

Our Students. Their Moment.

**New York State Testing Program
Grade 3 Common Core
English Language Arts Test**

Released Questions

May 2016

New York State administered the English Language Arts Common Core Tests in April 2016 and is now making approximately 75% of the questions from these tests available for review and use.

New York State Testing Program Grade 3-8 English Language Arts

Released Questions from 2016 Exams

Background

In 2013, New York State began administering tests designed to assess student performance in accordance with the instructional shifts and rigor demanded by the new New York State P-12 Learning Standards in English Language Arts (ELA). To help in this transition to new assessments, the New York State Education Department (SED) has been releasing an increasing numbers of test questions from the tests that were administered to students across the State in the spring. This year, SED is again releasing large portions of the 2016 NYS Grade 3-8 Common Core English Language Arts and Mathematics test materials for review, discussion, and use.

For 2016, included in these released materials are at least 75 percent of the test questions that appeared on the 2016 tests (including all constructed-response questions) that counted toward students' scores. Additionally, SED is providing information about the released passages; the associated text complexity for each passage; and a map that details what learning standard each released question measures and the correct response to each question. These released materials will help students, families, educators, and the public better understand the tests and the New York State Education Department's expectations for students.

Understanding ELA Questions

Multiple-Choice Questions

Multiple-choice questions are designed to assess the New York State P-12 Learning Standards in English Language Arts. These questions ask students to analyze different aspects of a given text, including central idea, style elements, character and plot development, and vocabulary. Almost all questions, including vocabulary questions, will be answered correctly only if the student comprehends and makes use of the whole passage.

For multiple-choice questions, students select the correct response from four answer choices. Multiple-choice questions assess reading standards in a variety of ways. Some ask students to analyze aspects of text or vocabulary. Many questions require students to combine skills. For example, questions may ask students to identify a segment of text that best supports the central idea. To answer these questions correctly, a student must first comprehend the central idea and then show understanding of how that idea is supported. Questions tend to require more than rote recall or identification.

Short-Response Questions

Short-response questions are designed to assess New York State P-12 Reading and Language Standards. These are single questions in which a student uses textual evidence to support his or her answer to an inferential question. These questions ask the student to make an inference (a claim, position, or

conclusion) based on his or her analysis of the passage, and then provide two pieces of text-based evidence to support his or her answer.

The purpose of the short-response questions is to assess a student’s ability to comprehend and analyze text. In responding to these questions, students are expected to write in complete sentences. Responses require no more than three complete sentences. The rubric used for evaluating short-response questions can be found in the grade-level Educator Guides at <http://www.engageny.org/resource/test-guides-for-english-language-arts-and-mathematics>.

Extended-Response Questions

Extended-response questions are designed to measure a student’s ability to write from sources. Questions that measure Writing from Sources prompt students to communicate a clear and coherent analysis of one or two texts. The comprehension and analysis required by each extended response is directly related to grade-specific reading standards. Student responses are evaluated on the degree to which they meet grade-level writing and language expectations. This evaluation is made by using a rubric that incorporates the demands of grade-specific New York State P-12 Reading and Language standards.

The integrated nature of the standards for ELA and literacy requires that students are evaluated across the strands (Reading, Writing, and Language) with longer pieces of writing, such as those prompted by the extended-response questions. The rubric used for evaluating extended-response questions can be found in the grade-level Educator Guides at <http://www.engageny.org/resource/test-guides-for-english-language-arts-and-mathematics>.

New York State P-12 Learning Standards Alignment

The alignment(s) to the New York State P-12 Learning Standards for English Language Arts is/are intended to identify the analytic skills necessary to successfully answer each question. However, some questions measure proficiencies described in multiple standards, including writing and additional reading and language standards. For example, two-point and four-point constructed-response questions require students to first conduct the analyses described in the mapped standard and then produce written responses that are rated based on writing standards. To gain greater insight into the measurement focus for constructed-response questions, please refer to the rubrics.

These Released Questions Do Not Comprise a “Mini Test”

To ensure future valid and reliable tests, some content must remain secure for possible use on future exams. As such, this document is *not* intended to be representative of the entire test, to show how operational tests look, or to provide information about how teachers should administer the test; rather, its purpose is to provide an overview of how the test reflects the demands of the New York State P-12 Learning Standards.

The released questions do not represent the full spectrum of the standards assessed on the State tests, nor do they represent the full spectrum of how the standards should be taught and assessed in the classroom. It should not be assumed that a particular standard will be measured by an identical question in future assessments. Specific criteria for writing test questions, as well as additional assessment information, are available at <http://www.engageny.org/common-core-assessments>.

2016 Grade 3 ELA Test Text Complexity Metrics for Released Questions Available on EngageNY

Selecting high-quality, grade-appropriate passages requires both objective text complexity metrics and expert judgment. For the grade 3-8 assessments based on the New York State P-12 Learning Standards for English Language Arts, both quantitative and qualitative rubrics are used to determine the complexity of the texts and their appropriate placement within a grade-level ELA exam.

Quantitative measures of text complexity are used to measure aspects of text complexity that are difficult for a human reader to evaluate when examining a text. These aspects include word frequency, word length, sentence length, and text cohesion. These aspects are efficiently measured by computer programs. While quantitative text complexity metrics are a helpful start, they are not definitive.

