CENSUS  
OF THE  
STATE OF NEW YORK,  
FOR  
1865.

TAKEN IN PURSUANCE OF ARTICLE THIRD OF THE CONSTITUTION OF THE STATE, AND OF CHAPTER SIXTY-FOUR  
OF THE LAWS OF 1855, AND CHAPTER THIRTY-FOUR OF THE LAWS OF 1865.

PREPARED FROM THE ORIGINAL RETURNS,

UNDER THE DIRECTION OF HON. FRANCIS C. BARLOW, SECRETARY OF STATE,

BY

FRANKLIN B. HOUGH,

SUPERINTENDENT OF THE CENSUS.

TOMPKINS COUNTY PUBLIC LIBRARY  
ITHACA, N. Y. 14850

## P R E F A C E.

---

The present Census is the second one that has been taken in this State, by persons appointed by the Secretary of State, and reporting their labors in full without summary or condensation. The preparation of results from these data, is done at this office, and in the present Census about thirty-five clerks, on an average, have been employed during fifteen months.

In each Census preceding that of 1855, the persons making the inquiries were appointed by the local city or town authorities, and the summaries prepared by each were forwarded to the county clerks. The latter prepared a table for their respective counties, by towns, cities and wards, which they forwarded to the Secretary of State for publication. Under this system, the only labor required at the central office was the construction of a general summary for the State, and the supervision of the press-work. But this method involved unlimited chances for error, against which there could be no remedy, and the change of the system, which was made in 1855, after mature consideration, has been justified in the results.

The present Census was taken under peculiar difficulties, occasioned by the late war. Our people had, during the last two years, been subjected to searching inquiries after those liable to military conscription, and at the the time when the blanks and instructions for the Census of 1865 were in press, a draft for half a million of men was pending in the loyal States. It is more than probable that had the war continued, this Census could not have been taken, especially in the large cities, from the impossibility of finding men who would be willing to incur the odium and peril of a labor so nearly like that of a military enrolment, and so liable to be confounded with the dreaded army conscription.

Until the present occasion, the persons taking the Census had been styled *Marshals*, but as this term had recently become associated with the office and duties of *Provost Marshals*, the Legislature, at the suggestion of my predecessor, changed this appellation to that of *Enumerators*, as more truly expressing their duties, without the suspicious meaning which the former term might have conveyed.

But the war happily ended before the enumeration of the present Census began, and many of the difficulties which had been apprehended disappeared. Notwithstanding this, suspicions still lingered in the minds of the ignorant, in densely settled localities, and many could not believe but that some scheme of military service lay concealed beneath these inquiries. This jealousy led to embarrassments and short returns in many cases.

The immense expenditures of the war brought the burden of a heavy debt upon the country, which could only be met by taxes upon property and productive incomes, and novel schemes were devised by Congress for raising these revenues. As the Census makes inquiries concerning the amount of capital invested in manufactures, the cost of materials and labor, and the value of products, it incidentally discloses the profits of business, and the amount of incomes. The utmost difficulty was therefore found in many cases, in arriving at a correct return upon these several subjects. Men otherwise intelligent, would often fail to discern, or profess to disbelieve, that the Census was not in some way connected with taxation, although the instructions to Enumerators were specific and full upon this subject, and the erroneous imputation was expressly disclaimed therein.

The law requires one or more Enumerators to be appointed in each ward or town, the number being left discretionary with the Secretary of State, who makes the appointments. As a general rule, one Enumerator was appointed in each election district; but where these districts were large, and especially in cities, they were subdivided by some street, river or well known line. In the City of New York an

## PREFACE.

estimate of the population, by single blocks, was taken upon the basis of families, through the Board of Metropolitan Police, and the information thus obtained afforded the basis of the appointments.

The labor of selecting Enumerators, and of procuring the returns, was performed under the direction of my predecessor, Mr. Depew, with the most scrupulous attention to the public good, and returns from each of the two thousand three hundred and thirty-two Enumerators were received in time to present a general summary, embracing the details required by the Constitution, at the beginning of the Legislative Session of 1866.

The clause inserted in the law in 1865, rendering the payment of Enumerators dependant upon acceptance of reports at this office, was found to operate most beneficially, by imposing an additional sense of responsibility, and the power was used whenever found necessary in perfecting the returns.

