- Active hand holding to guide students through their journey towards Perfection
- Practical & Scientific Approach towards the Markets
- Learning on real time charts.

### What sets MTS apart?

- Leading through innovation
- Pursuing excellence
- Growing by learning

## About Mentor

Dear Reader,

The stock markets have intrigued me and have held my interest ever since childhood, as I was born in a family of Stock Brokers. I have had the opportunity of getting formal education in Technical Analysis in reputed institutions, More over, the markets are the best teacher. No one can learn swimming by reading a manual. You have to jump in the water, until then, it's impossible to learn how to swim. The same concept applies to trading.

I have been trading and investing in The markets since last 15 years and I have had the opportunity teach students at Motilal Oswal (STIR) for 2 and a half years, where, I realized my passion and

flare for teaching .The over whelming response I received from my students and management of Motilal Oswal (STIR), has encouraged me to launch my Pet Venture MY TRADING SCHOOL. With my experience in markets, trading to me has become more like a science which is based on understanding minor details rather than whims and intuitions. Trading is not magic nor can it be worked on with gut feeling, rather it is a calculated method of analysis, which gives an accurate and real time help for trading and investing .

During my experience of teaching I have come across many people who are inclined towards trading but always keep the uncertainties in their subconscious mind which limits their scope to the minimum.

Thereby, my initiative is to bring the unexplored knowledge of scientific technical analysis of trading the Equity and the Futures and Options Markets, to students, experienced traders, professionals, housewives, or whoever is passionate about trading.

Best Regards,

*Smita Parekh* 

# TECHNICAL ANALYSIS – LEVEL 1
