- Expert in using various tools such as JIRA, Eclipse, Putty, SVN, CVS, Filezilla, Bugzilla, Service Now, CRM tools, clear case.
- Hands on in Mobile app development in iOS and Android platform.
- Expert in php, MySQL platform.
- Expert in Creating iOS and Android Mobile Apps using SFDC.

EXPERIENCE

- Salesforce.com Integration with CrowdFlower, Box.Net
- Communities and approval process
- Chatter Customization
- Expert knowledge of OO Design Principles and Patterns
- Expert level experience writing complex SOQL queries
- Excellent debugging and troubleshooting skills
- Expert on Visualforce and Apex
- Good knowledge in linux control panels like CPanel, PLESK, Kloxo etc
- Mobile Application for iOS using offline use of app.

1. Project Name: Crowd Flower Integration with Salesforce

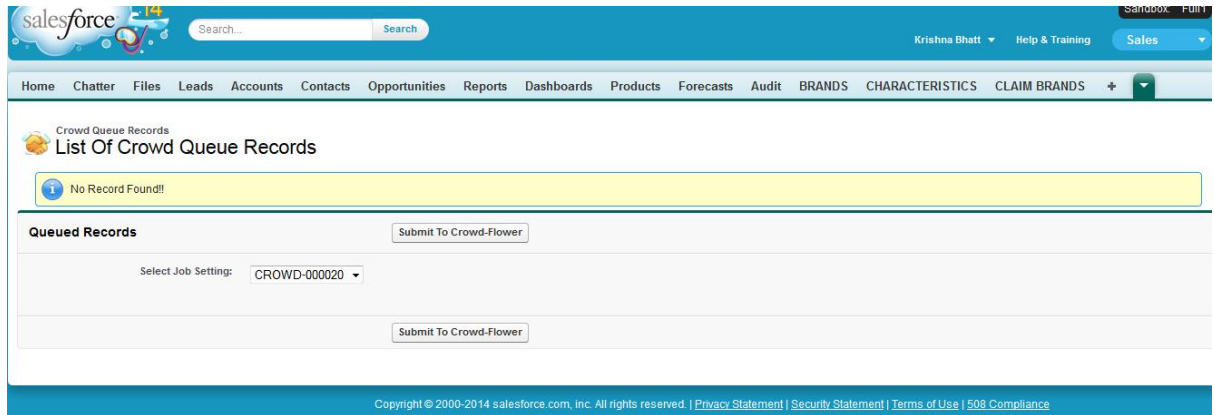

Description:

Crowd-Flower is the world's leading crowd-sourcing service, with over one billion tasks completed by five million contributors. We specialize in micro-tasking: distributing small, discrete tasks to many online contributors in assembly line fashion.

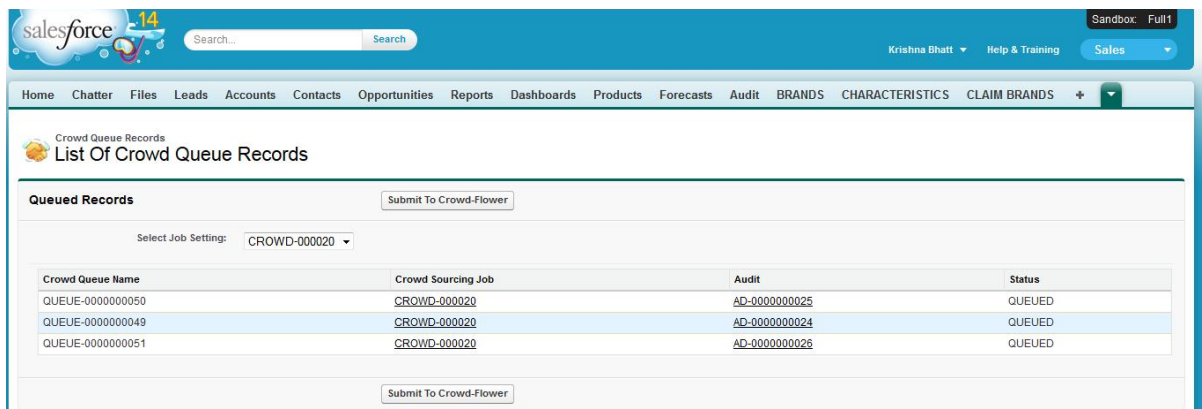

Integrated crowd Flower from Salesforce to submit the images from the Salesforce environment to identified images Properties like Year of manufacture, Manufacture Name and so on. Which is verified by the millions of peoples called contributors.

