article correctly. Iran (Persian: اير أن اrān [ʔiːˈrɒːn] (listen)), also called Persia,[11] and officially the Islamic Republic of Iran,[a] is a country in Western Asia. It is bordered to the northwest by Arghanistan, to the east by Afghanistan, to the southeast by
Pakistan, to the south by the Persian Gulf and the Gulf of Oman, and to the west by Turkey and Iraq. Iran covers an area of 1,648,195 km2 (636,372 sq mi), with a population of 83 million. It is the second-largest country in the Middle East, and its capital and largest city is Tehran. Iran is home to one of the world's oldest civilizations, [12]
[13] beginning with the formation of the Elamite kingdoms in the fourth millennium BC. It was first unified by the Iranian Medes in the seventh century BC, when Cyrus the Great founded the Achaemenid Empire, which became one of the largest empires in history and the world's
first superpower.[15] The empire fell to Alexander the Great in the fourth century BC and was divided into several Hellenistic states. An Iranian rebellion established the Parthian Empire, a major world power for the next four centuries.[16][17]
Arab Muslims conquered the empire in the seventh century AD, which led to the Islamic art, literature, philosophy, and architecture spreading across the Muslim world and beyond during the Islamic Golden Age. Over the next two centuries, a
series of native Muslim dynasties emerged before the Seljuq Turks and the Mongols conquered the region. In the 15th century, the native Safavids re-established a unified Iranian and Muslim history.[5][18] Under the reign of Nader
Shah in the 18th century, Iran once again became a major world power,[19][page needed] though by the 19th century a series of conflicts with Russia led to significant territorial losses.[20][21] The early 20th century saw the Persian Constitutional Revolution. Efforts to nationalize its fossil fuel supply from Western companies led to an
Anglo-American coup in 1953, which resulted in greater autocratic rule under Mohammad Reza Pahlavi and growing Western political influence. [22] He went on to launch a far-reaching series of reforms in 1963. [23] After the Iranian Revolution, the current Islamic Republic was established in 1979 [24] by Ruhollah Khomeini who became
the country's first Supreme Leader. The Government of Iran is an Islamic theocracy which includes elements of a presidential democracy, with the ultimate authority vested in an autocratic "Supreme Leader",[25] a position held by Ali Khamenei since 1989 following Khomeini's death. The Iranian government is widely considered to be
authoritarian, and has attracted widespread criticism for its significant constraints and abuses against human rights and civil liberties, [26][27][28][29] including several violent suppressions of mass protests, unfair elections, and limited rights for women and children. Iran is a regional and middle power, with a geopolitically strategic location
in the Asian continent.[30] Iran is a founding member of the United Nations, the ECO, the OIC, and the OPEC. It has large reserves of fossil fuels — including the world's second-largest proven oil reserves.[31] The country's rich cultural legacy is reflected in part by its 22 UNESCO World Heritage
Sites.[32] Historically a multinational state, Iran remains a pluralistic society comprising numerous ethnic, linguistic, and religious groups, the largest being Persians, Azeris, Kurds, Mazandaranis and Lurs.[3] Name Main article: Name of Iran The term Iran derives directly from Middle Persian Ērān, first attested in a third-century inscription
at Nagsh-e Rostam, with the accompanying Parthian inscription using the term Aryan, in reference to the Iranians. [33] The Middle Persian) and ary- (Parthian), both deriving from Proto-Iranian language *arya- (meaning "Aryan", i.e. "of the Iranians"), [33] [34]
recognized as a derivative of Proto-Indo-European language *ar-yo-, meaning "one who assembles (skilfully)".[35] In the Iranian languages, the gentilic is attested as a self-identifier, included in ancient inscriptions and the literature of the Avesta,[36][c] and remains also in other Iranian ethnic names Alan (Ossetian: Up Ir) and Iron (Upon)
[34] According to the Iranian mythology, the country's name comes from the name of Irai, a legendary prince and shah who was killed by his brothers.[37] Historically, Iran has been referred to as Persia by the West,[11] due mainly to the writings of Greek historians who referred to all of Iran as Persis (Ancient Greek: Περσίς; from Old
Persian Finity Pārsa),[38] meaning "land of the Persians", while Persis itself was one of the provinces of ancient Iran that is today known as Fars.[39] As the most extensive interaction the ancient Greeks had with any outsider was with the Persians, the term persisted, even long after the Greco-Persian Wars (499–449 BC). In 1935,
Reza Shah requested the international community to refer to the country by its native name, Iran, on Nowruz, falling on 21 March 1935; effective 22 March that year. [40][41] Opposition to the name change led to the reversal of the decision in 1959, and Professor Ehsan Yarshater, editor of Encyclopædia Iranica, propagated a move to use
Persia and Iran interchangeably.[42]Today, both Iran and Persia are used in cultural contexts, while Iran remains irreplaceable in official state contexts to the modern state proper.[44][45][46] "Greater Iran" (Iranzamin or Iran e Bozorg)[47] refers to territories of the Iranian
cultural and linguistic zones. In addition to modern Iran, it includes portions of the Caucasus, Anatolia, Mesopotamia, Afghanistan, and Central Asia.[48][page needed] Pronunciation to modern Iran, it includes portions of the Caucasus, Anatolia, Mesopotamia, Afghanistan, and Central Asia.[48][page needed] Pronunciation to modern Iran, it includes portions of the Caucasus, Anatolia, Mesopotamia, Afghanistan, and Central Asia.[48][page needed] Pronunciation to modern Iran, it includes portions of the Caucasus, Anatolia, Mesopotamia, Afghanistan, and Central Asia.[48][page needed] Pronunciation to modern Iran, it includes portions of the Caucasus, Anatolia, Mesopotamia, Afghanistan, and Central Asia.[48][page needed] Pronunciation to modern Iran, it includes portions of the Caucasus, Anatolia, Mesopotamia, Afghanistan, and Central Asia.[48][page needed] Pronunciation to modern Iran, it includes portions of the Caucasus, Anatolia, Mesopotamia, Afghanistan, and Central Asia.[48][page needed] Pronunciation to modern Iran, it includes portions of the Caucasus, Anatolia, Mesopotamia, Afghanistan, Afgh
and /ɪˈræn/,[49] while American English dictionaries such as Merriam-Webster's provide pronunciations which map to /ɪˈræn, aːˈræn/, [50] or likewise in Random House Webster's Unabridged Dictionary as /ɪˈræn, aːˈræn/, aɪˈræn/, aɪ
pronunciation. Similarly, Glasgow-based Collins English Dictionary provides both English English pronunciations. The pronunciation /aɪˈræn/ eye-RAN may be heard in U.S. media. Max Fisher in The Washington Post[52]
prescribed /iːˈrɑːn/ for Iran, while proscribing /aɪˈræn/. The American Heritage Dictionary of the English Language, in the dictionary's 2014 Usage Ballot, addressed the topic of the pronunciations of Iran and Iraq.[53] According to this survey, the pronunciations /ɪˈrɑːn/ and /ɪˈræn/ were deemed almost equally acceptable, while /ɪˈrɑːn/ was
preferred by most panelists participating in the ballot. With regard to the /aɪ'ræn/ pronunciation, more than 70% of the panelists were that /aɪ'ræn/ has "hawkish connotations" and sounds "angrier", "xenophobic", "ignorant", and "not ... cosmopolitan". The /aɪ'ræn/
pronunciation remains standard and acceptable, reflected in the entry for Iran in the American Heritage Dictionary itself, as well as in each of the other major dictionaries of American English. History Main article: History of Iran See also: Timeline of Iranian history Prehistory Further information: Prehistory of Iran and Archaeological sites in
Iran A cave painting in Doushe cave, Lorestan, from the 8th millennium BC[54] The earliest attested archaeological artifacts in Iran, like those excavated at Kashafrud and Ganj Par in northern Iran, confirm a human presence in Iran since the Lower Paleolithic.[55] Iran's Neanderthal artifacts from the Middle Paleolithic have been found
mainly in the Zagros region, at sites such as Warwasi and Yafteh.[56][57][page needed] From the 10th to the seventh millennium BC, early agricultural communities began to flourish in and Chogha Mish.[62][63][page needed] From the 2agros region in western Iran, including Chogha Golan,[58][59] Chogha Bonut,[60][61] and Chogha Mish.[62][63][page needed][64] The
occupation of grouped hamlets in the area of Susa, as determined by radiocarbon dating, ranges from 4395–3955 to 3680-3490 BC.[65] There are dozens of prehistoric sites across the Iranian Plateau, pointing to the existence of ancient cultures and urban settlements in the fourth millennium BC.[64][66][67] During the Bronze Age, the
territory of present-day Iran was home to several civilizations, including Elam, Jiroft, and Zayanderud. Elam, the most prominent of these civilizations, developed in the southwest alongside those in Mesopotamia, and continued its existence until the emergence of the Iranian empires. The advent of writing in Elam was paralleled to Sumer,
and the Elamite cuneiform was developed since the third millennium BC. [68] From the 34th to the 20th century BC, northwestern Iran was part of the Kura-Araxes culture, which stretched into the neighboring Caucasus and Anatolia. Since the earliest second millennium BC, Assyrians settled in swaths of western Iran and incorporated the
region into their territories. Classical antiquity Main articles: Median Empire, Achaemenid Empire, Achaemenid Empire, Releucid Empire, and Sasanian Empire,
now Iran from the Eurasian Steppe, [69] rivaling the native settlers of the region. [70][71] As the Iranians dispersed into the wider area of Greater Iran and beyond, the boundaries of modern-day Iran were dominated by Median, Persian, and Parthian tribes. From the late seventh century BC, the Iranian peoples, together with
the "pre-Iranian" kingdoms, fell under the domination of the Assyrian Empire, based in northern Mesopotamia. [72] [page needed] Under king Cyaxares, the Medes and Persians entered into an alliance with Babylonian ruler Nabopolassar, as well as the fellow Iranian Scythians and Cimmerians, and together they attacked the Assyrian
Empire. The civil war ravaged the Assyrian Empire between 616 and 605 BC, thus freeing their respective peoples from three centuries of Assyrian rule. [72] The unification of the Median tribes under king Deioces in 728 BC led to the foundation of the Median Empire which, by 612 BC, controlled almost the entire territory of present-day
Iran and eastern Anatolia.[73] This marked the end of the Kingdom of Urartu as well, which was subsequently conquered and dissolved.[74][75] Tomb of Cyrus the Great, the son of Mandane and Cambyses I, took over the Median Empire, and founded the
Achaemenid Empire by unifying other city-states. The conquest of Media was a result of what is called the Persian Revolt. The brouhaha was initially triggered by the actions of the Median ruler Astyages, and was quickly spread to other provinces, as they allied with the Persians. Later conquests under Cyrus and his successors expanded
the empire to include Lydia, Babylon, Egypt, parts of the Balkans and Eastern Europe proper, as well as the lands to the Babylonian army at Opis, and marked the end of around four centuries of Mesopotamian domination of the region by
conquering the Neo-Babylonian Empire. Cyrus entered Babylon and presented himself as a traditional Mesopotamian monarch. Subsequent Achaemenid Empire (550 BC-330 BC) around the time of Darius I and Xerxes I The Parthian
Empire (247 BC-224 AD) in 94 BC at its greatest extent, during the reign of Mithridates II At its greatest extent, the Achaemenid Empire included territories of modern-day Iran, Republic of Azerbaijan (Arran and Shirvan), Armenia, Georgia, Turkey (Anatolia), much of the Black Sea coastal regions, northeastern Greece and southern
Bulgaria (Thrace), northern Greece and North Macedonia (Paeonia and Macedon), Iraq, Syria, Lebanon, Jordan, Israel and the Palestinian territories, all significant population centers of ancient Egypt as far west as Libya, Kuwait, northern Saudi Arabia, parts of the United Arab Emirates and Oman, Pakistan, Afghanistan, and much of
Central Asia, making it the largest empire the world had yet seen. [15] It is estimated that in 480 BC, 50 million people lived in the Achaemenid Empire at its peak ruled over 44% of the world's population, the highest such figure for any empire in history. [78] The Achaemenid Empire is noted for the release of the Jewish
exiles in Babylon,[79] building infrastructures such as the Royal Road and the Chapar (postal service), and the use of an official language, Imperial Aramaic, throughout its territories.[15] The empire had a centralized, bureaucratic administration under the emperor, a large professional army, and civil services, inspiring similar
developments in later empires. [80][81] Eventual conflict on the western borders began with the Ionian Revolt, which erupted into the Greco-Persian Wars and continued through the first half of the fifth century BC, and ended with the withdrawal of the Achaemenids from all of the territories in the Balkans and Eastern Europe proper. [82] In
334 BC, Alexander the Great invaded the Achaemenid Empire, defeating the last Achaemenid emperor, Darius III, at the Battle of Issus. Following the premature death of Alexander, Iran came under the control of the Hellenistic Seleucid Empire. In the middle of the second century BC, the Parthian Empire rose to become the main power
in Iran, and the century-long geopolitical arch-rivalry between the Romans and the Parthians began, culminating in the Roman—Parthian Wars. The Parthian Empire continued as a feudal monarchy for nearly five centuries, until 224 CE, when it was succeeded by the Sasanian Empire. [83] Together with their neighboring arch-rival, the
