COMPOSITE DECKING

Urban Range

Ambi DECK composite products are environmentally friendly, combining the proven strength of high density polyethylene plastic with reclaimed wood fibres. This produces a decking with the workable qualities of wood without the potential draw backs.

The new **Rural Range** comes with a natural woodgrain finish, utilising a polymer outer shell which completely encapsulates the board in an impermeable layer ensuring the highest protection against scratches, stains and colour fade.

Also available...

Finish Trims

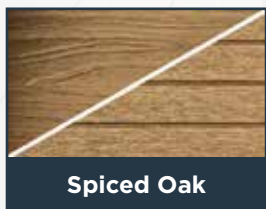

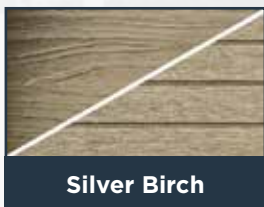

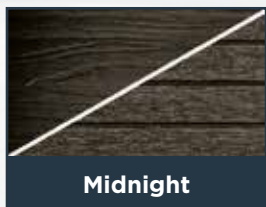

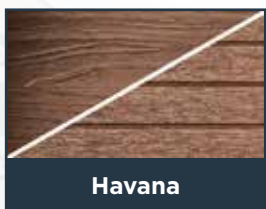

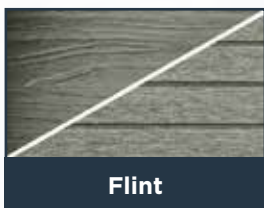

Balustrade

Composite Joist

Rural Range

The perfect alternative to timber decking

FORTEX CLADDING

Single Lap

Double Lap

10 YEAR GUARANTEE

Additional info...

Fortex is a range of innovative cladding products that couple the benefits of low maintenance PVC with a choice of two sizes. Weighing in at just 3.15kg per 5 metre board, Fortex is considerably lighter than comparable fibre cement boards, which makes storing, handling and fitting quick and easy. Fortex is designed for use on all types of exteriors including brick, masonry and concrete.

When fitted with standard insulation materials the Building Research Establishment's (BRE) Green Guide to Specification has given Fortex cladding an A+ rating.
