Contents

vii

ACKNOWLEDGMENTS	xvii
CHAPTER 1 Introduction	1
The recording studio	4
The control room	7
The changing faces of the music studio business	9
The project studio	10
The portable studio	11
Studio in the palm of your hand	12
Knowledge is power!	12
Whatever works for you	13
Making the project studio pay for itself	14
Live/on-location recording: a different animal	14
Audio for video and film	17
Multimedia	17
The people who make it all happen	18
The artist	19
Studio musicians and arrangers	19
The producer	19
The engineer	20
Assistant engineer	20
Maintenance engineer	21
Mastering engineer	21
The DJ	21
The VJ	22
Studio management	22
Music law	22
Women and minorities in the industry	23
Behind the scenes	23
Career development	24
The recording process	26
Preparation	26
Recording	27
Overdubbing	31
Mixdown	32
Mastering	34
Song sequence editing	35
Product manufacturing	36
Marketing and sales	36
The transducer	37
CHAPTER 2 Sound and hearing	41
The basics of sound	41
Waveform characteristics	42

Amplitude	43
Frequency	45
Velocity	46
Wavelength.....	46
Phase	48
Harmonic content.....	52
Envelope	56
Loudness levels: the decibel	57
Logarithmic basics	58
The decibel	59
The simple heart of the matter	61
The ear	61
Threshold of hearing	62
Threshold of feeling.....	63
Threshold of pain	63
Taking care of your hearing	63
Psychoacoustics	64
Auditory perception	64
Beats.....	65
Combination tones.....	66
Masking	66
Perception of direction	67
Perception of space	69
Direct sound.....	70
Early reflections	70
Reverberation	70
Doubling	71
CHAPTER 3 Studio acoustics and design.....	73
Studio types	74
The professional recording studio	74
The audio-for-visual production environment	75
The project studio.....	76
The portable studio	78
Primary factors governing studio and control room acoustics	79
Acoustic isolation	80
Symmetry in control room design.....	92
Frequency balance.....	97
Room reflections and acoustic reverberation	107
CHAPTER 4 Microphones: design and application	111
The microphone: an introduction	111
Microphone design	112
The dynamic microphone.....	112
The ribbon microphone.....	113
The condenser microphone.....	115
Microphone characteristics	119
Directional response	119
Frequency response	123
Transient response.....	125
Output characteristics.....	125
Microphone preamps	130

Microphone techniques	132
Pickup characteristics as a function of working distance	132
Stereo miking techniques	142
Surround miking techniques	145
Microphone placement techniques	148
Brass instruments	150
Guitar	152
Keyboard instruments	155
Percussion	158
Stringed instruments	166
Voice	168
Woodwind instruments	169
Microphone selection	171
Shure SM57	171
AKG D112	172
Beyerdynamic M160	172
Royer labs R-121	174
Neumann KM 180 Series	175
AKG C3000B	176
MXL V67i	177
Telefunken M216 stereo mic	179
CHAPTER 5 The analog tape recorder	181
To 2-inch or not to 2-inch?	181
Magnetic recording and its media	182
The professional analog ATR	184
The tape transport	184
The magnetic tape head	187
Equalization	189
Bias current	189
Monitoring modes	190
To punch or not to punch	192
Tape, tape speed and head configurations	193
Print-through	194
Cleanliness	195
Degaussing	196
Backup and archive strategies	196
Backing up your project	196
Archive strategies	197
CHAPTER 6 Digital audio technology	199
The language of digital	199
Digital basics	200
Sampling	201
Quantization	203
The devil's in the details	205
Fixed- vs. floating-point processing	209
The digital recording/reproduction process	209
The recording process	209
The playback process	211
Sound file sample rates	212
Sound file bit rates	213