Qualitative measures are a crucial complement to quantitative measures. Using qualitative measures of text complexity involves making an informed decision about the difficulty of a text in terms of one or more factors discernible to a human reader applying trained judgment to the task. To qualitatively determine the complexity of a text, educators use a rubric composed of five factors; four of these factors are required and one factor is optional. The required criteria are: meaning, text structure, language features, and knowledge demands. The optional factor, graphics, is used only if a graphic appears in the text.

To make the final determination as to whether a text is at grade-level and thus appropriate to be included on a grade 3-8 assessment, New York State uses a two-step review process, which is industry best-practice. First, all prospective passages undergo quantitative text complexity analysis using three text complexity measures. If at least two of the three measures suggest that the passage is grade-appropriate, the passage then moves to the second step, which is the qualitative review using the text-complexity rubrics. Only passages that are determined appropriate by at least two of three quantitative measures of complexity **and** are determined appropriate by the qualitative measure of complexity are deemed appropriate for use on the exam.

For more information about text selection, complexity, and the review process please refer to

Text Complexity Metrics for 2016 Grade 3 Passages

Passage Title	Word Count	Lexile	Flesch-Kincaid	Reading Maturity Metric*	Degrees of Reading Power*	Qualitative Review
The Private I's and the Case of the Big Stink	498	360L	2.0		43	Appropriate
Mary Jane and Her Recycled Sticks	663	650L	3.2	5.1		Appropriate
Start Your Engines!	595	530L	4.6	5.3		Appropriate
Excerpt from How to Convince Your Parents You Can...Care for a Kitten	628	790L	4.4	4.2		Appropriate
Excerpt from Leaving Emma	596	700L	3.8	5.0		Appropriate
A Stinky Plant Hike	482	830L	3.2	4.6		Appropriate
Excerpt from Project Mulberry	662	600L	3.5	6.5		Appropriate
Excerpt from Sweet Land of Liberty	539	780L	6.2	5.2		Appropriate

* Depending on when the passage was selected, either the Reading Maturity Metric or Degrees of Reading Power was used as the third quantitative metric.

New York State 2016 Quantitative Text Complexity Chart for Assessment and Curriculum

To determine if a text's quantitative complexity is at the appropriate grade level, New York State uses the table below. In cases where a text is excerpted from a large work, only the complexity of the excerpt that students see on the test is measured, not the large work, so it is possible that the complexity of a book might be above or below grade level, but the text used on the assessment is at grade level. Because the measurement of text complexity is inexact, quantitative measures of complexity are defined by grade band rather than by individual grade level and then paired with the qualitative review by an educator.

Grade Band	ATOS	Degrees of Reading Power	Flesch-Kincaid	The Lexile Framework	Reading Maturity	SourceRater
2nd–3rd	2.75 – 5.14	42 – 54	1.98 – 5.34	420 – 820	3.53 – 6.13	0.05 – 2.48
4th–5th	4.97 – 7.03	52 – 60	4.51 – 7.73	740 – 1010	5.42 – 7.92	0.84 – 5.75
6th–8th	7.00 – 9.98	57 – 67	6.51 – 10.34	925 – 1185	7.04 – 9.57	4.11 – 10.66
9th–10th	9.67 – 12.01	62 – 72	8.32 – 12.12	1050 – 1335	8.41 – 10.81	9.02 – 13.93
11th–12th	11.20 – 14.10	67 – 74	10.34 – 14.20	1185 – 1385	9.57 – 12.00	12.30 – 14.50

Book 1

TIPS FOR TAKING THE TEST

Here are some suggestions to help you do your best:

- Be sure to read all the directions carefully.
- Most questions will make sense only when you **read the whole passage**. You may read the passage more than once to answer a question. When a question includes a quotation from a passage, be sure to keep in mind what you learned from reading the whole passage. You may need to review **both** the quotation and the passage in order to answer the question correctly.
- Read each question carefully and think about the answer before choosing your response.
- Plan your time.

Directions

Read this story. Then answer questions 1 through 6.

The Private I's and the Case of the Big Stink

by Wendi Silvano

- 1 Inez brushed some brown hairs from her bedspread. Ivy fluffed up the pink pillow on her bed. Then she picked up the green pillow.
- 2 “Ack!” said Ivy. “This pillow smells!”
- 3 Inez took a whiff. “You’re right!”
- 4 Izzy came into the bedroom. “Hey,” she said, “who rolled my slippers in garbage?”
- 5 Ivy and Inez laughed.
- 6 “I’m not joking,” said Izzy. “Smell them!”
- 7 Ivy smelled the slippers. “Yuck! That smells just like my pillow.”
- 8 “What’s going on?” said Inez.
- 9 “Something smelly is going on,” said Izzy.
- 10 “But what would make my pillow and your slippers stink?” said Ivy.

