Notes:

- <sup>a</sup> Housing units at ECC are pre-manufactured modular units.
- <sup>b</sup> This is the legal configuration of this camp as verified by the original drawings. However, the current layout may be different in practice.
- <sup>c</sup> The camp was temporarily closed in July 2020 due to safety issues and the COVID-19 pandemic. The closure resulted in a decrease of 150 minimum beds.

Notes:

<sup>a</sup> As of December 2018, half of the A Wing in Unit 4 began to house segregation inmates. This change resulted in an increase of 42 close custody beds and a loss of 84 medium custody beds.

Notes:  
<sup>a</sup> Pursuant to "Stickney" case law, the capacity of Units 1-3 cannot exceed 172 each. This case law allows for the capacities to be increased to 220 if one additional roving officer is added to each unit per shift.  
<sup>b</sup> The designation of this unit changed from SSLP to SSRT.  
<sup>c</sup> The designation of the A and B Wings in Unit 2 was changed from General Population Level II to Intermediate Medical Unit, the C Wing is for Special and Rehabilitative Care for psychiatric and  
<sup>d</sup> Construction work in Unit 2, C Wing has been completed and the wing is now open for habitation.  
<sup>e</sup> Unit 5 is pending repairs, and the A Wing in Unit 5 is reserved to control the spread of COVID-19. The  
<sup>f</sup> Unit 6, which is for intake, is also being utilized to quarantine inmates during the entry process

Notes: These are private facility beds paid for at a contractually agreed daily rate and utilized while Nevada seeks ways to raise capital to expand or retrofit existing buildings.

<sup>a</sup> In July 2019, the contract to rent beds from Saguaro Correctional Center in Arizona was reduced from 200 to 100 beds.

<sup>b</sup> As of October 2020, 96 inmates were housed at this facility and they will return to Nevada by the end of the year.

Notes:

<sup>a</sup> The boot camp program that was offered at this facility was transferred to Casa Grande Transitional Housing. These wings now house general population, minimum custody inmates.

<sup>b</sup> This measure will allow the NDOC to consolidate inmate programs and more efficiently utilize its resources. Individuals that have jobs or that are assigned to NDF live in Unit 2, while those that are not employed live in Unit 3.

Notes:

<sup>a</sup> In November of 2020, this facility had to utilize the gym to quarantine inmates to mitigate the spread of COVID-19

Special Purpose Beds	Male	Females	Total
<b>Infirmiry Beds</b>			
ESP, Unit 9, reserved	30		30
FMWCC, Unit 11, reserved		11	11
HDSP, Unit 13, reserved	40		40
LCC, Unit 7, reserved	14		14
SDCC, Unit 9, reserved	4		4
<i>Sub total</i>	88	11	99
<b>Hospital</b>			
NNCC, Unit 8, reserved	106		106
<i>Sub total</i>	106	0	106
<b>Total</b>	<b>194</b>	<b>11</b>	<b>205</b>

*Note: Special purpose beds are reserved for individuals with special medical or mental health needs.*

