# MINI MOTABILITY.

[www.mini.co.uk/motability](http://www.mini.co.uk/motability)

Official Fuel Economy Figures for the new MINI range (excluding the new MINI Electric and the MINI Countryman Plug-in Hybrid): Fuel consumption (combined): 34.4 – 52.3 mpg (8.2 – 5.4 l/100km). CO<sub>2</sub> emissions: 188 – 122 g/km. Figures shown are for comparability purposes; only compare fuel consumption and CO<sub>2</sub> figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles and vehicle load. The CO<sub>2</sub> figures shown have been determined according to the WLTP test. WLTP has been used as the applicable CO<sub>2</sub> figure from 1 April 2020 for first year vehicle tax (VED) and from 6 April 2020 for company car tax (BIK). The CO<sub>2</sub> figures were previously based on the NEDC equivalent.

The models shown on this brochure feature both standard and optional equipment. For more information, please contact your local MINI Centre. Subject to changes in design and equipment. Information valid for vehicles from July 2021 production.
