# GENERAL OPERATION

# B

## IMPORTANT NOTICE

There are some models that may use 2 different systems in the same model year. In many cases it is not possible to tell which system the vehicle you are working on may use until you hook up your T-Code and try each system.

You must switch adapters when trying a different System Type. If you try "Type 1" and the tester fails to communicate, then switch adapters and try "Type 2".

Remember to use the same adapter as the System "Type" you are selecting with the tester.

NOTE : The Immobiliser receiver does need reprogramming if replaced.

# GENERAL OPERATION

# B

## KEY TYPES

### Chrysler, Dodge, Jeep & Plymouth Interchangeable Keys

### Chrysler & Dodge "Mitsubishi" Type Keys Interchangeable Keys

# SPECIAL FUNCTIONS

# C

## VEHICLE SELECTION

ACURA  
CADILLAC  
> CHRYSLER  
> DODGE  
FORD  
HONDA

Select **CHRYSLER** or **DODGE** from the Vehicle Selection Menu using the **UP** and **DOWN** arrows.

Then press the **ENTER** key.

## VEHICLE SELECTION

SEBRING 2DR HTP  
TYPE 1  
TYPE 2

Verify the System type from the model application guide.

## VEHICLE SELECTION

STRATUS 2DR HTP  
TYPE 1  
TYPE 2

Make sure the transponder key is in the ignition and turned to the "ON" position.

SWITCH IGNITION ON

Press the **ENTER** button.

**PRESS ENTER KEY**

# SPECIAL FUNCTIONS

# C

## ECU IDENTIFICATION

CHRYSLER 94-98

TYPE 1.

PRESS ENTER KEY

## ECU IDENTIFICATION

CHRYSLER 98-03

TYPE 2.

PRESS ENTER KEY

## DIAGNOSTIC MENU

ECU IDENTIFICATION  
> SPECIAL FUNCTIONS

Select **SPECIAL FUNCTIONS** and press the **ENTER** button.

## DIAGNOSTIC MENU

CLEAR KEYS  
PROGRAM KEYS

"CLEAR KEYS" = Will erase all keys.  
"PROGRAM KEYS" = Add Keys to car.

If you CLEAR keys - you will need to then program any keys you want to start the car, including the one in the ignition.

## SPECIAL FUNCTIONS

### ERASING KEYS

#### DIAGNOSTIC MENU

> CLEAR KEYS  
PROGRAM KEYS

To erase all keys - Select **CLEAR KEYS**

If you CLEAR keys - you will need to then program any keys you want to start the car, including the one in the ignition.

SECURITY CODE

----

Enter the 4 number PIN Code for the vehicle you are working on.

The PIN Code is available from the dealer.

SECURITY CODE

1234

IS CODE CORRECT

OK=ENTER CLEAR=BACK

You will need to confirm the PIN Code. (The PIN Code pictured is just an example)

CLEAR KEYS

PROCEDURE COMPLETE

**PRESS ENTER KEY**

You will now need to program any keys you want to start the car, including the one in the ignition.

# SPECIAL FUNCTIONS

# C

## ADDING KEYS

### DIAGNOSTIC MENU

CLEAR KEYS  
> PROGRAM KEYS

To Add keys - Select PROGRAM KEYS

PROGRAMMING KEYS

SWITCH IGNITION ON  
WITH NEW KEY

Make sure the transponder key is in the ignition and turned to the "ON" position.

**PRESS ENTER KEY**

Press the **Enter** button.

SECURITY CODE

-----

Enter the 4 number PIN Code for the vehicle you are working on.

SECURITY CODE

1234

IS CODE CORRECT

OK=ENTER CLEAR=BACK

You will need to confirm the PIN Code. (The PIN Code pictured is just an example)

PROGRAMMING KEYS

PROCEDURE COMPLETE

ENTER - PROG MORE KEYS  
BACK - EXIT ROUTINE

You are done with the programming of the key in the ignition, press **Enter** to program more keys.

JEEP CHEROKEE

#### DIAGNOSTIC MENU

PROGRAM REMOTE

NOTES :

There are 4 memory positions for the TYPE 11 remote system, 1,2,3 & 4

PROGRAM REMOTE  
ENTER REMOTE NO. X

Enter the number to fill a memory position for the remote being programmed.

