Who is SACE ?

In 2019 HydroKleen purchased ALL rights to the SACE machine Package which was about to be offered to the Australian market. The SACE Package was initially developed as a small compact Air Conditioner cleaning machine.

When acquired by HydroKleen, it was rebuilt and improved to a high industrial standard that now allows the user to clean 10 to 12 wall splits per day!

As you are probably aware, the HydroKleen Equipment, systems and processes are sold only with a License Agreement and is a complete business model/system.

You can purchase the SACE Package “online” or from HydroKleen just as you would purchase a Refrigerator or a TV.

It comes with training videos and training manuals to get you started.

You do not need a license to purchase the SACE equipment. All equipment is manufactured alongside the HydroKleen Equipment and is 100% Australian Made and comes with a full 12 - month warranty on the equipment.

WHAT DOES THE SACE PACKAGE INCLUDE ?

- The SACE Machine - Specialised in cleaning ductless Split System Air Conditioners
- The SACE Catchment Bag - Designed to be a no mess/no fuss bag that can be used for over 3000 cleans without the need for replacing.
- The Catchment Hose and Tank which is a no leak hose with attachments and the durable Catchment Tank which holds up to 5 gallons of biotoxins.
- Drain tube cleaner for getting to where the gun can't reach.
- Safety equipment including safety glasses and face masks.

DIFFERENCE BETWEEN SACE & HYDROKLEEN