Roman-Byzantines, they made up the world's two most dominant powers at the time, for over four centuries. one of Iran's most influential periods, as under the Sasanians their influence reached the culture of ancient Rome (and through that as far as Western Europe),[84][85] Africa,[88] Most of the era of the Sasanian Empire was
overshadowed by the Roman-Persian Wars, which raged on the western borders at Anatolia, the Western Caucasus, Mesopotamia, and the Levant, for over 700 years. These wars ultimately exhausted both the Romans and the Sasanians and led to the defeat of both by the Muslim invasion. [citation needed] Throughout the Achaemenid,
Parthian, and Sasanian eras, several offshoots of the Iranian dynasties established eponymous branches in Anatolia and the Caucasus, including the Pontic Kingdom, the Mihranids, and the Arsacid dynasties of Armenia, Iberia (Georgia), and Caucasian Albania (present-day Republic of Azerbaijan and southern Dagestan). [citation]
needed] Medieval period Main articles: Muslim conquest of Persia and Medieval Iran The prolonged Byzantine—Sasanian Empire, opened the way for an Arab invasion of Iran in the seventh century.[89][90] The empire was initially
defeated by the Rashidun Caliphate, which was succeeded by the Umayyad Caliphate, followed by the Umayyad Caliphate, followed, which targeted Iran's then Zoroastrian majority and included religious persecution, [91][92][93] demolition of libraries [94] and fire temples, [95] a
special tax penalty ("jizya"),[96][97] and language shift.[98][99] In 750, the Abbasids overthrew the Umayyads.[100] Arabs Muslims and Persian Muslim, Abu Muslim, Abu Muslim, Abu Muslim, In their struggle for power, the society in their times gradually became
cosmopolitan and the old Arab simplicity and aristocratic dignity, bearing and prestige were lost. Persians and Turks began to replace the Arab nobility with the subject races, the practice of polygamy and concubinage, made for a social amalgam wherein loyalties became uncertain and a hierarchy of
officials emerged, a bureaucracy at first Persian and later Turkish which decreased Abbasid prestige and power for good. [104] After two centuries of Arab rule, semi-independent Iranian kingdoms—including the Tahirids, Saffarids, Samanids, and Buyids—began to appear on the fringes of the declining Abbasid Caliphate
[citation needed] Tomb of Hafez, the medieval Persian poet whose works are regarded as a pinnacle in Persian literature and have left a considerable mark on later Western writers, most notably Goethe, Thoreau, and Emerson[105][106][107] The blossoming literature, philosophy, mathematics, medicine, astronomy and art of Iran
became major elements in the formation of a new age for the Iranian civilization, during a period known as the Islamic Golden Age. [108] The Islamic Golden Age reached its peak by the 10th and 11th centuries, during which Iran was the main theater of scientific activities. [110] The cultural revival that began in the Abbasid period led
to a resurfacing of the Iranian national identity; thus, the attempts of Arabization never succeeded in Iran.[citation needed] The Shu'ubiyya movement became a catalyst for Iranians to regain independence in their relations with the Arab invaders.[111] The most notable effect of this movement was the continuation of the Persian language
attested to the works of the epic poet Ferdowsi, now considered the most prominent figure in Iranian literature.[citation needed] Tuğrul Tower, a 12th-century monument at Rhages The 10th century saw a mass migration of Turkic tribes from Central Asia into the Iranian Plateau.[112] Turkic tribesmen were first used in the Abbasid army as
mamluks (slave-warriors), replacing Iranian and Arab elements within the army.[101] As a result, the Mamluks gained significant political power. In 999, large portions of Iran came briefly under the Seljuk and Khwarezmian empires.[112]
The Seljuks subsequently gave rise to the Sultanate of Rum in Anatolia, while taking their thoroughly Persianized identity with them. [113][114] The result of the adoption and patronage of Persian culture by Turkish rulers was the development of a distinct Turko-Persian tradition. From 1219 to 1221, under the Khwarazmian Empire, Iran
suffered a devastating invasion by the Mongol Empire army of Genghis Khan. According to Steven R. Ward, "Mongol levels and depredations killed up to three-fourths of the population of the Iranian Plateau, possibly 10 to 15 million people. Some historians have estimated that Iran's population did not again reach its pre-Mongol levels
until the mid-20th century."[115] Following the fracture of the Mongol Empire in 1256, Hulagu Khan, grandson of Genghis Khan, establishing the Timurid Empire which lasted for another 156 years. In 1387, Timur ordered the complete
massacre of Isfahan, reportedly killing 70,000 citizens. [116] The Ilkhans and the Timurids soon came to adopt the ways and customs of the Iranians, surrounding themselves with a culture that was distinctively Iranian. [117] Early modern period Safavids Main article: Safavid Iran Venetian portrait, kept at the Uffizi, of Ismail I, the founder of
the Safavid Empire By the 1500s, Ismail I of Ardabil established the Safavid Empire, [118] with his capital at Tabriz, [112] Beginning with Azerbaijan, he subsequently extended his authority over all of the Iranian territories, and established an intermittent Iranian hegemony over the vast relative regions, reasserting the Iranian identity within
large parts of Greater Iran.[119] Iran was predominantly Sunni, [120] but Ismail instigated a forced conversion to the Safavid territories in the Caucasus, Iran, Anatolia, and Mesopotamia. As a result, modern-day Iran is the only official Shia nation of the world, with it holding an absolute
majority in Iran and the Republic of Azerbaijan, having there the first and the second highest number of Shia inhabitants by population percentage in the world.[122][123] Meanwhile, the centuries-long geopolitical and ideological rivalry between Safavid Iran and the neighboring Ottoman Empire led to numerous Ottoman—Iranian wars.[115]
A portrait of Abbas I, the powerful, pragmatic Safavid ruler who reinforced Iran's military, political, and economic power The Safavid era saw the start of
mass integration from Caucasian populations into new layers of the society of Iran, as well as mass resettlement of them within the heartlands of Iran, playing a pivotal role in the history of Iran, as well as mass resettlement of them within the heartlands of Iran, playing a pivotal role in the history of Iran, as well as mass resettlement of them within the heartlands of Iran, playing a pivotal role in the history of Iran, as well as mass resettlement of them within the heartlands of Iran, playing a pivotal role in the history of Iran, as well as mass resettlement of them within the heartlands of Iran, playing a pivotal role in the history of Iran, as well as mass resettlement of them within the heartlands of Iran, playing a pivotal role in the history of Iran, as well as mass resettlement of them within the heartlands of Iran, playing a pivotal role in the history of Iran, as well as mass resettlement of them within the heartlands of Iran, playing a pivotal role in the history of Iran, as well as mass resettlement of them within the heartlands of Iran, playing a pivotal role in the history of Iran, as well as mass resettlement of them within the heartlands of Iran, playing a pivotal role in the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass resettlement of the history of Iran, as well as mass r
wars with the Ottomans, and the foreign interference (most notably the Russian interference), the Safavid rule was ended by the Pashtun rebels who besieged Isfahan and defeated Sultan Husayn in 1722. Afsharids Main article: Afsharid dynasty In 1729, Nader Shah, a chieftain and military genius from Khorasan, successfully drove out
and conquered the Pashtun invaders. He subsequently took back the annexed Caucasian territories which were divided among the Ottoman and Russian authorities by the ongoing chaos in Iran. During the reign of Nader Shah, Iran reached its greatest extent since the Sasanian Empire, reestablishing the Iranian hegemony all over the
Caucasus, as well as other major parts of the west and central Asia, and briefly possessing what was arguably the most powerful empire at the time. [19] Statue of Nader Shah, the powerful expansion, as well as his military
successes, went into a decline following the final campaigns in the Northern Caucasus against then revolting Lezgins. The assassination of Nader Shah sparked a brief period of relative peace and prosperity.[115] Zands Main
article: Zand dynasty Compared to its preceding dynasties, the geopolitical reach of the Zand dynasty was limited. Many of the Iranian territories in the Caucasus gained de facto autonomy, and were locally ruled through various Caucasian khanates. However, despite the self-ruling, they all remained subjects and vassals to the Zand king
[125] Another civil war ensued after the death of Karim Khan in 1779, out of which Agha Mohammad Khan emerged, founding the Qajar dynasty in 1794. Qajars Main article: Qajar Iran In 1795, following the disobedience of the Georgian subjects and their alliance with the Russians, the Qajars captured Tbilisi by the Battle of Krtsanisi, and
drove the Russians out of the entire Caucasus, reestablishing the Iranian suzerainty over the region. A map showing the 19th-century northwestern borders of Iran, comprising modern-day eastern Georgia, Dagestan, Armenia, and the Republic of Azerbaijan, before being ceded to the neighboring Russian Empire by the Russo-Iranian
wars The Russo-Iranian wars of 1804–1813 and 1826–1828 resulted in large irrevocable territorial losses for Iran for centuries, [20] and thus substantial gains for the neighboring Russian Empire. As a result of the 19th-century
Russo-Iranian wars, the Russians took over the Caucasus, and Iran irrevocably lost control over its integral territories in the region (comprising modern-day Dagestan, Georgia, Armenia, and Republic of Azerbaijan), which got confirmed per the treaties of Gulistan and Turkmenchay. [21][126] The area to the north of Aras River, among
which the contemporary Republic of Azerbaijan, eastern Georgia, Dagestan, and Armenia are located, were Iranian territory until they were occupied by Russia in the course of the 19th century. [21][127][128][129][130][131][132] As Iran shrank, many Transcaucasian and North Caucasian Muslims moved towards Iran, [133][134] especially
until the aftermath of the Circassian Genocide, [134] and the decades afterwards, while Iran's Armenians were encouraged to settle in the newly incorporated Russian territories, [135][136][137] causing significant demographic shifts. Around 1.5 million people—20 to 25% of the population of Iran—died as a result of the Great Famine of
1870–1871.[138] The first national Iranian Parliament was established in 1906. Between 1872 and 1905, a series of protests took place in response to the Constitutional Revolution in 1905. The first Iranian constitution and the first
national parliament of Iran were founded in 1906, through the ongoing revolution. The Constitution included the official recognition of Iran since then. The struggle related to the constitutional movement was
followed by the Triumph of Tehran in 1909, when Mohammad Ali Shah was defeated and forced to abdicate. On the pretext of restoring order, the Russians occupied northern Iran in 1911 and maintained a military presence in the region for years to come. But this did not put an end to the civil uprisings and was soon followed by Mirza

Reza Shah in military uniform Despite Iran's neutrality during World War I, the Ottoman, Russian and British empires occupied the territory of western Iran and fought the Persian Campaign before fully withdrawing their forces in 1921. At least 2 million
Persian civilians died either directly in the fighting, the Ottoman perpetrated anti-Christian genocides or the war induced famine of 1917-1919. A large number of Iranian Assyrian and Iranian Armenian Christians, as well as those Muslims who tried to protect them, were victims of mass murders committed by the invading Ottoman troops,
notably in and around Khoy, Maku, Salmas, and Urmia.[140][143][144] Apart from the rule of Agha Mohammad Khan, the Qajar rule is characterized as a century of misrule.[112] The inability of Qajar Iran's government to maintain the country's sovereignty during and immediately after World War I led to the British directed 1921
Persian coup d'état and Reza Shah's establishment of the Pahlavi dynasty. Reza Shah, became the new Prime Minister of Iran and was declared the new monarch in 1925. Pahlavis Main article: Pahlavi Iran See also: Anglo-Soviet invasion of Iran In the midst of World War II, in June 1941, Nazi Germany broke the Molotov-Ribbentrop
Pact and invaded the Soviet Union, Iran's northern neighbor. The Soviets quickly allied themselves with the Allied countries and in July and August, 1941 the British demanded that the Iranian government expel all Germans from Iran. Reza Shah refused to expel the Germans and on 25 August 1941, the British and Soviets launched a
surprise invasion and Reza Shah's government quickly surrendered. [145] The invasion's strategic purpose was to secure a supply line to the USSR (later named the Persian Corridor), secure the oil fields and Abadan Refinery (of the UK-owned Anglo-Iranian Oil Company), prevent a German advance via Turkey or the USSR on Baku's oil
fields, and limit German influence in Iran. Following the invasion, on 16 September 1941 Reza Shah abdicated and was replaced by Mohammad Reza Pahlavi, his 21-year-old son.[146][147][148] The Allied "Big Three" at the 1943 Tehran Conference During the rest of World War II, Iran became a major conduit for British and American aid