1. Go to the page Name : cfjobPosting

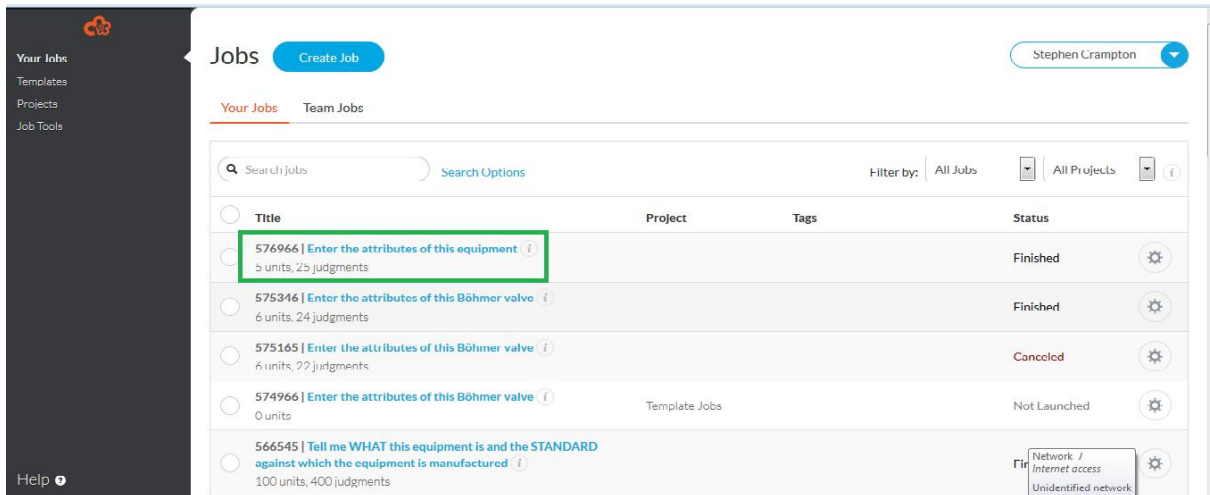

URL: <https://c.cs6.visual.force.com/apex/cfjobposting>

2. Then Select job Setting from Drop-down list after that you will see Related Queues

3. Then after click on "Submit To Crowd-Flower" button and then image will be post into the CrowdFlower Environment.

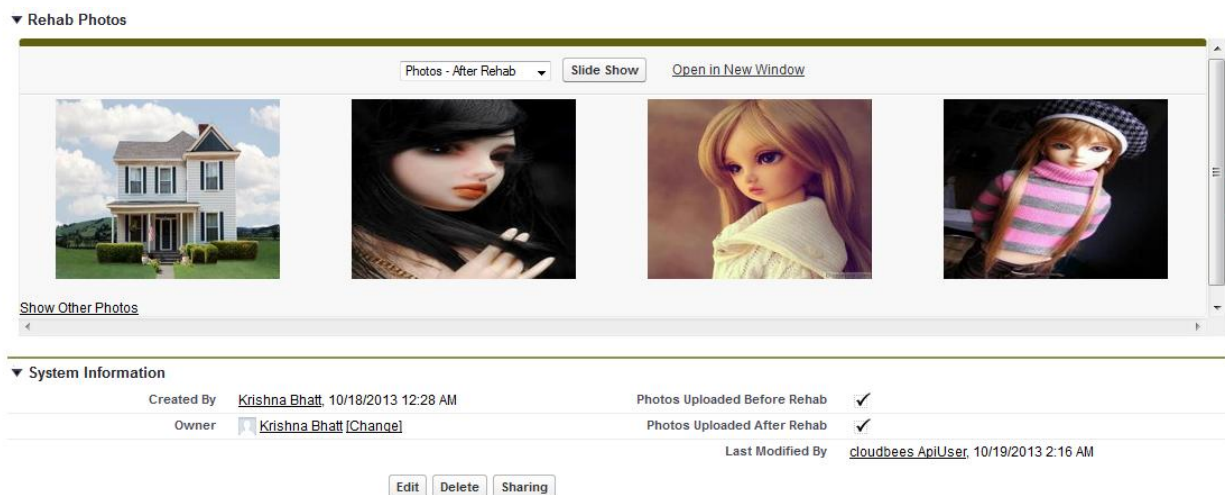

4. Then wait for until job is finished.
5. When job is finished then Result records will be create in Salesforce. (this will be done via automatic web-hook Url)

2. Project Name: Photo Viewer with pre-Fetching Image with J-Query.

Description:

Photo Slide Show Viewer is responsible for showing uploaded image in Slider View. Photo Slider automatically create thumbnail of images those are uploaded into the server. It's Not Fetch all images at a time it is based on pre-fetching feature.

