୍ରବ୍ୟର୍କ୍ତ ବ୍ୟର୍ବ ବ୍ୟର୍ବ Chapter 2: The Culture of Atlantis

After the fall of Atlantis and the ascension to Godhood of the hero Arkantos, the surviving Atlanteans find themselves adrift, without a home and without a god to watch over them. Their long devotion to Poseidon had resulted in a great betraval, and hardened them as a people.

When the Titans reemerged, it was only natural that the Atlanteans would seek to follow them, A Titan was, after all, the onemal king of Atlantis.

Thus a kinship was formed between the Atlanteans and the Titans; two groups of outcasts, united in desire to reclaim their former

Atlantean Playing Tips

- . Oracles-Oracles can neither fight nor gather resources, but are invaluable as short-range scouts. Place your Oracles at the fringes of towns and don't move them so that their line of sight increases and exposes your surroundings. Flashes of light indicate that their line of sight has improved
- . Farning Favor-Atlanteans gain favor by building Town Centers. The more Town Centers, the more favor. Atlanteans can also build Town Centers during the Archaic Age, earlier than other cultures
- . Heroes-Any Allantean human unit can become a hero, so there are benefits to making different types of heros. A hero Citizen builds and gathers faster, a hero Contarius is faster with greater attack and defense. Atlantean heroes are very strong against myth units.
- . Reusable God Powers-Some God Powers granted to the Atlanteans can be used again after recharging. Some are granted more readily than others, and the most powerful are rarely granted more than once.

Heroes

Heroes of the Atlantean culture are quite different from those of the Greek, Foyntian, and Norse cultures. There are no set hero characters, like the Greek heroes Odysseus and Bellerophon, and no set hero class, like the Egyptian Priests and the Norse Hersirs. Rather, any normal unit can become a hero at a cost of resources and total population.

To turn a normal human unit into a hero, simply click the button indicating hero and, if you have the resources, your unit will be empowered with a divine aura.

Hero units have slightly greater hit points, attack, and defence, but the greatest benefits come in the form of massive bonus damage. against myth units and the sheer number of them that you can potentially have.

Civilians

Citizen

Training Location Town Center

The Citizens of Atlantis are a hardy and capable group. They have great fortitude, and though they are not capable fighters, they will fight with enthusiasm in defense of their lands and homes. A pack mule accompanies each, and they need no drop points for gathered resources.

Oracle Training Location Temple

The Oracle is a non-labor, non-combat unit who is trained to have powerful inner vision that can be used to reveal sizable portions of the map. Place your initial Oracles at the fringes of town and don't move them so that their line of sight may increase and expose your surroundings. Flashes of light indicate that their line of sight has reached its maximum range.

Myth Units

Automaton The Automaton is a forged construct in the shape of a man. They are stronger and sturdler than any human soldler and, since they can repair and rebuild each other, are particularly dangerous in a group.