to the Soviet Union and an avenue through which over 120,000 Polish refugees and Polish Armed Forces fled the Axis advance. [149] At the 1943 Tehran Conference, the Allied "Big Three"—Joseph Stalin, Franklin D. Roosevelt, and Winston Churchill—issued the Tehran Declaration to guarantee the post-war independence and
boundaries of Iran. However, at the end of the war, Soviet troops remained in Iran and established two puppet states in north-western Iran, namely the People's Government of Azerbaijan and the Republic of Mahabad. This led to the Iran crisis of 1946, one of the first confrontations of the Cold War, which ended after oil concessions were
promised to the USSR and Soviet forces withdrew from Iran proper in May 1946. The two puppet states were soon overthrown and the oil concessions were later revoked. [150] [151] 1951–1978: Mosaddegh, Shah Mohammad Reza Pahlavi Main article: 1953 Iranian coup d'état Mohammad Reza Pahlavi and the Imperial Family during the
coronation ceremony of the Shah of Iran in 1967 In 1951, Mohammad Mosaddegh was appointed as the Prime Minister. He became enormously popular in Iran after he nationalized Iran's petroleum industry and oil reserves. He was deposed in the 1953 Iranian coup d'état, an Anglo-American covert operation that marked the first time the
United States had participated in the overthrow of a foreign government during the Cold War. [152] After the coup, the Shah became increasingly autocratic and sultanistic, and Iran entered a phase of decades-long controversial close relations with the United States and some other foreign governments. [153] While the Shah increasingly
modernized Iran and claimed to retain it as a fully secular state, [22] arbitrary arrests and torture by his secret police, the SAVAK, were used to crush all forms of political opposition. [154] Ruhollah Khomeini, a radical Muslim cleric, [citation needed] became an active critic of the Shah's far-reaching series of reforms known as the White
Revolution. Khomeini publicly denounced the government, and was arrested and imprisoned for 18 months. After his release in 1964, he refused to apologize, and was eventually sent into exile. Due to the 1973 spike in oil prices, the economy of Iran
was experiencing double digit inflation, and despite the many large projects to modernize the country, corruption was rampant and caused large amounts of waste. By 1975 and 1976, an economic recession led to increased unemployment, especially among millions of youths who had migrated to the cities of Iran looking for construction
jobs during the boom years of the early 1970s. By the late 1970s, many of these people opposed the Shah's regime and began to organize and join the protests against it.[155] Since the 1979 Islamic Revolution Main article: History of the Islamic Republic of Iran See also: Iranian Revolution and Iran-Iraq War Ruhollah Khomeini's return to
Iran from exile, 1 February 1979 The 1979 Revolution, later known as the Islamic Revolution, [156][157][158] began in January 1978 with the first major demonstrations paralyzing the country and its economy, Mohammad Reza Pahlavi fled to the United States, and Ruhollah
Khomeini returned from exile to Tehran in February 1979, forming a new government. [160] After holding a referendum, Iran officially became an Islamic republic in April 1979. [161] A second referendum in December 1979 approved a theocratic constitution. [162] The immediate nationwide uprisings against the new government began with
the 1979 Kurdish rebellion and the Khuzestan uprisings, along with the uprisings in Sistan and Baluchestan and other areas. Over the next several years, these uprisings were subdued in a violent manner by the new Islamic government. The new government began purging itself of the non-Islamist political opposition, as well as of those
Islamists who were not considered radical enough. Although both nationalists and Marxists had initially joined with Islamists to overthrow the Shah, tens of thousands were executed by the new regime afterwards. [163] Many former ministers and officials in the Shah's government, including former prime minister Amir-Abbas Hoveyda, were
executed following Khomeini's order to purge the new government of any remaining officials still loyal to the exited Shah. On 4 November 1979, a group of Muslim students seized the United States Embassy and took the embassy with 52 personnel and citizens hostage, [164] after the United States refused to extradite Mohammad Reza
Pahlavi to Iran, where his execution was all but assured. Attempts by the Jimmy Carter administration to negotiate for the release of the hostages, and a failed rescue attempt, helped force Carter out of office and brought Ronald Reagan to power. On Jimmy Carter's final day in office, the last hostages were finally set free as a result of the
Algiers Accords. Mohammad Reza Pahlavi left the United States for Egypt, where he died of complications from cancer only months later, on 27 July 1980. The Cultural Revolution began in 1980, with an initial closure of universities for three years, in order to perform an inspection and clean up in the cultural policy of the education and
training system.[165] An Iranian soldier wearing a gas mask on the front-line during the Iran-Iraq War. Although the forces of Saddam Hussein made several early advances, by mid 1982, the Iranian forces successfully
managed to drive the Iraqi army back into Iraq. In July 1982, with Iraq thrown on the defensive, the regime of Iran took the decision to invade Iraq and conducted countless offensives in a bid to conquer Iraqi territory and capture cities, such as Basra. The war continued until 1988 when the Iraqi army defeated the Iranian forces inside Iraq
and pushed the remaining Iranian troops back across the border. Subsequently, Khomeini accepted a truce mediated by the United Nations. The total Iranian troops back across the border. Silent Demonstration during the
2009–10 Iranian election protests Following the Iran-Iraq War, in 1989, Akbar Hashemi Rafsanjani and his administration concentrated on a pragmatic pro-business policy of rebuilding and strengthening the economy without making any dramatic break with the ideology of the revolution. In 1997, Rafsanjani was succeeded by moderate
reformist Mohammad Khatami, whose government attempted, unsuccessfully, to make the country more free and democratic. [168] The 2005 presidential election brought conservative populist candidate, Mahmoud Ahmadinejad, to power. [169] By the time of the 2009 Iranian presidential election, the Interior Ministry announced incumbent
President Ahmadinejad had won 62.63% of the vote, while Mir-Hossein Mousavi had come in second place with 33.75%.[170][171] The election results were widely disputed, [172][173] and the creation of the Iranian Green Movement
Hassan Rouhani was elected as the president on 15 June 2013, defeating Mohammad Bagher Ghalibaf and four other candidates. [176][177] The electoral victory of Rouhani relatively improved the relations of Iran with other countries. [178] The 2017–18 Iranian protests were initiated on 31 December 2017 and continued for months. The
2017-18 Iranian protests swept across the country against the government and its longtime Supreme Leader in response to the economic and political situation. [179] The scale of protests throughout the country and the number of people participating were significant, [180] and it was formally confirmed that thousands of protesters were
arrested.[181] The 2019–20 Iranian protests started on 15 November in Ahvaz, spreading across the country within hours, after the government announced increases in the fuel price of up to 300%.[182] A week-long total Internet shutdown throughout the country marked one of the most severe Internet blackouts in any country, and in the
bloodiest governmental crackdown of the protestors in the history of Islamic Republic, [183] tens of thousands were arrested and hundreds were killed within a few days according to multiple international observers, including Amnesty International [184] On 3 January 2020, the revolutionary guard's general, Qasem Soleimani, was
assassinated by the United States in Iraq, which considerably heightened the existing tensions between the two countries and leading to nation-wide
protests. An international investigation led to the government admitting to the shootdown of the plane by a surface-to-air missile after three days of denial, calling it a "human error".[186][187] Geography Main article: Geography of Iran See also: Borders of Iran, Agriculture in Iran, and Environmental issues in Iran Mount Damavand, Iran's
highest point, is located in Amol, Mazenderan. Iran has an area of 1,648,195 km2 (636,372 sq mi).[3] It lies between latitudes 24° and 40° N, and longitudes 44° and 64° E. It is bordered to the northwest by Armenia (35 km or 22 mi), the Azeri exclave of Nakhchivan (179 km or 111 mi),[188] and the Republic of Azerbaijan (611 km or
380 mi); to the north by the Caspian Sea; to the northeast by Turkmenistan (992 km or 616 mi); to the east by Afghanistan (936 km or 582 mi) and Pakistan (909 km or 565 mi); to the south by the Persian Gulf and the Gulf of Oman; and to the west by Iraq (1,458 km or 906 mi) and Turkey (499 km or 310 mi). Iran consists of the Iranian
Plateau, with the exception of the coasts of the Caspian Sea and Khuzestan. It is one of the world's most mountainous countries, its landscape dominated by rugged mountain ranges that separate various basins or plateaux from one another. The populous western part is the most mountainous, with ranges such as the Caucasus, Zagros
and Alborz, the last containing Mount Damavand, Iran's highest point at 5,610 m (18,406 ft), which is also the highest mountain in Asia west of the Hindu Kush. The northern part of Iran is covered by the lush lowland Caspian Hyrcanian mixed forests, located near the southern shores of the Caspian Sea. The eastern part consists mostly
of desert basins, such as the Kavir Desert, which is the country's largest desert, and the Lut Desert, as well as some salt lakes. Iran had a 2019 Forest Landscape Integrity Index mean score of 7.67/10, ranking it 34th globally out of 172 countries.[189] The only large plains are found along the coast of the Caspian Sea and at the northern
end of the Persian Gulf, where the country borders the mouth of the Arvand river. Smaller, discontinuous plains are found along the remaining coast of the Persian Gulf, the Strait of Hormuz, and the Gulf of Oman. Iran located in seismically active area. [190] On average every 10 years one 7 Richter earthquake occurs in Iran. [191] Most
earthquakes are Shallow-focus and can be very devastating like tragic 2003 Bam earthquake Climate Hot semi-arid climate Hot semi-arid climate Hot-summer Mediterranean climate Continental Mediterranean climate Having 11 climates out of the world's
13. Iran's climate is diverse. [192] ranging from arid and semi-arid, to subtropical along the Caspian coast and the northern forests. [193] On the northern edge of the country (the Caspian coast plain), temperatures rarely fall below freezing and the area remains humid for the rest of the year. Summer temperatures rarely exceed 29 °C
(84.2 °F).[194][195] Annual precipitation is 680 mm (26.8 in) in the eastern part of the plain and more than 1,700 mm (66.9 in) in the western part. Gary Lewis, the United Nations Resident Coordinator for Iran, has said that "Water scarcity poses the most severe human security challenge in Iran today".[196] To the west, settlements in the
Zagros basin experience lower temperatures, severe winters with below zero average daily temperatures and heavy snowfall. The eastern and central basins are arid, with less than 200 mm (7.9 in) of rain, and have occasional deserts.[197] Average summer temperatures rarely exceed 38 °C (100.4 °F).[194] The coastal plains of the
Persian Gulf and Gulf of Oman in southern Iran have mild winters, and very humid and hot summers. The annual precipitation ranges from 135 to 355 mm (5.3 to 14.0 in).[194] Despite climate change in the region Iran is one of the few countries in the world which has not ratified the Paris Agreement.[198] Biodiversity See also: Wildlife of
Iran Persian leopard, listed as Endangered on the IUCN Red List. The wildlife of Iran is composed of several animal species, including bears, the Eurasian lynx, foxes, gazelles, gray wolves, jackals, panthers, and wild pigs.[199][200] Other domestic animals of Iran include Asian water buffaloes, camels, cattle, donkeys, goats, horses, and
the sheep. Eagles, falcons, partridges, pheasants, and storks are also native to the wildlife of Iran. One of the most famous members of the Iranian cheetah, whose numbers were greatly reduced after the 1979 Revolution. [201] The Persian leopard, which is the
world's largest leopard subspecies living primarily in northern Iran, is also listed as an endangered species. [202] Iran lost all its Asiatic lions and the now extinct Caspian tigers by the earlier part of the International Union for Conservation of Nature, a sign
of serious threats against the country's biodiversity. The Iranian Parliament has been showing disregard for wildlife by passing laws and regulations such as the act that lets the Ministry of Industries and Mines exploit mines without the involvement of the Department of Environment, and by approving large national development projects
without demanding comprehensive study of their impact on wildlife habitats, [204] Administrative divisions Main articles: Regions of Iran, and Counties of

Kuwait Saudi Arabia Iran is divided into five regions with thirty-one provinces (ostān), [205] each governed by an appointed governor (ostāndār). The country has one of the highest urban growth rates in the world. From
1950 to 2002, the urban proportion of the population increased from 27% to 60%.[206] Most internal migrants have settled around the cities of Tehran, Isfahan, Ahvaz, and Qom. The listed population of around 8.8
million (2016 census), is the capital and largest city of Iran. It is an economical and cultural center, and is the hub of the country's second most populous city, Mashhad, has a population of around 3.3 million (2016 census), and is capital of the province of Razavi Khorasan. Being the site
