Naída S

Product information

Naída S, with new Spice+ technology, offers a complete power portfolio including an UltraPower, SuperPower and CRT model in three performance levels accommodating moderate to profound hearing loss. Naída S is WaterResistant and offers a wide range of accessories and FM possibilities, giving the convenience of wireless connectivity.

For detailed information visit www.phonakpro.com

Key features*

StereoZoom takes binaural processing technology to a whole new level by integrating the input from the four microphone network of two hearing instruments. StereoZoom has the unique ability to significantly narrow the beam, effectively addressing the common need to focus on a single voice in a crowd.

UltraZoom is designed to significantly improve signal-to-noise ratio in a new and unique manner. A key innovation applied to UltraZoom Premium is SNR-Boost. When in directional mode, SNR-Boost is activated in addition to the traditional temporal-based noise canceller. SNR-Boost is a spatial noise canceller designed specifically for directional applications which uses spatial cues to distinguish between speech from the front and surrounding noise. With this clear distinction, noise cancellation can be more appropriately applied to further enhance the signal-to-noise ratio for speech coming from the front.

auto ZoomControl harnesses full bandwidth audio exchange and advanced binaural processing to automatically track and focus on speech, regardless of the direction, enabling understanding without the need to face the speaker.

FlexControl allows the wearer to easily make targeted adjustments which have a significant impact on satisfaction. FlexControl offers the freedom and flexibility to maximize hearing benefits everywhere.

Enhanced SoundRecover features a frequency compression bandwidth that is double that of the previous SoundRecover algorithm. That means that even for the rare occasion when the lowest cut-off frequency is selected audibility beyond 8000 Hz is still ensured.

Fitting

Software: Phonak Target 2.0 and higher, NOAH compatible Interfaces: iCube/NOAHlink/HI-PRO

*please note that some features are model dependent.

Technical description

UltraPower and SuperPower

- 1 Sound outlet
- 2 Transparent hook
- 3 Miniature microphone with Wind & Weather Protector (WaterResistant)
- 4 Program button
- 5 Access to programming socket
- 6 Digital volume control
- 7 Serial number
- 8 Battery compartment with ON/OFF switch
- 9 Wind & Weather Protector (WaterResistant) for battery compartment
- 10 Design-integrated FM
- 11 Power SlimTube with custom earmold

CRT

- 1 Earpiece: cShell
- 2 xReceiver unit
- 3 Microphone protection
- 4 Push button
- 5 Battery compartment with ON/OFF switch
- 6 Access to programming socket
- 7 Serial number
- 8 Design-integrated FM

With Power (xP) xReceiver

Mild to severe hearing loss, all audiometric configurations.

With Standard (xS) xReceiver

Mild to moderately-severe hearing loss, all audiometric configurations.

CableFree Fitting with iCube

- 1. Switch iCube on and check the Bluetooth connection to the computer.
- 2. Put iCube around the patient's neck and connect the neckloop to the iCube.

Fitting a BTE via cable

1. Flip open the cover for the programming socket.

2. Connect the programming plug into the socket.

Use programming cable CS-44 A (Phonak version) only.

CRT

1. Flip open the battery compartment to access the programming socket.

2. Connect the programming plug into the socket.
Use programming cable CS-44 A (Phonak version) only.
