# About This Dictionary

The third edition of this dictionary contains more than 800 new expressions. These comprise the expressions that have appeared in the last few years—including many new expressions used in everyday talk on the streets and the college campus. The “Phrase-Finder Index” has been completely revised to make finding the location of new phrasal entries in the dictionary easier. What do we expect of slang in the year 2000 and beyond? Much of the same: sex, scatology, rudeness, and clever wordplay.

This dictionary is a collection of slang and colloquial expressions in frequent use in the United States in the twentieth century. It contains expressions that are familiar to many Americans and other expressions that are used primarily within small groups of people. The entries represent the language of the underworld, the nursery, the college campus, California beaches, urban back streets, and Wall Street. We hear from prisoners, surfers, junkies, Valley Girls, blacks, weight lifters, and just plain folks. Fad words, metaphors, wordplay, and various figures of speech make up the body of the dictionary.

There is no standard test that will decide what is slang or colloquial and what is not. Expressions that are identified as slang are often some type of entertaining wordplay, and they are almost always an alternative way of saying something. Colloquial expressions are usually spoken and are often thought of as being direct, earthy, or quaint. Slang and colloquial expressions come in different forms: single words, compound words, simple phrases, idioms, and complete sentences. Slang is rarely the first choice of careful writers or speakers or anyone attempting to use language for formal, persuasive, or business purposes. Nonetheless, expressions that can be called slang or colloquial make up a major part of American communication in movies, television, radio, newspapers, magazines, and informal conversation.

Localized fad words are usually thought to have a short life, but other kinds of slang expressions may spread and last for a long time. The farther they spread, the longer they will last. If they last long

enough, they may become so well known that they become standard English unavoidably. Most such slangy expressions simply join an enormous pool of similar expressions, and they are used until displaced by newer terms. At some point the old ones are put on hold until they are forgotten by everyone or revived by a new generation. Many expressions that hang around for decades will pop up again and again in novels and movies or in sporadic use in the speech of older generations.

For more than two hundred years, the jargon of criminals has been a major source of everyday slang words. Alcohol, drugs, and crime have been firmly fixed in the public consciousness since the time of prohibition in the United States. The entertainment value of crime and law enforcement has brought a constant stream of criminal slang into novels, movies, and radio and television shows over the last half century. This dictionary contains many of the expressions from these areas that have made public appearances through the years. Even more remain hidden behind closed doors. Matters of social taboo have also provided many slang expressions. Although strictly speaking taboo words are not slang, many taboo expressions have been included in this edition. Young people are responsible for a high proportion of the fad expressions and collegiate wordplay found here. Clever or insulting nicknames for types of people are the major linguistic product of this subgroup.

Whereas many of the entries are humorous or clever, others simply represent the everyday turns of phrase common to informal speech in the United States. Where possible, the examples are given in natural slangy language, even if it is ungrammatical in formal writing. The examples are to be taken as representative of slang usage, not of standard, formal English usage.

Most slang words that deal with personal type, race, sex, ethnic origins, and so forth, are quite rude—often hateful—and considered by some people taboo. No apology is made for those that are included. They are rude or they wouldn't be considered slang or colloquial. On the other hand, no attempt is made to include all of them, and many of the worst have been omitted. Slang is slang and anyone looking for an issue will find many of them in nonstandard vocabulary. It is worthwhile to include rude words and identify them as such for the sake of

innocents who encounter these words on television, in the theater, in novels, in newspapers, in the workplace, in shops, and on the street.

The grammar and syntax of each expression are best determined from the examples that accompany each entry. The notion of “part of speech” is relevant to the function of individual words. The words within the clauses and phrases that are entries in the dictionary can be given part-of-speech labels, but it is the grammar and syntax of the entire phrase that is important. Each expression in the dictionary is assigned a “function code” that serves to indicate the functional potential of the entry expression. These codes represent *function* independently from *form*. That is to say, expressions that function the same get the same label. For instance, nouns, noun compounds, noun phrases, and noun clauses are all marked *n.* for “nominal.” The codes are described in the following section, “Guide to the Use of the Dictionary.”

Unlike standard English, few slang or colloquial expressions are standardized in spelling or punctuation. Standard dictionaries differ considerably as to whether a standard English compound is printed as one word, two words, or a hyphenated word. The spelling of slang entries is even more variable. This dictionary usually represents slang expressions in the form in which they were found in print, except for rhyming compounds, e.g., *fat-cat* or *funny-money*, which are always hyphenated in this book.