GO ON

11 “This must be a case for the Private I’s,” said Izzy.
12 “I’ll get my notebook,” said Inez.
13 She wrote: *The Case of the Big Stink*.
14 “Any ideas?” she asked.
15 “Let’s see if anything else smells the same,” said Ivy.
16 “Great idea!” said Izzy.
17 Inez wrote: *Plan 1: Sniff out the stink*.
18 The Private I’s went to the kitchen. They sniffed the counter. They sniffed the
table. They sniffed the garbage can.
19 “The garbage can stinks,” said Ivy, “but not in the way my pillow does.”
20 “Let’s try the living room,” said Izzy.
21 They sniffed the curtains. They sniffed the lamps. They sniffed the sofa.
22 “Yuck!” said Ivy. “That’s the stink, all right.”
23 Inez wrote: *The sofa has the big stink*.
24 “What do Ivy’s pillow, my slippers, and the sofa have in common?” said Izzy.
25 “They all stink,” said Ivy.
26 “Ha, ha,” said Izzy.
27 “Hey! Wait a minute,” said Inez. “All of those things are soft and cushy.”
28 “That’s an important clue,” said Izzy.
29 Inez wrote: *Everything with the big stink is soft and cushy*.
30 “My pillow is the cushiest,” said Ivy. “That’s why I like to lie on it.”
31 “Hmm,” said Izzy. “The pillow and the sofa are things people lie on.”
32 “What about the slippers?” said Inez. “People don’t lie on slippers.”
33 “But Baxter does,” said Ivy. “He sleeps on anything soft.”
34 “And look—brown hairs on my slippers!” said Izzy. “I suspect Baxter rolled in
something stinky.”
35 “How can we check?” said Inez. “He’s gone with Mom.”
36 “Let’s smell his bed,” said Ivy.
37 “Brilliant!” said Izzy.
38 They all went to sniff Baxter’s bed.

39 “Yuck!”
40 Inez wrote: *Baxter is spreading the big stink.*
41 “But what is he rolling in?” asked Izzy.
42 “Let’s follow the smell,” said Ivy.
43 “Great idea,” said Izzy.
44 So Izzy, Inez, and Ivy went outside. They walked around the yard, sniffing.
45 “Check out the area behind these bushes,” said Izzy.
46 “That’s Baxter’s favorite napping spot,” said Inez. “The ground there is covered
with soft moss.”
47 She took a whiff. “It’s got the stink, all right.”
48 Ivy peeked under the bushes. “There are two rotting eggs under here. They
must be leftovers from our Easter-egg hunt. They’re all crushed from Baxter
rolling in them.”
49 Just then, Mom came home with Baxter.
50 “Someone has to give this dog a bath!” said Mom. “He stinks.”
51 Izzy, Inez, and Ivy laughed.
52 “Come on, Baxter,” said Izzy. “Let’s get you un-stinked.”
53 Inez wrote: *The Case of the Big Stink: Solved.*

1 Read these sentences from paragraphs 13 and 17 of the story.

She wrote: *The Case of the Big Stink.*

Inez wrote: *Plan 1: Sniff out the stink.*

Which **best** describes why these lines are important to the story?

- A** They show how the girls record their information.
- B** They provide proof that Inez has the best ideas.
- C** They give a clue that the story is about a dog.
- D** They show that Inez wants to be a writer.

2 In the story, which two items smell the same?

- A** the curtains and the garbage can
- B** the slippers and the counter
- C** the table and the lamps
- D** the sofa and the pillow

3 In paragraphs 27 and 28, why does Izzy think the clue is important?

- A** It shows why the smelly things are in the house.
- B** It shows a way to connect all of the smelly things.
- C** It shows that the girls need to look for more things that smell the same.
- D** It shows that the girls have become good at finding the things that smell.

4 Read the sentence from paragraph 45 of the story.

“Check out the area behind these bushes,” said Izzy.

Which **best** describes the meaning of “check out” as it is used in the sentence?

- A search
- B write on
- C sit next to
- D stay away from

5 Which **best** describes the main idea of the story?

- A Three girls write in their notebook about a smelly dog.
- B Three girls try to discover where a bad smell comes from.
- C Three girls discover that some parts of the house are smelly.
- D Three girls help look for things in the house that smell the same.

6 Why do the girls **most likely** call themselves the “Private I’s”?

- A because they want to keep a big secret
- B because they keep their information in a notebook
- C because they are all important and because of their ideas
- D because they are solving a mystery and because of their names

Read this story. Then answer questions 13 through 18.

Mary Jane and Her Recycled Sticks

by Marcia K. Wasson

- 1 Mary Jane woke up excited. She had barely slept the night before. Today when she got to school, she would turn in her art project. Mary Jane went downstairs, walked into the kitchen, and noticed the kitchen table had been cleaned off. The ice pop sticks and tissue paper she had left everywhere the night before were gone.
- 2 “Good morning, Mom,” Mary Jane said. “Thanks for cleaning up my mess! I was going to do it this morning.”
- 3 “Good morning, Mary Jane,” Mom said, smiling. “I didn’t clean up anything. I thought you put your supplies away after you finished your art project. Better grab some eggs and bacon. Dad and Josh will be down any minute.”
- 4 Mary Jane sat down with her breakfast as her dad and older brother came into the kitchen.
- 5 “Dad, Josh, did either of you clean up the mess I left on the kitchen table last night?” Mary Jane asked.
- 6 “It wasn’t me,” Dad said.
- 7 “It wasn’t me either,” Josh added with a shrug.
- 8 “Well someone cleaned up the leftover tissue paper and broken ice pop sticks,” Mary Jane said. “I didn’t, and Mom said it wasn’t her. I wonder what happened to them.”
- 9 Suddenly Smokey, the family cat, jumped up on the table. He tried to steal a piece of bacon from Josh’s plate.
- 10 “Hey!” Josh yelled. “That’s mine, Smokey! Get down!”
- 11 Smokey meowed and jumped to the floor without the bite of bacon.
- 12 “Poor Smokey,” Mary Jane sighed.
- 13 “Remember when Smokey would steal my toys when I was little?” Josh asked.