Regarding digital audio levels	214
Digital audio transmission	214
Signal distribution.....	220
What is jitter?.....	221
Wordclock	222
Digital audio recording systems	224
Samplers	225
Hard-disk recording	226
Hard-disk multitrack recorders	227
Portable studios	227
Flash memory handhelds.....	227
Older technologies.....	229
CHAPTER 7 The digital audio workstation	235
Integration now ... integration forever!.....	235
DAW Hardware	238
The desktop computer	240
The laptop computer	241
Accessories and accessorize	244
System interconnectivity	244
USB.....	245
FireWire.....	246
Networking	247
The audio interface	249
Audio driver protocols	251
Latency	252
DAW controllers.....	252
Sound file formats.....	255
Format interchange and compatibility	256
Sound file sample and bit rates	257
DAW Software	257
Sound file recording, editing, region definition and placement.....	259
MIDI sequencing and scoring	267
Real-time, on-screen mixing	269
Mixdown and effects automation	279
Power to the processor ... Uhhh, people!	282
Get a computer that's powerful enough.....	282
Make sure you have enough memory	282
Keep your production media separate	283
Update your drivers!	283
Going dual monitor.....	284
Keeping your computer quiet.....	284
Backup and archive strategies.....	285
Session documentation	287
In closing.....	289
CHAPTER 8 Groove tools and techniques	291
The Basics	291
Time and pitch change techniques.....	292
Warping	292
Beat slicing	293

Looping your DAW	293
Loop-based audio software	295
Reason	299
ReWire	302
Groove and loop hardware	303
Groove and loop plug-ins	303
Drum and drum loop plug-ins	305
Pulling loops into a DAW session	305
DJ Software	306
Obtaining loop files from the great digital wellspring	307
CHAPTER 9 MIDI and electronic music technology	309
MIDI production environments	310
What is MIDI?	312
What MIDI isn't	313
System interconnections	314
The MIDI cable	315
MIDI phantom power	316
Wireless MIDI	317
MIDI Jacks	318
MIDI Echo	319
Typical configurations	319
The daisy chain	319
The multiport network	321
Exploring the spec	322
The MIDI message	323
MIDI channels	324
MIDI modes	326
Channel voice messages	327
Explanation of controller ID parameters	330
System messages	331
System-exclusive messages	335
MIDI and the personal computer	337
Connecting to the peripheral world	338
The MIDI interface	338
Electronic instruments	339
Inside the toys	340
Instrument plug-ins	341
Keyboards	342
Sample CDs, DVDs and the Web	346
The MIDI keyboard controller	347
Percussion	349
Sequencing	352
Integrated workstation sequencers	353
Software sequencers	353
Basic introduction to sequencing	354
Recording	354
Setting the session tempo	355
Changing tempo	356
Click track	356

- Multiple track recording 357
- Punching in and out 357
- Step time entry 358
- Saving your MIDI files 359
- Editing 359
 - Practical editing techniques 361
 - Editing controller values 362
- Playback 363
- Transferring MIDI to audio tracks 364
- Mixing a sequence 365
- Music printing programs 365
- CHAPTER 10** Multimedia and the web 369
 - The multimedia environment 369
 - Delivery media 371
 - The CD 371
 - The DVD 371
 - The web 373
 - Delivery formats 374
 - Digital audio 374
 - Uncompressed soundfile formats 375
 - Compressed codec soundfile formats 375
 - Perceptual coding 375
 - MP3 377
 - MP4 378
 - WMA 378
 - AAC 379
 - RealAudio 379
 - FLAC 380
 - Tagged metadata 380
 - MIDI 381
 - Standard MIDI files 382
 - General MIDI 382
 - Graphics 383
 - Desktop video 386
 - Multimedia and the web in the “need for speed” era 387
 - Thoughts on being (and getting heard) in cyberspace 388
 - Uploading to stardom! 388
 - Copyright protection: wanna get paid? 390
 - Secure digital music initiative 390
 - Internet radio 391
 - The virtual E-dub 391
 - On a final note 391
- CHAPTER 11** Synchronization 393
 - Synchronization between media transports 393
 - Timecode 394
 - Synchronization using SMPTE timecode 401
 - MIDI-based synchronization 404
 - Video’s need for a stable timing reference 407
 - Digital audio’s need for a stable timing reference 408

