

Obsolescence engineering: challenges and ongoing initiatives in France

Who are we?

French Institute of Obsolescence

Sid-Ali Addouche (Dr.)
Vice-President,
Scientific Affaires

Claude Baron (Pr. Eng.)
Senior Scientific Advisor

Kevin Boissié (Dr.)
Vice-President,
Industrial Affaires

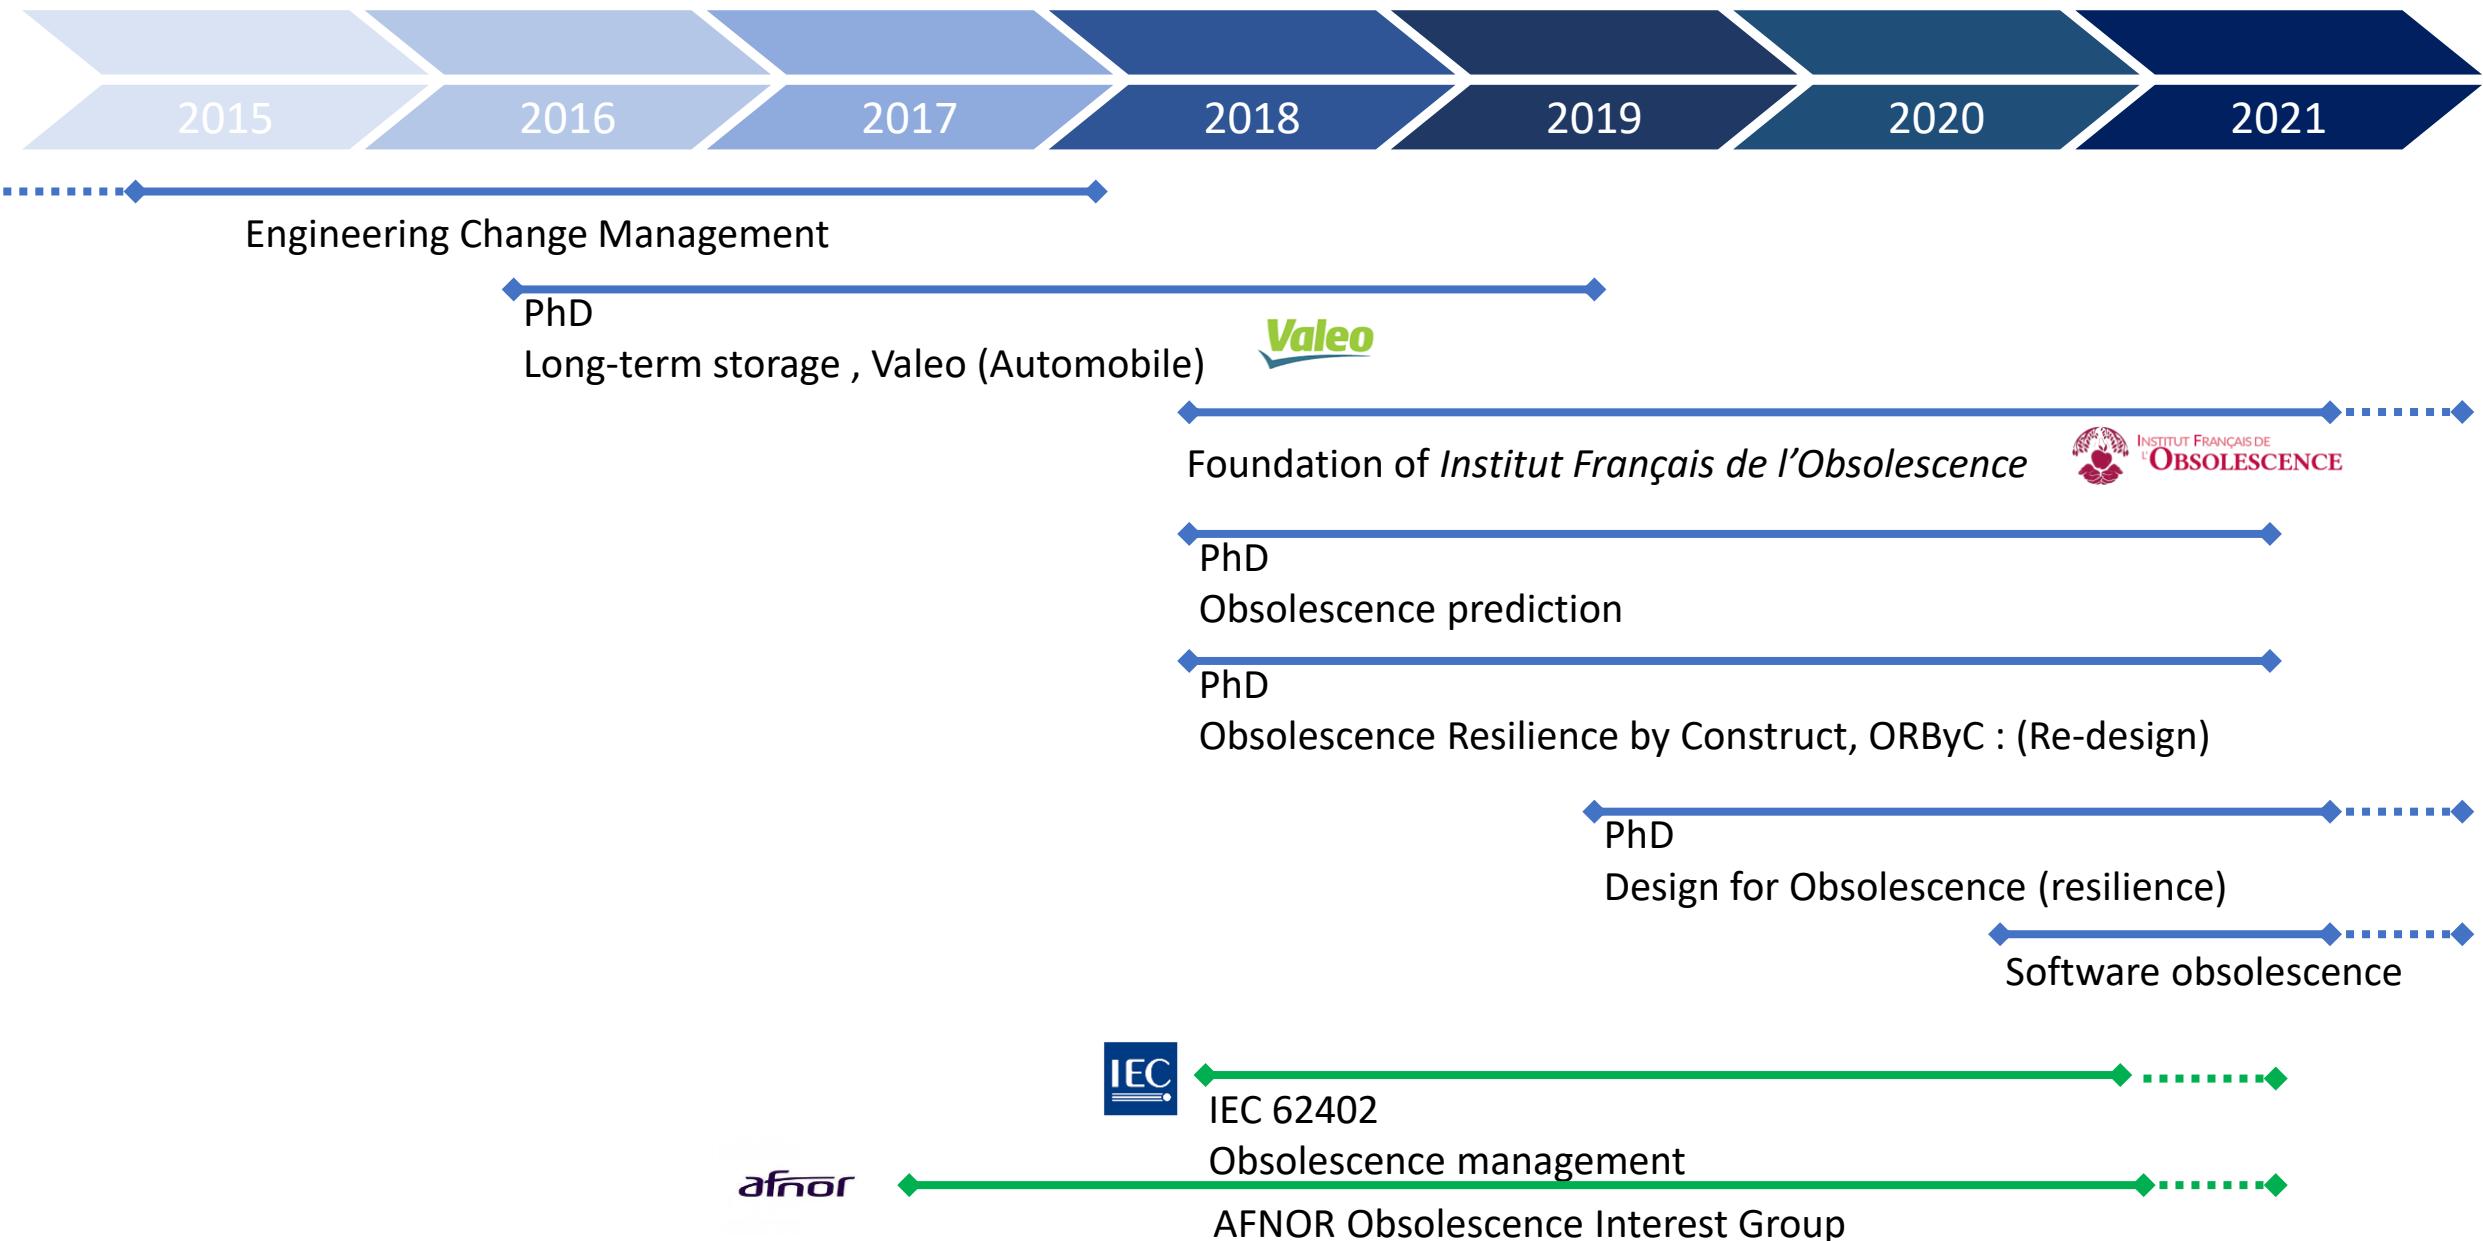

Marc Zolghadri (Pr.)
President

What are we doing ?

Research activities

Structuring activities

2015

2016

2017

2018

2019

2020

2021

Mrs. Robin Brown & Mr. Tracy Daubenspeck
OSD Parts Mgt. Program Manager
OSD DMSMS Program Manager