PROGRAMMING REMOTES  
PRESS UNLOCK BUTTON

This will overwrite the memory location if a remote was already stored in it.

#### DIAGNOSTIC MENU

PROGRAM REMOTE

You can program the same remote into all 4 positions to erase any existing remote controls.

Press the UNLOCK button.

The programming window is very short, so be quick.

The door locks cycle after the remote is programmed.

The tester will return to the Program menu.

# REMOTE CONTROL PROGRAMMING

## *96 Concorde, Intrepid, LHS, New Yorker, Vision Remote Programming*

1. Turn Ignition ON.
2. Connect a jump wire from Pin 1 of the Diagnostic Connector (Upper left pin is number 1). Connect to ground.
3. Doors will LOCK and then UNLOCK to verify program mode.
4. Press the button on the remote control, doors will LOCK and UNLOCK to verify programming is complete.
5. Repeat for additional transmitters.
6. Remove wire and turn ignition OFF.
7. Test all remote controls.

### *Programming this type of Remote control*

1. Open the drivers door and leave open.
2. Turn the mechanical door lock lever on the drivers door to LOCK.
3. Insert Ignition key and turn ignition ON.
4. Point the transmitter at the receiver and press the LOCK button for 5 seconds. If successful the door will unlock.
5. Additional remotes can be programmed by moving the lock lever back to the lock position and perform procedure 4 again.
6. Repeat for up to 4 remotes.
7. When completed turn ignition OFF and ON within 20 seconds of programming the final remote control.
8. Check all remotes for operation.

Grand Cherokee	WJ	C (BL)&(GRY)	C (BL)&(GRY)	C (BL)&(GRY)	C (BL)&(GRY)
Jeep Cherokee	XJ	C	C	C	C

DO Reprogram all of the vehicles transmitters at the same time.

DO NOT

Reprogram if replacing a transmitter battery,  
If any of the transmitter buttons ??? (illegible),  
For reduced range performance

NOTE: If equipped with VTSS, the system must be disarmed and/or unlocked to enter program mode.

Warning: Simultaneous programming of multiple vehicles should be avoided as any transmitter activated within 30 meters (100 feet) can get programmed and may result in cross-vehicle programming.

# REMOTE CONTROL PROGRAMMING

# D

## Program Method A

### Procedure

1. Press the LOCK button 5 times at 2 second intervals to synchronise transmitter.
2. Turn ignition ON, and wait for vehicle ignition Chimes to stop.
3. Using any original working transmitter press the UNLOCK button for 4 to 10 seconds.
4. Within the 4 to 10 seconds continue pressing the UNLOCK button and press the PANIC button for 1 second and then release both buttons at the same time. (FOR **AN/DN** release either button first). A chime will sound to indicate the programming mode has been entered.
5. Press the LOCK and UNLCOCK buttons at the same time for 1 second and release. (For **AN/DN** a chime will sound).
6. Press and release any button and the chime will sound to indicate successful programming (**AN/DN** the locks will cycle).
7. Repeat steps 5 to 7 for additional remotes.
8. Turn ignition OFF. Programming mode will stop after 1 minute (**AN/DN** and RS it is 30 seconds).

## Program Method B

### Procedure

1. Press the LOCK button 5 times at 2 second intervals to synchronise transmitter.
2. Turn ignition ON, and wait for vehicle ignition Chimes to stop.
3. Using any original working transmitter press the UNLOCK button for 4 to 10 seconds.
4. Continue to HOLD the UNLOCK button and press the PANIC button. A chime will sound to indicate programming mode has been entered.
5. Press a button on the remote control of all that require programming including any existing remotes. A chime will sound for each remote programmed.
6. Turn ignition OFF to exit program mode.

## Program Method C

NOTE : DRBIII REQUIRED FOR THIS METHOD.

## Program Method D

### Procedure

1. Locate the dark green program enable wire connected to Pin 1 of the OBD 16 pin connector under the left side of the Instrument Panel.
2. Connect the program enable more terminal to ground.
3. Insert the key into the ignition and turn ignition ON. The central locking will lock and unlock indicating program mode has been entered.
4. Using the remote control to be programmed press the LOCK or UNLCK buttons. The locks will cycle to indicate programming has been successful.
5. Repeat step 4 for additional remotes.
6. Disconnect program enable wire.
7. Turn ignition OFF and remove key.
8. Test all remotes.