Screen-Shots:

After Click on Slide Show Button

Task 2: Create File Storage Manager For Uploading Files.

Description:

File Storage Manager is responsible for uploading files in a well format. We can move, delete, upload, edit, view, and rename files in the File Storage Manager. Also, we can upload images into the **cloud-bees** server or **Amazon** server with file upload.

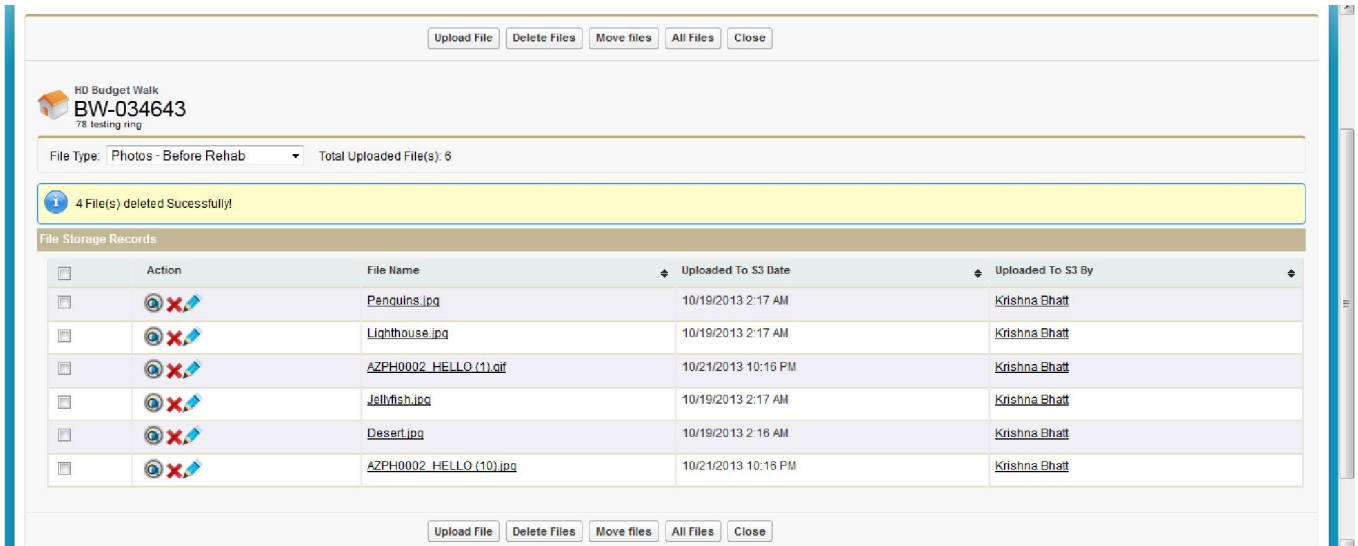

Screen-Shots:

The screenshot shows a web interface for 'File Storage Records'. At the top, there are buttons for 'File Storage Manager' and 'Upload To S3', and a link for 'File Storage Records Help'. Below this is a table with the following data:

Action	File Type	File Name	Uploaded To S3 By	Uploaded To S3 Date
<input type="checkbox"/> Edit Del	Photos - After Rehab	AZPH0002_testproperty.jpg	Krishna Bhatt	10/18/2013 10:39 PM
<input type="checkbox"/> Edit Del	Photos - After Rehab	AZPH0001_wg.jpg	Krishna Bhatt	10/18/2013 10:39 PM
<input type="checkbox"/> Edit Del	Photos - After Rehab	Road-Over-Forest-HD-Wallpapers.jpg	Krishna Bhatt	10/18/2013 10:39 PM
<input type="checkbox"/> Edit Del	Photos - After Rehab	AZPH0002_HELLO (2).jpg	Krishna Bhatt	10/18/2013 11:41 PM
<input type="checkbox"/> Edit Del	Photos - After Rehab	AZPH0002_HELLO (3).jpg	Krishna Bhatt	10/18/2013 11:41 PM

At the bottom of the table, there are links: 'Show 5 more >' and 'Go to list (22) >'.

After Click on Button File Storage Manager

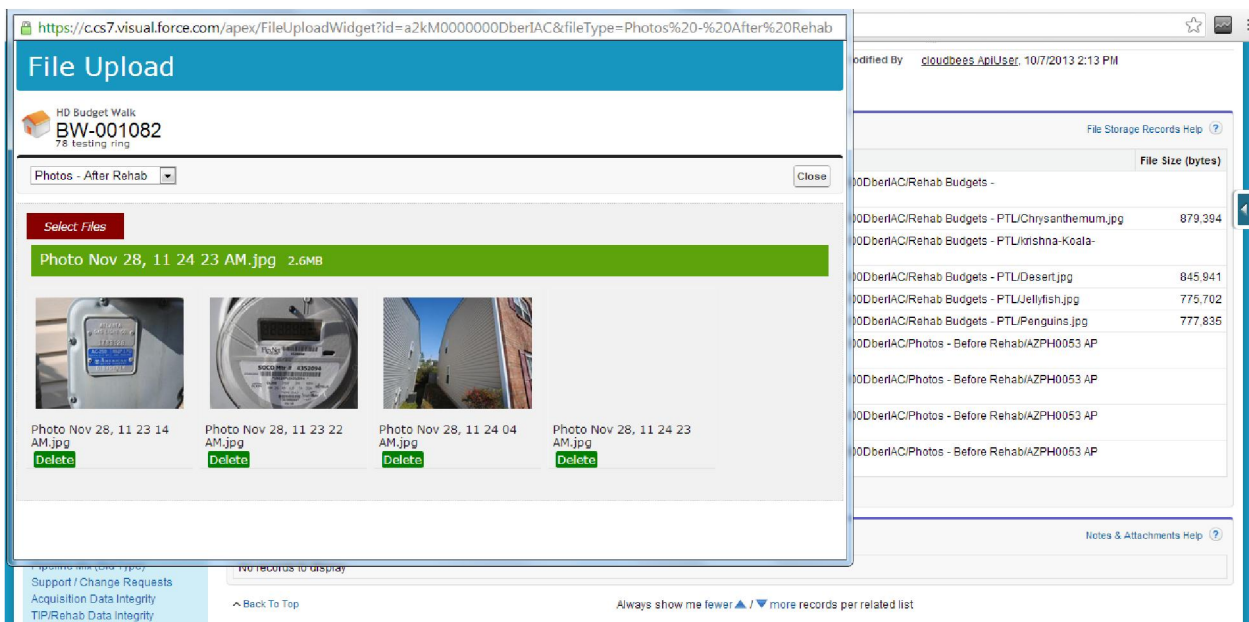

After Click in **Upload File Button**

Task 3: File upload Widget will be open It is responsible for uploading multiple file into the server.

Description:

We can upload multiple Images into the Server From here. Also we can delete recently uploaded Files. It will be open in Pop-Up window.

Screen-Shots:

Task 4: Mass File Uploader

Description: Mass File-up loader to upload multiple File In different File types in same time. We can see Error Files which are not matched with related File Type.

