Trust in, and value from, information systems

Achieve

ISACA offers professional development training to fit your unique needs. Let us help you find the right solutions, drive results and create personalized learning experiences for you and your enterprise.

About ISACA

As a nonprofit, global membership association for IT and information systems professionals, ISACA is committed to providing its diverse constituency of more than 95,000 worldwide with the tools they need to achieve individual and organizational success. The benefits offered through our training and education programs result in greater trust in, and value from, information systems.

ISACA Training

ISACA is setting the pace in industry-leading training, knowledge and resources. Our portfolio of offerings encompasses the most in-demand IT Assurance, Security, Governance and Risk topics. Courses are delivered by world renowned practitioners and combine group discussion, case studies and best practices to enhance your knowledge and skills.

Why Train with ISACA?

- Practical and relevant courses
- Applicable immediately to your current or prospective roles and responsibilities
- Knowledgeable trainers that bring real world scenarios and case studies to the classroom
- Comprehensive offerings address many learning styles
- Courses built on ISACA's thought leadership
- Various options to fit your training budget
- Customized content available with our **On-site Training Program**
- Ability to continue the learning experience beyond the classroom through ISACA online events, whitepapers, research, webinars and communities

Continuing Professional Education Credits

ISACA is registered with the National Association of State Boards of Accountancy (NASBA) as a sponsor of continuing professional education on the National Registry of CPE Sponsors. State boards of accountancy have final authority on the acceptance of individual courses for CPE credit.

Complaints regarding registered sponsors may be submitted to the National Registry of CPE Sponsors through its website: www.learningmarket.org.

Meet the ISACA Trainers!

Our trainers are dedicated professionals who hold multiple industry certifications. Currently practicing in their related fields, they bring their unique, real world experiences to the courses they facilitate. Each trainer delivers proven strategies, techniques and best practices to the classroom. These skilled facilitators are ISACA members who have contributed regularly to ISACA research and the IT profession.

To meet the ISACA trainers, visit www.isaca.org/trainers.

According to the 2011 *Role of CIO Report*, 66% of senior IT executives need to learn more about the cloud. Start your research today by downloading a complimentary white paper here: <http://www.isaca.org/cloudwp>

2012 ISACA® Training

A Unique In-Depth Training Experience

Empower

"Learning is the master skill. When you fully engage in learning—when you throw yourself wholeheartedly into experimenting, reflecting, reading, or getting coaching—you are going to experience the thrill of improvement and the taste of success. More is more when it comes to learning."

—Training Magazine 8-2010

Assurance Courses

IT Auditors have become an enterprise's most valuable asset. Stakeholders need assurance that information is properly derived, maintained, sustained and protected to achieve the business goals.

Cloud Computing Fundamentals for IT Professionals

Learn the fundamentals of cloud computing including defining the cloud, identifying service delivery models and exploring the threat and security issues related to data and computation outsourcing.

Duration: 2 days

CPE: up to 16

Member / Nonmember Cost: \$1,150 / \$1,250

Other applicable disciplines: Security, Risk

Fundamentals of IT Audit and Assurance

This intensive course provides the IT auditor with the essential components of an information system audit. IT tools and techniques will be presented. This course will also identify controls and objectives to understand organizational risks and how to mitigate them.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,295 / \$2,495

IT Audit and Assurance Practices

Building on the basics of creating an information systems audit, this course focuses on relevant IT governance and management issues. Learn how to develop business continuity and disaster recovery plans, audit application controls and support IT service delivery. This comprehensive course is aligned with the CISA job practice areas and ISACA's IS Auditing Standards, Guidelines and Procedures.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,295 / \$2,495

Cloud Computing—Seeing through the Cloud: What Internal Audit Needs to Know (ISACA/Deloitte)

This comprehensive course will provide knowledge and tools to create an audit plan based on the different cloud computing services. Challenges to adopting the cloud in your enterprise and how to manage risks associated with cloud services will be discussed and analyzed.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,500 / \$2,700

Other applicable disciplines: Security

Network Security Auditing (ISACA/Deloitte)

This in-depth course equips the IT auditor with the necessary skills to scope, plan and perform a network security audit. Learn how to view and help protect the network perimeter of the organization through a range of hands on presentations and demonstrations.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,500 / \$2,700

Other applicable disciplines: Security, Risk

Taking the Next Step—Advancing Your IT Auditing Skills (ISACA/Deloitte)

Designed for the experienced IT audit professional with managerial responsibilities, this course presents advanced auditing techniques. Discover how to identify risks in a variety of infrastructure platforms and manage resources when structuring IT audits.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,500 / \$2,700