14 “I remember,” Mom said.

15 “Me too,” Dad agreed, nodding. “He drove you nuts. You would leave your jacks on the floor after playing with them, and Smokey would take several and hide them. You would have to find the missing jacks when you wanted to play again.”

16 “Maybe Smokey took my leftover art project scraps,” Mary Jane said. “Josh, what did he do with your toys when he took them?”

17 “He would hide them behind the big, ugly brown chair in the living room,” Josh said.

18 “That chair is not ugly!” Mom scolded.

19 “OK, Mom,” Mary Jane groaned. “I’m going to see if my scraps are behind it.” She hopped out of her seat and ran into the next room. With a grunt, she slowly pulled out the heavy chair. “My stuff is here!” she gasped. “And here are some hair ribbons I thought I had lost along with a wash cloth I remember dropping the other day.”

20 Josh poked his head into the living room. “Look, Josh,” Mary Jane continued, “Smokey made a bed with the pieces of tissue paper and the wash cloth. The leftover ice pop sticks and my missing ribbons are on the floor around the bed. He probably plays with those.” She laughed. “It’s sort of funny when you think about it.”

21 “What’s funny?” Josh asked.

22 “My assignment was to reuse or recycle everyday objects and make an art project out of them. I recycled and painted the ice pop sticks and I reused the colored tissue paper to make a stained glass window. The ice pop sticks are the borders and the colored tissue paper is the glass.”

23 “I still don’t see why that’s funny,” Josh said.

24 “Smokey recycled and reused my leftovers!” Mary Jane explained. “He recycled the tissue paper and sticks that I was going to throw away! He reused the wash cloth as bedding. I never thought about animals recycling and reusing.”

25 “That is funny,” Dad called from the kitchen. “Now move the chair back and let’s finish breakfast.”

26 Mary Jane pushed the chair back in place and sat back down at the table. Smokey walked over and sat next to Mary Jane’s chair and looked up at her. She leaned over and patted his head. “Thanks, Smokey,” she said. “This will be a funny story to tell my teacher. And it’s a great idea for another class project—what does your pet recycle and reuse?”

GO ON

13 Which detail would be **most** important to include in a summary of the story?

- A** Mary Jane is bringing her art project to school that day.
- B** Mary Jane notices that her art leftovers are gone from the table.
- C** Mary Jane thanks her mother for cleaning the table.
- D** Mary Jane plans to eat some eggs and bacon for breakfast.

14 Why is paragraph 17 important to the rest of the story?

- A** It introduces Smokey's favorite piece of furniture.
- B** It introduces a conflict between Josh and his mother.
- C** It suggests that Josh knows where Smokey hides.
- D** It gives the information that helps Mary Jane solve the problem.

15 Read these sentences from paragraph 19.

She hopped out of her seat and ran into the next room. With a grunt, she slowly pulled out the heavy chair.

Which words give the **best** clue for why Mary Jane grunts?

- A** "hopped out"
- B** "ran into"
- C** "she slowly"
- D** "heavy chair"

- 16** Which items suggest that Smokey has been taking things for a long period of time?
- A** Mary Jane's hair ribbons
 - B** bits of tissue paper
 - C** Josh's piece of bacon
 - D** broken ice pop sticks

- 17** What does paragraph 22 **mostly** show about Mary Jane?
- A** She is very creative.
 - B** She is an excellent student.
 - C** She enjoys art class.
 - D** She spends a lot of time on her assignments.

- 18** What did Mary Jane make for her art project?
- A** a sheet of glass with colored tissue paper
 - B** a fancy window with ice pop sticks and colored tissue paper
 - C** a tiny home with ice pop sticks and colored tissue paper
 - D** a bed frame with ice pop sticks

TIPS FOR TAKING THE TEST

Here are some suggestions to help you do your best:

- Be sure to read all the directions carefully.
- Most questions will make sense only when you **read the whole passage**. You may read the passage more than once to answer a question. When a question includes a quotation from a passage, be sure to keep in mind what you learned from reading the whole passage. You may need to review **both** the quotation and the passage in order to answer the question correctly.
- Read each question carefully and think about the answer before choosing your answer or writing your response.
- For written-response questions, be sure to
 - clearly organize your writing and express what you have learned;
 - accurately and completely answer the questions being asked;
 - support your responses with examples or details from the text; and
 - write in complete sentences using correct spelling, grammar, capitalization, and punctuation.
- For the last question in this test book, you may plan your writing on the Planning Page provided but do NOT write your final answer on this Planning Page. Writing on this Planning Page will not count toward your final score. Write your final answer on the lined response pages provided.
- Plan your time.

Directions

Read this passage. Then answer questions 25 through 31.

Start Your Engines!

by Ari Mahler

1 An empty highway stretches for miles ahead of you. The engine hums. The car hugs the road. What a sweet ride.

2 Now imagine a world without cars. It's hard! The invention of cars changed how and where we live. Take a drive back through time to see how.

The Need for Speed

3 Before cars, people used their own feet or animals for transportation. People walked. They rode horses, camels, even elephants. Or they drove wagons, carriages, or sleds. Animals provided the power. Travel was slow and difficult. People rarely went far. They couldn't carry many goods with them.

4 Inventors began to dream. What could go faster? What could haul heavier loads? Could they build a vehicle with its own source of power?

Full Steam Ahead

5 In 1769, an inventor named Nicolas Joseph Cugnot found an answer. He was a soldier in the French army. He watched horses slowly move weapons to the battlefield, one cannon at a time.

