# Building A Tradition Of Excellence Since 1868

Betts Spring Company was founded in 1868, in San Francisco. Through the pioneer days of the Old West, through the Great Earthquake of 1906, through two World Wars, and into the new millennium, Betts Spring has been owned and operated by six generations of the same American family. We have long been known for truck parts that improve vehicle safety and long-term performance. Innovative products, state-of-the-art manufacturing, and service to our customers has been a Betts trademark, now spanning three centuries.

We have always managed our business for long-term results... and long-term relationships with our customers. Our employees have always been key in achieving this goal, by realizing that our success is based on our customers' success. Through training and progressive management, Betts empowers its team to provide outstanding products and service to our many business partners.

Betts Mud Flap Hangers exemplify this commitment. Each hanger is designed, manufactured and finished for unsurpassed performance and enhanced vehicle appearance. Betts is demanding about every detail... because rig operators are demanding about what goes on their trucks.

If you have questions about any of the Mud Flap Hangers or accessories in this catalog, please call us. We'll be happy to assist you.

## Our Vision

*To be recognized as the world's leading manufacturer of suspension components, heavy duty truck parts, and accessories, that serves a diverse and wide range of customers.*

## Our Mission

*The fundamental purpose of Betts Spring Company is to exceed our customers expectations with quality, responsiveness, innovation, value, and to provide cost effective products and services.*

*We will pursue excellence in all that we do; in the value and safety of our products, our support services, our customer and associate relations, our competitiveness, and our profitability.*

*Exceeding our customers expectations is paramount and is the cornerstone of our success.*

## LIMITED WARRANTY

Betts Products are guaranteed for a period of one year from date of shipment against defects in materials or workmanship, provided these defects were not caused by improper application, abuse, accident, or improper installation. While Betts uses appropriate materials, finishes, and manufacturing processes for the transportation industry, flap hangers and related components are known to serve in an abusive environment. Tangling with other truck components, abuse, vibration from rough roads, and impacts from debris are all likely during the lifetime of the products.

Defects arising from repairs made or attempted by parties other than the manufacturer are excluded from this warranty. Painted or powder coated parts are not guaranteed for cosmetic appearance or corrosion resistance. The cosmetic appearance of Bright Stainless Steel components are only guaranteed until time of installation. Service conditions can cause a decline in appearance. Maintenance and care are required to maintain the like-new condition.

Never attempt to repair a damaged flap hanger. Straightening can leave hidden cracks, which could eventually result in failure. Always follow the installation instructions provided.

If the Buyer discovers a defect, he must report the defect in writing to Betts within thirty(30) days after discovery and on or before thirty(30) days after the expiration of the warranty period. If Betts finds uninstalled equipment to be defective, we will replace or repair it at no charge and bear the cost of transportation for the defective goods. Betts will not bear transportation costs for goods found defective in service. Except as provided in this warranty, Betts shall not be liable for labor, transportation, or any other expense required to repair or replace defective goods. Also excluded are any claims arising from loss of use, consequential damages, arising out of or caused by a defect of any goods sold to the Buyer, nor for any loss resulting from loss of use or resale. No other warranty is expressed or implied in any way, it being the intent of the parties to specifically disclaim the warranty of merchantability and the warranty of fitness.

At its own discretion, Betts reserves the right to alter or change specifications of its product, to make product improvements or changes as required by market conditions, without any special notice. Betts makes no warranty as to fitness for use or merchantability in event of these changes.

# Standard

## .640 BAR TYPE MUD FLAP HANGERS

### Straight Bar

These .640 square spring steel hangers, standard equipment on many new trucks, are the workhorse of the industry. Betts hangers are shot peened and painted to ensure long life. Hangers and mounting brackets are interchangeable to suit your application.

*Kits include (2) B711 mounting brackets (unless otherwise specified), (2) mud flap hangers, adjustable flap clips, (2) cotter pins, and mounting hardware for flap and bracket.*

#### A23

##### Flap Mounting Kit

Contains nuts, bolts and washers to mount one mud flap. Sold only in lots of 50 kits.

**RT25**  
**RT35**

### Conspicuity Strips

For mud flap hangers without Conspicuity tape, Betts offers these light weight, aluminum, reflective Conspicuity Strips which meet the FMVS standard for retroreflective material. These conspicuity strips are designed to fit most popular straight or angled down mud flap hangers. **The RT25 and RT35 are sold in pairs.**

## Offset

These .640 square spring steel hangers are designed to fit trucks with short frames and allow flexibility to position the flap where desired. Betts hangers are shot peened and painted to ensure long life.

*Kits include (2) B711 mounting brackets (unless otherwise specified), (2) mud flap hangers, adjustable flap clips, (2) cotter pins, and mounting hardware for flap and bracket.*

# Heavy Duty

## .750 BAR TYPE MUD FLAP HANGERS

### Straight Bar

These .750 square spring steel hangers are among the strongest and most durable flap hangers on the market, designed to meet the heavy load of anti-spray flaps. Betts hangers are shot peened and painted to ensure long life. Hangers and mounting brackets are interchangeable to suit most applications.

