## NFPA Air Cylinders

Now Includes Optional Oversize rod information

PNEUMATIC PRODUCTS

## The dimensional interchange to NFPA Standards

Tie rods are 100,000 psi minimum yield steel for maximum holding power. Threads are rolled for durability.

Pressure rating: 250 psi max.
Temperature limits: $-10^{\circ} \mathrm{F}$ to $+165^{\circ} \mathrm{F}$.

Lubrication is a high performance synthetic grease with microscopic PTFE particles in suspension.

Cushion has a flush, retained adjustment needle.

Oversized nonmetallic, composite ${ }^{\ddagger}$ rod bearing provides maximum load bearing support and superb wear resistance for high cycle life.

Polyurethane rod wiper has excellent abrasion resistance.

Hard ( 60 Rc ) coated I.D. high strength aluminum alloy tube.

Ground and polished high strength steel piston rod has hard chrome plated surface to provide maximum cycle life for bushing and seals.

Solid aluminum alloy piston is strong, light weight and carries a wide graphite filled PTFE wear band to support maximum Compression type tube seals are reusable.

Port design allows full flow for optimum cylinder operation.

Bearing retainer ring allows bearing cartridge to be removed without disassembly of cylinder. load conditions.
"Note: Rod bushing for $1-1 / 2^{\prime \prime} \& 6^{\prime \prime}$ bores with oversize rod is graphite filled, cast iron material.

# Quick Reference to Mounting Styles 

MXO - Basic Cylinder Order Code XO

MF1 Head Rectangular Flange - Order Code F1

MF2 Cap Rectangular
Flange - Order Code F2

| Model Number |  |
| :---: | :---: |
| Cylinder Bore |  |
| $15=1-1 / 2$ |  |
| $20=2$ |  |
| $25=2-1 / 2$ |  |
| $32=3-1 / 4$ |  |
| $40=$ |  |
| $50=$ |  |
| $60=6$ |  |
| Order NFPA |  |
| Code Mounting |  |
| XO . . . MXO = Basic cylinder - no mount |  |
| F1 . . . . MF1 = Head rectangular flange |  |
| F2 $\ldots .$. MF2 $=$ Cap rectangular flange |  |
| P1 . . . . MP1 = Fixed clevis |  |
| P2 . . . . MP2 = Detachable clevis |  |
| P3 . . . . . MP3 = Fixed eye |  |
| P4 . . . . MP4 = Detachable eye |  |
| T6 . . . . . MT1 $={ }^{1}$ Head trunnion |  |
| T7 $\ldots .$. MT2 $={ }^{1}$ Cap trunnion |  |
| T8 . . . . MT4 $={ }^{1}$ Mid trunnion |  |
| X1 . . . . MX1 = Extended tie rods both ends |  |
| X2 . . . . MX2 = Cap end tie rods |  |
| X3 $\ldots \ldots$. . MX3 $=$ Head end tie rods |  |
| S1 . . . . MS1 = Angle mount |  |
| S2 ... | . . .MS2 = Side lug |
| S4 | .MS4 = Bottom tapped, flush mount |
| SN | - = Sleeve nut |

${ }^{1}$ Trunnion pins are removable.

Adjustable Air cushions (St'd position Head and Cap = C)

| Position | 1 | 2 | 3 | 4 |
| :---: | :---: | :---: | :---: | :---: |
| No Cushions | A | A | A | A |
| Head \& Cap | B | C | D | E |
| Head only | F | G | H | J |
| Cap only | K | L | M | N |

Standard port and air cushion adjustment positions
Ports are in position \#1 both ends; cushion adjustments are in position \#2 both ends.
Optional position Air cushion adjustment can be located on same surface as standard size port on 2" bore and larger. For $1-1 / 2$ " bore or for larger ports, consult factory. For Trunnion mounting style, ports or air cushions can be located at Position 1 or 3 only.
Standard Ports, Diameters, and Rod Threads