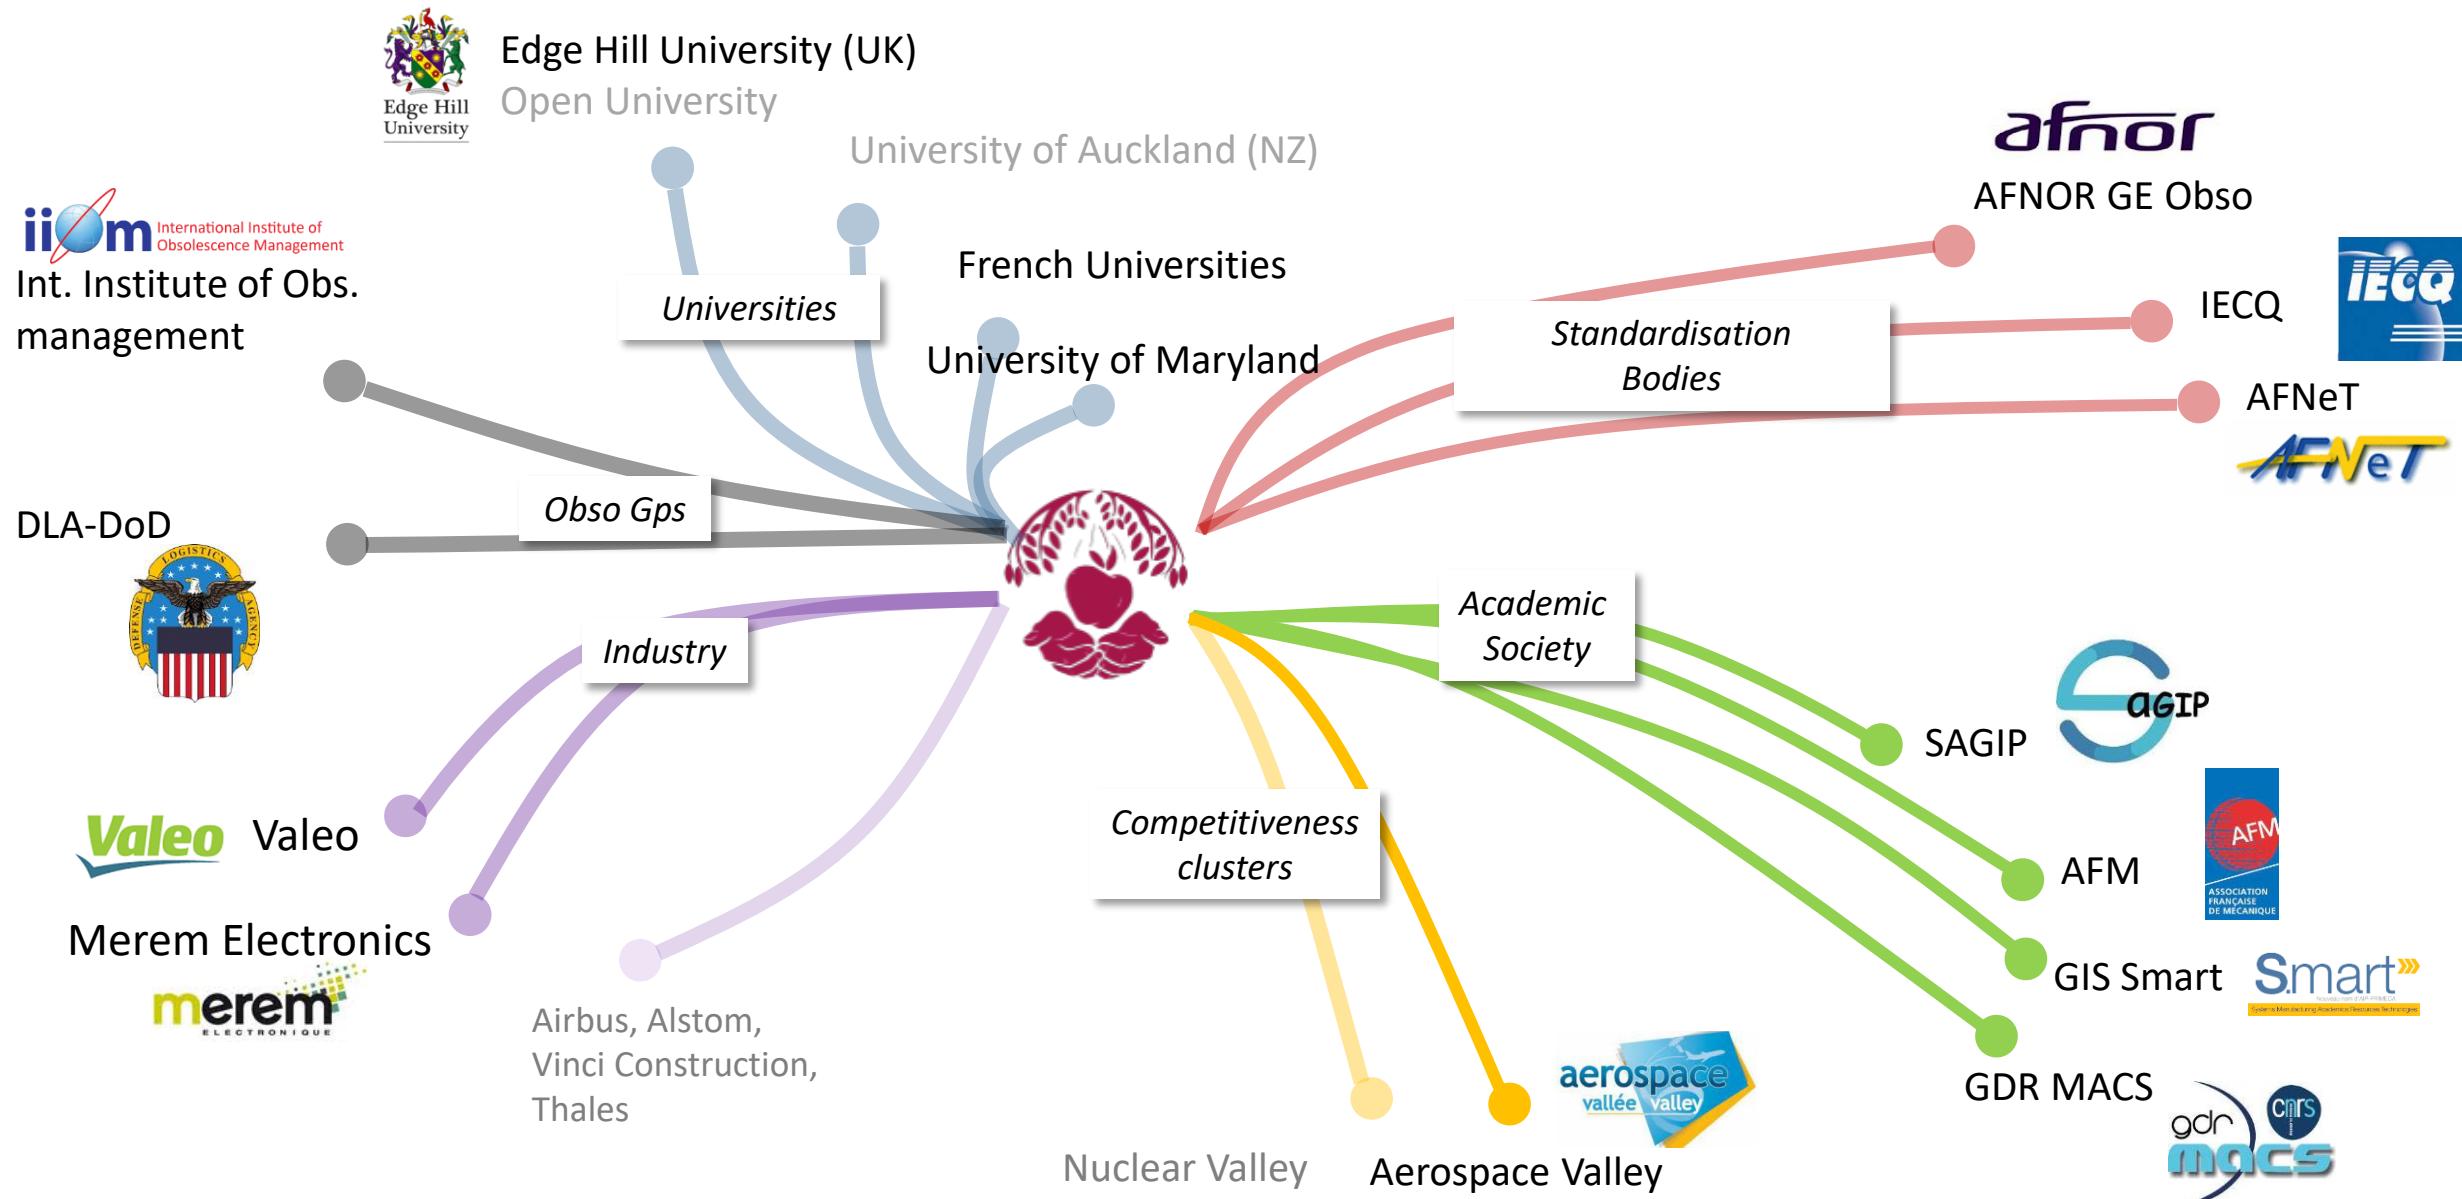

Parts & Material Management Working Group
SD-22 (2020)

Wolfgang Heinbach (President, DE)
Stuart Broadbent (Director, UK)

Creation of France Chapter of IIOM
(2021)

Networking activities

Networking activities

- AFNOR special interest group « Obsolescence of electronic components»
- More than 25 years of experience
- 48 companies – 90 experts
- Two working groups: WG Brokers + WG Storage
- Contributions:
 - UTE C 96-004:2008 ; Audit for obsolescence management
 - UTE C 96-027:2011 ; Obsolescence management – Application guide (collaboration IEC 62402)
 - UTE C 96-027-1:2011 ; Obsolescence of electronic equipment – Applied guide for obsolescence management
 - UTE C 96-029:2011 ; Long duration storage of electronic components – Guide for implementation
