

CALENDAR EXPLANATION

वशिष्टा। यस्मिन् पक्षे यत्र काले येन दृग्गणितेक्यम्। दृश्यते तेन पक्षेण कुर्यात्तिथ्यादिनिर्णयम्॥

Biggest misconception is "Indian Hindu festivals observance date in the Indian calendar / panchang is applicable for all location in world". Many people contact their parents to find the observance dates for Indian Hindu festivals. Some use their favorite panchangam from India to find an observance date for an Indian festival. In reality **observance dates from Indian panchangam is valid only in India and is not transferrable to other locations.**

THE INDIAN DATE – TITHI: What is Indian date – Tithi? Why it is different from an English date? Why it is not exactly 24 hours? The Indian date or Tithi is "A lunar day, or the time it takes for the longitudinal angle between the Moon and the Sun to increase by 12". Tithis begin at varying times of day and vary in duration from approximately 19 to approximately 26 hours".

This definition clearly says an Indian Tithi is based on the following:

- Daily motions and celestial longitude positions of the Sun and the Moon. Hence it is a celestial event and they begin and end at the same instance all over the world. Because longitudes of the Sun and the Moon isn't local to one particular country. They happen at the same instance. Longitudes of the Sun and the Moon are calculated from the center of the Earth.
- The distance between them is measured in terms of degrees of longitudes and maximum degrees in a circle or ellipse is 360 degrees.
- Each day is 12 degree distance between the Sun and the Moon.
- **Length of English date is fixed – 24 hours whereas Tithis begin at varying times of day and vary in duration from approximately 19 to 26 hours.** This is because the elliptical orbit of the earth and the Moon.
- Tithis can start and end anytime unlike English date that starts and end at midnight.
- **The start and end times of Tithis are calculated using astronomical formula (for determining longitude positions of the Sun and the Moon from the center of the earth). These times are usually as per UTC (Universal Time Coordinated – aka GMT).**
- **Time difference to your country is applied to arrive at Tithi start ending times as per your country.**
- When one Tithi ends the next Tithi starts.

FESTIVAL DETERMINATION: Each festival has a unique rule. These rules are written in Sanskrit as a part of dharmashastra or agama. For example one of the rule for the Karwa Chauth is: "The Karwa Chauth celebrated on the 4th Tithi of Ashwin Krishna paksha or Purnimant Karthik Krishna Paksha when the Tithi exists during the Moon rise". Another rule for Ganesh Chaturthi says: "The Ganesh Chaturthi is observed when the Bhadrpad Shukla Chaturthi Tithi exists during the madhyahana (noon) time". Likewise different rules exist for each festival. The noon, the midnight and other parts of the day cannot be calculated as per fixed clock time. These are based on local sunrise and local sunset. Hence, a festival observance date calculations requires Tithi begin and end times, Daily local Sunrise and sunset timings, Daily Moonrise and Moonset timings – These are always dependent on longitude, latitude, and altitude. Tithi begin and end times are calculated using the center of the earth using universal time and then later converted to local timezone.

Hence the festival dates you see in Indian calendar prepared in India from your local place is calculated based on your local place's longitude, latitude. Hence it cannot be used outside of India. Panchangkartas (people who make panchangas) interpret these rules on the panchangas they have prepared using the astronomical formulae. Your pundit who performs puja at your home/temple may or may not know these lengthy rules and/or astronomical formulae, or some websites that show day to day panchang.

TIMINGS LISTED IN THE CALENDAR: The Tithi & Nakshatra times indicate a time when the Tithi or Nakshatra ends. The Panchanga uses the Vedic definition of a day, i.e., A day starts with Sunrise and ends with the subsequent Sunrise. Thus, a Tithi with a time of 29:00 indicates that the Tithi ends past midnight but before the next Sunrise at 5:00 AM (29:00 – 24:00) on the next calendar day. Hence 24:00 means 00:00 hours of the next day, 25:00 means 1:00 AM of the next day, and 29:00 means 5:00 AM of the next day. This is standard time notation for any Panchangam. The time for Sun's Sankramana is when Sun will enter that rasi or sign on that day. eg. Makara 4:36 means Sun is entering Makara rasi at 4 hour 36 minute. All other times are the ending times. Please refer to the following hour guide to determine when Tithi or Nakshatra end times mentioned in the panchanga. The top row is hours and then the bottom row is what time they get translated to with reference to an English date.