Magnet
$\mathrm{N}=$ No magnet
$E=$ Magnet sensing
Options
XX = No options
$B F=$ Bumper, head end only ${ }^{1}(\mathrm{pg} .10) \quad$ Also allows use of
$B R=$ Bumper, cap end only ${ }^{1}$ (pg. 10) - adjustable air cushions.
CT = Composite cylinder tube
DR $=$ Double rod (pg. 4)
MR = Male rod stud with "KK" thread (pg. 10) Available only for Style \#3 Rod End
$\mathrm{SB}=$ Silent seal bumpers (allows use of adjustable air cushions - pg. 10) Note: 150 psi max., $200^{\circ} \mathrm{F}$ max.
SR = Stainless steel piston rod
ST $=$ Stainless steel tie rods
VS $=$ Viton ${ }^{\circledR}$ seals ( $385^{\circ} \mathrm{F}$ max.)
WS $=$ Metallic rod scraper
Combination Options
$B B=$ Bumpers, head and cap ${ }^{1}$.
$\mathrm{CR}=$ Composite tubing and stainless rod.
CS = Composite tubing and stainless tie rods.
$\mathrm{CU}=$ Composite tubing, stainless rod and tie rods.
$C D=$ Double rod and bumper (cap end only).
DB = Double rod and bumper (head \& cap end).
DF = Double rod and bumper (head end only).
DM = Double rod and male rod stud (head end only).
DN = Double rod \& male rod stud (cap end only).
DO = Double rod \& male rod stud (head \& cap end).
DS = Double rod and stainless rod.
DT = Double rod and stainless tie rods.
DU = Double rod, stainless rod and stainless tie rods.
SS = Stainless steel rod and tie rods.
WD = Composite tubing, stainless rod, stainless tie rods, and metallic scraper.
WE = Composite tubing, stainless rod, stainless tie rods, metallic scraper and Viton seals.
WV = Metallic rod scraper and Viton seals.
Consult factory for additional combination options.
${ }^{1}$ OAL increases 0.062 per end.
Piston travel is minimum of specified stroke.

MXO - No mount Order Code XO

Head End View $1-1 / 2^{" 1}$ thru 5 " Bores

Head End View for 6 " Bore and $3-1 / 4,4,5 \& 6$ " Bore for Oversize Rod

## Double Rod Cylinder - No mount

Use option code "DR" for double rod cylinder available with the following NFPA mounts:

Head End View 1-1/2" thru 5" Bores

Head End View for 6" Bore and 3-1/4, 4, 5 \& 6" Bore for Oversize Rod

## What do you need? Tell us. We'll go to work for you!

## - Strokes in decimal increments

 or longer than 48" (99" maximum)- Stop Tubes for longer strokes
- Electroless Nickel Plating
- Extruded Aluminum Cylinder Tube (Enclosed Tie Rods)
- Hard Chrome Plated I.D. Steel CyI. Tube
- Custom Rod End Features
- Additional Ports
- Multi-Power ${ }^{\circledR}$ Cylinders (150 psi max)

Fabco-Air attaches multiple pistons to a common shaft and provides internal air passages through the shaft to all pistons. Internal baffles divide the cylinder body into separate sections or stages. When air pressure is applied to port \#2 of the cylinder illustrated at the right, all three pistons are pressurized simultaneously nearly tripling the thrust. Cylinders can be built with up to four stages enabling thrusts of over 16,000 pounds to be reached!

## - Tandem Cylinders

Tandem cylinders provide nearly twice the force on an equivalent double acting cylinder. Two pistons are attached to a common piston rod. Ports 2 and 4 are pressurized simultaneously to nearly double the extend force. Ports 1 and 3 are pressurized to double the retract force.

## - 3-Position Cylinders

3-Position cylinders are generally used when three distinct rod positions are required from a single cylinder body. Two cylinders are assembled tip-to-tail with a common center head. Using cylinders with two different strokes (the shorter located on the rear cylinder), enables the front rod to be extended from "home" to a positive midposition or to full extension.