Other applicable disciplines: Risk

**Register before the Early Bird Deadline and Save US \$200*

Information Security Essentials for IT Auditors (ISACA/Deloitte)

This unique course enables the experienced auditor to recognize and address information security issues in the enterprise. Learn to identify and analyze the risk associated with security threats across network, operational and physical systems.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,500 / \$2,700

Other applicable disciplines: Risk, Security

Healthcare Information Technology (ISACA/Deloitte)

For those in the healthcare industry, this course will provide an overview of current information technology topics and how they apply to the healthcare profession. Regulatory issues, trends, and future reform will be discussed as well as how these will affect the IT audit professional.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,500 / \$2,700

Risk Courses

Effective management of business risk has become an essential component of IT governance. Lead the drive and help your enterprise mitigate risk.

A Risk Based and Business-Aligned Approach to Protecting Information Infrastructure and Assets

Explore the progression of information risk management and security as it relates to the strategies and goals of the enterprise. Develop metrics and measures for effective information security and learn how to create a culture of security awareness.

Duration: 2 days

CPE: up to 16

Member / Nonmember Cost: \$1,150 / \$1,250

Other applicable disciplines: Security

A Pragmatic Approach to Developing an Information Risk Management Strategy

This course provides an introduction to practical concepts for developing an information security and risk management strategy. Learn the steps required to be able to design and implement a comprehensive, proactive program, and realize the benefits that it provides.

Duration: 2 days

CPE: up to 16

Member / Nonmember Cost: \$1,150 / \$1,250

Other applicable disciplines: Security

Information Risk and Business Continuity/Disaster Recovery Planning

This course provides an overview of the specific criteria, steps and actions necessary to implement and sustain an information risk management program that includes plans for business continuity and disaster recovery. Key components of disaster recovery, business continuity and incident planning will be examined to address critical function disruptions and the capability to recover operations successfully.

Duration: 2 days

CPE: up to 16

Member / Nonmember Cost: \$1,150 / \$1,250

Other applicable disciplines: Security

IT Risk Management

Learn the principles of IT risk management in this new four day course. Explore how to build awareness around IT risk, communicate risk scenarios and define key risk indicators. Define roles and responsibilities for the development and implementation of risk strategy.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,295 / \$2,495

"The truth is that the best leaders are the best learners. Leadership is an observable pattern of practices and behaviors, and a definable set of skills and abilities."

—Training Magazine 8-2010

Governance Courses

Enterprises understand that strong relationships between business goals and supporting processes are imperative to sustain organizational success.

COBIT: Strategies for Implementing IT Governance

This course will provide an understanding of COBIT 4.1 and how to implement COBIT in your enterprise. Identify common IT challenges, define the COBIT framework components and recognize how COBIT relates to the IT environment. Apply the COBIT framework in a practical situation by explaining the use of management guidelines, control objectives and control practices.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,295 / \$2,495

Governance of Enterprise IT (GEIT)

A comprehensive course for IT professionals with current or prospective managerial responsibilities that identifies how to develop a governance strategy that will bring and sustain value and manage risk in your enterprise. Learn how to sustain governed practices, and identify the primary issues to be addressed with the existing business philosophy and current IT processes.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,295 / \$2,495

Security Courses

It is now more important than ever for executives to ensure that their IT security managers and professionals have the expertise needed to reduce risk and protect the enterprise.

Securing Wireless and Mobile Technologies

This course highlights the security issues related to the use of wireless and mobile technologies. Discuss mobile security and control issues and participate in a demonstration of security and audit tools and techniques.

Duration: 2 days

CPE: up to 16

Member / Nonmember Cost: \$1,150 / \$1,250

Other applicable disciplines: Assurance

An Introduction to Privacy and Data Protection (ISACA/Deloitte)

This course analyzes the risk and value of personal information from different perspectives and outlines the consequences of privacy failures. Explore how organizations can govern, manage, and protect regulated and high value data to manage the risk of non-compliance, information misuse, unauthorized access and loss.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,500 / \$2,700

Other applicable disciplines: Risk

Network Security for IT Security Professionals

This is a network security course that focuses on networking and network communication protocol fundamentals. TCP/IP security issues using a live TCP/IP network to demonstrate key concepts and tools, including firewall and intrusion detection systems will be used.

Duration: 2 days

CPE: up to 16

Member / Nonmember Cost: \$1,150 / \$1,250

Other applicable disciplines: Assurance

Information Security Management

This course provides the expertise needed to reduce security risk and protect the enterprise. Learn how to design and effectively manage a security management program, and develop procedures to help respond to and recover from disruptive information security events.

Duration: 4 days

CPE: up to 32

Member / Nonmember Cost: \$2,295 / \$2,495