23:xx	24:xx	25:xx	26:xx	27:xx	28:xx	29:xx	30:xx	31:xx
11:xx PM	0:xx AM	1:xx AM	2:xx AM	3:xx AM	4:xx AM	5:xx AM	6:xx AM	7:xx AM
Same date	next date	next date	next date	next date	next date	next date	next date	next date

Here if the hour number is greater than 12 it means PM. When the hour number is greater than 23 then it ends on the next English date before sunrise, that means subtract 24 hours from hour to get exact time and take next English date. For example tithi Amavasya ends at 26:36 on 19th March 2015 it means it really ends past midnight of 19th March 2015 but before next day sunrise of 20th March. Here it ends at 2:36 AM on 20th March. I know this is little complex but English Dates don't exactly map to Hindu Day and Date. Hindu day is from one sunrise to another and Hindu Date don't start at midnight.

UTTARAYANA / DAKSHINAYANA: The season occur based on earth's position around the Sun. This is due to Earth's tilt of 23.45 degrees. The Earth circles around Sun with this tilt. When the tilt is facing the Sun we get summer and when the tilt is away from the Sun we get winter. Because of this tilt it seems like the Sun travels north and south of the equator. The Uttarayana is the Sun appearing to move north. The Dakshinayana is the Sun appearing to move towards South. This causes rise to seasons and dependent on equinoxes and solstices.

There is a common misconception that Makara Samkranti is the Uttarayana. This is because at one point in time Sayana and Nirayana Zodiac were same. Every year equinoxes slides by 50 seconds due to precision of equinoxes, giving birth to Ayanamsha and causing Makara Samkranti to slide further. As a result if you think Makara Samkranti is Uttarayana then as it is sliding it will come in June after 9000 years. However Makara Samkranti still holds importance in our Rutuals as a Samkranti. All Drika Panchanga makers will use the position of the tropical Sun to determine Uttarayana and Dakshinayana. Hence January 14th isn't Uttarayana. Actual Uttarayana occurs on December 21st/22nd of every year. **Some people observe Uttarayana and Dakshinayana based on Nirayana positions of sun (although it's not as per Drika Siddhanta) and we respect that. The same goes for Ritu. Ritus are always observed based on Tropical position of Sun but some observe based on Lunar month and some on Nirayana Sun. We at mypanchang.com are Drika panchanga and Tropical positions for Ayana and Ritu as per Drika Siddhanta. Note: We have used Dharmasindhu for festival determination and others may use other agamas and hence could be a differences in dates.**

About myPanchang.com: myPanchang.com is the leading panchang maker providing the most accurate panchangam in English and various Indian languages and panchangam for over more than 394 cities all over the world based on highly accurate driga ganitha or thiruganitha. Most temples in the world rely on myPanchang.com for accurate Panchang data and festival observance times.

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
Ashtami full night Svaati 24:16 31	Satyanarayana Puja can be done any day but mostly it's done on day of Sankramana (When the sun changes the sign) or the day of Purnima especially when Purnima prevails during pradasha (As per rules of Nakta Vrata). However Purnima fasting (For those who observe Purnima fast, not necessarily for satyanarayana vrata) needs to be observed during Purnima prevailing at the time of sunrise.		There are many beliefs about birth of Sri Hanuman. North India believes during midnight of Purnimant Kartika Kr (Amavasyant Ashwin Kr) Chaturdashi. Whereas Andhra believes Amavasyant Vaishakha Krishna Dashami. Karnataka, Gujarat, Maharashtra and certain parts of Andhra believes its Chaitra Purnima. Tamil Calendar believes its when the Sun in Dhanush Rashi and in Mula Nakshatra – Marghazi Moolam.		Margasira K Saptami 08:09 Hasta full night Purnimant Pushya Kr. Amanata Margasira Kr. Two systems in determining how a hindu month starts: A) Purnimant: Months ends on Purnima and begin with Krishna paksha to Shukla paksha. Popular in North India. Mainly hindi speaking belt. Also known as Purnimant System. B) Amavasyant: Months end on Amavasya. Months begin from Shukla paksha ends on Amavasya. Popular in Gujarat, Maharastra, Karnataka, Andhra Pradesh. Names of Shukla paksha month remains same under both months. As per Purnimant System, a month starts 15 days earlier than its Amavasyant Counter Part. For example. Shravana Masa will begin on Amavasyant Ashadha Krishna Paksha in Purnimant Calendar. This means when Amavasyant Ashadha Krishna Paksha is going on at the same time North India Will celebrate Shravana Krishna Paksha followed by Shravana Shukla Paksha which will be same for both Calendric systems.