 - UTE C 96-029-1:2011 ; Guide méthodologique de dimensionnement des stocks de fin de vie des composants et sous-ensembles électroniques

Defence networking activities

- Etat Major de l'Armée de l'Air et de l'Espace
(French Aerospace Army General Staff)

- Obsolescence management for fighter aircrafts

- Obsolescence management for armoured personnel carrier

nexTER

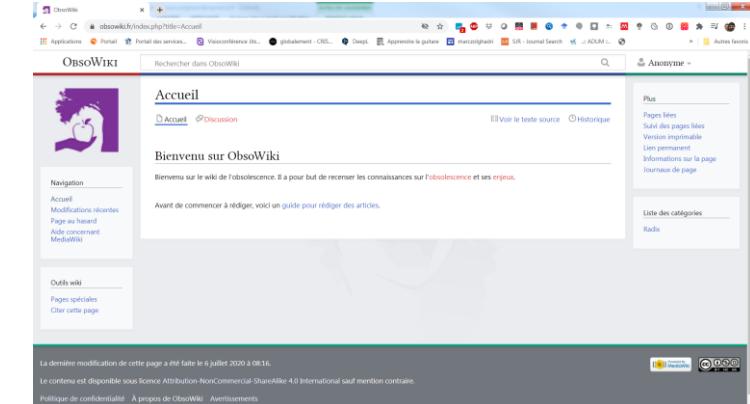

- Collaborations with « Ecole de l'Air » and « CREA »

« Tooling » ‘in progress’ activities

- French national research center: Action « Obsolescence » 2020-2022

- ObsoWiki

- « 1st Obsolescence and Innovation Days », April 2021

- COBRA (Control of Obsolescence Risk and Assessment)
 - Platform to support Obsolescence management
- White paper: Obsolescence (Fr.)

COBRA

What do we think we should do ?