of the Imam Reza Shrine, it is a holy city in Shia Islam. About 15 to 20 million pilgrims visit the shrine every year. [208] [209] Isfahan has a population of the province of Isfahan, and was also the third capital of the Safavid Empire. It is home to a wide
variety of historical sites, including the famous Shah Square, Siosepol, and the churches at the Armenian district of New Julfa. It is also home to the world's seventh largest shopping mall, Isfahan City Center. The fourth most populous city of Iran, Karaj, has a population of around 1.9 million (2016 census). It is the capital of the province of
Alborz, and is situated 20 km west of Tehran, at the foot of the Alborz mountain range. It is a major industrial city in Iran, with large factories producing sugar, textiles, wire, and alcohol. With a population of around 1.7 million (2016 census), Tabriz is the fifth most populous city of Iran, and had been the second most populous until the late
1960s. It was the first capital of the Safavid Empire, and is now the capital of the province of East Azerbaijan. It is also considered the country's second major industrial city (after Tehran). Shiraz, with a population of around 1.8 million (2016 census), is Iran's sixth most populous city. It is the capital of the province of Fars, and was also the
capital of Iran under the reign of the Zand dynasty. It is located near the ruins of Persepolis and Pasargadae, two of the four capitals of the Achaemenid Empire. Government and politics Main article: Politics of Iran Iran's syncretic political system combines elements of an Islamic theocracy with vetted democracy. The political system of the
Islamic Republic is based on the 1979 Constitution. [210] Supreme Leader Ali Khamenei, the Supreme Leader of Iran, meeting with his counterpart, China's paramount leader Xi Jinping on 23 January 2016. Iran and China are strategic allies. [211][212] The Leader of the Revolution ("Supreme Leader") is responsible for delineation and
supervision of the policies of the Islamic Republic of Iran. [213] The Iranian president has limited power compared to the Supreme Leader Khamenei, has been issuing decrees and making the final decisions on the economy, environment, foreign policy, education, national
planning, and everything else in the country.[215][216][217][218][217][218][217][228] Khamenei also outlines and urges for the transparency,[223] and has fired and reinstated presidential cabinet appointments.[224][225] Key ministers are selected with the Supreme Leader Ali Khamenei's agreement and he has the
ultimate say on Iran's foreign policy. [214] The president-elect is required to gain the Leader Khamenei's official approval before being sworn in before the Parliament (Mailis). Through this process, known as Tanfiz (validation), the Leader agrees to the outcome of the presidential election. [citation needed] The Supreme Leader is directly
involved in ministerial appointments for Defense, Intelligence and Foreign Affairs, as well as other top ministries after submission of candidates from the president. [226] Iran's regional policy is directly controlled by the office of the Supreme Leader with the Ministry of Foreign Affairs' task limited to protocol and ceremonial occasions. All of
Iran's ambassadors to Arab countries, for example, are chosen by the Quds Corps, which directly reports to the Supreme Leader. [215] The budget bill for every year, as well as withdrawing money from the National Development Fund of Iran, require Supreme Leader Ali Khamenei's approval and permission. [citation needed] The Supreme
Leader Khamenei can and did order laws to be amended. [227] Setad, estimated at $95 billion in 2013 by the Reuters, accounts of which are secret even to the Iranian parliament, [228] [229] is controlled only by the Supreme Leader. [230] [231] Ali Khamenei voting in the 2017 presidential election The Supreme Leader is the commander-in-
chief of the armed forces, controls the military intelligence and security operations, and has sole power to declare war or peace. [213] The heads of the judiciary, the state radio and television networks, the commanders of the police and military forces, and six of the twelve members of the Guardian Council are directly appointed by the
Supreme Leader.[213] The Assembly of Experts is responsible for electing the Supreme Leader, and has the power to dismiss him on the basis of qualifications and popular esteem.[232] To date, the Assembly of Experts has not challenged any of the Supreme Leader's decisions, nor has it attempted to dismiss him.[233] The previous
head of the judicial system, Sadeq Larijani, appointed by the Supreme Leader, said that it is illegal for the Assembly of Experts to supervise the Supreme Leader, said that it is illegal for the Assembly of Experts to supervise the Supreme Leader, said that it is illegal for the Assembly of Experts to supervise the Supreme Leader, said that it is illegal for the Assembly of Experts has become a ceremonial body without any real power. [235][236][237][238]
There have been instances when the current Supreme Leader publicly criticized members of the Assembly of Experts, resulting in their arrest and dismissal. For example, Khamenei publicly called then-member of the Assembly of Experts Ahmad Azari Qomi a traitor, resulting in Qomi's arrest and eventual dismissal from the Assembly of
Experts. Another instance is when Khamenei indirectly called Akbar Hashemi Rafsanjani a traitor for a statement he made, causing Rafsanjani to retract it. [239] Guardian Council (all members of which are directly or indirectly appointed by
the Leader) or the Leader before running, in order to ensure their allegiance to the Supreme Leader. [240] The Leader very rarely does the Vetting himself directly, but has the power to do so, in which case additional approval of the Guardian Council.
[241] The Guardian Council can, and has dismissed some elected members of the Iranian parliament in the past. [242] For example, Minoo Khaleghi was disgualified by Guardian Council even after winning election, as she had been photographed in a meeting without wearing headscarf. [243] President Iranian President Hassan Rouhani
meeting with Russian President Vladimir Putin. Iran and Russia are strategic allies. [244][245][246] After the Supreme Leader, the Constitution defines the President is elected by universal suffrage for a term of four years, however, the president is still required to gain the
Leader's official approval before being sworn in before the Parliament (Majlis). The Leader also has the power to dismiss the elected president approval before being sworn in before the Parliament (Majlis). The Leader also has the power to dismiss the elected president approval before being sworn in before the Parliament (Majlis). The Leader also has the power to dismiss the elected president approval before being sworn in before the Parliament (Majlis). The Leader also has the power to dismiss the elected president approval before being sworn in before the Parliament (Majlis). The Leader also has the power to dismiss the elected president approval before being sworn in before the Parliament (Majlis). The Leader also has the power to dismiss the elected president approval before being sworn in before the Parliament (Majlis). The Leader also has the power to dismiss the elected president approval before the Parliament (Majlis) and the Parliament (Majlis) are the power to dismiss the elected president approval before the Parliament (Majlis) are the Par
the implementation of the constitution, and for the exercise of executive powers in implementing the decrees and general policies as outlined by the Supreme Leader, except for matters directly related to the Supreme Leader, who has the final say in all matters. [213] Unlike the executive in other countries, the President of Iran does not
have full control over anything, as these are ultimately under the control of the Supreme Leader. [210] Chapter IX of the Constitution of the Islamic Republic of Iran sets forth the qualifications for presidential election and all other elections in Iran are outlined by the Supreme Leader. [223][248] The
President functions as the executive of affairs such as signing treaties and other international agreements, and administering national planning, budget, and state employment affairs, all as approved by the Supreme Leader. [216][217][248][218][219][220][221][249] The President appoints the ministers, subject to the approval of the
Parliament, as well as the approval of the Supreme Leader, who can dismiss or reinstate any of the ministers at any time, regardless of the decisions made by the President or the Parliament. [224][225][250] The President supervises the Council of Ministers, coordinates government decisions, and selects government policies to be placed
before the legislature.[251] The current Supreme Leader, Ali Khamenei, has fired as well as reinstated Council of Ministers members.[252][253] Eight Vice Presidents serve under the President, as well as a cabinet of twenty-two ministers, who must all be approved by the legislature.[254] Legislature The Islamic Consultative Assembly,
also known as the Iranian Parliament The legislature of Iran, known as the Islamic Consultative Assembly, is a unicameral body comprising 290 members elected for four-year terms. [255] It drafts legislation, ratifies international treaties, and approves the national budget. All parliamentary candidates and all legislation from the assembly
must be approved by the Guardian Council.[256] The Guardian Council comprises twelve jurists, including six appointed by the Head of the Judiciary.[257][258] The Council interprets the constitution and may veto the Parliament. If a law is
deemed incompatible with the constitution or Sharia (Islamic law), it is referred back to the Parliament for revision. [247] The Expediency Council, and serves as an advisory body to the Supreme Leader, making it one of the most powerful governing
bodies in the country.[259] Local city councils are elected by public vote to four-year terms in all cities and villages of Iran. Law Main article: Judiciary, who in turn appoints the head of the Supreme Court and the chief public prosecutor.
[233] There are several types of courts, including public courts that deal with civil and criminal cases, and revolutionary courts which deal with certain categories of offenses, such as crimes against national security. The decisions of the revolutionary courts are final and cannot be appealed. [233] The Special Clerical Court handles crimes
allegedly committed by clerics, although it has also taken on cases involving laypeople. The Special Clerical Court functions independently of the regular judicial framework, and is accountable only to the Supreme Leader. The Court's rulings are final and cannot be appealed. [233] The Assembly of Experts, which meets for one week
annually, comprises 86 "virtuous and learned" clerics elected by adult suffrage for eight-year terms. Foreign relations Main article: Foreign relations for eight relations have often been portrayed as being based on two strategic principles;
eliminating outside influences in the region, and pursuing extensive diplomatic contacts with developing and non-aligned countries. [260] Since 2005, Iran's nuclear program has become the subject of contention with the international community, mainly the United States. Many countries have expressed concern that Iran's nuclear program
could divert civilian nuclear technology into a weapons program. This has led the United Nations Security Council to impose sanctions against Iran which had further isolated Iran politically and economically from the rest of the global community. In 2009, the U.S. Director of National Intelligence said that Iran, if choosing to, would not be
```

```
able to develop a nuclear weapon until 2013.[261] Protest against U.S. recognition of Jerusalem as capital of Israel. Tehran, 11 December 2017. As of 2009[update], the government of Iran maintains diplomatic relations with 99 members of the United Nations,[262] but not with the United States, and not with Israel—a state which Iran's
government has derecognized since the 1979 Revolution. [263] Among Muslim nations, Iran has an adversarial relationship with Saudi Arabia is a conservative Sunni monarchy. [264] Regarding the Israeli—Palestinian conflict, the government
of Iran has recognized Jerusalem as the capital of the State of Palestine, after Trump recognized Jerusalem as the capital of Israel. [265] Since the 2000s, Iran's controversial nuclear program has raised concerns, which is part of the basis of the international sanctions against the country. On 14 July 2015, Tehran and the P5+1
came to a historic agreement (Joint Comprehensive Plan of Action) to end economic sanctions in exchange for Iran's restriction in producing enriched uranium after demonstrating a peaceful nuclear research project that would meet the International Atomic Energy Agency standards. [268] Iran is a member of dozens of international
organizations, including the G-15, G-24, G-77, IAEA, IBRD, IDA, IDB, IFC, ILO, IMF, IMO, Interpol, OIC, OPEC, [269] WHO, and the United Nations, and currently has observer status at the World Trade Organization. Military Main article: Armed Forces of the Islamic Republic of Iran See also: Iranian involvement in the Syrian Civil War
Sophisticated indigeonous long range missile system Bavar-373 paraded in Tehran. The Islamic Republic of Iran has two types of armed forces: the regular forces of the Army, the Air Force, and the Revolutionary Guards, totaling about 545,000 active troops. Iran also has around 350,000 Reserve Force, totaling around
900,000 trained troops. [270] The government of Iran has a paramilitary, volunteer militia force within the Islamic Revolutionary Guard Corps, called the Basij, which includes about 90,000 full-time, active-duty uniformed members. Up to 11 million men and women are members of the Basij who could potentially be called up for service.