6 Cugnot had a better idea. He built a carriage. It rolled on three wooden wheels. On the front, he put a big metal boiler. It looked like a giant, black teakettle attached to a tricycle. The boiler heated water. That made steam. Pressure from the steam forced the front wheel to roll.

7 Cugnot had built the first automobile, or car. Auto means "self." Mobile means "moving." Cugnot's invention could move all by itself.

8 Cugnot's car was stronger than any horse. It was powerful enough to pull a few cannons at once. But it wasn't perfect.

9 Its top speed was about 4 kilometers (2.5 miles) per hour. It had to stop every 20 minutes to build up new steam. Steam engines also were heavy and noisy. They had a strong odor, too. And people worried the boiler might explode.

GO ON

Battery Power

10 Other car inventors had a different idea for power. Would electric batteries work? The first electric car was invented in the 1830s in Scotland. By 1900, electric cars were the most popular kind of car in the U.S. They were quiet. They didn't smell as much.

11 Yet they had drawbacks, too. Most could only go about 30 to 60 kilometers (20 to 40 miles). Then the battery died. Places to plug in and recharge the battery were scarce.

12 Electric cars didn't have enough power to push through muddy roads. And most were slow. The New York City police used bicycles to catch "speeding" motorists!

Hitting the Gas

13 In the 1880s, two German inventors had an idea. It changed cars forever. Working separately, they each built a car powered by a gasoline engine. Gas-powered cars could go faster. Plus, the cars had fuel tanks to store extra gasoline. Cars could now travel longer distances.

14 The first gas-powered cars cost up to \$2,000. That was a lot of money in 1900. It took a typical person in the U.S. four years to earn that much. Only the richest people could afford these cars.

15 Henry Ford changed that. He built a car that sold for \$260. He sold cars so cheaply because he had a faster way to make them.

16 Inside his factory, each worker installed a different car part. The workers stood along an assembly line. The car moved through the factory on a conveyor belt. It got a part from each worker. Within one hour, workers could put together all 700 parts of Ford's Model T car.

17 Now many middle-class families could afford to buy a car. By 1927, more than 15 million Model Ts had rolled off the assembly line and chugged their way onto America's roads.

- 25 In paragraph 4, the word “vehicle” means something that
- A leads to questions
 - B takes years to create
 - C moves people and goods
 - D encourages people to invent
- 26 Why was Nicolas Joseph Cugnot’s invention able to move by itself?
- A It used steam.
 - B It had wheels.
 - C It was very large.
 - D It was very strong.
- 27 Read this sentence from paragraph 11.
- Yet they had drawbacks, too.**
- The word “drawbacks” shows that the electric car
- A was not quickly accepted by the public
 - B changed the way that people traveled
 - C did not provide a perfect solution
 - D used batteries for power
- 28 How do paragraphs 10 through 15 support a main idea of the passage?
- A by discussing how several inventors improved cars
 - B by listing the names of countries to show how far apart they are
 - C by describing the condition of the streets to show the need for better roads
 - D by showing that drivers had to be stopped because their cars were going too fast

- 29** The first gas-powered cars were an improvement on the electric car because the gas-powered cars
- A** did not cost much
 - B** did not smell bad
 - C** were able to travel farther
 - D** made less noise when driven
- 30** How are paragraphs 14 through 17 connected?
- A** They show a problem that existed and explain how Henry Ford solved it.
 - B** They describe the order of steps to move a Model T from the factory to the roads.
 - C** They compare the number of parts in a Model T to the number of parts in other cars.
 - D** They explain the effect of typical earnings on the people who worked for Henry Ford.
- 31** The headings divide the passage by the
- A** uses for automobiles
 - B** changes in automobiles
 - C** inventors of automobiles
 - D** popularity of automobiles

Excerpt from *How To Convince Your Parents You Can . . . Care For A Kitten*

by Stephanie Bearce

- 1 Would you like a furry pet that likes to jump, play, cuddle, and purr? If so, a kitten could be the perfect pet for you. Baby cats are called kittens, and they like to be with people. They enjoy playing games, chasing string, and batting balls with their paws. Kittens love sitting on a person's lap and being petted. They are small and like to live inside with people. Kittens make great pets.
- 2 Have your parents said that a pet would be too messy in the house? Kittens are neat and tidy animals. They do not often need a bath because they use their tongues and paws to clean their fur. Kittens are also tidy about their bathroom habits and quickly learn to use a litter box.
- 3 Do your parents say that a pet needs lots of room? Are they worried about exercising a pet? You can tell them that kittens do not need a lot of space. They are happy living in small apartments and are good pets for people who live in towns and cities. Kittens do not need to go to the park for exercise, and they do not need to be walked on a leash. They exercise by jumping and running around the house. Because they are so active, it is important to keep their play space clean and free from objects that could hurt them. Kittens must be supervised to ensure they don't tear up things they shouldn't—like furniture, carpets, or curtains.
- 4 Do your parents think it costs too much for a pet? You can tell them that kittens are not too expensive. You can adopt kittens from animal shelters, or you can look in the newspaper to find people who are giving away kittens for free. Kittens do not need lots of expensive food. Most kittens like to eat dry cat food. They only need about a cup of food a day. Kittens do need regular visits to the veterinarian. Every year your kitten will need shots to keep him or her healthy. This can cost over \$100. Sometimes kittens can become ill, and they may need medicine from a veterinarian. This is another cost of having a kitten for a pet.

