MICROBIOLOGY OF THE SOIL AND THE ATMOSPHERE 772

ŗ

The Soil Environment 773 Enumeration and Isolation of Soil Microorganisms 773 Agar-Plate Culture Technique 775 Direct Microscopic Examination 775 Enrichment Culture Technique 775 Soil Microorganisms 776 Bacteria 777 Fungi 777 Algae 778 Protozoa and Viruses 778 The Rhizosphere 778 Interactions Among Soil Microorganisms 780 Mutualism 780 Commensalism 783 Antagonism 783 Competition 783 Parasitism 783 Predation 783

The Role of Microorganisms in Recycling 784 Biochemical Transformations of Nitrogen and Nitrogen Compounds 785 Nitrogen Fixation 786 Proteolysis 789 Amino Acid Degradation: Ammonification 789 Nitrification 790 Assimilatory Nitrate Reduction: Nitrate to Ammonia 790 Denitrification: Nitrate to Nitrogen Gas 790 Biochemical Transformations of Carbon Dioxide and Other Carbon Compounds 791 Carbon Dioxide Fixation 791 Cellulose Degradation 791 Biochemical Transformations of Sulfur and Sulfur Compounds 793 Biochemical Transformations of Other Elements and Their Compounds 794 Biodegradation of Herbicides and Pesticides 794 Microbiology of the Atmosphere 796 Techniques for Microbiological Sampling of Air 796 Origin of the Microorganisms of the Atmosphere 796 Kinds of Microorganisms Present in the Atmosphere 797

SUMMARY 799 KEY TERMS 799 REVIEW GUIDE 800 REVIEW QUESTIONS 805 DISCUSSION QUESTIONS 805

DISCOVER!

28.1 An Experimental Technique to Observe Interactions in the Rhizosphere 781

DISCOVER!

28.2 The Biocides: Biological Control of Insects 795

Distribution of Microorganisms in the Aquatic Environment 811 9 Freshwater Environments 811 Estuaries 814 Oceans 815 The Role of Aquatic Microorganisms 818 Food Chains and Food Webs in Aquatic **Environments 818** The Fertility of the Ocean 819 Drinking Water 820 Pollution 821 Water Purification 821 -Microorganisms As Indicators of Water Quality 822 Bacteriological Examination of Water for Potability 823 Nuisance Bacteria in Water Systems 825 Swimming Pools 825 Wastewater 827 Characteristics of Wastewater 828 Wastewater Treatment Processes 829 Economics of Wastewater Treatment 832 SUMMARY 833

MICROBIOLOGY OF FOOD 842

Significance of Microorganisms in Foods 843 Food As a Medium for Growth of Microorganisms 843

Microbiological Examination of Foods 843 Microscopic Techniques 844 Culture Techniques 845 Microorganisms in Fresh Foods 846 Meats 846 Poultry 846 Eggs 847 Fruits and Vegetables 847 Shellfish and Finfish 847 Milk 847 General Principles of Food Preservation 848 Aseptic Handling and Processing 848 High Temperatures 849 Low Temperatures 851 Dehydration 851 High Osmotic Pressure 851 Chemical Additives 852 Radiation 852 Microbial Spoilage of Foods 855 The Food Service Industry 855 Foods Produced by Microorganisms 858 Fermented Vegetables 859 Fermented Dairy Products 859 Microbial Cells As Food—Single-Cell Protein (SCP) 861

> SUMMARY 863 KEY TERMS 863 REVIEW GUIDE 864 REVIEW QUESTIONS 868 DISCUSSION QUESTIONS 868

DISCOVER!

30.1 Microwave Ovens 851 DISCOVER!

30.2 Preserving Food with Ionizing Irradiation 853

31

BIOTECHNOLOGY: THE INDUSTRIAL APPLICATIONS OF MICROBIOLOGY 869

Industrial Microbiological Products and Processes **870** Products of Microbial Dissimilation **871** Alcohol and Alcoholic Beverages 871 Vinegar 873 Lactic Acid 873 Other Products of Microbial Dissimilation 874 Products of Microbial Synthesis **874** Penicillin 875 Enzymes 877 Amino Acids 878

Other Products of Microbial Synthesis 879

Pharmaceuticals from Genetically Engineered Cells 879
Microbial Cells and Products for Immunization 882
Microorganisms for Insect Control 883
Microorganisms and the Recovery of Raw Materials 884
Microbiology and Mining 884
Petroleum Microbiology 885
Microbial Deterioration of Materials 887
Paper Products 887
Textiles and Cordage 888
Painted Surfaces 888
Bioremediation 889

SUMMARY 891 KEY TERMS 891 REVIEW GUIDE 892 REVIEW QUESTIONS 896 DISCUSSION QUESTIONS 896

DISCOVER!

31.1 Bacterial Production of Cellulose 883
DISCOVER!
31.2 A Microbial Solution to the Acid Rain Dilemma 885
DISCOVER!