GlobalSecurity.org estimates Iran could mobilize "up to one million men", which would be among the largest troop mobilizations in the world. [271] In 2007, Iran's military doctrine is based on deterrence. [273] In 2014,
the country spent $15 billion on arms, while the states of the Gulf Cooperation Council spent eight times more. [274] The government of Iran supports the military and financial aid. [275] Iran and Syria are close strategic allies, and Iran has provided significant support
for the Syrian Government in the Syrian Civil War. [276] According to some estimates, Iran controlled over 80,000 pro-Assad Shi'ite fighters in Syria. [276] For the Syrian Government of Iran has developed its own military industry, produced its own tanks, armored personnel carriers,
missiles, submarines, military vessels, missile destroyer, radar systems, helicopters, and fighter planes. [278] In recent years, official announcements have highlighted the development of weapons such as the Hoot, Kowsar, Zelzal, Fateh-110, Shahab-3, Sejjil, and a variety of unmanned aerial vehicles (UAVs). [279] Iran has the largest and
most diverse ballistic missile arsenal in the Middle East. [280] The Fair-3, a liquid fuel missile with an undisclosed range which was developed and produced conscription law at National Consultative Majlis. At that time every
male person who had reached 21 years old must serve for military for two years. The conscription exempted women from military service after 1979 revolution. Iranian constitution obliges all men of 18 years old and higher to serve in military or police bases. They cannot leave the country or be employed without completion of the service
period.[281] The period varies from 18 to 24 months. Human rights Main articles: Human rights in Iran and Human rights in the Islamic Republic of Iran According to international reports, Iran's human rights in the Islamic Republic of Iran According to international reports, Iran's human rights in the Islamic Republic of Iran According to international reports, Iran's human rights in Iran and H
government and its Supreme Leader, and severely restricts the participation of candidates in popular elections as well as other forms of political activity. [284] [285] Women's rights have been severely violated, with more child offenders being executed in Iran than in
any other country in the world. [287] [288] Sexual activity between members of the same sex is illegal and is punishable by up to death. [289] Over the past decade, numbers of anti-government protests have broken out throughout Iran (such as the 2019–20 Iranian protests), demanding reforms or the end to the Islamic Republic.
However, the IRGC and police often suppressed mass protests by violent means, which resulted in thousands of protesters killed. Economy Main article: Economy Main article: Economy of Iran See also: Iranian subsidy reform plan, Banking and insurance in Iran, Transport in Iran, and Communications in Iran Iran's provinces by their contribution to national
GDP (2014) Iran's economy is a mixture of central planning, state ownership of oil and other large enterprises, village agriculture, and small-scale private trading and service ventures. [291] In 2017, GDP was $427.7 billion ($1.631 trillion at PPP), or $20,000 at PPP per capita. [3] Iran is ranked as an upper-middle income economy by the
World Bank. [292] In the early 21st century, the service sector contributed the largest percentage of the GDP, followed by industry (mining and manufacturing) and agriculture. [293] The Central Bank of the Islamic Republic of Iran is responsible for developing and maintaining the Iranian rial, which serves as the country's currency. The
government does not recognize trade unions other than the Islamic labour councils, which are subject to the approval of employers and the security services. [294] The minimum wage in June 2013 was 487 million rials a month ($134). [295] Unemployment has remained above 10% since 1997, and the unemployment rate for women is
almost double that of the men.[295] Tehran is the economic center of Iran, hosting 45% of the country's industries.[296] In 2006, about 45% of the government's budget came from oil and natural gas revenues, and 31% came from taxes and fees.[297] As of 2007[update], Iran had earned $70 billion in foreign-exchange reserves, mostly
(80%) from crude oil exports. [298] Iranian budget deficits have been a chronic problem, mostly due to large-scale state subsidies, that include foodstuffs and especially gasoline, totaling more than $84 billion in 2008 for the energy sector alone. [299] [300] In 2010, the economic reform plan was approved by parliament to cut subsidies
gradually and replace them with targeted social assistance. The objective is to move towards free market prices in a five-year period and increase productivity and social justice. [301] The administration continues to follow the market reform plans of the previous one, and indicates that it will diversify Iran's oil-reliant economy. Iran has also
developed a biotechnology, nanotechnology, and pharmaceutical industry. [302] However, nationalized industries such as the bonyads have often been managed badly, making them ineffective and uncompetitive with years. Currently, the government is trying to privatize these industries, and, despite successes, there are still several
problems to be overcome, such as the lagging corruption in the public sector and lack of competitiveness. Iran has leading manufacture, transportation, construction materials, home appliances, food and agricultural goods, armaments, pharmaceuticals, information technology, and
petrochemicals in the Middle East. [303] According to the 2012 data from the Food and Agriculture Organization, Iran has been among the world's top five producers of apricots, cherries, sour cherries, sour cherries, cucumbers and gherkins, dates, eggplants, figs, pistachios, quinces, walnuts, and watermelons. [304] Economic sanctions against Iran,
such as the embargo against Iranian crude oil, have injured the economy, [305] In 2015, Iran and the P5+1 reached a deal on the nuclear program by 2016. [306] According to the BBC, renewed U.S. sanctions against Iran "have led to a sharp downturn in Iran's economy,
pushing the value of its currency to record lows, quadrupling its annual inflation rate, driving away foreign investors, and triggering protests."[307] Tourism Main article: Tourism in Iran More than a million tourists visit Kish Island each year.[308] Although tourism declined significantly during the war with Iraq, it has been subsequently
recovered.[309] About 1,659,000 foreign tourists visited Iran in 2004, and 2.3 million in 2009, mostly from Asian countries, including the republics of Central Asia, while about 10% came from the European Union and North America.[310][311] Since the removal of some sanctions against Iran in 2015, tourism has re-surged in the country.
Over five million tourists visited Iran in the fiscal year of 2014–2015, four percent more than the previous year. [312][313] Alongside the capital, the most popular tourist destinations are Isfahan, Mashhad, and Shiraz. [314] In the early 2000s, the industry faced serious limitations in infrastructure, communications, industry standards, and
personnel training.[315] The majority of the 300,000 travel visas granted in 2003 were obtained by Asian Muslims, who presumably intended to visit pilgrimage sites in Mashhad and Qom.[citation needed] Several organized tours from Germany, France, and other European countries come to Iran annually to visit archaeological sites and
monuments. In 2003, Iran ranked 68th in tourism revenues worldwide. [316] According to the UNESCO and the deputy head of research for Iran's Tourism in Iran is one of the largest in the world. [317][318][319] Weak advertising,
unstable regional conditions, a poor public image in some parts of the world, and absence of efficient planning schemes in the tourism sector have all hindered the growth of tourism. [320] Iran has a long paved road system linking
most of its towns and all of its cities. In 2011 the country had 173,000 kilometres (107,000 mi) of roads, of which 73% were paved. [321] In 2008 there were nearly 100 passenger cars for every 1,000 inhabitants. [322] Trains operate on 11,106 km (6,942 mi) of railroad track. [323] The country's major port of entry is Bandar-Abbas on the
Strait of Hormuz. After arriving in Iran, imported goods are distributed throughout the country by trucks and freight trains. The Tehran-Bandar-Abbas to the railroad system of Central Asia via Tehran and Mashhad. Other major ports include Bandar e-Anzali and Bandar e-Torkeman on the
Caspian Sea and Khorramshahr and Bandar-e Emam Khomeyni on the Persian Gulf. Dozens of cities have airports that serve passenger and cargo planes. Iran Air, the national airline, was founded in 1962 and operates domestic and international flights. All large cities have mass transit systems using buses, and several private
companies provide bus service between cities. Hamadan and Tehran hold the highest betweenness and closeness centrality among the cities of Iran, regarding road and air routes, respectively. [324] [325] Transport in Iran is inexpensive because of the government's subsidization of the price of gasoline. The downside is a huge draw on
government coffers, economic inefficiency because of highly wasteful consumption patterns, contraband with neighboring countries and air pollution. In 2008, more than one million people worked in the transportation sector, accounting for 9% of GDP.[326] Energy Main articles: Energy in Iran, Petroleum industry in Iran, Nuclear program
of Iran, and Foreign direct investment in Iran Iran holds 10% of the world's proven oil reserves and 15% of its gas. It is OPEC's second largest proved gas reserves after Russia, with 33.6 trillion cubic metres, [328] and the third largest natural gas
production after Indonesia and Russia. It also ranks fourth in oil reserves with an estimated 153,600,000,000 barrels. [329] [330] It is OPEC's second largest oil exporter, and is an energy superpower. [331] In 2005, Iran spent US$4 billion on fuel imports, because of contraband and inefficient domestic use. [332] Oil industry output averaged
4 million barrels per day (640,000 m3/d) in 2005, compared with the peak of six million barrels per day reached in 1974. In the early 2000s, industry infrastructure was increasingly inefficient because of technological lags. Few exploratory wells were drilled in 2005. In 2004, a large share of Iran's natural gas reserves were untapped. The
addition of new hydroelectric stations and the streamlining of conventional coal and oil-fired stations increased installed capacity to 33,000 megawatts. Of that amount, about 75% was based on natural gas, 18% on oil, and 7% on hydroelectric power. In 2004, Iran opened its first wind-powered and geothermal plants, and the first solar
thermal plant was to come online in 2009. Iran is the world's third country to have developed GTL technology.[333] Demographic trends and intensified industrialization have caused electric power demand to grow by 8% per year. The government's goal of 53,000 megawatts of installed capacity by 2010 is to be reached by bringing on line
new gas-fired plants, and adding hydropower and nuclear power plant ever built in the Middle East after the Metsamor Nuclear Power Plant in Armenia. [334] Education, science and technology Main articles: Education in
Iran and Science and technology in Iran Literacy rate of Iran's population plus 15, 1975–2015, according to UNESCO Institute of Statistics Education, and higher education is under the supervision of the Ministry of Science and Technology. The adult literacy rated
93.0% in September 2015,[336] while it had rated 85.0% in 2008, up from 36.5% in 1976.[337] According to the data provided by UNESCO, Iran's literacy rate among people aged 15 years and older was 85.54% as of 2016, with men (90.35%) being significantly more educated than women (80.79%), with the number of illiterate people of
the same age amounting to around 8,700,000 of the country's 85 million population. [338] According to this report, Iranian government's expenditure on education is to have a high school diploma and pass the Iranian University Entrance Exam (officially
known as konkur (کنکور)), which is the equivalent of the SAT and ACT exams of the United States. Many students do a 1-2-year course of pre-university (piš-dānešgāh), which is the equivalent of the pre-university course earns students the Pre-University
Certificate.[339] Sharif University of Technology is one of Iran's most prestigious higher education institutions. Iran's higher education is sanctioned by different levels of diplomas, including an associate degree (kārdāni; also known as lisāns) delivered in
four years, and a master's degree (kāršenāsi e aršad) delivered in two years, after which another exam allows the candidate to pursue a doctoral program (PhD; known as doktorā).[340] According to the Webometrics Ranking of World Universities (as of January 2017[update]), Iran's top five universities include Tehran University of
Medical Sciences (478th worldwide), the University of Technology (726th worldwide), Amirkabir University of Technology (605th worldwide), Amirkabir University of Technology (726th worldwide), Amirkabir University (726th worldw
been ranked first in terms of output growth rate, followed by China.[342] According to a study by SCImago in 2012, Iran would rank fourth in the world in terms of research output growth rate, followed by China.[342] According to a study by SCImago in 2019, a SUSE Linux-
based HPC system made by the Aerospace Research Institute of Iran (ARI) was launched with 32 cores, and now runs 96 cores. Its performance was pegged at 192 GFLOPS.[344] The Iranian humanoid robot Sorena 2, which was designed by engineers at the University of Tehran, was unveiled in 2010. The Institute of Electrical and
Electronics Engineers (IEEE) has placed the name of Surena among the five prominent robots of the world after analyzing its performance. [345] In the biomedical sciences, Iran's Institute of Biochemistry and Biophysics has a UNESCO chair in biology. [346] In late 2006, Iranian scientists successfully cloned a sheep by somatic cell nuclear
transfer, at the Royan Research Center in Tehran.[347] According to a study by David Morrison and Ali Khadem Hosseini (Harvard-MIT and Cambridge), stem cell research in Iran is amongst the top 10 in the world.[348] Iran ranks 15th in the world in nanotechnologies.[349][350][351] Simorgh launch. Iranian Space Agency Iran placed its
domestically built satellite Omid into orbit on the 30th anniversary of the 1979 Revolution, on 2 February 2009,[352] through its first expendable launch vehicle Safir, becoming the ninth country in the world capable of both producing a satellite and sending it into space from a domestically made launcher.[353] The Iranian nuclear program
was launched in the 1950s. Iran is the seventh country to produce uranium hexafluoride, and controls the entire nuclear fuel cycle. [354] Iranian scientists outside Iran have also made some major contributions to science. In 1960, Ali Javan co-invented the first gas laser, and fuzzy set theory was introduced by Lotfi A. Zadeh. [356]
Iranian cardiologist Tofigh Mussivand invented and developed the first artificial cardiac pump, the precursor of the artificial heart Furthering research and treatment of diabetes, the HbA1c was discovered by Samuel Rahbar. A substantial number of papers in string theory are published in Iran. [357] Iranian American string theorist Kamran
Vafa proposed the Vafa-Witten theorem together with Edward Witten. In August 2014, Iranian mathematician Maryam Mirzakhani became the first woman, as well as the first Iranian, to receive the Fields Medal, the highest prize in mathematics. [358] Demographics Main article: Demographics of Iran See also: Healthcare in Iran Population
of Iranian provinces and counties in 2021. Iran's population growth (1880–2016) Iran is a diverse country, consisting of numerous ethnic and linguistic groups that are unified through a shared Iranian nationality.[359] Iran's population grew rapidly during the latter half of the 20th century, increasing from about 19 million in 1956 to more than
84 million by July 2020.[360][361] However, Iran's fertility rate has dropped significantly in recent years, coming down from a fertility rate of about 1.39% as of 2018.[364] Due to its young population, studies project that the growth will
continue to slow until it stabilizes around 105 million by 2050.[365][366][366] Iran hosts one of the largest refugee populations in the world, with almost one million refugees, [368] mostly from Afghan officials for their repatriation.[370] According
to estimates, about five million Iranian citizens have emigrated to other countries, mostly since the 1979 Revolution. [371][372] According to the Iranian Constitution, the government is required to provide every citizen of the country with access to social security, covering retirement, unemployment, old age, disability, accidents, calamities,
health and medical treatment and care services.[373] This is covered by tax revenues and income derived from public contributions. [374] Languages of the population speak Persian, which is also the official language of the country. Others include speakers of a number of other Iranian
languages within the greater Indo-European family, and languages belonging to some other ethnicities living in Iran. In northern Iran, mostly confined to Gilan and Mazenderan, the Gilaki and Mazenderan languages are widely spoken, both having affinities to the neighboring Caucasian languages. In parts of Gilan, the Talysh language is
also widely spoken, which stretches up to the neighboring Republic of Azerbaijan. Varieties of Kurdish are widely spoken in the province of Kurdistan and nearby areas. In Khuzestan, several distinct varieties of Persian are spoken. Luri and Lari are also spoken in southern Iran. Azerbaijani, which is by far the most spoken language in the
country after Persian,[375] as well as a number of other Turkic languages and dialects, is spoken in various regions of Iran, especially in the region of Azerbaijan. Notable minority languages in Iran include Armenian, Georgian, Neo-Aramaic, and Arabic. Khuzi Arabic is spoken by the Arabs in Khuzestan, as well as the wider group of
Iranian Arabs. Circassian was also once widely spoken by the large Circassian minority, but, due to assimilation over the many years, no sizable number of Circassian was also once widely spoken by the large Circassian minority, but, due to assimilation over the many years, no sizable number of Circassian was also once widely spoken by the large Circassian minority, but, due to assimilation over the many years, no sizable number of Circassian was also once widely spoken by the large Circassian minority, but, due to assimilation over the many years, no sizable number of Circassian was also once widely spoken by the large Circassian minority, but, due to assimilation over the many years, no sizable number of Circassian was also once widely spoken by the large Circassian minority, but, due to assimilation over the many years, no sizable number of Circassian was also once widely spoken by the large Circassian minority, but, due to assimilation over the many years, no sizable number of Circassian minority, but, due to assimilation over the many years, no sizable number of Circassian was also once widely spoken by the large Circassian minority.