GO ON

- 5 When kittens are happy they will purr. Purring is a deep rumbling sound in the kitten's chest. It is fun to pet a kitten and make it purr.
- 6 Petting a kitten can also make you feel better when you have had a bad day. Doctors have found that when people sit quietly and pet a kitten, their hearts beat slower. That makes their blood pressure lower, and low blood pressure is a good thing. You can tell your family that having a kitten will be good for their health.
- 7 Kittens are fun to watch. They are great athletes. This is because they have a good sense of balance. If they jump or fall, they usually land on their feet. They have special muscles that help them twist their bodies in the air. Kittens have strong leg muscles. They learn to climb and jump when they are very young.
- 8 Kittens are smart and love to learn. Sometimes people think that you cannot teach a kitten tricks. That is because kittens are independent. They like to explore on their own and do what they want. But kittens can learn rules and how to obey. You can teach your kitten to come and sit, to lie down, and maybe even how to ring doorbells and flush toilets.
- 9 Today, kittens are some of the most popular pets in the world. You can find them in apartments in New York City. You can see them in Paris, France, or on farms in Missouri. Almost anywhere there are people, you will find kittens.

Read this story. Then answer question 34.

Emma misses her father, who is working in Turkey. In addition, her best friend, Tem, will be moving away at the end of the school year. Emma has told her teacher that she and Tem will work together on a report about North Dakota, the state where Emma's parents were born.

Excerpt from *Leaving Emma*

by Nancy Steele Brokaw

1 It took Tem and me two weeks to finish with North Dakota. We had to research the official state things like the bird, flower, and song, as well as the state history and what important people came from North Dakota. I drew a page-size version of the state flag that we used as a report cover.

2 We got out a ruler and measured. The distance from Fargo, N.D., to Grand Forks, N.D., was seventy-five miles. That was the same as the distance from my house in Champaign to Tem's new house, which they hadn't even bought yet, in Kankakee. We'd driven through North Dakota before, to visit my grandma. It was like driving across the moon.

Champaign and Kankakee are towns in the state of Illinois

3 The leaves were really falling, since it was the end of October. It was snowing in colors. Dad and I had always raked the leaves together. Now Mom said cleaning up the leaves was my job.

4 "Hey, Mom," I said, "since you want me to do the leaves, I was wondering if you'd mind typing our North Dakota paper? It's worth extra credit."

5 Mom was always up for typing. Before I was born, she worked as a secretary at Caterpillar, which I thought was a goofy name for a big factory.

6 "Sure," said Mom.

7 "Want to try it on the computer?" I asked.

8 "I wish I knew how," she said. "I'd love to be able to move words around and add graphs and pictures. One of these days I'll learn."

9 "You should," I said. "Anyway, I'll do the leaves and you do the typing."

10 "That's a deal," said Mom.

- 11 I got Tem to help me. We raked the leaves into little piles, and then we raked the little piles into bigger piles and finally into one big pile that we jumped in.
- 12 Sometimes when we raked, I could see my dad raking alongside us. Not the way you see people in real life or on TV, but in a different way, sort of inside my head. I needed to remember to tell Dad about this when he called.
- 13 That night I found a half-empty notebook and glued a piece of white paper on the cover. I drew a border of pens, pencils and markers. In the center, in cursive, I wrote *Day by Day*. At first I was going to call it *Emma's Journal*, but I thought "Day by Day" sounded a lot better. I didn't want to write a bunch of words, so that night I wrote just one: *leaves*. If I read that one word, I'd remember the rest and be able to tell Dad.
- 14 I wrote down *soccer*, too, because I had sort of, almost, scored a goal, and I figured Dad would want to know. Dad liked soccer a lot more than I did.
- 15 After my bath I shut the door and climbed up on my bed. I held Dad's pocket watch in my hand. It felt smooth and solid and the right amount of heavy, like a good rock. I heard the seconds ticking out the time. Time was falling away, like leaves blowing to the ground. When I wound the watch, I thought about how I wanted time to speed up to bring Dad home, and I wanted time to slow down so Tem could be my best friend longer.
- 16 It was five in the morning in Turkey. Dad would still be sleeping. I wrapped the watch in a bandanna and set it on my nightstand. I heard it ticking. I heard the wind blowing. Winter was coming, my last winter with Tem.

What does the reader learn about the kind of person Emma is? How do Emma's actions show the kind of person she is? Use details from the story to support your response.

In your response, be sure to

- explain what kind of person Emma is
- explain how Emma's actions show the kind of person she is
- use details from the story to support your response

TIPS FOR TAKING THE TEST

Here are some suggestions to help you do your best:

- Be sure to read all the directions carefully.
- Most questions will make sense only when you **read the whole passage**. You may read the passage more than once to answer a question. When a question includes a quotation from a passage, be sure to keep in mind what you learned from reading the whole passage. You may need to review **both** the quotation and the passage in order to answer the question correctly.
- Read each question carefully and think about the answer before writing your response.
- In writing your responses, be sure to
 - clearly organize your writing and express what you have learned;
 - accurately and completely answer the questions being asked;
 - support your responses with examples or details from the text; and
 - write in complete sentences using correct spelling, grammar, capitalization, and punctuation.
- For the last question in this test book, you may plan your writing on the Planning Page provided but do NOT write your final answer on this Planning Page. Writing on this Planning Page will not count toward your final score. Write your final answer on the lined response pages provided.
- Plan your time.