The entries come from many sources. Many have been collected and submitted by college students and other individuals. Much of the latest material has come directly from television and a lesser amount from contemporary radio. The Internet has become the newest major source of slang for the collector and reader. Standard reference works have been used to verify the meanings and spellings of older material. A surprising amount of old material has been verified in reruns of old movies. Many attestations have come from contemporary journalism, especially human interest and Sunday supplement material. A few of the examples are verbatim quotes of the original. Some are concocted, and many more have been edited to exemplify an expression’s meaning more concisely than the original quote. The examples exist to illus-

trate meaning, not to prove the earliest date of print or broadcast dissemination.

## Guide to the Use of the Dictionary

1. Entries are alphabetized according to an absolute alphabetical order that ignores all punctuation. The hyphen is treated the same as a space. Entries beginning with numerals precede the alphabetic entries.
2. The first step in finding an expression is to try looking it up in the body of the dictionary. Entries that consist of two or more words are entered in their normal order, such as **chill someone's action**. Phrases are never inverted or reordered like **action, chill someone's** or **track, off the**.
3. If you do not find the expression you want or if you cannot decide on the exact form of the expression, look up any major word in the expression in the "Phrase-Finder Index," which begins on page 485. There you will find all the multiword expressions that contain the word you have looked up. Pick out the expression you want, and look it up in the body of the dictionary.
4. Entry expressions appear in **boldface type**. When words or expressions that are not entries in this dictionary are cited, they appear in *italics*. Function codes and examples appear in *italics*.
5. A main entry may have one or more alternative forms. The alternatives are printed in **boldface type** and are preceded by "AND."
6. Definitions are in roman type. Alternative or closely related definitions are separated by semicolons.
7. Some definitions contain restrictive comments in parentheses that help to make the definition clearer. These comments limit the context in which the expression can be used.
8. Comments in parentheses after a definition give additional information about the expression, including any cautions, comments on origins, or indications of cross-referencing. Each numbered sense can have its own comments.
9. Every expression is followed by a function code that indicates the grammatical or syntactic function of the expression. These codes are

in *italics*. The function codes provide a way of determining the grammatical or syntactic function of a particular expression as it occurs in its examples. Expressions functioning as nominals (nouns, noun phrases, etc.) are marked *n*. Expressions serving to modify, restrict, or qualify (adjectives, adjective phrases, adverbs, adverb phrases, etc.) are marked *mod*. Expressions that are transitive verbs or transitive verb phrases (a transitive verb, its object(s), modifier(s), and auxiliaries) are marked *tv*. Expressions that are intransitive verbs or intransitive verb phrases (an intransitive verb, its auxiliaries, and modifiers) are marked *in*. Other abbreviations are explained in the section titled “Terms and Symbols.”

10. Some expressions that are modifiers (marked *mod*.) can occur only before or after the things they modify. Other modifiers can occur both before and after the things they modify. The distribution of modifiers is illustrated in the examples.
11. Many expressions have more than one major sense or meaning. These meanings are numbered with boldface numerals.
12. Sometimes a numbered sense will have an alternative form that does not apply to the other senses. In such cases the “AND” plus the alternative forms follow the numeral.
13. Entries that contain unfamiliar words and entries whose spelling is misleading have an indication of pronunciation in International Phonetic Alphabet symbols. See the symbols and their values in the “Pronunciation Guide.”
14. In some entries, comments direct the user to other entries for additional information through the use of the terms “Go to” or “See also.” The expressions mentioned are in **special type**.
15. If an entry has a grammatical structure that requires a nominal to serve as a subject or object, the nominal is represented by **some-one** for human nominals or **something** for nonhuman nominals. When both human and nonhuman nominals are possible, **some-one or something** is used.

# Terms and Symbols

□ marks the beginning of an example.

▢ marks the beginning of an example in which two elements of the phrase, usually a particle and an object, are transposed.

**acronym** an abbreviation consisting of a set of initials pronounced as a single word, as with *UNESCO*, the United Nations Educational, Scientific, and Cultural Organization.

**advertising** used in advertisements or marketing jargon.

**Amerindian** related to American Indian languages or cultures.

AND indicates an alternative element, either an alternative entry form or an alternative pronunciation.

**baby talk** used by infants or children or, more typically, by adults when talking to infants or children.

**black** typically used by or originated by African Americans.

**blend** made up of sounds from two other words, such as *smoke* + *fog* = *smog*.

**California** originating among the young people of California.

**catchphrase** an expression that is meant to catch attention because of its cleverness or aptness.

**collegiate** typically heard on college campuses.

**combining form** a sense of a word used only in combination with another word, as with **bug** in *camera bug*.

**deliberate spoonerism** a deliberate interchanging of initial consonants in a pair of words, such as *queer old dean* for *dear old queen*.

**drugs** having to do with illegal drugs and the sale and use of drugs.

**euphemistic** relatively refined and having no negative connotations.

*exclam.* exclamation.