As the war terminated in the interval between the nomination of Enumerators and the beginning of their labors, the changes of business and plans which followed, led to an unexpected number of resignations. But most of those letters declining to serve, were accompanied by recommendations for other persons suitably approved, and only occasioned the additional labor of correspondence. The number of changes from all causes, during the period of taking the Census, was four hundred and thirteen, of which several were from sickness or death occurring after the returns were partly prepared. It is believed that no duplications or omissions have been thereby occasioned, as, where the successor did not receive the unfinished work, he was directed to commence anew.

Disappointment has been expressed in some localities, upon the announcement of the results of this Census, as coming below former estimates, and sometimes below the returns of the last Federal Census. It would indeed have been an incident flattering to national pride, had we been able to show that the extraordinary efforts made by the loyal States during the late war for the maintenance of the Union, had not retarded our prosperity or checked our growth. But apart from the difficulties above referred to in obtaining accurate returns in some localities, such a conclusion is not warranted by facts, and the State of New York, in common with several of the other States in which a census was taken in 1865, presents, in the returns, indications of the effects of the war in the increased number of widows, and the reduced number of males within the ages liable to military service.

The sum of fifty thousand dollars was appropriated to defray the expenses attending the preparation of the present Census. The labor has been completed at a cost of more than ten thousand below the appropriation, and the balance has been applied towards defraying the printing the final report. The original returns of this Census, filling one hundred and three massive volumes, with six folio volumes of special blanks, and fourteen volumes of specimen numbers of newspapers and periodicals, are placed in the State Library for preservation.

The immediate labor of preparing and distributing the blanks and instructions, the correspondence during the time when the Enumerators were engaged, and subsequently the collection and certifying of the returns, the final supervision of the office labors, and preparation for the press, have been performed by Dr. Franklin B. Hough, who also had charge of the corresponding labors of the Census of 1855. His ability, fidelity, and thorough knowledge of the subject have deserved my warmest commendations.

FRANCIS C. BARLOW,  
*Secretary of State.*

## ERRATA.

In several of the first pages of Agricultural Statistics, a few errors in the totals of counties occurred, which were corrected in the Recapitulation by Counties. The latter should therefore be used in making references to these statistics.

On page 397, the columns for "Acres Sown," of buckwheat, should be corrected to read 240,300½ for 1864, and 184,716½ for 1865.

On page 401, add 2,141 to the number of milch cows kept in New York city, and the same to the total.

On page 402, add 23,880 horses, and 649 mules to the numbers for New York city, and increase the totals of the columns by these sums.

# INTRODUCTION.

THE history of the earlier returns of statistics of population, with many details connected with the subject, were given in the Introduction to the Census of 1855. It is, therefore, deemed sufficient to place, in this connection, the following general results, and to refer the reader to the volume of 1855 for more extended statements.\*

## Comparative Results of Colonial Censuses.

YEARS.	Total population.	INCREASE.		TOTAL BY SEXES.				PERCENTAGE OF COLORS AND SEXES.

Two attempts were made to obtain a census during the revolution, but only fragments of the returns exist. In 1786 a law of Congress made an enumeration of the population incident to a scheme for equalizing the public indebtedness. The total population of New York, under this census, was 238,897.

## CENSUS OF ELECTORS.

The first State Constitution, adopted in 1777, provided that, as soon after seven years from the termination of the existing war, as might be practicable, and at intervals of seven years subsequently, an enumeration of electors, under their several classes, should be made, as the basis for an adjustment of the representation in the Senate and Assembly. Under this requirement of the Constitution, a census of electors was taken in 1790, 1795, 1801, 1807, 1814 and 1821. The results being given by counties, in the volume for 1855, we here insert only the general and comparative results of the State:

## Comparative Results of the several State Electoral Censuses.

YEARS.	Electors owning freeholds worth £100 (\$250) and over.				Electors owning freeholds worth from £20 to £100 (\$50 to \$250).				Electors not freeholders, but renting tenements of annual val. of 40s. (\$5).				Other electors.**				Total electors of all classes.

Total Utica city.....									

\* New York was divided into seven wards in Gov. Dongan's charter of April 22, 1685. The wards then formed were named West, South, Dock, East, North and Montgomerie wards. The results of a city census, taken in 1805 and in 1816, will be given elsewhere.

† In 1865, but after the census appointments had been arranged, the city of Lockport was erected, and organized into five wards. There still remains a town of this name.