A Stinky Plant Hike

by Anne Esenther

- 1 “E-e-e-w, what stinks?” Mary exclaimed.
- 2 Mary was hiking with her friend, Roger. Mary liked hiking with Roger because he knew about plants.
- 3 It was early spring. They walked along a narrow trail through wet, swampy land. A slow-moving stream wound beside the path. On the bank, Mary saw purplish-brown, leaf-like hoods poking up from the soil. Each one wrapped around a yellow, pulpy blob. To Mary, they seemed like aliens from another planet. She was curious and inched closer.
- 4 “You’ll be sorry,” said Roger.
- 5 Mary leaned down. She poked one with a stick. A foul odor met her nose. “These smell like skunk,” she said.
- 6 “Congratulations,” said Roger. “You’ve discovered skunk cabbage. The purple part is called the spathe. The yellow is the flower.”
- 7 “But why does it smell so bad?” Mary asked.
- 8 “What do you think?” Roger replied.
- 9 Mary thought for a moment. “To keep people away,” she said.
- 10 “Think,” said Roger, “and look again.”
- 11 Mary gazed at the strange-looking plants. Upon careful examination, she noticed flies, butterflies, bees, and beetles.
- 12 “To attract insects!” she said triumphantly.
- 13 “But why?” asked Roger.
- 14 Mary crinkled her eyebrows and frowned slightly while she pondered his question. Slowly, a smile crept across her face. “I know,” she said, “pollen.”

GO ON

15 “Right,” Roger said. “Some insects eat rotting things. They are attracted to stinky smells because to them it means there’s food nearby. While they crawl around looking for food, they collect pollen. When they fly or crawl away, they bring the pollen to other plants.”

16 “So, the stinky smell of skunk cabbage fools them,” said Mary.

17 “Right again,” said Roger. “Let’s see what else we can find.”

18 They continued hiking. Soon, Mary and Roger came to an open, grassy field with sandy soil. As they walked along, they noticed tall, grass-like plants dotting the landscape.

19 “E-e-e-w, what stinks?” Mary asked again. Her shoe accidentally crushed a plant. The smell made tears come to her eyes.

20 “This smells like garlic,” she said.

21 “It is wild garlic,” said Roger. “How is it different from skunk cabbage?”

22 “It smells different,” said Mary.

23 “Good, what else?” Roger asked.

24 “The leaves are different,” Mary said.

25 “What else?” Roger asked again.

26 Mary wiped her eyes and peered at the plant. She looked and looked but couldn’t think of anything.

27 “No insects,” said Roger.

28 “Why?” Mary asked.

29 “The leaves of wild garlic contain sulfur-like compounds. They are released when the leaf is crushed. They are what make you cry. They also protect the plant by keeping insects from chewing on the leaves,” Roger explained.

30 Then, Roger grinned. “Let’s go home and have some garlic bread,” he said.

31 Mary smiled. “That stinks,” she said.

32 On the way back, Mary reviewed what she learned on their stinky plant hike. Plants stink for different, sometimes opposite reasons. Certain plants, like skunk cabbage, stink to attract insects. Other plants, like wild garlic, stink to keep them away.

35 Why does Roger ask Mary so many questions? Use **two** details from the story to support your response.

36 Read these paragraphs from the story.

“E-e-e-w, what stinks?” Mary exclaimed. (paragraph 1)

“E-e-e-w, what stinks?” Mary asked again. Her shoe accidentally crushed a plant. The smell made tears come to her eyes. (paragraph 19)

Why does the author repeat “E-e-e-w, what stinks?” in paragraphs 1 and 19? Use **two** details from the story to support your response.

Read this story. Then answer questions 37 and 38.

Julia and her father are cleaning the dinner dishes when Julia’s classmate, Patrick, knocks on the door.

Excerpt from *Project Mulberry*

by Linda Sue Park

- 1 We were almost done when Patrick knocked at the door and came in. He wasn’t a member of the family, so he knocked, but he was *almost* a member of the family, so he came in without waiting for anyone to answer. He yelled hi as he went up to my room to get his backpack, then came down again.
- 2 “Can I help?” he asked.
- 3 “It’s okay, Patrick, we’re almost finished,” my dad said.
- 4 Patrick sat at the table and opened his backpack. Just then my mom came into the room.
- 5 “I thought of a project you might be able to do,” she said quietly.
- 6 “Really?” I said at the same time that Patrick said, “What is it?” I stopped scraping the plate I was holding.
- 7 My mom’s eyes twinkled at me.
- 8 “Worms,” she said.
- 9 I stared at her for a second. “Worms?” I said.
- 10 My mom nodded.
- 11 “We’d raise worms?” I said. “You mean, like, for fishermen to use as bait?”
- 12 Right away a whole bunch of thoughts started jostling around in my mind. I turned to Patrick. “Maybe we could have them in an aquarium, but filled with dirt instead of water, and that way you could see them through the glass.”
- 13 Patrick looked doubtful. “Worms,” he said slowly. “I don’t know. . . .”
- 14 Then he started talking faster. “I read a book a while ago. There was this part where the people released bags and bags full of ladybugs on a farm because they were good for the plants. Or something like that. Somebody had to raise those ladybugs to get so many bagfuls, didn’t they? Maybe we could raise ladybugs—”

GO ON

15 My mom laughed and held up her hand. “Slow down, you two. I wasn’t thinking of earthworms. Or ladybugs.”

16 I said, “Well, what other kind of worms . . . Oh, like caterpillars, you mean? ‘The Life Cycle of the Monarch Butterfly’ or something?”