Basic considerations

Collaborative Research

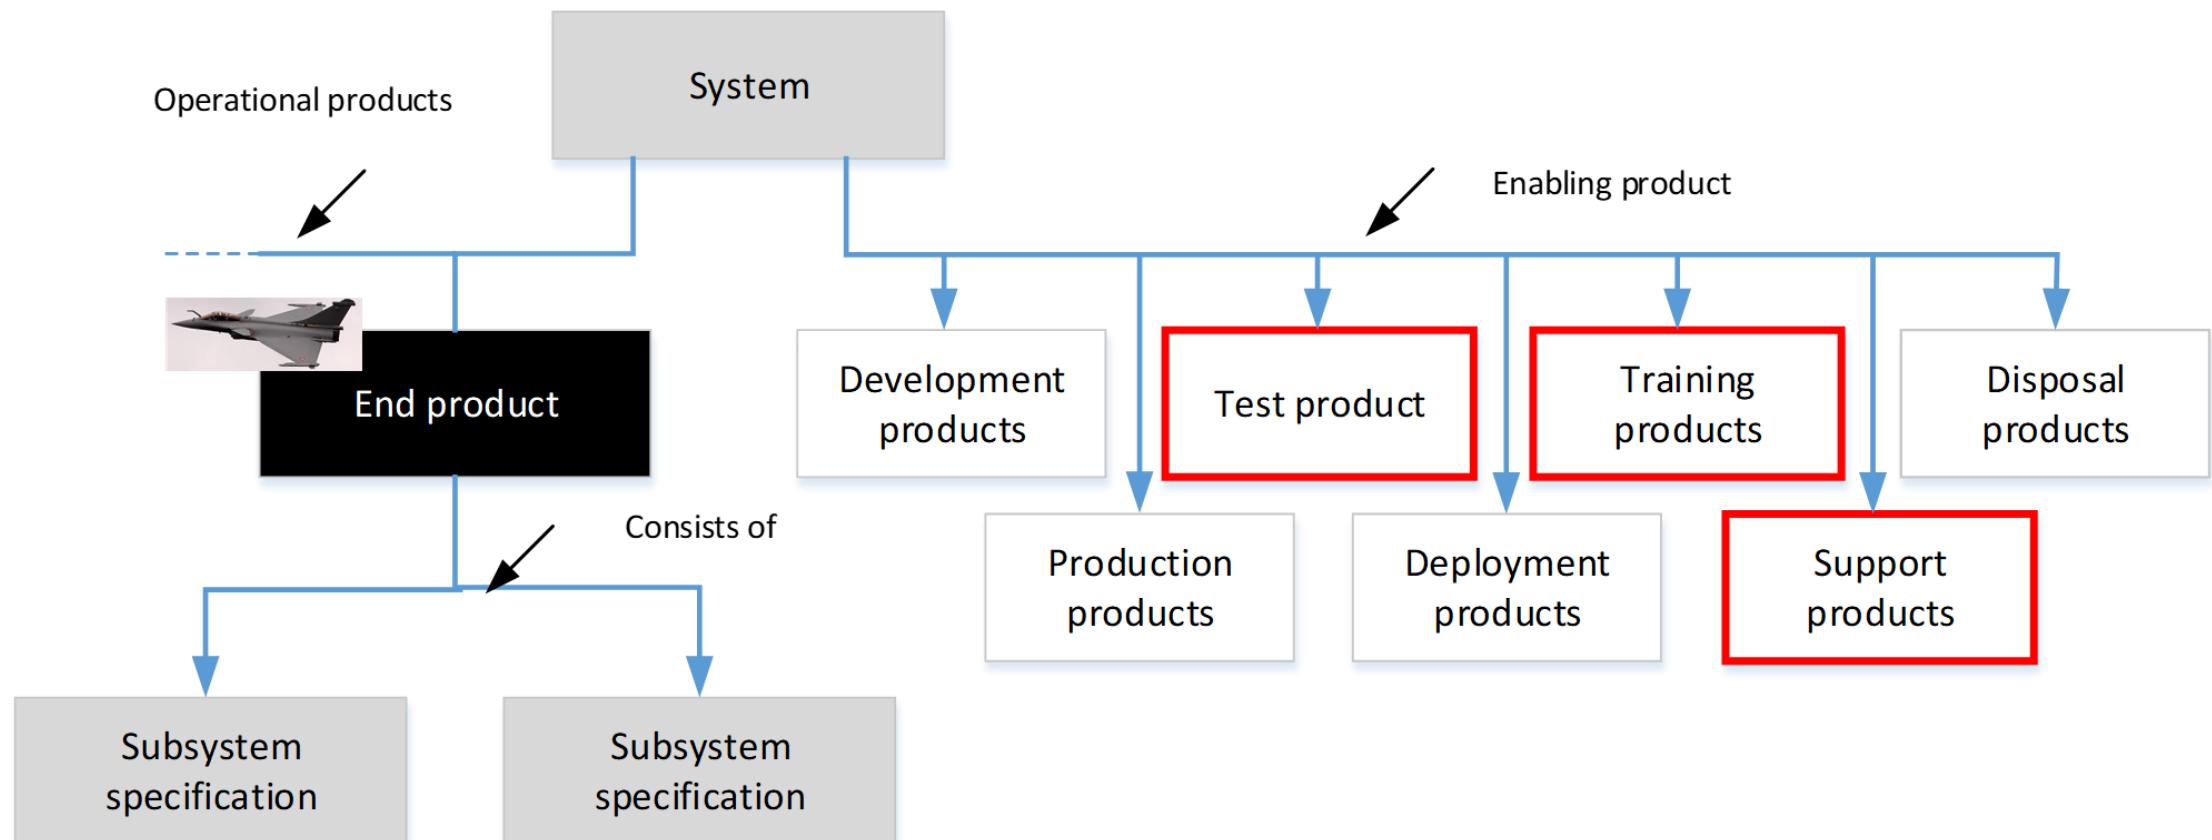

Impacts on system requirements

(ISO/IEC/IEEE 29148, 2011)
Systems and software engineering — Life cycle processes — Requirements engineering