## - Back-to-Back Cylinders

Here two cylinders are mounted back-toback. They can have the same or different strokes and can be operated independently. This assembly enables you to have four combinations of rods extended or retracted.

## Magnetic Piston: Option -E

- Option -E consists of a magnet bonded into the piston head. When the piston magnet moves past an external sensor, the magnetic field activates the sensor without physical contact.
- Reliability - The annular piston magnet is permanently bonded into a groove in the piston. It is a polarized permanent magnet of rubber bonded barium ferrite that is very stable and is not affected by shock. Under normal usage it will remain magnetized indefinitely.
- Warning - External magnetic fields and/or ferrous objects may
Order Sensors, Sensor Clamps and Cables Separately. See page 13 for details.
affect the strength of the piston magnet therefore affecting sensor actuation and piston position indication. Labels noting this are affixed to the cylinder.
- Mounting - The sensor is attached to a 2-part clamp that attaches rigidly to a tie rod and can be positioned anywhere along the length of the cylinder for very precise signaling.
- Two sensor styles are used - (a) the 9-2A197 Series for 1-1/2" thru 4" bores requires a tie rod clamp, and (b) the 749 Series which accommodates the larger diameter tie rods of the 5" and 6 " bores with an integral clamp.

## Male Rod Thread Stud: Option -MR

A high strength stud is threaded into the female rod end and retained with thread locking adhesive. This method eliminates the small diameter thread relief normally required when machining male threads. It provides a much stronger rod end which can be repaired, rather than replacing the complete rod, should the stud become damaged.

| Part No. | KK | A | 2A |

| NMR - $1 / 4-12$ | $1 / 4-12$ | 2.00 | 4.00 |

Also available separately for individual installation.
Available only with Style \#3 or \#8 Rod End.

## Rubber Bumpers Options: Head -BF ${ }^{\ddagger}$, Cap -BR, Head \& Cap -BB

A donut or pad of rubber is bonded in place to act as the piston stop and absorb the impact of the piston. This reduces noise and absorbs energy.

Cylinder length will increase .062" per bumper so that the piston will travel a minimum of specified stroke.

- Operating Temperature: $-20^{\circ}$ to $220^{\circ} \mathrm{F}$.
$\ddagger$ Note: $\quad$-BF not available $1-1 / 2$ " bore with oversize rod. -BF not available $1-\frac{1}{2} / 2^{\prime \prime}$ bore with adjustable air cushion.
-BF not available 2" bore with adjustable air cushion \& oversize rod.

## Silent Seal Bumpers: Option -SB

Attached to the piston, these bumpers reduce the noise caused by the impact of the piston against the end cap. Standard adjustable air cushions may be used in conjunction with these silent seal bumpers to further reduce end of stroke noise and impact while giving deceleration benefits.

- Available 1-1/2" thru 5 " bores only.
- Operating Temperature: $-20^{\circ}$ to $200^{\circ} \mathrm{F}$.
- Operating Pressure to 150 psi.

| NPP-1.375 | 1.375 | 4.125 |
| NPP-1.750 | 1.750 | 5.125 |

## Alignment Couplers

Alignment couplers can be used in both push or pull applications．Linear couplers can prevent binding caused by misalignment and allow a greater tolerance between the cylinder centerline and the mating part．

Cylinder rod thread extension must be standard length for use with these couplers．

| Part Number | A | B | C | D | E | F | G | H | Max．Pull Load Ibs． |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Seal Kits－Standard Rods

| Bore | Single Rod Part No． | Double Rod Part No． |
| :---: | :---: | :---: |
| 11／2＂ | N－11／2－$\square$－SK | N－11／2－$\square$ D－SK |
| 2 ＂ | N－2－■－SK | N－2－םD－SK |
| 21／2＂ | N－21／2－■－SK | N－21／2－םD－SK |
| $3^{1 / 4 "}$ | N－31／4－■－SK | N－31／4－■D－SK |
| $4{ }^{\prime \prime}$ | N－4－■－SK | N－4－ロD－SK |
| $5{ }^{\prime \prime}$ | N－5－口－SK | N－5－םD－SK |
| $6{ }^{\prime \prime}$ | N－6－■－SK | N－6－ロD－SK |

