

Newtech HARDWARE

PRODUCT CATALOGUE

Newtech HARDWARE

Newtech Hardware is an established supplier of twinslot and fixed bracket shelving systems, along with a growing range of hardware and ironmongery products.

The Newtech twinslot shelving range has become the preferred choice with architects and specifiers, and can be found in many schools, hospitals, colleges and universities, as well as commercial buildings and in the home.

Stockists and distributors have come to rely on the quality of Newtech products; the range now includes a comprehensive selection of own brand abrasives, line marking paint, chrome tubes, worktop accessories and floor trims.

As we continue to develop our range, our aim is to offer our customers high quality hardware and ironmongery products at competitive prices, along with the highest standards of service and customer care. For further information and enquiries, please contact our sales office.

The Newtech range of twinslot shelving is treated with anti-bacterial powder coating, making it particularly suitable for use in classroom and laboratory environments.

The information given in this catalogue has been checked for accuracy and every effort has been made to ensure that it is free from error. We cannot accept responsibility for any errors that may arise in the text, E&OE (errors & omissions excepted).

Formulation

Raw material: prime mild steel

Newtech Drop & Lock architectural steel shelving is manufactured from the best quality mild steel.

Paint Finish

Pre-treatment: Phosphate dip degrease
Finish: High quality polyester anti-bacterial powder coat
Colour: RAL 9016

Durability

The phosphate pre-treatment ensures keying and bonding to the metal, while the polyester powder coat is impervious to most commonly encountered chemicals and solvents, ensuring maintenance of its attractive appearance during many years of hard-wearing service.

Strength

One of the features of this system is its inherent strength. The following chart shows maximum recommended weight loadings per bracket. These are based on results achieved by independent testing (see below¹) and incorporate a minimum 50% safety margin to cover usage in all working situations.

Maximum recommended weight loadings per bracket

Code	Length		Max Load ² (Kgs*)
11205	4½	12cm	149
11207	6½	17cm	104
11209	8½	22cm	84
11211	10½	27cm	62
11213	12½	32cm	55
11215	14½	37cm	50
11315	14½	37cm	98
11319	18 ½	47cm	72
11419	18 ½	47cm	72
11324	24	61cm	67
11424	24	61cm	67
Reinforced			
21143	100mmx75mm		35
21165	150mmx120mm		47
21186	200mmx150mm		45
21108	250mmx200mm		53
Mitred			
21288	200mmx200mm		78
21200	250mmx250mm		66
21222	300mmx300mm		55
21244	350mmx350mm		55

² = maximum load (including safety margin) where the load is at the centre of the bracket length specified.

Performance in use

Newtech Drop & Lock architectural steel shelving has been designed to meet the highest of demands in a variety of situations. It's construction from heavy gauge mild steel means that it can be trusted to meet the demands of load bearing for long periods without failing or deforming.

The construction together with its high quality polyester anti-bacterial powder coat finish, means that the product will maintain its appearance and performance even in conditions of heavy prolonged use.

Safety

Newtech architectural shelving incorporates a safety protection feature which prevents the bracket (and shelf) being accidentally dislodged while in use. The bracket first slots and then drops into place, effectively locking the bracket once it is in this position, it cannot be dislodged unless first the shelf is removed and then the bracket is angled upwards to enable withdrawal from the upright.

Applications

Existing applications include the following:

Institutional	Universities, colleges, schools, libraries public buildings
Commercial	Offices, retail, storerooms, showrooms, veterinary clinics
Healthcare	Hospitals, clinics, laboratories, medical research establishments dental laboratories plus many more

Accessories

The range of bookends (4 designs) is designed to meet the variety of applications anticipated for the product including libraries, offices and institutional uses.

These are complemented by a comprehensive range of steel shelves from a company with long experience in fabrication from sheet and tubular steel.

Where the ranges described herein still fail to meet the demands of a specific application Newtech is also able to offer a bespoke production facility.

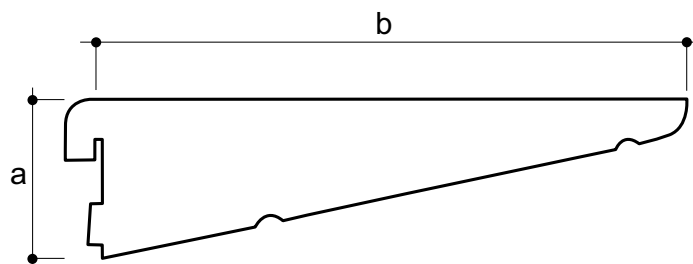

¹ Independent testing of uprights and brackets was conducted during March and April 2000. Detailed results available upon request.

Tests conducted by:
Salford University Faculty of Engineering, Department of Aeronautical, Mechanical and Manufacturing Engineering, The University of Salford. M5 4WT, England.

11178	6	38mm	380mm	380mm
11194	6	38mm	445mm	476mm

Fixing of wall uprights

The strength of the installation is dependent on the strength of these fixings; it is the installers responsibility to ensure the strength and suitability of these fixings (especially when fixing to partitions or hollow/stud walling) and that the substrate material is adequate.

The wall uprights are countersunk to accept no. 12

screws which will sit into the countersink without projection.

The length of the screw will be selected on site as appropriate.