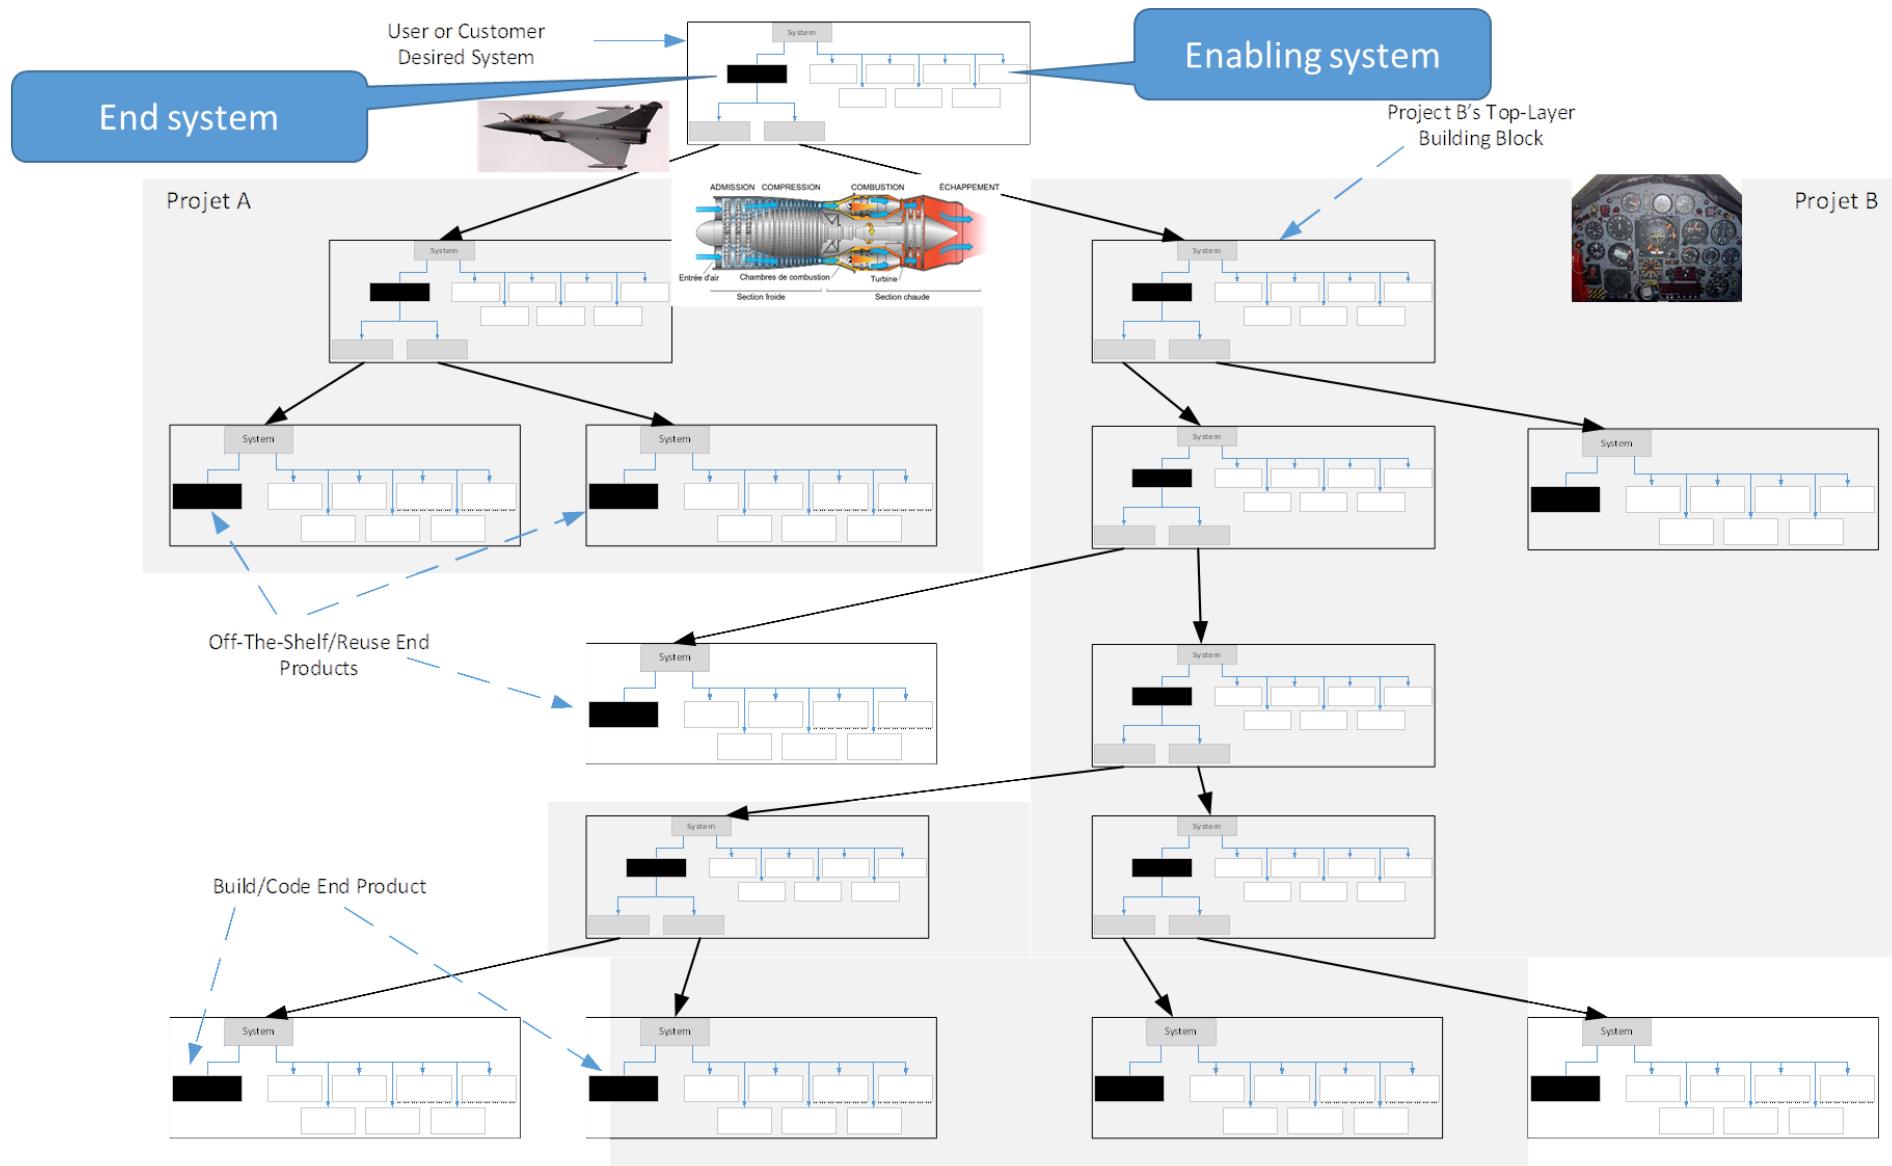

Collaborative Research

Final products and enablers (ANSI/EIA 632)