17 I didn’t mean to sound impatient—I knew my mom was only trying to help. But raising caterpillars was more like a science-fair project, not a Wiggle project.

Wiggle = a club for school-aged kids

18 “Sort of. No, not exactly.” My mom took the plate out of my hand and gave it to my dad. “I was thinking you could do a silkworm project.”

19 I stared at her with my mouth half-open.

20 “My grandmother raised silkworms in Korea,” my mom said. “I used to help her. It’s really quite interesting, and it’s not like butterflies. I mean, it is in some ways, but it’s more than that. Because at the end you get an actual product—the silk.”

21 “It’s sort of like sheep,” Patrick said. “Only instead of sheep and wool, it’s caterpillars and silk. . . .”

22 I was pretty sure I’d already known that silk came from silkworms. But I’d never really thought about it before.

23 “Exactly,” my mom said. “It would be on a small scale, of course—you wouldn’t end up with enough silk to make fabric. But you might get enough for some thread.”

24 “Thread?” Patrick opened his eyes wide. He took a deep breath, swallowed, and sort of shook himself. Then he stood up and started pacing around the kitchen. “Jules, we can raise the—the caterpillars, and get thread from them, and then you can *sew* something with the thread, and we can enter the project in two categories—Animal Husbandry and Domestic Arts!”

25 He looked at me, his face all business. “I’ll get started on the Internet—oh, wait,” he said, and frowned at his watch. “It’s not even seven-thirty. I can’t do it yet.”

26 Patrick knew our family’s evening routine. Kenny got the computer until eight o’clock, and I got it after that.

27 “Homework comes first anyway, you two,” my mom said.

28 I went to get my backpack, wondering when Patrick would notice that I was not one bit excited about doing a silkworm project.

Read this passage. Then answer questions 39 and 40.

In 1939, Oscar Chapman learned that a young African-American woman named Marian Anderson was not allowed to sing at Constitution Hall in Washington, D.C., because of the color of her skin. He and his friend Walter White worked together to give her the opportunity to have a concert at the Lincoln Memorial instead.

Excerpt from *Sweet Land of Liberty*

by Deborah Hopkinson

- 1 The Lincoln Memorial had never been used for a public gathering. But Oscar wasn't about to let that stop him. Oscar went to see his boss, Harold Ickes, who agreed to talk to his boss: President Franklin Roosevelt!
- 2 Oscar stood by anxiously as Ickes called President Roosevelt to ask his permission.
- 3 “Tell Oscar to let Marian Anderson sing at the top of the Washington Monument if she wants to,” President Roosevelt said. “It’s a wonderful idea.”
- 4 Oscar had a big job ahead of him. He wanted to make sure people in the government showed their support for Marian. He knew some wouldn’t want to come. Like the school board members back in Oscar’s hometown, they didn’t believe in equal rights.
- 5 Oscar decided to put them on the spot. He sent invitations by telegram to every important government official, senator, and representative. Not only that, he asked the messenger to bring back a signed receipt for each one. No one would be able to claim he didn’t get an invitation!
- 6 “One man wadded up the telegram and threw it down,” the messenger told Oscar. “He said, ‘That squirt Oscar Chapman is stirring up trouble.’”
- 7 Oscar laughed. Stirring things up was exactly what he aimed to do.
- 8 On Easter Sunday, April 9, 1939, people gathered early near the Lincoln Memorial. Thousands came in buses from Philadelphia, Marian Anderson’s hometown.

GO ON

9 At first the day was cold and cloudy. But soon the sky cleared. By five o'clock, when the concert was set to begin, the crowd stretched from the Lincoln Memorial to the Washington Monument.

10 Constitution Hall, where Marian Anderson had hoped to sing, could seat 4,000 people. But now 75,000 people of all ages and races would hear her.

11 When Marian stepped forward, she looked out on a vast sea of faces. She could feel a great wave of good will pouring out from everyone. She took a deep breath, and sang from her heart.

12 Marian chose to begin by singing not just about, but to the country she loved, changing the words of a beloved old song. A hush came over the crowd as her powerful voice rang forth.

*My country, 'tis of thee,
Sweet land of liberty,
To thee we sing;
Land where my fathers died,
Land of the pilgrims' pride,
From every mountainside
Let freedom ring!*

13 As the concert ended, Walter White caught sight of a young girl in the crowd. He saw her stretch out her hands toward the great singer. Tears streamed down her face and hope gleamed in her eyes. Walter remembered that girl for the rest of his life.

14 Thousands of people heard Marian Anderson sing that day. It was the largest concert crowd the capital had ever seen, and the first major gathering at the feet of Abraham Lincoln for the cause of civil rights.

15 But not the last. Twenty-four years later, Martin Luther King Jr., made his most famous speech in the same place.

16 And Oscar Chapman?

17 Well, he set about opening parks and swimming pools in Washington, D.C., to everybody, whatever the color of his or her skin.

18 Oscar Chapman was a man who liked to keep stirring things up. After all, sometimes that's the only way to get things to change.

39

What do paragraphs 12 and 13 show about the audience who listened to Marian Anderson sing at the Lincoln Memorial? Use **two** details from the passage to support your response.