**eye-dialect** a type of respelling of a word so that it appears to have been spoken with a regional accent, as with *sez* for *says*.

**folksy** in the manner of country people; rustic and quaint.

**function code** an indication of the grammatical or syntactic potential of a particular sense of an expression. Go to *exclam.*, *in.*, *interj.*, *interrog.*, *mod.*, *n.*, *phr.*, *pro.*, *sent.*, and *tv.* in this section.

**Go to** Go to the entry indicated.

*in.* intransitive. Expressions that are intransitive verbs or intransitive verb phrases (an intransitive verb, its auxiliaries, and modifiers) are marked *in.*

*interj.* interjection.

*interrog.* interrogative.

**initialism** an abbreviation consisting of the initial letters of the words being shortened. The letters are pronounced one by one, as with *IBM*.

**jargon** the specialized terminology of an occupation; shoptalk.

**journalistic** as used in popular journalism—newspapers and magazines.

**juvenile** as might be said by a child.

*mod.* modifier. Expressions serving to modify, restrict, or qualify (adjectives, adjective phrases, adverbs, adverb phrases, etc.) are marked *mod.*

*n.* nominal. Expressions functioning as nominals (nouns, noun phrases, etc.) are marked *n.*

**onomatopoetic** having to do with a word with a sound suggesting the meaning of the word, as with **vroom**, the sound of an engine.

*phr.* phrase.

**Pig Latin** a form of wordplay where the second part of a word is placed before the initial sound, which then ends in *ay*, as with **unk-jay** for *junk*.

**play on** referring to wordplay that is based on a particular expression.  
For instance, **eagle freak** is a play on **eco freak**.

**police** from the speech of law-enforcement officers.

*pro.* pronoun.

**prohibition** indicates an expression that came into use during the prohibition of alcohol in the United States during the 1920s and early 1930s.

**securities market(s)** having to do with the stock markets, the bond markets, or the sale of other financial instruments.

**See also** Find additional or related information at the entry indicated.  
*sent.* sentence.

**standard English** widely known English, not usually considered slang or colloquial.

**streets** originating in the streets of urban America.

**taboo** indicates an expression that is regarded as out of place in public use.

**term of address** an expression that can be used to address someone directly.

*tv.* transitive. Expressions that are transitive verbs or transitive verb phrases (a transitive verb and its object(s), modifier(s), and auxiliaries) are marked *tv.*

**underworld** from criminal speech or law enforcement.

**verbal weapon** an expression that is typically used to insult or malign someone.

**Western** speech typical of Western movies or other stereotypes of the Old West.

# Pronunciation Guide

Some expressions in the dictionary are followed by a phonetic transcription in International Phonetic Alphabet (IPA) symbols. These expressions include words whose pronunciations are not predictable from their spellings, difficult or unfamiliar words, and words where the stress placement is contrastive or unique. The style of pronunciation reflected here is informal and tends to fit the register in which the expression would normally be used. A [d] is used for the alveolar flap typical in American pronunciations such as [wɑdɚ] ‘water’ and [əˈnɑɪlədɛd] ‘annihilated.’ The transcriptions distinguish between [ɑ] and [ɔ] and between [w] and [ʍ] even though not all Americans do so. In strict IPA fashion, [j] rather than the [y] substitute is used for the initial sound in ‘yellow.’ The most prominent syllable in a multisyllabic word is *preceded* by a [ˈ]. The use of AND OR in a phonetic transcription echoes the use of AND OR in the preceding entry phrase. The use of “...” in a transcription indicates that easy-to-pronounce words have been omitted. Parentheses used in a transcription either correspond to parentheses in the preceding entry phrase or indicate optional elements in the transcription. For instance, in [ˈɑrtsi ˈkræf(t)si] ‘artsy-craftsy,’ the “t” may or may not be pronounced. The following chart shows the American English values for each of the IPA symbols used in the phonetic transcriptions. To use the chart, first find the large phonetic symbol whose value you want to determine. The two English words to the right of the symbol contain examples of the sound for which the phonetic symbol stands. The letters in **boldface** type indicate where the sound in question is found in the English word.

# Phrase-Finder Index

Use this index to find the form of a phrase that you want to look up in the dictionary. If you are looking for a single word, please look up that word in the main body of the dictionary. Single words are not indexed here. To use this index, pick out any major word in the phrase you are seeking. Then look up the simplest form of that word in this index to find the form of the phrase used in the dictionary. Finally, look up the phrase in the main body of the dictionary.

Some of the words occurring in the phrasal entries do not appear as entries in this index. Some words are omitted because they occur so frequently that their lists would cover many pages. In these instances, you should look up the phrase under some other word. Most of the grammar or function words, such as prepositions, pronouns, and articles, are not indexed.