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
Lord Ramachandra was born on Chaitra Shukla Paksha Navami tithi during the noon time and punarvasu nakshatra was prevailing. Hence as per this rule although Navami prevails during 15 th April but not during the noon time (8 th Muhurtha of the day) but it does prevail on 14 th April. Hence Ram Navami in USA/PST zone will be on 14 th of April. USA is a big country and hence dates could differ from timezone to timezone.		Yuga+aadi = Yugadi. Simply means beginning of a new Era or year. Yugadi is a Sanskrit word and simply means beginning of a new year. The new year in Maharashtra is known as Gudi Padwa. Whereas in Karnataka and Andhra Pradesh it's known as Ugadi (apabhransha from Yugadi). Sindhi know it as a Cheti Chand. It is also marks beginning of a Chaitra Navaratri.		Bohag Bihu is a new year of Assam. Pohela Baisakh is a new year of Bengal. Vishu is for Kerala. Baisakhi is Punjabi New Year. Pana Sankranti is Oriya New Year. However, certain sampradayas do not agree with this dharmashastraic view and they differ in their opinion. According to their belief people who worship only Vishnu and none other are vaishnavas. There are other subtle differences on festival rules between smarthas and vaishnavas. This difference arises as smarthas cannot break their fast on a day when trayodashi prevails and Vaishnavas consider Dashami Tithi prevailing during Arunodaya kala then it's contaminated. Hence they will not fast on Ekadashi but Dwadashi and break their fast on a tithi combined with trayodashi. Also if there is Ekadashi vriddhi Smartha will fast on the first day and Vaishnava will fast on the second day. If there is a Dwadashi tithi prevailing for 2 days then Vaishnava will discard Ekadashi and fast on Dwadashi.

Hindu women keep fasts for their husband's longer life. There are many vratas celebrated in different parts of india under different names. For example: Karwa Chauth. Various Teej Vrata – Hariyali Teej, Kajali Teej, Haritalika Teej (Kevada Teej). Tamil women celebrates this vrata as Karadyan Nombu (Savitri Nombu) usually appears when Sun enters mina rashi around 13 th or 14 th of March. Gujarat, Maharastra, Karnataka, Andhra it is also celebrated as Vata-Savitri Vratam appearing on Jyestha Purnima. Certain parts in Northern India Celebrates on a different day. But overall goal is same -- Praying for longer life of their husbands.			Vaishakha K Ekadashi 09:20 Revati 10:08 Apara Ekadashi Purnimant Jyestha Kr. Ganesha Chaturthi. A lord of beginning. Remover of obstacles. Giver of wisdom, wealth and progeny. Ganesha is not only worshipped in India but all over the world including Thailand, Srilanka, Malaysia, Indonesia, Cambodia etc. Ganesha vigrahas (Murthis) are brought in homes and daily worship is done upto 10 days and on Anant Chaturdashi vigrahas are immersed in water.		Mahalaya or Shraddha Parva is period to remember departed ancestors. Their Shraddham is done on their tithi when they departed from their biological body and merged into infinite. Dharmashastras say 'Pita guru Pita deva pita dharma sanatanah'. Ancestor's blessings are important for success in our lives. If unable to do Shraddha one can visit temple and donate in memory of departed ancestors. <p>Bhagwad Geeta is known as nectar of Veda. Lord Krishna revealed this to Arjuna on Margashira Shukla Ekadashi in the middle of battlefield in kurukshetra. It's a guide for a mankind to attain moksha and how to behave in day to day life. It preaches about Dharma, Karma, Bhakti, Gnana (Knowledge) and finally how to attain moksha. There are many translations available but the most ancient is by Aadi Shankaracharya known as Shankar Bhashyam. Later many other translations came propounding various Vedanta theories by Ramanujacharya, Madhavacharya, and so on.</p>