*Kits include (2) B700 mounting brackets (unless otherwise specified), (2) mud flap hangers, adjustable flap clips, (2) cotter pins, and mounting hardware for flap and bracket.*

#### A21 .750" round steel, bolts to frame

#### A82

#### A83

### Conspicuity Strips

For mud flap hangers without Conspicuity tape, Betts offers these light weight, aluminum, reflective Conspicuity Strips which meet the FMVS standard for retroreflective material. These conspicuity strips are designed to fit most popular straight or angled down mud flap hangers.

The RT25 and RT35 are sold in pairs.

### B516

#### Flap Mounting Kit

Contains nuts, bolts and washers to mount one mud flap. Sold only in lots of 50 kits.

### Angled Down

These .750 square spring steel hangers provide maximum durability, accommodate close trailer hookups and prevent damage due to tangling with landing gear. They are highly recommended for dollies. The special end-clip design on our B87 and B88 hangers helps prevent tear-outs and supports the entire flap.

*Kits include (2) B700 mounting brackets (unless otherwise specified), (2) mud flap hangers, adjustable flap clips, (2) cotter pins, and mounting hardware for flap and bracket.*

#### A81

### Betts is Safety Focused

Betts Spring Company believes that the safety of our customers comes first. Carefully read all safety and installation instructions enclosed with your Betts products before installation. For additional information, please contact us toll free at

**(800) 227-2192.**

## Offset

These .750 square spring steel hangers provide maximum durability and are designed to fit trucks with short frames. They allow flexibility to position the flap where desired. Betts hangers are shot peened and painted to ensure long life.

*Kits include (2) B700 mounting brackets (unless otherwise specified), (2) mud flap hangers, adjustable flap clips, (2) cotter pins, and mounting hardware for flap and bracket.*

\* B91 kits also includes conspicuity required strips. The B91 is designed as a "mid-mount". It holds the flap in the middle to give additional landing gear clearance. Rigid plastic flaps (not included) are recommended with the B91.

*Betts strongly recommends the use of cotter pins with all bar-type hangers. Please note that cotter pins are only included in the kits.*

## Heavy Duty Mounting Brackets

Betts one-piece, cast steel, heavy duty mounting brackets provide **greater strength and longer life** than metal-stamped brackets. The brackets below are designed to fit all Betts heavy duty mud flap hangers. Mounting brackets reflect the same high quality finish as Betts hangers and are painted black to match hangers.

*Kit includes 2 brackets and mounting hardware.*

# End Costly Downtime, Expense & Tickets For Mud Flap Damage

## The Betts DirectFlex® System Delivers Improved Performance and Durability You Can Count On

Imagine a product that would nearly eliminate the problems of lost or torn mud flaps or destroyed hangers from curb pinches. Gone are the expensive tickets for operating without mud flaps, and say goodbye to costly downtime for repairs. The NEW Betts DirectFlex® System sets a new industry standard for durability, directional flexibility, and value. The System is composed of two uniquely designed and manufactured components; the Betts DirectFlex® spring steel mud flap hanger and the ingeniously designed Betts ChannelFlap™. These two Betts innovations have come together into one smart system for today's diverse trucking industry. The patented system has been ingeniously engineered to be light weight, more durable, and offers a greater value than any other spray suppression systems on the market today.