Real-world sync applications for using timecode and MIDI timecode	408
Master/slave relationship	409
Audio recorders	409
VCRs	410
Software applications	410
Digital audio workstations	410
DAW support for video and picture sync	411
Routing timecode to and from your computer	411
Keeping out of trouble	413
CHAPTER 12 Amplifiers	415
Amplification	415
The operational amplifier	418
Summing amplifiers	419
Distribution amplifiers	419
Power amplifiers	420
Voltage- and digitally controlled amplifiers	421
CHAPTER 13 The art and technology of mixing	423
The recording process	424
Recording	425
Overdubbing	428
Mixdown	429
Understanding the underlying concept of “the mixing surface”	429
Channel input	432
Auxiliary send section	435
Equalization	438
Dynamics section	440
Monitor section	440
Channel fader	443
Output section	444
Channel assignment	446
Grouping	448
Monitor level section	449
Patch bay	449
Metering	451
Power- and ground-related Issues	455
Balanced power	456
Power conditioning	457
Digital console and daw virtual mixer technology	457
Mixdown level and effects automation	460
Write mode	461
Read mode	463
Drawn (rubberband) automation	463
Mixing and balancing basics	463
Need more inputs?	466
A final footnote on the art of mixing	467
CHAPTER 14 Signal processing	469
The wonderful world of analog, digital or whatever	469
Plug-ins	471
Plug-in control and automation	471

Signal paths in effects processing.....	472
Inline routing.....	472
Parallel routing.....	475
Effect processing.....	475
Hardware and virtual effects in action.....	476
Peaking filters.....	478
Shelving filters.....	480
High-pass and low-pass filters.....	480
Equalizer types.....	481
Applying equalization.....	483
EQ in action!.....	484
Dynamic range.....	487
Metering.....	487
Dynamic range processors.....	491
Compression.....	492
Multiband compression.....	498
Limiting.....	498
Expansion.....	500
The noise gate.....	501
Time-based effects.....	503
Delay.....	503
Reverb.....	506
Psychoacoustic enhancement.....	508
Pitch shifting.....	509
Time and pitch changes.....	509
Multiple-effects devices.....	511
Dynamic effects automation and editing.....	512
CHAPTER 15 Noise reduction.....	513
Analog noise reduction.....	513
The compansion process.....	515
Single-ended noise-reduction process.....	516
The noise gate.....	517
Digital noise reduction.....	518
Fast Fourier transform.....	518
Restoration.....	522
CHAPTER 16 Monitoring.....	523
Speaker and room considerations.....	523
Speaker design.....	525
Crossover networks.....	526
Actively powered vs. passive speaker design.....	526
Speaker polarity.....	529
Monitoring.....	530
Monitor volume.....	531
The big bad bottom end.....	532
Monitoring configurations.....	533
Mono.....	534
Stereo.....	534
Stereo + sub.....	535
Quad.....	535

Surround minus an LFE	535
Surround with an LFE	536
Theater plus an LFE	537
Monitor level control	537
Spectral reference	538
Monitor speaker types	538
Farfield monitoring	538
Nearfield monitoring	539
Small speakers	541
Headphones	541
Your car	543
Monitoring in the studio	543
Headphones in the studio	543
Speakers in the studio	544
CHAPTER 17 Surround sound	545
Surround sound: past to the present	546
Stereo comes to television	547
Theaters hit home	547
Surround in the not-too-distant future	547
Monitoring in 5.1 surround	548
5.1 speaker placement	549
Practical placement	550
Active/passive monitors in surround	551
Surround interfacing	552
Surround final mastering and delivery formats	553
Dolby digital (AC3)	553
Dolby pro logic	555
SRS	557
WMA	557
MP4	557
Up-mix to 5.1	559
Mixing in surround	559
Surround mixers	559
Reissuing back catalog material	561
CHAPTER 18 Mastering	563
The mastering process	563
To master or not to master—was that the question?	565
“Pre”paration	566
Mastering the details of a project	567
Sequencing: the natural order of things	567
Relative volumes	568
EQ	569
Dynamics	569
Multiband dynamic processing	571
File resolution	572
Dither	572
The digital audio editor in the mastering process	572
On a final note	573

CHAPTER 19 Product manufacture	575
Choosing the right facility and manufacturer	575
CD manufacturing	577
The process	578
CD burning software	579
CD-R/RW media	584
Burning speeds	586
Rolling your own	586
CD labeling	588
CD and DVD handling and care	588
DVD and blu-ray burning	589
Vinyl disc manufacture	590
Disc cutting	591
Recording discs	594
The mastering process	595
Vinyl disc plating and pressing	595
Producing for the Web	596
CHAPTER 20 Studio tips and tricks	597
Preparation and the details	597
What's a producer and when do you need one?	598
Do you need a music lawyer?	599
Long before going into the studio	600
Before going into the studio	601
Setting up	603
Session documentation	603
Recording	604
Mixdown	605
Backup and archive strategies	606
Household tips	607
Musicians' tools	608
Record your own concerts and practices	609
Protect your investment	610
Protect your hardware	610
Update your software	611
A word on professionalism	611
In conclusion	612
CHAPTER 21 Yesterday, today and tomorrow	613
Yesterday	613
Today	618
1's and 0's	619
The WWW	619
Tomorrow	620
Happy trails	621
APPENDIX A Continuing education	623
APPENDIX B Tax tips for musicians	625
INDEX	633

Acknowledgments

xvii

I'd like to thank my partner, Daniel Eric Butler, for putting up with the general rantin', ravin', and all 'round craziness that goes into writing a never-ending book project. I'd also like to express my thanks to my music collaborators ... especially those with EMC (www.electronicmusiccollective.com—Marcell, Henta, Laz, Diem, Greg, Doc & Tony) for helping me to reach new heights on the performance stage. Same goes for my best buddies: Steve "Stevo" L. Royea, Phil & Vivian Williams, Rick Mankowski and the folks at Easy Street Records in West Seattle (www.easystreetonline.com). Last but not least ... lots of love goes to my family in the U.S. and to Thomas and Maria in Austria.

A very special mention goes to my production editor and good buddy, Terri Jadick, for "truly" being the best editor I've had the pleasure of working with ... and for being an understanding friend that shows no remorse in supporting a lifelong vice—Chocolism!

I'd also like to thank my production editor Catharine Steers and Paul Gottehrer for their amazing patience and understanding in laying out this book.

Thank you all!

The Authors

xviii

David Miles Huber is a producer and musician in the electronic, dance and downtempo genres, whose CDs have sold over the million mark. The chilled foundation of DMH's music is energized and balanced out by lush, downtempo beats and live acoustic instruments that can be performed in stereo or surround sound. His latest music and collaborations can be heard on www.51bpm.com and www.MySpace/51bpm.

DMH received his degree in music technology from Indiana University (I.M.P.) and was the first American to be admitted into the prestigious Tonmeister program at the University of Surrey in Guildford, Surrey, England. As well as being a member of NARAS (www.grammy.com) and the NARAS Producers and Engineers Wing (P&E Wing), he has authored numerous books and contributed to various magazines and websites on the subjects of recording and electronic music.

Robert E. Runstein has been associate with all aspects of the recording industry, working as a performer, sound mixer, electronics technician, A&R specialist, and record producer. He has served as chief engineer and technical director of a recording studio and has taught several courses in modern recording techniques. He is a member of the Audio Engineering Society.