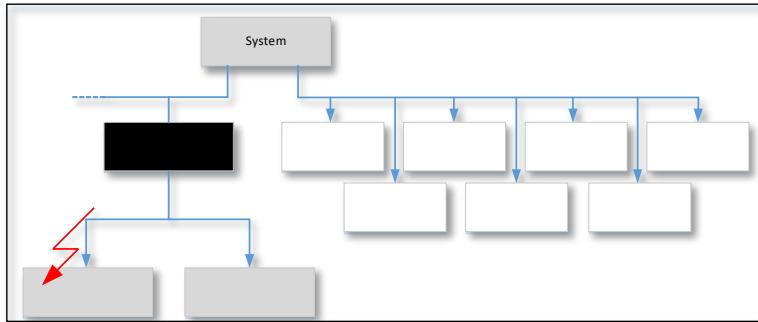

Collaborative Research

Final products and enablers (ANSI/EIA 632)

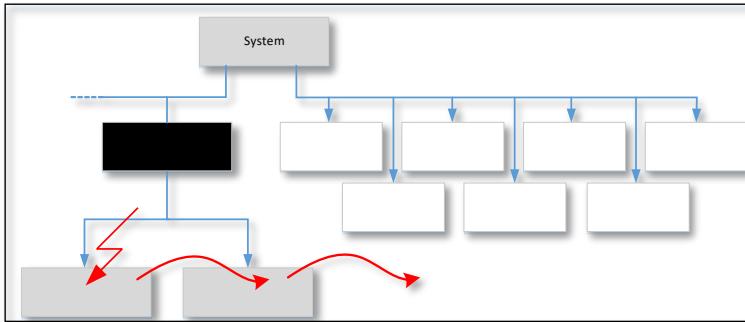

Collaborative Research

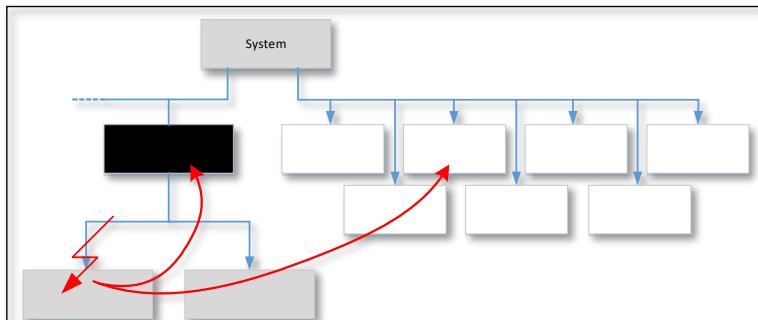

Final products and enablers (ANSI/EIA 632): propagation matters

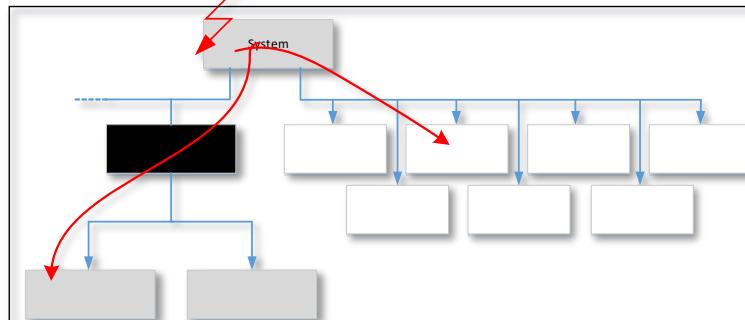

(a) No propagation

