Introduction

Philosophy and Rationale for the Arts

The arts are essential in education and they provide students with a means to think, feel, and understand the world in unique ways. The meta-cognitive skills learned through instruction in the arts fosters effective work habits, creativity and innovation, critical thinking and problem solving, communication, and collaboration, each of which transfers across content areas preparing students for life in the 21st century.

These revised Nevada Academic Content Standards for Fine Arts encompass five disciplines: Visual Arts, Music, Theater, Dance, and Media Arts, and are predicated on a belief that Artistic Literacy provides students with an ability to create, present, critique, and connect art to their academic studies, lives, and the world around them.

The 2017-2018 Nevada Academic Content Standards for Fine Arts have substantive changes from those previously adopted to better respond to the needs of the field, including the following:

1. Creating four (4) strands to better represent the idea of artistic literacy. The four strands are: Creating, Presenting, Responding, and Connecting.
2. The creation of Anchor standards under each of the strands to provide consistency across the disciplines and the presentation of standards across content, disciplines, and grade levels.
3. Grade by grade level standards for each discipline, including three (3) levels at high school to allow for greater differentiation of instruction and to support student learning.
4. The inclusion of media arts standards to support the integration of artistic literacy in the areas of film, animation, gaming and computational artmaking (e.g., writing software code) to supplement existing standards in the area of digital communications across the curriculum.

Interpretation Guide to Reading the Standards:
