**8:30 A.M. (Eastern) Thursday, August 27, 2020**

## REVISION TO SEASONAL ADJUSTMENT FACTORS

Beginning with the Unemployment Insurance (UI) Weekly Claims News Release issued Thursday, September 3, 2020, the methodology used to seasonally adjust the national initial claims and continued claims will reflect additive factors as opposed to multiplicative factors.

Seasonal adjustment factors can be either multiplicative or additive. A multiplicative seasonal effect is assumed to be proportional to the level of the series. A sudden large increase in the level of the series will be accompanied by a proportionally large seasonal effect. In contrast, an additive seasonal effect is assumed to be unaffected by the level of the series. In times of relative economic stability, the multiplicative option is generally preferred over the additive option. However, in the presence of a large level shift in a time series, multiplicative seasonal adjustment factors can result in systematic over- or under-adjustment of the series; in such cases, additive seasonal adjustment factors are preferred since they tend to more accurately track seasonal fluctuations in the series and have smaller revisions.

Prior to September 2020, the seasonally adjusted unemployment insurance claims series used multiplicative seasonal adjustment factors. Starting in September Bureau of Labor Statistics staff, who provide the seasonal adjustment factors, specified these series as additive. In accordance with the usual practice, the seasonal adjustment models and factors will be reviewed at the beginning of each calendar year, when prior years of seasonally adjusted estimates will be subject to revision.

## UNEMPLOYMENT INSURANCE WEEKLY CLAIMS

### SEASONALLY ADJUSTED DATA

In the week ending August 22, the advance figure for seasonally adjusted **initial claims** was 1,006,000, a decrease of 98,000 from the previous week's revised level. The previous week's level was revised down by 2,000 from 1,106,000 to 1,104,000. The 4-week moving average was 1,068,000, a decrease of 107,250 from the previous week's revised average. The previous week's average was revised down by 500 from 1,175,750 to 1,175,250.

The advance seasonally adjusted **insured unemployment rate** was 9.9 percent for the week ending August 15, a decrease of 0.2 percentage point from the previous week's revised rate. The previous week's rate was revised down by 0.1 from 10.2 to 10.1 percent. The advance number for seasonally adjusted **insured unemployment** during the week ending August 15 was 14,535,000, a decrease of 223,000 from the previous week's revised level. The previous week's level was revised down by 86,000 from 14,844,000 to 14,758,000. The 4-week moving average was 15,215,750, a decrease of 604,000 from the previous week's revised average. The previous week's average was revised down by 21,500 from 15,841,250 to 15,819,750.

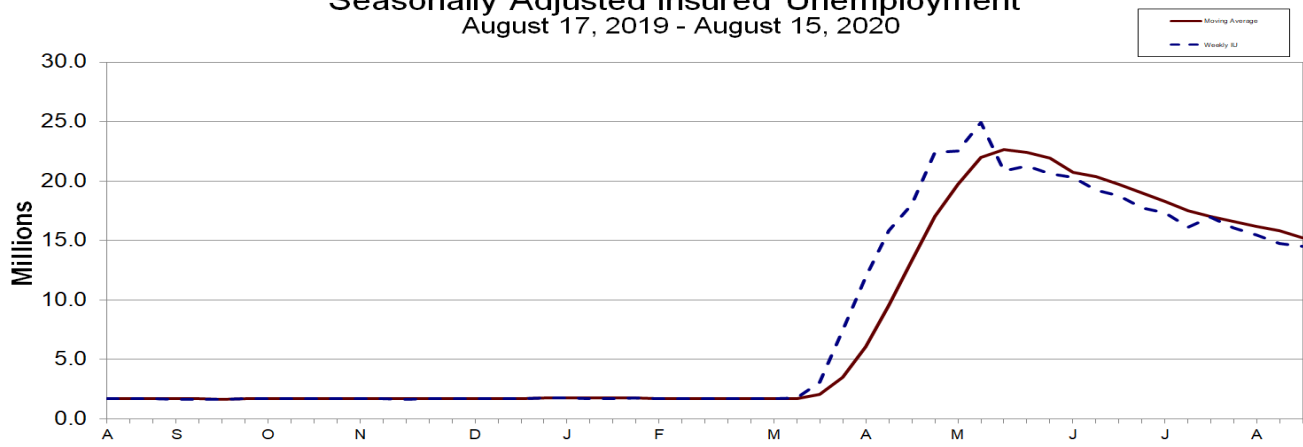

### Seasonally Adjusted Initial Claims

August 24, 2019 - August 22, 2020

# Seasonally Adjusted Insured Unemployment

August 17, 2019 - August 15, 2020

**UNADJUSTED DATA**

The advance number of actual initial claims under state programs, unadjusted, totaled 821,591 in the week ending August 22, a decrease of 67,958 (or -7.6 percent) from the previous week. The seasonal factors had expected an increase of 12,140 (or 1.4 percent) from the previous week. There were 176,867 initial claims in the comparable week in 2019. In addition, for the week ending August 22, 51 states reported 607,806 initial claims for Pandemic Unemployment Assistance.

The advance unadjusted insured unemployment rate was 9.5 percent during the week ending August 15, a decrease of 0.2 percentage point from the prior week. The advance unadjusted number for persons claiming UI benefits in state programs totaled 13,909,872, a decrease of 272,941 (or -1.9 percent) from the preceding week. The seasonal factors had expected a decrease of 59,034 (or -0.4 percent) from the previous week. A year earlier the rate was 1.1 percent and the volume was 1,615,803.

The total number of people claiming benefits in all programs for the week ending August 8 was 27,017,232, a decrease of 1,042,323 from the previous week. There were 1,644,315 persons claiming benefits in all programs in the comparable week in 2019.

During the week ending August 8, Extended Benefits were available in the following 52 states: Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Puerto Rico, Rhode Island, South Carolina, Tennessee, Texas, Vermont, the Virgin Islands, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

Initial claims for UI benefits filed by former Federal civilian employees totaled 1,145 in the week ending August 15, a decrease of 32 from the prior week. There were 1,029 initial claims filed by newly discharged veterans, a decrease of 2 from the preceding week.

There were 13,968 former Federal civilian employees claiming UI benefits for the week ending August 8, a decrease of 646 from the previous week. Newly discharged veterans claiming benefits totaled 13,566, a decrease of 346 from the prior week.

During the week ending August 8, 49 states reported 10,972,770 individuals claiming Pandemic Unemployment Assistance benefits and 49 states reported 1,407,802 individuals claiming Pandemic Emergency Unemployment Compensation benefits.

The highest insured unemployment rates in the week ending August 8 were in Hawaii (19.8), Puerto Rico (19.2), Nevada (17.3), California (16.1), New York (15.4), Connecticut (13.6), Louisiana (13.5), the Virgin Islands (12.8), Georgia (12.6), and Massachusetts (12.2).

The largest increases in initial claims for the week ending August 15 were in New Jersey (+11,580), Florida (+11,190), New York (+9,879), Texas (+9,096), and Tennessee (+3,793), while the largest decreases were in California (-12,155), Nevada (-6,817), Georgia (-4,236), Puerto Rico (-2,864), and Pennsylvania (-1,510).

Wisconsin	13,903	14,834	-931	162,778	173,270	-10,492
Wyoming	846	861	-15	10,556	10,568	-12
US Total	821,591	889,549	-67,958	13,909,872	14,182,813	-272,941

Note: Advance claims are not directly comparable to claims reported in prior weeks. Advance claims are reported by the state liable for paying the unemployment compensation, whereas previous weeks reported claims reflect claimants by state of residence. In addition, claims reported as "workshare equivalent" in the previous week are added to the advance claims as a proxy for the current week's "workshare equivalent" activity.

Figures appearing in columns showing over-the-week changes reflect all revisions in data for prior week submitted by state agencies.

1. The Unemployment Compensation program for Federal Employees (UCFE) and the Unemployment Compensation for Ex-servicemembers (UCX) exclude claims filed jointly under other programs to avoid duplication.
2. Rate is not seasonally adjusted. The source of U.S. total covered employment is BLS.

## TECHNICAL NOTES

This news release presents the weekly unemployment insurance (UI) claims reported by each state's unemployment insurance program offices. These claims may be used for monitoring workload volume, assessing state program operations and for assessing labor market conditions. States initially report claims directly taken by the state liable for the benefit payments, regardless of where the claimant who filed the claim resided. These are the basis for the advance initial claims and continued claims reported each week. These data come from ETA 538, Advance Weekly Initial and Continued Claims Report. The following week initial claims and continued claims are revised based on a second reporting by states that reflect the claimants by state of residence. These data come from the ETA 539, Weekly Claims and Extended Benefits Trigger Data Report.

### A. Initial Claims

An initial claim is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place and these result in activity counts including the count of initial claims. The count of U.S. initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data which are difficult to seasonally adjust, making the series subject to some volatility.

### B. Continued Weeks Claimed

A person who has already filed an initial claim and who has experienced a week of unemployment then files a continued claim to claim benefits for that week of unemployment. Continued claims are also referred to as insured unemployment. The count of U.S. continued weeks claimed is also a good indicator of labor market conditions. Continued claims reflect the current number of insured unemployed workers filing for UI benefits in the nation. While continued claims are not a leading indicator (they roughly coincide with economic cycles at their peaks and lag at cycle troughs), they provide confirming evidence of the direction of the U.S. economy.

### C. Seasonal Adjustments and Annual Revisions

Over the course of a year, the weekly changes in the levels of initial claims and continued claims undergo regularly occurring fluctuations. These fluctuations may result from seasonal changes in weather, major holidays, the opening and closing of schools, or other similar events. Because these seasonal events follow a more or less regular pattern each year, their influence on the level of a series can be tempered by adjusting for regular seasonal variation. These adjustments make trend and cycle developments easier to spot. At the beginning of each calendar year, the Bureau of Labor Statistics provides the Employment and Training Administration (ETA) with a set of seasonal factors to apply to the unadjusted data during that year. Concurrent with the implementation and release of the new seasonal factors, ETA incorporates revisions to the UI claims historical series caused by updates to the unadjusted data.