### Betts DirectFlex® System

#### DF25 and DF35

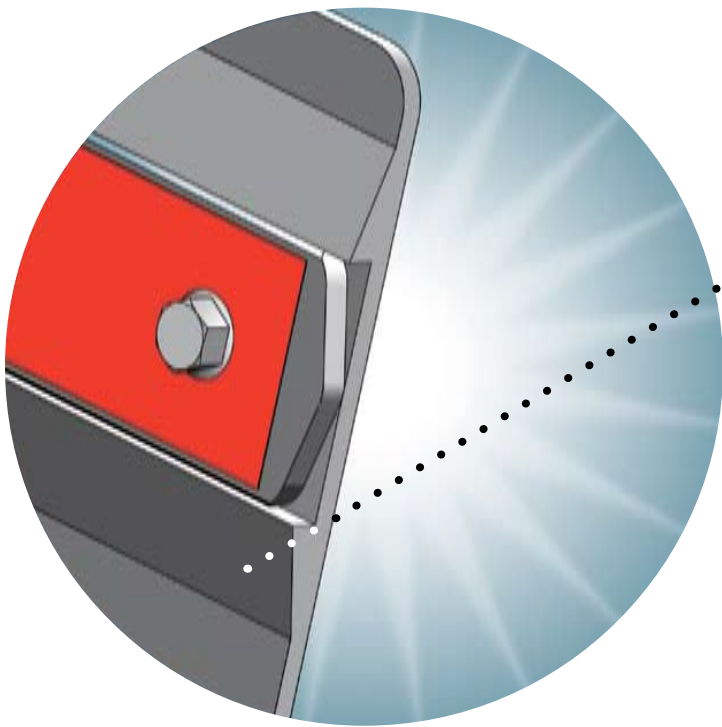

- System far exceeds industry standards for durability and strength thus greatly reducing the need for flap and hanger replacements.
- Revolutionary, patented concept in splash guard protection. Another Betts innovation that saves you costly down time.
- Constructed of high quality, non-welded, alloy spring steel – built tough to last.
- Arm pre-fastened to mounting bracket with strong vibration resistant Huck® fasteners – giving you one of the strongest hanger connections on the road.
- Available in weather resistant powder coated or galvanized finish to ensure maximum corrosion protection and longer life.
- Every DirectFlex® hanger is shot peened for increased durability and life span.
- Integrated conspicuity (meets FMVS standards) saving you the expense and hassle of having to add additional conspicuity strips.
- Easily retrofit to existing frame bracket hole pattern – making for an easy installation, without additional frame drilling.
- Available in straight and angled versions – offering the perfect solution to your turning clearance needs.
- ChannelFlap™ mounting hardware creates a strong compression fit to hanger – increasing the strength of the connection by more than 300%.
- Innovative reinforced channel design in light weight / heavy duty poly ChannelFlap™ which will provide maximum strength you can count on.
- Custom Logo imprints available on the ChannelFlap™ – allowing you an opportunity to advertise your company name and logo.

**US PATENT # 6,827,372**

# Straight Arm

How to use the tables below

Use the following steps to determine the correct DirectFlex® Part Number:

- 1 Select the style of hanger.
- 2 Measure and select the mounting hole center to center dimension (column A).
- 3 Determine the bolt hole orientation: Horizontal or Vertical.
- 4 Select the overall length desired (column B).
- 5 Select kit part number.

Use the following steps to determine the correct ChannelFlap™ Part Number:

- 1 Select mud flap top to bottom dimension.
- 2 Find ChannelFlap™ part number.

▲ Special Order; call for availability.

Kits include (2) mud flap hangers pre-assembled to mounting brackets using Huck® Fasteners and mounting hardware for flap and bracket as well as integrated conspicuity.

### How to use the tables below

#### Use the following steps to determine the correct Part Number:

- 1 Select the style of hanger.
- 2 Measure and select the mounting hole center to center dimension (column A).
- 3 Select the overall length desired (column B).
- 4 Choose between black carbon steel or stainless steel.
- 5 Choose with or without conspicuity.
- 6 Select quantity.
- 7 Select kit part number.

## Straight Arm

These steel hangers spring back after impact every time. Precision cut, robotically welded end caps for durability, radiused ends to minimize flap tears, and contoured finished appearance are just a few ways Betts improves this common industry hanger style with uncommon styling. Available in black carbon steel or in bright, mirror finish stainless steel.

Kits include (2) stainless steel mud flap hangers with lamp mount housing(s) and mounting hardware for flap and hanger.

\* Includes Conspicuity Strip.

\*\* This hanger uses one A7SPR spring per arm and is specifically designed for easy and safe replacement of the spring.

Flap Hangers with clearance lamps have become popular in many applications. They provide improved vehicle visibility and driver convenience when maneuvering the tractor at night. Betts is the first company to provide a flap hanger with a stainless clearance lamp housing, giving improved corrosion resistance over common chrome lamp holders.

The LT9S provides increased length over the Betts B7S. The end user is responsible for checking his frame and axle width to ensure that the flap hanger and lamp meet legal vehicle width requirements.

Betts welded lamp housing is an industry exclusive.

# Custom Manufacturing

Coiled Springs

Special Order Custom Colors

Custom Springs and Torsion Bars

Special Lengths

Betts' technology and commitment to customer satisfaction allows us to efficiently provide special flap hangers, torsion bars, custom colors, metal fabrications, and custom springs. Contact 1-800-227-2192 for technical assistance.

## The Conspicuity Law

All tractors built after July 1, 1997 must use reflective material on rear fenders or horizontal hangers supporting mud flaps. D.O.T. (FMVSS 108)

Red and white reflective tape or reflectors must be applied to horizontal hangers supporting mud flaps

White, L-shaped reflectors must be applied to the upper corners of the cab or sleeper box

## Conspicuity Requirements

For mud flap hangers without integrated Conspicuity tape, Betts offers light weight, aluminum, reflective Conspicuity Strips which meet the Federal Motor Vehicle Safety Standard for retroreflective material. Conspicuity Strips may be used with a variety of hanger types for aftermarket application. They are packaged in pairs and easy to install.
