Background Music and Paging Systems

ATLASIED, TASCAM AND CLOCKAUDIO AUDIO SOLUTIONS

SPRING 2021

Background Music and Paging Systems

The hospitality world today is driven by audio/video media. Its effect has become the heartbeat of a company's brand - the energy, flow, and atmosphere.

Successful restaurants and retailers are leveraging music as a medium to create an experience that attracts and retains customers while also improving employee satisfaction.

Customers expect clear sound to hear announcements or enjoying background music so the system must automatically compensate for ambient noise and a variety of source audio levels.

# AtlasIED/Tascam/Clockaudio Background Music and Paging Solution

AtlasIED Atmosphere's 4 and 8 zone audio processors offer powerful DSP combined with plug-n-play Wall Plate accessories for additional audio inputs, zone control and sensors for ambient noise level (ANS). Features such as a built-in message player, auto-gain, GPIO, and ANS sensing. Strategy III Series speakers are the most innovative and easily installable in-ceiling speakers for the professional audio markets.

Tascam professional media players provide the most versatile audio content playback options. The CD-400U includes CD, Bluetooth wireless, SD, USB, and AM/FM tuner capability for playback of quality audio. Recording from the CD or AM/FM source to SD or USB media is possible.

Clockaudio, a global leader in pro-AV microphone technologies feature UHF Personal Wideband True Diversity wireless systems with both handheld and lavalier microphone options.

This Background Music and Paging System is designed to provide ultimate versatility in music content, announcements and presentation flexibility coupled with high quality audio distribution. Audio sources and zone levels may be managed at any location using wall controllers or mobile devices.