notably regarding the largest and second largest ethnicities in Iran, the Persians and Azerbaijanis. Percentages given by the CIA's World Factbook include 53% Persian, 16% Azerbaijani, 10% Kurdish, 7% Mazenderani and Gilaki, 7% Luri, 2% Turkmen, 2% Balochi, 2% Arabic, and 2% the remainder Armenian, Georgian, Neo-Aramaic, and CIA's World Factbook include 53% Persian, 16% Azerbaijani, 10% Kurdish, 7% Mazenderani and Gilaki, 7% Luri, 2% Turkmen, 2% Balochi, 2% Arabic, and 2% the remainder Armenian, Georgian, Neo-Aramaic, and CIA's World Factbook include 53% Persian, 16% Azerbaijani, 10% Kurdish, 7% Mazenderani and Gilaki, 7% Luri, 2% Turkmen, 2% Balochi, 2% Arabic, and 2% the remainder Armenian, Georgian, Neo-Aramaic, and CIA's World Factbook include 53% Persian, 16% Azerbaijani, 10% Kurdish, 7% Mazenderani and CIA's World Factbook include 53% Persian, 16% Azerbaijani, 10% Kurdish, 7% Mazenderani and CIA's World Factbook include 53% Persian, 16% Azerbaijani, 10% Kurdish, 7% Mazenderani and CIA's World Factbook include 53% Persian, 16% Azerbaijani, 10% Kurdish, 7% Mazenderani and CIA's World Factbook include 53% Persian, 16% Azerbaijani, 10% Kurdish, 7% Mazenderani and CIA's World Factbook include 53% Persian, 16% Azerbaijani, 10% Kurdish, 7% Mazenderani and CIA's World Factbook include 53% Persian, 16% Azerbaijani, 10% Kurdish, 10% Kurdis
and Circassian.[3] Ethnic groups Main article: Ethnicities in Iran Iran's provinces by population density (2013) As with the spoken languages, the ethnic group composition also remains a point of debate, mainly regarding the largest and second largest ethnic groups, the Persians and Azerbaijanis, due to the lack of Iranian state censuses
based on ethnicity. The CIA's World Factbook has estimated that around 79% of the population of Iran are a diverse Indo-European ethno-linguistic group that comprise speakers of various Iranian languages, [380] with Persians (including Mazenderanis and Gilaks) constituting 61% of the population, Kurds 10%, Lurs 6%, and Balochs 2%.
Peoples of other ethno-linguistic groups make up the remaining 21%, with Azerbaijanis constituting 16%, Arabs 2%, Turkmens and other Turkic tribes 2%, and other Signature (including Mazenderanis, Assyrians) 1%.[3] The Library of Congress issued slightly different estimates: 65% Persians (including Mazenderanis, Assyrians) 1%.[3] The Library of Congress issued slightly different estimates: 65% Persians (including Mazenderanis, Assyrians) 1%.[3] The Library of Congress issued slightly different estimates: 65% Persians (including Mazenderanis, Assyrians) 1%.[3] The Library of Congress issued slightly different estimates: 65% Persians (including Mazenderanis, Assyrians) 1%.[3] The Library of Congress issued slightly different estimates: 65% Persians (including Mazenderanis, Assyrians) 1%.[3] The Library of Congress issued slightly different estimates: 65% Persians (including Mazenderanis, Assyrians) 1%.[3] The Library of Congress issued slightly different estimates: 65% Persians (including Mazenderanis, Assyrians) 1%.[3] The Library of Congress issued slightly different estimates: 65% Persians (including Mazenderanis) 1%.[3] The Library of Congress issued slightly different estimates: 65% Persians (including Mazenderanis) 1%.[3] The Library of Congress issued slightly different estimates (including Mazenderanis) 1%.[3] The Library of Congress issued slightly different estimates (including Mazenderanis) 1%.[3] The Library of Congress issued slightly 1%.[3] The Li
Gilaks, and the Talysh), 16% Azerbaijanis, 7% Kurds, 6% Lurs, 2% Baloch, 1% Turkic tribal groups (incl. Qashqai and Turkmens), and non-Iranian, non-Turkic groups (incl. Armenians, Georgians, Assyrians, Circassians, and Arabs) less than 3%. It determined that Persian is the first language of at least 65% of the country's population,
and is the second language for most of the remaining 35%.[381] Religion Main articles: Religion in Iran and Irreligion in Iran See also: Islamization of Iran Iranian people by religion, 2011 General Census Results[382] Religion Percent Number Muslim 99.3989%(90–95% Shia) 74,682,938 Christian 0.1566% 117,704 Zoroastrian 0.0336%
25,271 Jewish 0.0117% 8,756 Other 0.0653% 49,101 Undeclared 0.3538% 205,317 Twelver Shia Islam is the official state religion, to which about 4% to 8% of the population are Sunni Muslims, mainly Kurds and Baloches. The remaining 2% are non-Muslim religious minorities,
including Christians, Zoroastrians, Jews, Bahá'ís, Mandeans, and Yarsanis.[3][385] There are a large population of adherents of Yarsanism, a Kurdish indigenous religion in Iran. Its followers are mainly Gorani Kurds and certain groups of Lurs. They are based in Kurdistan Province,
Kermanshah Province and Lorestan mainly. Christianity, Judaism, Zoroastrianism, and the Sunni branch of Islam are officially recognized by the government, and have reserved seats in the Iranian Parliament.[139] Historically, early Iranian religions such as the Proto-Iranic religion and the subsequent Zoroastrianism and Manichaeism
were the dominant religions in Iran, particularly during the Median, Achaemenid, Parthian, and Sasanian eras. This changed after the fall of the Sasanian Empire by the centuries-long Islamization that followed the Muslim Conguest of Iran. Iran was predominantly Sunni until the conversion of the country (as well as the people of what is
today the neighboring Republic of Azerbaijan) to Shia Islam by the order of the Safavid dynasty in the 16th century. [120] Judaism has a long history in Iran, dating back to the Achaemenid conquest of Babylonia. Although many left in the wake of the establishment of the State of Israel and the 1979 Revolution, about 8,756[386] to
25,000[387] Jewish people live in Iran. Iran has the largest Jewish population in the Middle East outside of Israel. [388] Around 250,000 to 370,000 Christianity is the country's largest recognized minority religion. [391] Most are of Armenian background, as well as a sizable minority of Assyrians. [392] A
large number of Iranians have converted to Christianity from the predominant Shia Islam.[393][394][395][394][395][396] The Bahá'í Faith is not officially recognized and has been subject to official persecution.[397] According to the United Nations Special Rapporteur on Human Rights in Iran, Bahá'ís are the largest non-Muslim religious minority in
Iran, with an estimated 350,000 adherents. [398] Since the 1979 Revolution, the persecution of Bahá'ís has increased with executions and denial of civil rights, especially the denial of civil rights, especially the denial of civil rights, especially the denial of access to higher education and employment. [397][399][400] Iranian officials have continued to support the rebuilding and renovation of Armenian churches
in the Islamic Republic. The Armenian Monastic Ensembles of Iran has also received continued support. In 2019, the Iranian government registered the Holy Savior Cathedral, commonly referred to as Vank Cathedral, in the New Julfa district of Isfahan, as a UNESCO World Heritage Site, with significant expenditures for its congregation.
Currently three Armenian churches in Iran have been included in the UNESCO World Heritage List. [401][402] Culture Main article: Culture of Iran has influenced cultures as far as Greece and Italy to the west, Russia to the north
the Arabian Peninsula to the south, and south and east Asia to the east. Art Main articles: Iranian art, Safavid art, Qajar art, and Iranian modern and contemporary art Iron Age gold cup from Marlik, kept at New York City's Metropolitan Museum of Art The art of
Iran encompasses many disciplines, including architecture, stonemasonry, metalworking, weaving, pottery, painting, and calligraphy. Iranian works of art show a great variety in style, in different regions and periods. [403] The art of the Medes remains obscure, but has been theoretically attributed to the Scythian style. [404] The
Achaemenids borrowed heavily from the art of their neighboring civilizations, [405] but produced a synthesis of a unique style, [406] with an eclectic architecture remaining at sites such as Persepolis and Pasargadae. Greek iconography was imported by the Seleucids, followed by the recombination of Hellenistic and earlier Near Eastern
elements in the art of the Parthians, [407] with remains such as the Temple of Anahita and the Statue of the Parthian Nobleman. By the time of the Parthian art was highly influential, and spread into far regions. Tag-e-Bostan, Tag-e-
Kasra, Naqsh-e-Rostam, and the Shapur-Khwast Castle are among the surviving monuments from the Sasanian period. During the Middle Ages, Sasanian medieval art, [88] which carried forward to the Islamic world, and much of what later became known as Islamic
learning—including medicine, architecture, philosophy, philology, and literature—were of Sasanian basis.[410][411][412][413] The Safavid works of art show a far more unitary development than in any other period,[415] as part of a political evolution that reunified Iran as a
cultural entity.[415] Safavid art exerted noticeable influences upon the neighboring Ottomans, the Mughals, and the Deccans, and was also influential through its fashion and garden architecture on 11th–17th-century Europe.[415] Kamal-ol-Molk's Mirror Hall, often considered a starting point in Iranian modern art[416] Iran's contemporary
art traces its origins back to the time of Kamal-ol-Molk, [417] a prominent realist painter at the court of the Qajar dynasty who affected the norms of painting and adopted a naturalistic style that would compete with photographic works. A new Iranian school of fine art was established by Kamal-ol-Molk in 1928, [417] and was followed by the
so-called "coffeehouse" style of painting. Iran's avant-garde modernists emerged by the arrival of new western influences during World War II.[417] The vibrant contemporary art scene originates in the late 1940s, and Tehran's first modern art gallery, Apadana, was opened in September 1949 by painters Mahmud Javadipur, Hosein
Kazemi, and Hushang Ajudani. [418] The new movements received official encouragement by mid-1950s, [417] which led to the emergence of artists such as Marcos Grigorian, signaling a commitment to the creation of a form of modern art grounded in Iran. [420] Architecture Main articles: Iranian architecture and Persian gardens
Ruins of the Tachara, part of the World Heritage site of Persepolis. Isfahan's World Heritage site of Naqsh-e Jahan Square. The history of architecture in Iran goes back to the seventh millennium BC. [421] Iranians were among the first to use mathematics, geometry and astronomy in architecture. Iranian architecture displays great variety.
both structural and aesthetic, developing gradually and coherently out of earlier traditions and experience. [422] The guiding motif of Iranian architecture is its cosmic symbolism, "by which man is brought into communication and participation with the powers of heaven". [423] Iran ranks seventh among UNESCO's list of countries with the
most archaeological ruins and attractions from antiquity. [424] Traditionally, the guiding formative motif of Iranian architecture has been its cosmic symbolism "by which man is brought into communication and participation with the powers of heaven". [425] This theme has not only given unity and continuity to the architecture of Persia, but
has been a primary source of its emotional character as well. According to Persian historian and archaeologist Arthur Pope, the supremacy of architecture applies to both pre- and post-Islamic periods. [426] Weaving Main article: Persian carpet
Iran's carpet-weaving has its origins in the Bronze Age, and is one of the most distinguished manifestations of Iranian art. Iran is the world's total output and having a share of 30% of world's export markets. [427][428] Literature Main articles:
Literature in Iran, Iranian literature, and Persian literature, and Persian literature Tomb of the 10th-century Persian poet Ferdowsi, author of Šāhnāme, the Classical Persian composition of the Iranian national epics, in Tus Iran's oldest literary tradition is that of Avestan, the Old Iranian sacred language of the Avesta, which consists of the legendary and religious
texts of Zoroastrianism and the ancient Iranian religion, with its earliest records dating back to the pre-Achaemenid times. [429] Of the various modern languages used in Iran, Persian, various dialects of which are spoken throughout the Iranian Plateau, [430] has the most influential literature. Persian has been dubbed as a worthy
language to serve as a conduit for poetry, and is considered one of the four main bodies of world literature.[432] In spite of originating from the region of Persia (better known as Persia) in southwestern Iran, the Persian language was used and developed further through Persianate societies in Asia Minor, Central Asia, and South Asia,
leaving massive influences on Ottoman and Mughal literatures, among others. Iran has a number of famous medieval poets, most notably Rumi, Ferdowsi, Hafez, Saadi Shirazi, Omar Khayyam, and Nezami Ganjavi.[433] Iranian literature also inspired writers such as Johann Wolfgang von Goethe, Henry David Thoreau, and Ralph Waldo
Emerson.[105][106][107] Philosophy Main articles: Ancient philosophy & Ancient Iranian philosophy, and Iranian philosophy originates from Indo-European roots, with Zoroaster's reforms having major influences. According to The
Oxford Dictionary of Philosophy, the chronology of the subject and science of philosophy starts with the Indo-Iranians, dating this event to 1500 BC. The Oxford dictionary also states, "Zarathushtra's philosophy entered to influence Western tradition through Judaism, and therefore on Middle Platonism." While there are ancient relations
between the Indian Vedas and the Iranian Avesta, the two main families of the Indo-Iranian philosophical traditions were characterized by fundamental differences, especially in their implications for the human being's position in society and their view of man's role in the universe. The Cyrus Cylinder, which is known as "the first charter of
human rights", is often seen as a reflection of the Achaemenid era. [434][435] The earliest tenets of Zoroastrian schools are part of the extant scriptures of the Zoroastrian religion in Avestan. Among them are treatises such as the Zatspram,
Shkand-gumanik Vizar, and Denkard, as well as older passages of the Avesta and the Gathas. [436] Mythology Main articles: Persian mythology consists of ancient Iranian folklore and stories, all involving extraordinary beings, reflecting
attitudes towards the confrontation of good and evil, actions of the gods, and the exploits of heroes and fabulous creatures. Myths play a crucial part in Iranian history. The geography of Greater Iran, a vast area covering
present-day Iran, the Caucasus, Anatolia, Mesopotamia and Central Asia, with its high mountain ranges, plays the main role in much of Iranian mythology. Tenth-century Persian poet Ferdowsi's long epic poem Šāhnāme ("Book of Kings"), which is for the most part based on Xwadāynāmag, a Middle Persian compilation of the history of
Iranian kings and heroes from mythical times down to the reign of Chosroes II,[437] is considered the national epic of Iran. It draws heavily on the Bundahishn. Music Main article: Music of Iran Iran is the apparent birthplace of the earliest
complex instruments, dating back to the third millennium BC.[438] The use of both vertical and horizontal angular harps have been documented at Kul-e Farah. Multiple depictions of horizontal harps were also sculpted in Assyrian palaces,
dating back between 865 and 650 BC. Karna, an ancient Iranian musical instrument from the 6th century BC, kept at the Persepolis Museum Xenophon's Cyropaedia mentions a great number of singing women at the court of the Achaemenid Empire. Athenaeus of Naucratis, in his Deipnosophistae, points out to the capture of Achaemenid
singing girls at the court of the last Achaemenid king Darius III (336-330 BC) by Macedonian general Parmenion. Under the Parthian For "minstrel") had a prominent role in the society. [439] According to Plutarch's Life of Crassus (32.3), they praised their national heroes and ridiculed their Roman rivals.
Likewise, Strabo's Geographica reports that the Parthian youth were taught songs about "the deeds both of the gods and of the noblest men". [440] The history of Sasanian music is better documented than the earlier periods, and is especially more evident in Avestan texts. [441] By the time of Chosroes II, the Sasanian royal court hosted a
number of prominent musicians, namely Azad, Bamshad, Barbad, Nagisa, Ramtin, and Sarkash. Iranian traditional musical instruments include string instruments include string instruments such as chang (harp), qanun, santur, rud (oud, barbat), tar, dotar, setar, tanbur, and kamanche, wind instruments such as sorna (zurna, karna) and ney, and percussion
instruments such as tompak, kus, daf (dayere), and nagare. Iran's first symphony orchestra, the Tehran Symphony Orchestra, was founded by Qolam-Hoseyn Minbashian in 1933. It was reformed by Parviz Mahmoud in 1946, and is currently Iran's oldest and largest symphony orchestra. Later, by the late 1940s, Ruhollah Khalegi founded
the country's first national music society, and established the School of National Music in 1949.[442] Iranian pop music has its origins in the Qajar era.[443] It was significantly developed since the 1950s, using indigenous instruments and forms accompanied by electric guitar and other imported characteristics. The emergence of genres
such as rock in the 1960s and hip hop in the 2000s also resulted in major movements and influences in Iranian music. [444][445][446][447] Theater Main articles: Persian theater and Persian dance The Roudaki Hall, constructed between 1957 and 1967 in Tehran The earliest recorded representations of dancing figures within Iran were
found in prehistoric sites such as Tepe Sialk and Tepe Mūsīān.[448] The oldest Iranian initiation of theater and the phenomena of acting can be traced in the ancient epic ceremonial theater such as Sug-e Siāvuš ("mourning of Siāvaš"), as well as dances and theater narrations of Iranian mythological tales reported by Herodotus and
Xenophon. Iran's traditional theatrical genres include Baqqāl-bāzi ("grocer play", a form of slapstick comedy), Ruhowzi (or Taxt-howzi, comedy performed over a courtyard pool covered with boards), Siāh-bāzi (in which the central comedian appears in blackface), Sāye-bāzi (shadow play), Xeyme-šab-bāzi (marionette), and Arusak-bāzi
(puppetry), and Ta'zie (religious tragedy plays).[449] Before the 1979 Revolution, the Iranian national stage had become a famous performing scene for known international artists and troupes,[450] with the Roudaki Hall of Tehran constructed to function as the national stage for opera and ballet. Opened on 26 October 1967, the hall is
home to the Tehran Symphony Orchestra, the Tehran Opera Orchestra, and the Iranian National Ballet Company, and was officially renamed Vahdat Hall after the 1979 Revolution. Loris Tjeknavorian's Rostam and Sohrab, based on the tragedy of Rostam and Sohrab from Ferdowsi's epic poem Šāhnāme, is an example of opera with
Persian libretto. Tjeknavorian, a celebrated Iranian Armenian composer and conductor, composed it in 25 years, and it was finally performed for the first time at Tehran's Roudaki Hall, with Darya Dadvar in the role of Tahmina. Cinema and animation Main articles: Cinema of Iran and History of Iranian animation Reproduction of the 3rd-
millennium BC goblet from southeastern Iran, possibly the world's oldest example of animation. [451] A third-millennium BC earthen goblet discovered at the Burnt City, a Bronze Age urban settlement in southeastern Iran, depicts what could possibly be the world's oldest example of animation. The artifact, associated with Jiroft, bears five
sequential images depicting a wild goat jumping up to eat the leaves of a tree. [452] [453] The earliest attested Iranian examples of Visual representations, however, are traced back to the bas-reliefs of Persepolis, the ritual center of the Achaemenid Empire. The figures at Persepolis remain bound by the rules of grammar and syntax of
visual language, [454] The Iranian visual arts reached a pinnacle by the Sasanian era, and several works from this period have been found to articulate movements and actions in a highly sophisticated manner. It is even possible to see a progenitor of the cinematic close-up shot in one of these works of art, which shows a wounded wild pig
escaping from the hunting ground.[455] Abbas Kiarostami (1940-2016), an acclaimed Iranian film director By the early 20th century, the five-year-old industry of cinema came to Iran. The first Iranian filmmaker was probably Mirza Ebrahim (Akkas Bashi), the court photographer of Mozaffar-ed-Din Shah of the Oajar dynasty. Mirza Ebrahim
obtained a camera and filmed the Qajar ruler's visit to Europe. Later in 1904, Mirza Ebrahim (Sahhaf Bashi), a businessman, opened the first public movie theater in Tehran. [456] After him, several others like Russi Khan, Ardeshir Khan, and Ali Vakili tried to establish new movie theaters in Tehran. Until the early 1930s, there were around
15 cinema theaters in Tehran and 11 in other provinces. [455] The first Iranian feature film, Abi and Rabi, was a silent comedy directed by Ovanes Ohanian in 1930. The first sounded one, Lor Girl, was produced by Ardeshir Irani and Abd-ol-Hosein Sepanta in 1932. Iran's animation industry began by the 1950s, and was followed by the
establishment of the influential Institute for the Intellectual Development of Children and Young Adults in January 1965. [457] [458] The 1960s was a significant decade for Iranian cinema, with 25 commercial films produced annually on average throughout the early 60s, increasing to 65 by the end of the decade. The majority of the
production focused on melodrama and thrillers. With the screening of the films Qeysar and The Cow, directed by Masoud Kimiai and Dariush Mehrjui respectively in 1969, alternative films set out to establish their status in the film industry and Bahram Beyzai's Downpour and Nasser Taghvai's Tranquility in the Presence of Others followed
soon. Attempts to organize a film festival, which had begun in 1954 within the framework of the Golrizan Festival, resulted in the festival in 1973.[459] Behrouz Vossoughi, a well-known Iranian actor who has appeared in more than 90 films
After the Revolution of 1979, and following the Cultural Revolution, a new age emerged in Iranian cinema, starting with Long Live! by Khosrow Sinai and followed by many other directors, such as Abbas Kiarostami, an acclaimed Iranian director, planted Iran firmly on the map of world cinema when he won the
Palme d'Or for Taste of Cherry in 1997.[460] The continuous presence of Iranian films in prestigious international festivals, such as the Cannes Film Festival, attracted world attention to Iranian masterpieces.[461] In 2006, six Iranian films, of six different styles, represented
Iranian cinema at the Berlin International Film Festival. Critics considered this a remarkable event in the history of Iranian cinema. [462][463] Asghar Farhadi, a well-known Iranian director, has received a Golden Globe Award and two Academy Awards, representing Iran for Best Foreign Language Film in 2012 and 2017. In 2012, he was
named as one of the 100 Most Influential People in the world by the American news magazine Time. Observances See also: List of festivals in Iran Haft-Seen, a customary of Nowruz, the Iranian New Year Iranian Ne
people adhering to different religions, but is considered a holiday for the Zoroastrians. It was registered on the UNESCO's list of Masterpieces of the Oral and Intangible Heritage of Humanity in 2009,[464] described as the Persian New Year,[465][466][467][468] shared with a number of other countries in which it has historically been
celebrated. On the eve of the last Wednesday of the preceding year, as a prelude to Nowruz, the ancient festival of Čāršanbe Suri celebrates Atar ("fire") by performing rituals such as jumping over bonfires and lighting off firecrackers and fireworks. [469][470] The Nowruz celebrations last by the end of the 13th day of the Iranian year
(Farvardin 13, usually coincided with 1 or 2 April), celebrating the festival of Sizdebedar, during which the people traditionally go outdoors to picnic.[citation needed] Yaldā, another nationally celebrated ancient tradition,[471] commemorates the ancient goddess Mithra and marks the longest night of the year on the eve of the winter solstice
(čelle ye zemestān; usually falling on 20 or 21 December),[472][473] during which families gather together to recite poetry and eat fruits—particularly the red fruits watermelon and Markazi,[476][477][478][479] there is also the mids
festival of Tirgān,[480] which is observed on Tir 13 (2 or 3 July) as a celebration of water.[481][482] Alongside the ancient Iranian celebrations, Islamic annual events such as Ramezān, Eid e Fetr, and Ruz e Āšurā are marked by the country's large Muslim population, Christian traditions such as Noel,[483] Čelle ye Ruze, and Eid e
Pāk[484] are observed by the Christian communities, Jewish traditions such as Purim, [485] Hanukā, [486] and Eid e Fatir (Pesah)[487][488] are observed by the Zoroastrians. Public holidays Main article: Public holidays in Iran See also:
Iranian calendars Iran's official calendar of the Solar Heiri calendar, beginning at the vernal equinox in the Northern Hemisphere, which was first enacted by the Iranian Parliament on 31 March 1925,[490] Each of the Solar Heiri calendar correspond with a zodiac sign, and the length of each year is absolutely solar.[490]
The months are named after the ancient Iranian months, [490] namely Farvardin (Fravaši), Ordibehešt (Aša Vahišta), Xordād (Haurvatāt), Tir (Tištrya), Amordād (Amərətāt), Šahrivar (Xšaθra Vairya), Mehr (Miθra), Ābān (Āpō), Āzar (Ātar), Dey (Daθuš), Bahman (Vohu Manah), and Esfand (Spəntā Ārmaiti). Alternatively, the Lunar Hejri
calendar is used to indicate Islamic events, and the Gregorian calendar remarks the international events. Legal public holidays based on the Iranian solar calendar include the cultural celebrations of Nowruz (Farvardin 1–4; 21–24 March) and Sizdebedar (Farvardin 13; 2 April), and the political events of Islamic Republic Day (Farvardin 12;
1 April), the death of Ruhollah Khomeini (Khordad 14; 4 June), the Khordad 15 event (Khordad 15; 5 June), the anniversary of the 1979 Revolution (Bahman 22; 10 February), and Oil Nationalization Day (Esfand 29; 19 March). [491] Lunar Islamic public holidays include Tasua (Muharram 9; 30 September), Ashura (Muharram 10; 10 February), and Oil Nationalization Day (Esfand 29; 10 February).