Insert＂H＂or＂C＂at $\square$ for cushion at head end or cap end，or＂HC＂for both ends． Leave blank if none．

For Viton ${ }^{\circledR}$ seal kits add suffix＂V＂to part numbers above．Consult factory for pricing specific Viton ${ }^{\circledR}$ kit part numbers．

For oversize rod seal kits，add Suffix ＂OS＂to the part numbers above．

## Rod Bushings

（Includes standard seals for the bushing only．）

| Rod Dia． | Part No． |
| :---: | :---: |
| $5 / 8^{\prime \prime}$ | N－0．625－BK |
| $1^{\prime \prime}$ | $\mathrm{N}-1.000-\mathrm{BK}$ |
| $1^{3} / 8^{\prime \prime}$ | $\mathrm{N}-1.375-\mathrm{BK}$ |
| $1^{3} / 4^{\prime \prime}$ | $\mathrm{N}-1.750-\mathrm{BK}$ |

Temperature Range:
$-20^{\circ}$ to $+80^{\circ} \mathrm{C}\left(-4^{\circ}\right.$ to $\left.+176^{\circ} \mathrm{F}\right)$

## Warning!

Do not exceed sensor ratings. Permanent damage to sensor may occur. Power supply polarity MUST be observed for proper operation of sensors. See wiring diagrams included with each sensor.

## Sensors for 1-1/2" to 4" Bores

## Sensors for 5" and 6" Bores

## Female Cordsets

## 1 Year Limited Warranty for Catalog \#NF-6 Products

Subject to the following conditions, FABCO-AIR, Inc., warrants to its immediate purchaser (Purchaser) that at the time of shipment this product is free and clear of all liens and encumbrances, is free from defects in material and workmanship and will conform to samples if the order is based on samples, or to FABCO-AIR's applicable product specifications, or to Purchaser's written specifications to the extent they have been accepted in writing by FABCO-AIR. All products are subject to FABCO-AIR's normal manufacturing and commercial variations and practices. THE FOREGOING WARRANTY IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES NOT EXPRESSLY SET FORTH HEREIN, WHETHER EXPRESSED OR IMPLIED BY OPERATION OF LAW OR OTHERWISE, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR PURPOSE.Purchaser's exclusive remedy, and FABCO-AIR's sole liability under this warranty is expressly limited to the correction, replacement or refund of purchase price, at FABCO-AIR's option, of products which are returned freight prepaid, accompanied by proof of purchase and written claim of defect, and upon which inspection by FABCO-AIR and in FABCO-AIR's sole judgement do not comply with this warranty.

All warranties made by FABCO-AIR or imposed on FABCO-AIR by law shall expire one (1) year from date of shipment by FABCO-AIR.

This warranty does not cover and no warranty is made with respect to: (A) failures not reported to FABCO-AIR within the period specified above; (B) failure or damage due to misapplication, misuse, abuse, improper storage or handling, abnormal conditions of temperature, water, dirt, corrosive substances, or other contaminants; (C) products which have been repaired with parts or materials not furnished or approved by FABCO-AIR or by anyone other than FABCO-AIR or its authorized representative or products which have been in any way tampered with or altered; and (D) products damaged in shipment or storage or otherwise without fault of FABCO-AIR.

## Limitations on Liability

FABCO-AIR's total responsibility for any claims, damages, losses or liabilities related to the product covered hereunder shall not exceed the purchase price of such product. In no event shall FABCO-AIR be liable for any special, indirect, incidental or consequential damages of any character, including, but not limited to, loss of use of productive facilities or equipment, lost profits, property damage, transportation, installation or removal or lost production whether suffered by Purchaser or any third party. FABCO-AIR disclaims all liability for any and all costs, claims, demands, charges, expenses or other damages, either direct or indirect, incident to all property damage arising out of any cause of action based on strict liability. This warranty gives you specific legal rights and you may have other rights from state to state.
