Ask your doctor or pharmacist
about the benefits of FlexPen®

- FlexPen® has the same co-pay as vial and syringe on most managed care plans^a
- One box of FlexPen® gives you 50% more insulin than a vial^b

Levemir®, NovoLog®, and NovoLog® Mix 70/30 are prescription medications. If you need assistance with prescription costs, help may be available. Visit www.pparx.org or call 1-888-4PPA-NOW.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088. Talk to your doctor about the importance of diet and exercise in your treatment plan.

^a Intended as a guide. Lower acquisition costs alone do not necessarily reflect a cost advantage in the outcome of the condition treated because there are other variables that affect relative costs. Formulary status is subject to change.

^b One box of 5 FlexPen® equals 1500 units versus 1 vial equals 1000 units.

Needles are sold separately and may require a prescription in some states. Needles and FlexPen® must not be shared.

Levemir® FlexPen®
insulin detemir (rDNA origin) injection

NovoLog® FlexPen®
insulin aspart (rDNA origin) injection

NovoLog Mix 70/30 FlexPen®
70% insulin aspart protamine suspension and 30% insulin aspart injection, (rDNA origin) in a prefilled syringe