Screen-Shots:

The screenshot shows a web application interface for "Mass Portfolio File Upload". At the top, there is a blue header with the text "Mass Portfolio File Upload". Below the header, there is a section titled "Portfolio" with a small icon. Underneath, there is a "Select File Type" dropdown menu currently set to "Accounting Records". A message states: "These File(s) are invalid. Please Check them :-
Qwerty_Photo Nov 28, 11 21 45 AM.jpg
Photo Nov 28, 11 39 59 AM.jpg
q.jpg". A "Clear" button is located to the right of this message. Below this, there is a "Select Files" button. The main area displays two file upload progress bars: a yellow one for "sddssad_Photo Nov 28, 11 22 07 AM.jpg 2.5MB Uploading..." and a green one for "sddssad_Photo Nov 28, 11 22 30 AM.jpg 2.2MB". Below the progress bars, there are two thumbnail images of a house with a garage. Each thumbnail has a caption: "sddssad_Photo Nov 28, 11 22 30 AM.jpg" and a "Delete" button. At the bottom of the interface, there is a "Start Upload" button.

Project Name 6: Zillow Integration

Description: Zillow Integration is used for get All info about matched Property .

Project Name 12: Report Scheduler

Description: Create Scheduled Reports with the Report Scheduler to overcome Salesforce limitations: Send any amount of Scheduled Reports to any User or Non User, any hour of the day you choose. And leverage our parameter value inputs to create/manage fewer Reports.

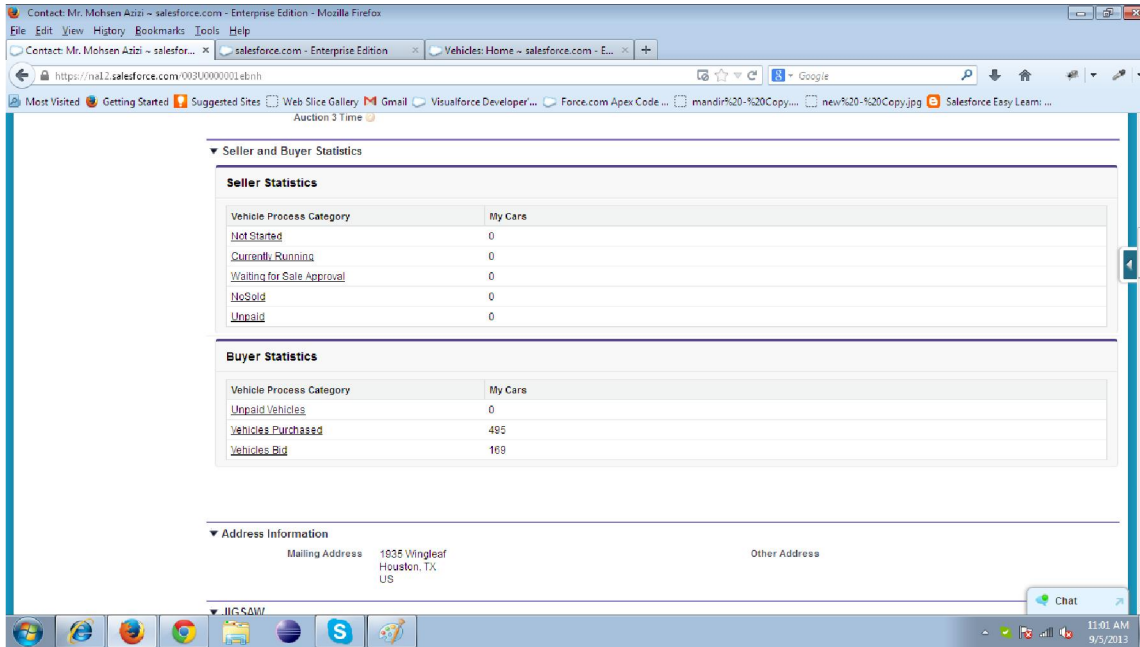

Screen-Shots:

The screenshot displays the Salesforce AppExchange interface for the 'Report Scheduler' app. The top navigation bar includes the AppExchange logo, a search bar, and links for 'Are you new?' and 'Login'. The main header features a red banner with the text 'Simple, flexible scheduling of any report, to Salesforce Users and Non Users'. Below this, the app's title 'Report Scheduler' is shown with a 5-star rating (7 reviews) and an 'Email' button. The navigation tabs include 'Overview', 'Details', 'Reviews', and 'Provider'. The 'Overview' tab is active, showing the app's description: 'Perfect for device users, Scheduled Reports are fully visible in the email body (includes summarized columns) and or via csv or xls attachments for your data warehouse team. Signup for a weekly demo: https://attendeegotowebinar.com/rt/2503660896509304320'. The 'RELEASSED' date is 9/4/2012, and the 'PRICING' is \$75.00 USD per company per month. The 'CATEGORIES' section is partially visible. On the right, the 'Settings' page is shown with a red box around the 'Default Org Email Domain' field containing '@mycompany.com'. Another red box highlights the 'Approved External Email Addresses' field, which contains 'chairman@abc.com;projectmanager@xyz.com'. A yellow tooltip points to this field with the text 'Semi-colon separated list of email addresses'. The 'Blocked External Domains' field contains '@yahoo.com;@aol.com;'. A red arrow points from the 'Approved External Email Addresses' field to the 'Default Org Email Domain' field.

Project Name 13: V-Mark Vehicle Management

Description: Create related in the object which show the Seller and Buyers Statistics. This shows how many vehicle sold and purchase by this record in Salesforce. We can check it by Vehicle Status category.

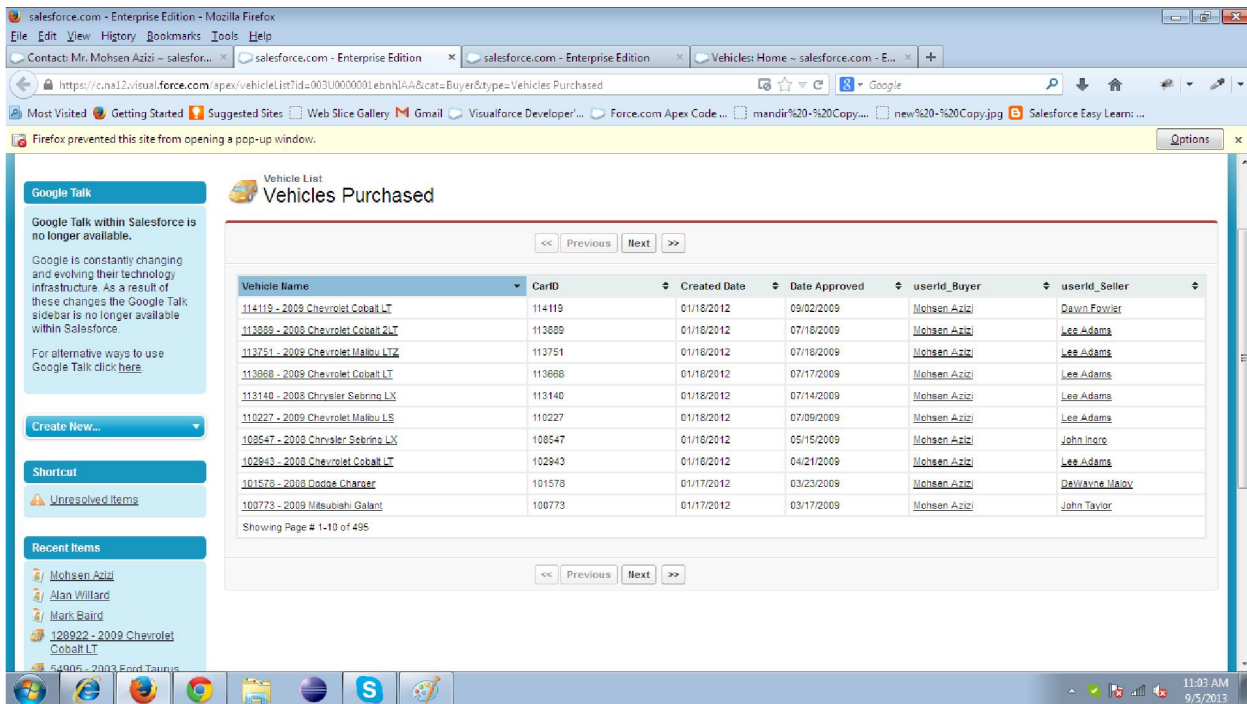

Screen Shots:

After Click on link of buyer Statistics vender Purchased

Description:

Show the Vehicle purchased by this record

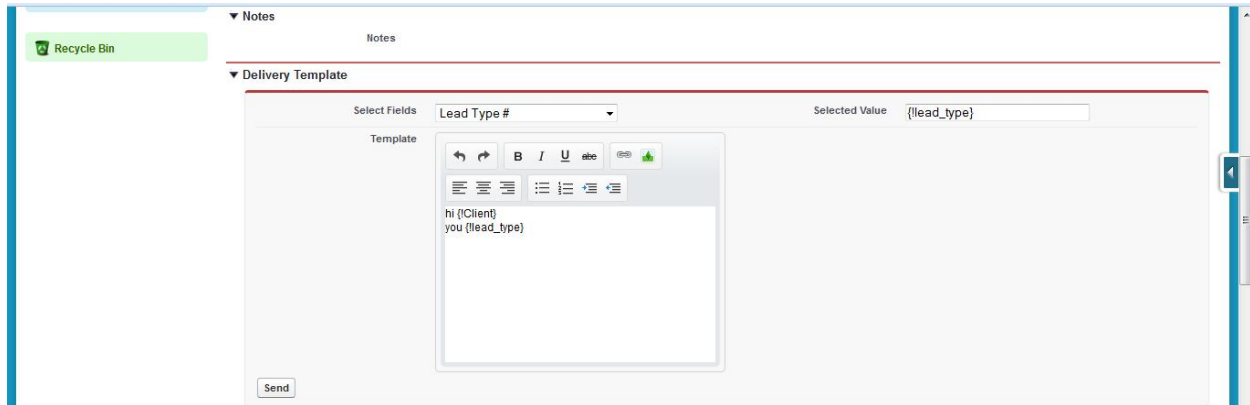

Project Name 14: Vender Genie's Delivery templates and match templates

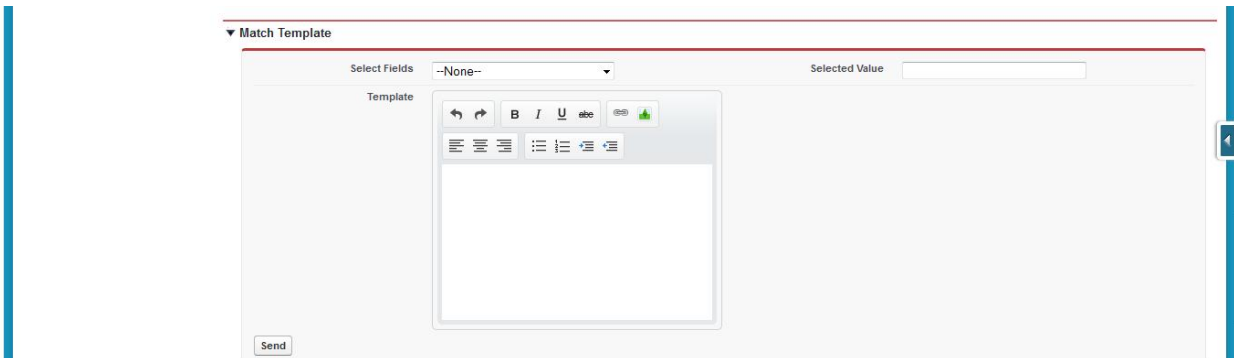

Description: **Delivery templates** are responsible for Creating Email by mapping the field of records like Standard Email Templates of Salesforce apex. You can select Field from pick- list and we will get a mapping name in selected value input field this will copy into the template text area. After clicking on **Send** button you can send Email to recipient with their values.

Screen-Shots:
