CCS INC.

http://www.ccs-grp.com/index.html

Perfil da Empresa:

CCS is the LED lighting manufacturer for the industrial automation (Machine Vision Lighting) We have subsidiaries in America, Belgium and Singapore. Also representative offices in China and Thailand.

Faturamento (milhões ienes): 5509

Número de Funcionários (Global) : 210

Produtos/tecnologia:

CCS is the LED lighting manufacturer with offering various types of lighting to meet any kinds of inspection of customers.Our LED lights are designed for various kinds of inspection (Machine Vision Inspection / Visual Inspection.)We are also offering testing units for the evaluation and also propose the optimized lights for the objects with offering the test reports.Also we offer any kinds of custom lighting to accommodate with customers environment.We would be grateful if we could have a chance to talk with engineers.

Procura:

□ Clientes - OEM & auto-parts maker

Presença no Brasil - Future

CHUO HATSUMEI INSTITUTE CO., LTD.

http://www.chuhatsu.co.jp/

Perfil da Empresa:

The technique that infuses a resin (impregnant) to fill the invisible porosity that occurs in the casting process using a special system (impregnation system).

Faturamento (milhões ienes):1300

Número de Funcionários (Global): 48

Produtos/tecnologia:

The technique that infuses a resin (impregnant) to fill the invisible porosity that occurs in the casting process using a special system (impregnation system).

Because porosity is unavoidable in the casting process, frankly speaking, some defective products are bound to result. The probability of product rejection due to porosity depends on the particular product, but can reach as high as 20 to 50%.

By impregnation technology, products that would otherwise be rejected can be made usable, so this technology can be indispensable for life-supporting parts and on parts that must endure high pressure.

Procura:

□ Clientes - OEM & auto-parts maker

Presença no Brasil - Future

DAICEL CORPORATION

http://www.daicel.com/en/

Perfil da Empresa:

We are involved in a variety of industries derived from celluloid, including our core technologies of cellulose chemistry, organic chemistry, polymer chemistry, and pyrotechnic engineering. Faturamento (milhões ienes): 443775

Número de Funcionários (Global): 10173

Produtos/tecnologia:

Daicel is producing pyrotechnic products, such as, various airbag inflators, micro gas generator (MGG) for seatbelt pre-tensioner, initiator, and power disconnect device. It also produces various engineering plastics as well as auto parts using the plastics.

Procura:

Clientes

Companies which produces air bag module and seat belt pre-tensioner.

Companies which needs power disconnect device.

Presença no Brasil - Future

DAIFUKU CO., LTD.

http://www.daifuku.co.jp

Perfil da Empresa:

Total Material handling system integrator

Faturamento (milhões ienes):267284

Número de Funcionários (Global): 7746

Produtos/tecnologia:

Material Handling system for Automotive production & Distribution automation system & logistics automation system, Over head and floor type Monorail system, Skillet system, AS/RS, transfer system for paint shop, Automation equipment for General assembly system and other material handling system

Daifuku Group's products have continued to support automakers around the world for nearly 100 years.

Daifuku's automated systems are used throughout the manufacturing process. Our equipment is used in pressing, welding, painting, assembly, parts storage and supply, and engine testing. Daifuku responds quickly to the unique needs of our customers. Some of our accomplishments in the automotive industry include the simultaneous production of different models, increased production efficiency, improved quality, and improved factory conditions for a quieter and cleaner employee environment.

Procura:

□ Clientes: OEM & auto-parts maker

FUJIKURA LTD.

http://www.fujikura.co.jp/eng/index.html

Perfil da Empresa:

Fujikura has subsidiaries in Brazil and Paraguay to produce Wire Harness and to provide engineering service to Car Manufacturer locally. We can provide not only Wire Harness but also can provide Electronics Unit for Automobile. Fujikura has already had wide experience in Brazil.

Faturamento (milhões ienes):661510

Número de Funcionários (Global): 54452

Produtos/tecnologia:

Electrical component for Automobile (Wire Harness)

Fujikura established a 1st plant in Paraguay in May, 2011, and started to export products wireharness to Brazilian Clients from December, 2011.

Fujikura is producing all types of wire-harness (based on the customer's requirements) to OEM clients and Tier1 clients in Brazil, with the good quality and price competitiveness.

Moreover, Fujikura has a customer service center in Sao Paulo to support quality control of the harnesses & R&D engineering team to generate product designs.

Fujikura has already exported 8.2 million units of wire-harnesses to clients in Brazil, without any logistics problems.

FURUKAWA SISTEMAS AUTOMOTIVOS DO BRASIL LTDA.

http://www.furukawaas.co.jp/english/index.html

Perfil da Empresa: automotive parts

Faturamento (milhões ienes):867817

Número de Funcionários (Global): 46134

Produtos/tecnologia:

1. Steering Roll Connectors (SRC)

Through use of our flat harness technology, this component produces a signal that triggers deployment of the air bag. Furukawa Electric holds the top spot in market share for this product.

2.Wire Harnesses

Automotive electric connection systems are becoming increasingly larger and more complex. In line with this trend, we are constantly focused on thin, light weight, productive solutions that are friendly to the environment.

3.Battery State Sensor (BSS)

Our company and FAS, FETI has developed the automobile lead battery simulation model. Based on knowledge acquired in the process of developing the BSS algorithm, which was jointly developed by our company and FETI, typical of electrolytic lead batteries, the stratification phenomenon and the polarization relaxation after charging and discharging are reproducible with this simulation model.

HORKOS CORP

http://www.horkos.co.jp/english/

Perfil da Empresa:

Manufacturing and sales of Machine tools for automobile manufacturing industry

Faturamento (milhões ienes):21100

Número de Funcionários (Global): 723

Produtos/tecnologia:

Product: Product: Machining center, Special purpose machine

PR point: Our product lineup are specialized for automobile manufacturing industry, and realize high efficiency, energy saving with MQL technology. The Monolithic structure of a combined bed and the first column provides High Rigidity and adds a low center of gravity to the whole machine. The movable second column is constructed of ductile cast iron for weight reduction. Downsizing and weight reduction of movable the Y-axis provides energy savings and allows for faster acceleration/deceleration which in turn increases productivity.

Presença no Brasil -nil

KANEMATSU AMÉRICA DO SUL IMPORTAÇÃO E EXPORTAÇÃO LTDA.

http://www.kanematsu.co.jp/en/index.html

Perfil da Empresa:

Trading in various kinds of commercial products, production of traded goods, investment in businesses, provision of related services

Faturamento (milhões ienes):1117096

Número de Funcionários (Global): 6002

Produtos/tecnologia:

1. Supplier Name : Nagakura Mfg. Co., Ltd.

Product name : Pricision Forged gear

Product Outline : Thanks to the cold forging technology and Low Cost Coutry's

machining/griding process, Nagakura's Transmission gear has strong price competitiveness and good quality. Nagakura has the machining factory in Vietnam and Mexico. Acutally, Nagakura is supplying Automatic Trasmission parts to ZF, GM, Chrysler group and will supply to Ford in future.

2. Supplier Name : Kuraray

Product Outline : Activated Carbon for Automobile canister

Technology Summary : Activated carbon in canister plays a role in release of air pressure in fuel pathway and prevention of gas emission by absorbing and desorbing evaporative gasoline. 3. Supplier Name : NANJO Auto Interior Co.,Ltd

Product Name: Door Trims

Product outline : 3D stitch technology developed with sewing machine manufacturers and to realize the 3D sewing machine head, which was developed jointly. Workmanship is very beautiful, there is a sense of quality. The height of the quality of artificial leather with PVC resin, very cheap when compared to leather. The combination of low pressure injection + press molding that own NPM (Nanjo Press Molding), a PVC resin and decoration film, it can be integrally molded with the base of the base material. In order to be able to complete what you do in a normal two steps in one step, man-hour is large

The reduction can be, it is possible in cost saving. Nanjo has Mexican plant in Mexico and 2nd Mexican plant will be opened in 2018.

Presença no Brasil - Yes (office)

KBK DO BRASIL COMÉRCIO DE MÁQUINAS LTDA.

http://kbk-brasil.com.br/

Perfil da Empresa:

Sales for Equipment and Machine Parts. In particular, we sell vacuum equipment and hydraulic products in Brazil.

Faturamento (milhões ienes):49009

Número de Funcionários (Global): 367

Produtos/tecnologia:

Our Brazil office imports Hydraulic components(Yuken Kogyo), Vacuum heat treatment machine (ULVAC), and Clamps (pascal) from Japan, and we have secured inventory and maintenance factory, the service system to local.

1. Yuken Kogyo: Hydraulic components

Yuken Kogyo manufactures high quality and cost competitive hydaulic components ideal for tool machine and plastic injection machine. The line up of products varies widely such as Hydraulic Pumps, hydraulic motors, proportional electro-hydraulic controls, pressure control valves, flow control valves, directional control valves modular valves, logic valves, linear servo valves, AC servo motor driven pumps. 2. ULVAC: Vacuume heat treatment

ULVAC's vacuume heat treatment machine for spluttering is grobally knowed as its high quality. The state-of-the-art tecnology of ULVAC is ideal for production of mirrors, emblem, small size lamps and other interior parts

For more detail, please see the website:

https://www.ulvac.co.jp/products_e/

3. Pascal: Clamps

Pascal is the specialist of clamp system. Pascal provides a various of clamping system products such as Pascal die clamp, Pascal working clamp, Pascal hydraulic clamp, Pascal magnetic clamp, Pascal Air(pneumatic) clamp, Pascal machine tool system, Pascal pallet clamp, Pascal Press mahine system, Pascal Die clamp, Pascal Traveling clamp, Pascal hydraulic control equipment. Its products is used in various industrial sector, and in automotive sector, major assembley makers and parts makers are our customers.

NITTO DENKO CORPORATION

http://www.nitto.com/jp/en/

Perfil da Empresa:

Adhesive technologies and core technologies such as coating technology based on the sheet and film-like and added various features and optical films for liquid crystal displays,

automotive parts, seawater desalination membrane and transdermal absorption-type tape formulation, creating products in a wide range of areas globally.

Faturamento (milhões ienes):825243

Número de Funcionários (Global): 27214

Produtos/tecnologia:

1. High functionality material for automotive that can reduce vibration &

noise and can enhance comfort

2. Double coated adhesive tape and foam for waterproofing

3. Converting products with combination of different kinds of materials

Nitto has a rich lineup of products providing automobiles and other various transport machines with an abundance of useful materials. We currently have sales offices established in more than 26 countries around the world.

We are working hard to provide new types of added value to meet the recent needs of various fields, especially the automobile field, through technologies such as automotive lightening that aim to further increase fuel efficiency in the future, the evolution of power modules for environmental vehicles and electrical equipment developed in pursuit of safety and amenity.