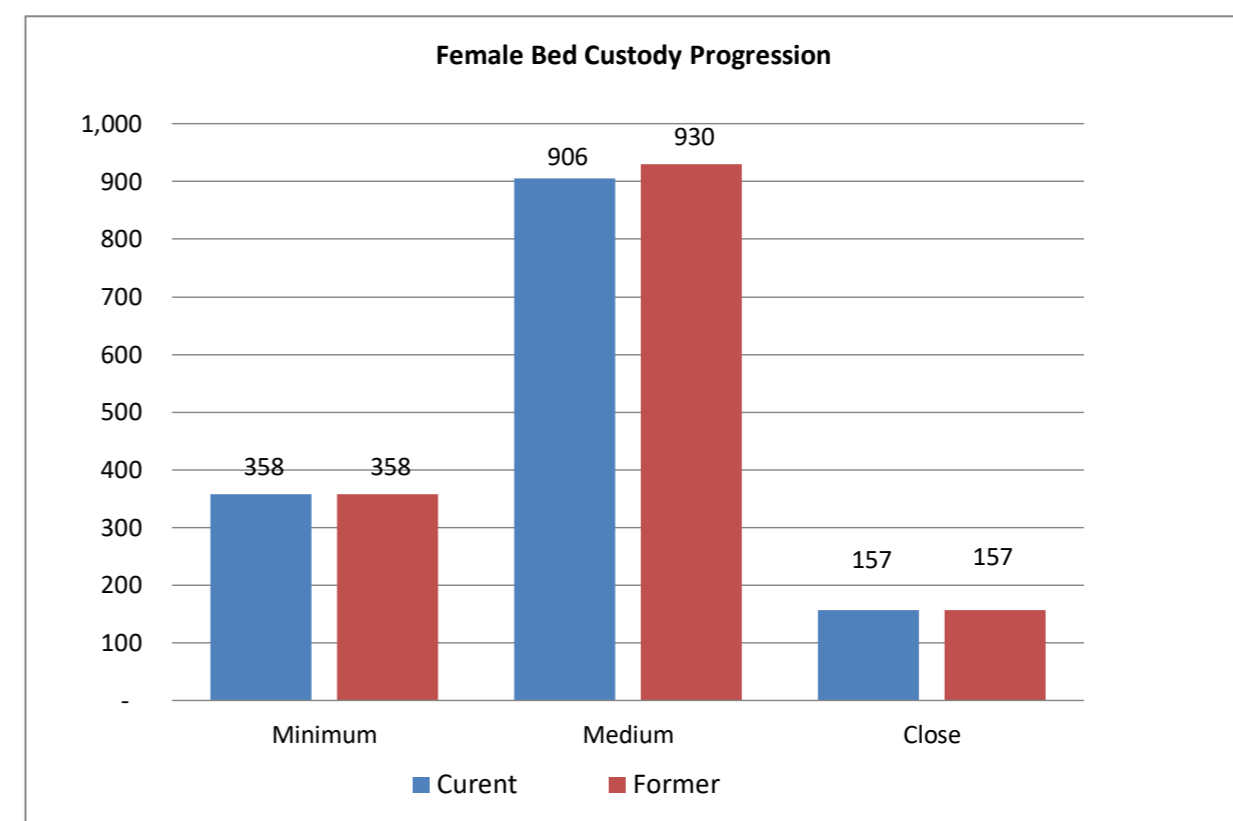

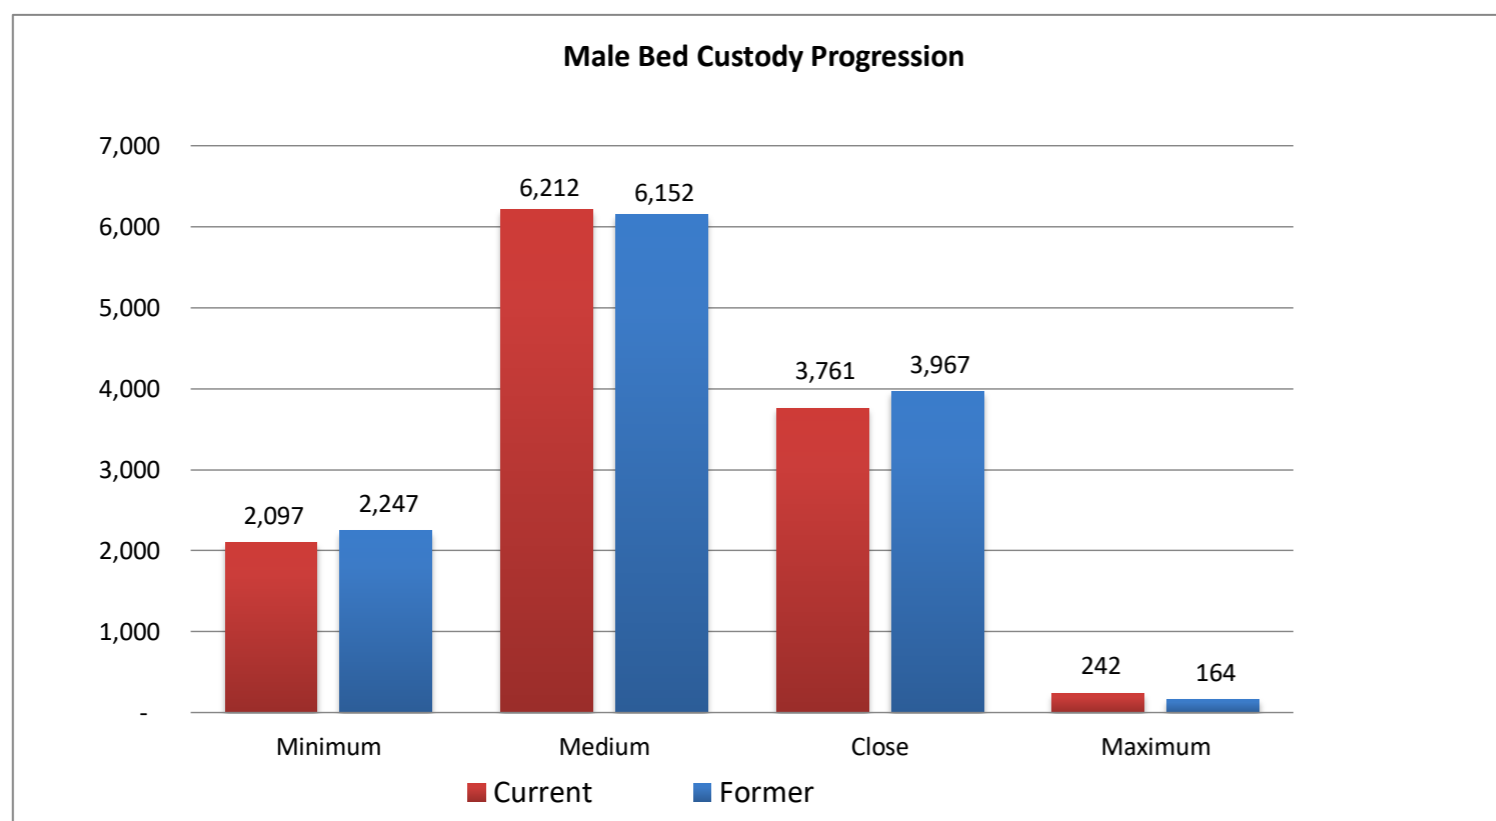

Temporary Housing <sup>a</sup>					
Male and Female	Max	Close	Medium	Min	Total
Male Beds	2	36	58	0	96
Female Beds	0	0	0	0	0
<i>Grand Totals</i>	2	36	58	0	96

<sup>a</sup>Note, the distribution of beds across custody levels was updated in November 2020 per a review of the inmate roster.

<b>Total Beds</b>	<b>13,733</b>	<b>13,975</b>	<b>(242)</b>

<sup>a</sup> The difference between the number of beds in the current edition of the report and the past edition encompasses changes in the number of beds in Nevada facilities as well as changes in the custody level of inmates housed at the Saguaro Correctional Center in Arizona.

<sup>b</sup> Base beds except for special housing beds or female beds at NNCC. The base structure of NNCC was corrected to remove beds not intended for housing.

Select designations have been discontinued but are listed above for historical purposes.

Nevada Department of Corrections

Definitions of Capacity

Capacity	Definition	Room Type
Base Structure	The NDOC utilizes the Nevada Public Works Board bed capacity numbers, as designed, and these numbers do not change over time. This concept assumes that there is one inmate per bed, and capacity utilization is at no more than 100%.	◆ Cells. The NDOC follows the definition established by the Public Works Board, which is one inmate per cell or single-occupied cells in a housing area.
		◆ Camps/dorms. Dormitory capacity is established by the Public Works Board during the design and construction phases. Dorm style housing areas are intended to be shared by multiple inmates
Operating Capacity	This concept assumes that every other cell houses two prisoners, on the average. The outcome is at least 150% utilization of the cell capacity of a given housing area. However, specialized housing units are excluded from this ratio calculation. Housing areas intended to accommodate special populations, such as segregation, mentally or medically ill, or death row inmates who are single-celled for security and safety.	
Emergency Capacity	This concept assumes that more than every other cell houses two prisoners, on the average. The outcome is at least 168% utilization of the cell capacity of a given housing area. However, specialized housing units are excluded from the base and/or total capacity and from this ratio calculation. Housing areas intended to accommodate special populations, such as segregation, mentally or medically ill, or death row inmates are single-celled for security and safety.	
Emergency Overflow	This concept assumes that more than every other cell houses two prisoners, on the average. The outcome is more than 150% utilization of the cell capacity of a given housing area. However, specialized housing units are excluded from the base and/or total capacity and from this ratio calculation. Housing areas intended to accommodate special populations, such as segregation, mentally or medically ill, or death row inmates are single-celled for security and safety.	
Total Beds	This is the sum of emergency capacity and emergency overflow beds. Total beds divided by base structure is the percentage utilization of space to bed design.