1 October), Arba'een (Safar 20; 10 November), the death of Muhammad (Safar 28; 17 November), the death of Ali al-Ridha (Safar 29 or 30; 18 November), the death of Fatimah (Jumada-al-Thani 3; 2 March), the birthday of Ali (Rajab 13; 10 April), Muhammad's first revelation
(Rajab 27; 24 April), the birthday of Muhammad al-Mahdi (Sha'ban 15; 12 May), the death of Ali (Ramadan 21; 16 June), Eid al-Ourban (Zulhijja 10; 1 September), and Eid al-Oadir (Zulhijja 18; 9 September). [491] Cuisine Main article: Iranian cuisine
Chelow kabab (rice and kebab), one of Iran's national dishes[492][493][494] Due to its variety of ethnic groups and the influences from the neighboring cultures, the cuisine of Iran's national dishes[492][493][494] Due to its variety of ethnic groups and the influences from the neighboring cultures, the cuisine of Iran's national dishes[492][493][494] Due to its variety of ethnic groups and the influences from the neighboring cultures, the cuisine of Iran's national dishes[492][493][494] Due to its variety of ethnic groups and the influences from the neighboring cultures, the cuisine of Iran's national dishes[492][493][494] Due to its variety of ethnic groups and the influences from the neighboring cultures, the cuisine of Iran's national dishes[492][493][494] Due to its variety of ethnic groups and the influences from the neighboring cultures.
characteristic flavorings such as saffron, dried lime, cinnamon, and parsley are mixed delicately and used in some special dishes. Onion and garlic are commonly used in the preparation of the accompanying course, but are also served separately during meals, either in raw or pickled form. Iranian cuisine includes a wide range of main
dishes, including various types of kebab, pilaf, stew (khoresh), soup and āsh, and omelette, Lunch and dinner meals are commonly accompanied by side dishes such as borani, Mirza Oasemi, or kashk e bademian as the appetizer. In Iranian
culture, tea (čāy) is widely consumed. [495] [496] Iran is the world's seventh major tea producer, [497] and a cup of tea is typically the first thing offered to a guest. [498] One of Iran's most popular desserts is the falude, [499] consisting of vermicelli in a rose water syrup, which has its roots in the fourth century BC. [500] [501] There is also the
popular saffron ice cream, known as bastani sonnati ("traditional ice cream"),[502] which is sometimes accompanied with carrot juice.[503] Iran is also famous for its caviar.[504] Sports Main article: Sport in Iran Skiers at the Dizin Ski Resort Iran is most likely the birthplace of polo,[505][506] locally known as čowgān, with its earliest
records attributed to the ancient Medes. [507] Freestyle wrestling is traditionally considered the national wrestling, called košti e pahlevāni ("heroic wrestling"), is registered on UNESCO's Intangible Cultural Heritage list. Being a
mountainous country, Iran is a venue for skiing, snowboarding, hiking, rock climbing, [508] and mountain climbing, [509][510] It is home to several ski resorts, the most famous being Tochal, located in the Alborz mountain
rage, is the world's fifth-highest ski resort (3,730 m or 12,238 ft at its highest station). Iran's National Olympic Committee was founded in 1947. Wrestlers and weightlifters have achieved the country's highest records at the Olympics. In September 1974, Iran became the first country in West Asia to host the Asian Games. The Azadi Sport
Complex, which is the largest sport complex in Iran, was originally built for this occasion. The Azadi Stadium in Tehran is West Asia's largest football stadium. Football has been regarded as the most popular sport in Iran, with the men's national team has maintained
its position as Asia's best team, ranking 1st in Asia and 33rd in the world according to the FIFA World Rankings (as of May 2020[update]).[512] Volleyball is the second most popular sport in Iran.[513][514] Having won the 2011 and 2013 Asian Men's Volleyball Championships, the men's national team is currently the strongest team in
Asia, and ranks eighth in the FIVB World Rankings (as of July 2017[update]). Basketball is also popular, [515] with the men's national female champions boycotting tournaments in Iran in chess (U.S. Woman Grandmaster Nazí
Paikidze)[516][517] and in shooting (Indian world champion Heena Sidhu),[518] as they refused to enter a country where they would be forced to wear a hijab. Media Main article: Media of Iran Iran is one of the countries with the worst freedom of the press situation, ranking 164th out of 180 countries on the Press Freedom Index (as of
2018).[519] The Ministry of Culture and Islamic Guidance is Iran's main government department responsible for the cultural policy, including activities regarding communications and information.[520] Iran's first newspapers were published during the reign of Naser al-Din Shah of the Oaiar dynasty in the mid-19th century.[521] Most of the
newspapers published in Iran are in Persian, the country's official language. The country's most widely circulated periodicals are based in Tehran Times, Iran Daily, and Financial Tribune are among English-language newspapers based in Iran.
Television was introduced in Iran in 1958.[522] Although the 1974 Asian Games were broadcast in color, full color programming began in 1978.[522] Since the Islamic Republic of Iran Broadcasting (IRIB).[318] Despite the restrictions on non-domestic television, about 65% of the
residents of the capital city and about 30 to 40% of the residents outside the capital city access worldwide television channels through observers state that the figures are likely to be higher. [523][524] Iran received access to the Internet in 1993. According to Internet World Stats, as of 2017 [update], around 69.1%
of the population of Iran are Internet users. [525] Iran ranks 17th among countries by number of Internet users. According to the statistics provided by the web information company of Alexa, Google Search is Iran's most widely used search engine and Instagram is the most popular online social networking service. [526] Direct access to
many worldwide mainstream websites has been blocked in Iran, including Facebook, which has been blocked since 2009 due to the organization of anti-governmental protests on the website. [527] However, as of 2017[update], Facebook has around 40 million subscribers based in Iran (48.8% of the population) who use virtual private
networks and proxy servers to access the website. [525] Some of the officials themselves have verified accounts on the social networking websites that are blocked by the authorities, including Facebook and Twitter. [528] About 90% of Iran's e-commerce takes place on the Iranian online store of Digikala, which has around 750,000 visitors
per day and more than 2.3 million subscribers and is the most visited online store in the Middle East. [529] [526] Fashion and clothing Main article: Fashion in Iran is divided into several historical periods. The exact date of the emergence of weaving in Iran is not yet known, but it is likely to coincide with the emergence of
civilization. Clothing in Iran is mentioned in Persian mythology. Ferdowsi and many historians have considered Keyumars to be the inventor of the use of living skins as clothing. [530] Ferdowsi considers Tahmuras to be a
kind of textile initiator in Iran. There are historical discoveries in northern Iran from about 6,000 BC that refer to wool weaving at the time. Other discoveries in central Iran dating back to 4200 BC have shown that the animals' skin has not been the only clothing worn on the Iranian Plateau since those years. The clothing of ancient Iran took
an advanced form, and the fabric and color of clothing became very important at that time. Depending on the social status, eminence, climate of the region and the season, Persian clothing during the Achaemenian period took various forms. The philosophy used in this clothing, in addition to being functional, also had an aesthetic role.
[530] Beauty pageant festivals inside Iran were not held after the 1979 revolution, and the last selection ceremony of the "beauty pageant and Miss Universe outside of Iran, Sahar Biniaz (Miss Universe Canada 2012) and
Shermineh Shahrivar (Miss Germany and Miss Europe) are examples of Iranian models outside Iran.[531][532] Girls of Enghelab Street was a series of protests in 2017–2019 against a compulsory hijab in Iran.[533] See also List of Iran-related topics Outline of Iran Name of Iran Notes ^ Persian: جمهوری اسلامی ایران
Irān (listen) [dʒomhuː rije eslɒː mije ?iːˈrɒn] ^ Including the Nakhchivan Autonomous Republic ^ In the Avesta, the airiia- (the "non-Arya"). The word also appears four times in Old Persian: One is in the Behistun Inscription, where ariya- is
the name of a language (DB 4.89). The other three instances occur in Darius the Great's inscription at Nagsh-e Rostam (DNa 14-15), in Darius I's inscription of Xerxes I at Persepolis (XPh 12-13). In these, the two Achaemenid dynasties describe themselves as parsa parsahya puça ariya
ariyaciça "a Persian, son of a Persian, an Ariya, of Ariya origin."—The phrase with ciça ("origin, descendance") assures that ariya is an ethnic name wider in meaning than pārsa and human Rights Law: Towards a Right to

Three Child Offenders Executed". Human Rights Watch. 2018. A Freedom House (2017). "Iran". Freedom House (2017). "Iran". Freedom House (2017). "Iran". Freedom House (2017). The Islamic Republic of Iran holds elections regularly, but they fall short of democratic standards due to the role of the hard-line Guardian Council, which disqualifies all
candidates deemed insufficiently loval to the clerical establishment. Ultimate power rests in the hands of the country's supreme leader. Avatollah Ali Khamenei, and the unelected institutions under his control. Human rights abuses continued unabated in 2016, with the authorities carrying out Iran's largest mass execution in years and
launching a renewed crackdown on women's rights activists. The regime maintained restrictions on freedom of expression, both offline and online, and made further arrests of journalists, bloggers, labor union activists, and dual nationals visiting the country, with some facing heavy prison sentences. Hard-liners in control of powerful
institutions, including the judiciary and the Islamic Revolutionary Guard Corps (IRGC), were behind many of the year's abuses. There were no indications that President Hassan Rouhani, a self-proclaimed moderate seeking reelection in 2017, was willing or able to push back against repressive forces and deliver the greater social
freedoms he had promised. Opposition leaders Mir Hossein Mousavi, his wife Zahra Rahnavard, and reformist cleric Mehdi Karroubi remained or put on trial. As in 2015, the media were barred from quoting or reporting on former president Mohammad Khatami, another
important reformist figure. Avery, Daniel (4 April 2019). "71 Countries Where Homosexuality is Illegal". Newsweek. "Iran defends execution of gay people". Deutsche Welle. 12 June 2019.