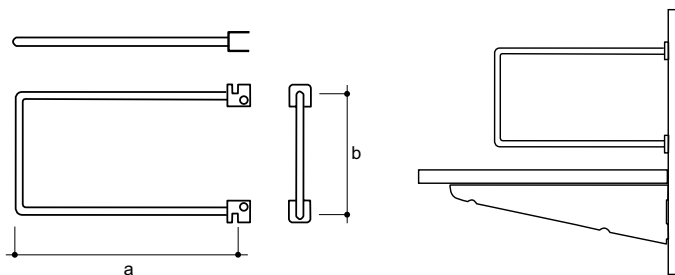

Fixing centres between uprights: Where Newtech standard steel shelves are used the centres between

uprights are 1000mm. When using MDF or other timber material the thickness of the material will determine suitable centres; however as a general guide 600mm centres could be the maximum suitable where material of 20mm thickness or above is used.

Aerosols for Industry

The range of aerosols for industry from Newtech is suitable for engineering, DIY, automotive, agricultural and general purpose use. The range is headed by AC-90, a high quality, silicone free multi-purpose lubricant. The range also includes anti-rust paint and food safe products.

Code	Description	Size ml	Colour	Ctn Qty
AC-90 Lubricant, Cleaner, Penetrates & Releases, Displaces Moisture, does not contain Silicone.				
72202	AC-90 (multi-purpose)	425		15
Food Grade Product Range H1 approvals by NSF & INS.				
72201	AC-90 H1 Food Grade	425		15
CD-90 Chain & Drive Spray.				
72217	CD-90	500		15
CG-90 Food Grade Clear Grease Lubricant + PTFE.				
72220	CG-90	500		15
CT-90 Cutting, Tapping, Drilling Fluid. Makes cutting easy, extends tooling life.				
72203	CT-90	500		15
Isopropyl Alcohol-Electronic Cleaning Solvent.				
72204	I.P.A.	500		15
Hand Cleaner with Poly-Grains - Lemon 5lt.				
72214	Industrial Hand Cleaner	5ltr		4
Large Hand Wipes - Strong Industrial Grade				
72228	Large Wipes	80 wipes		6
SA-90 Industrial Strength Adhesive.				
72212	SA-90	500		15
SP-90 Dry Film Silicone Lubricant.				
72218	SP-90	500		15
RP-90 Rapid Penetrating Release Fluid. Releases seized, corroded parts.				
72205	RP-90	500		15
TF-90 Fast Drying Cleaning Solvent & Degreaser.				
72219	TF-90	500		15
ZG-90 Cold Zinc Galvanise Paint. Corrosion Protection.				
72206	ZG-90 Red	500		15
72207	ZG-90 Green	500		15
72208	ZG-90 White	500		15
72209	ZG-90 Black	500		15
72210	ZG-90 Blue	500		15
72211	ZG-90 Zinc	500		15
ZG-90 Cold Zinc Galvanise Paint Brushing.				
72221	ZG-90 Zinc	500ml tin		6
72222	ZG-90 Black	500ml tin		6
72223	ZG-90 White	500ml tin		6

Voyager IV (4 wheel applicator)

The Newtech range of own brand abrasives has been carefully selected to offer stockists a wide selection, high quality product and eye catching packaging to encourage the customer to buy. The range includes sanding belts and sheets, 5m, 10m and 50m rolls, discs and accessories in a range of grits to fulfil all requirements.

ABRASIVES GUIDE

Grit	Paint Stripping	Bare Surfaces	In Between Coats
	Coarse 40 - 60 Grit	Medium 80 - 120 Grit	Fine 180 Grit
Application	For heavy removal of paint & varnish	For surface levelling and smoothing of bare surfaces	For surface smoothing in between coats

The Newtech range of abrasives consists of the following products;

Sanding Fibre Discs

Available with 16mm hole and 22mm hole.

For power sanding on metal, masonry, ceramics, plastics, hard fillers, enamels & hardwoods.

Sanding Sponge

- Medium / coarse
- Designed for use either wet or dry
- Simply rinse and re-use
- Suitable for use on metal, wood, plastic, filler & paint
- Use prior to application of paint or varnish
- Particularly suitable for sanding contoured areas

The sanding belts, sheets, discs and delta sanding pads will fit all the current major brands.

Rolls

Yellow

For hand and power sanding on paint, plaster, fillers, boards and softwoods

Brown

For hand and power sanding on metal, masonry, ceramics, plastics, hard fillers, enamels and hardwoods

Green

For hand and power sanding on paint, plaster, fillers, boards and softwoods

White

For hand and power sanding on wood, metal, varnish, paint, plastic and for keying & finishing all surfaces

Sanding Mesh Roll

Double-sided silicon carbide grain coated mesh. 5m x 115mm Suitable for plasterboard, rough timber, rust removal and metal polishing. Open screen design resists clogging.

Glass Paper Sanding Sheet

These economy hand sanding sheets are ideal for general purpose applications. Suitable for sanding Wood and Paint

Wet & Dry Sanding Paper

Wet & Dry Paper is perfect for fine sanding of primer undercoat and sanding between coats of paint. It is made from silicone carbide for a professional finish on metal, paint and fillers.

Wet & Dry Latex Sanding Sheets

Composed of a latex impregnated paper backing material with extra durable coating which helps to produce a high quality finish, particularly on coarser surfaces.

Sanding Cloth

- Suitable for heavy-duty applications, such as rust removal and metal shaping

Dry Stearate Sanding Sheet

For working on close grained hardwoods of the type typically used in furniture making and high end woodworking.

First of all they are stearted. Stearate is a dry lubricant, chemically similar to soap, it makes the surface of the abrasive resistant to clogging which provides a more uniform result and extends the life of the abrasive.

The particles are Silicon Carbide, a very sharp angular abrasive that gives optimum results on tight grained hardwoods.

The abrasive particles are applied in an open coat - separated from each other - improving flexibility, extending working life and giving a more uniform finish.