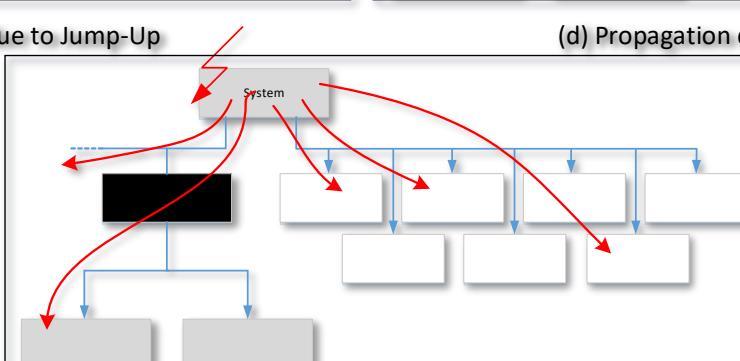

(b) Propagation due to dependency

(c) Propagation due to Jump-Up

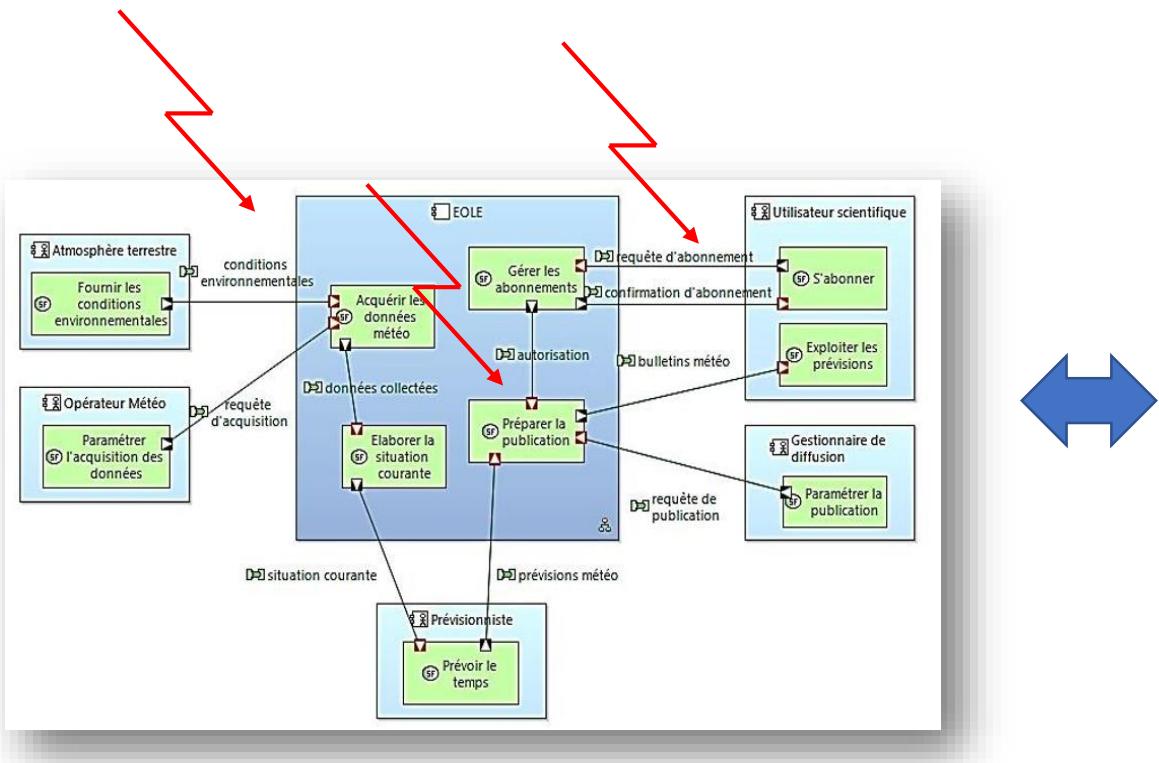

(d) Propagation due to Jump-down

(e) Multi-domain propagation

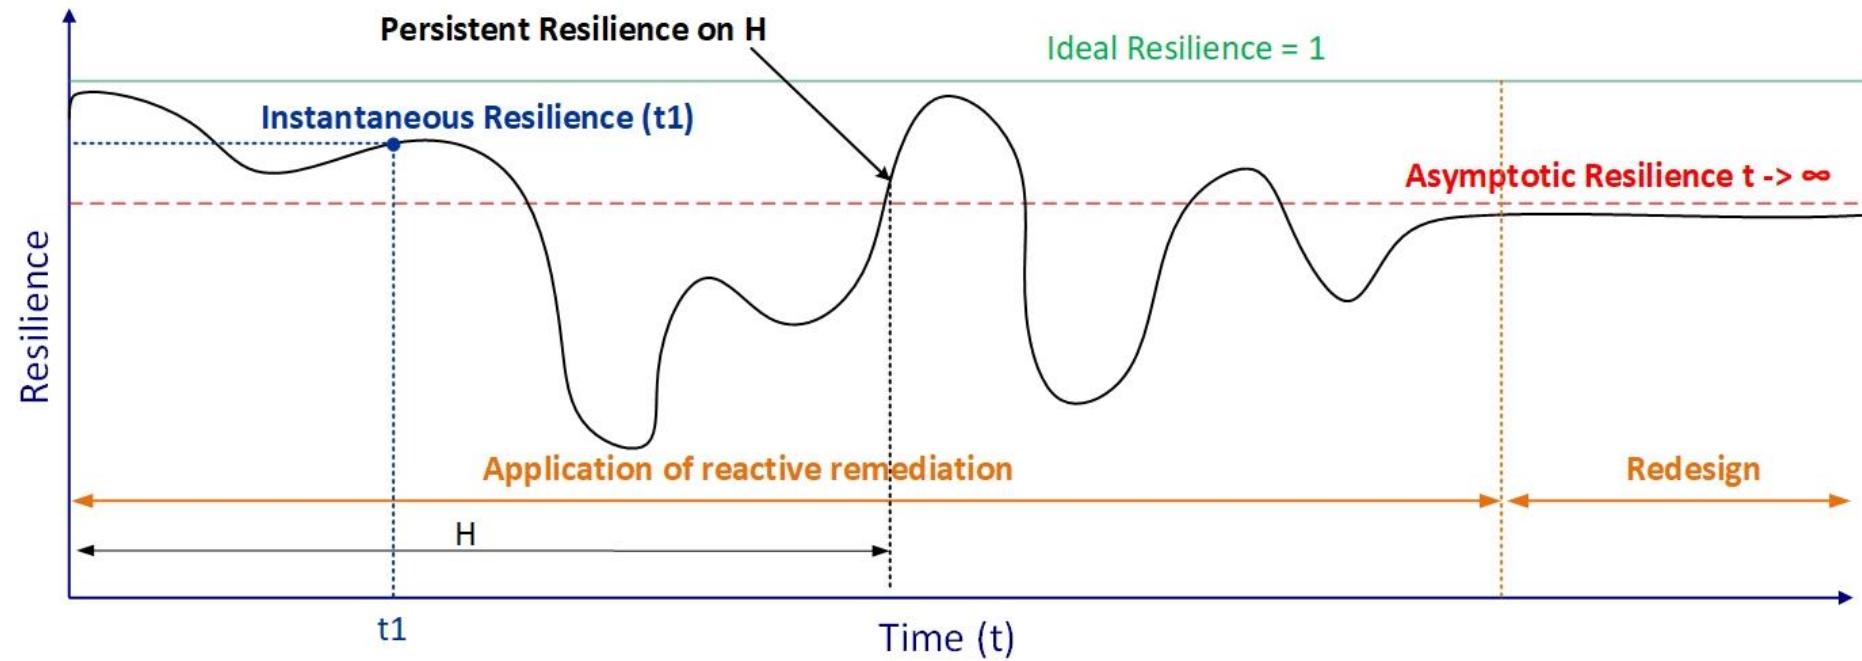

Collaborative Research

Final products and enablers (ANSI/EIA 632): propagation matters

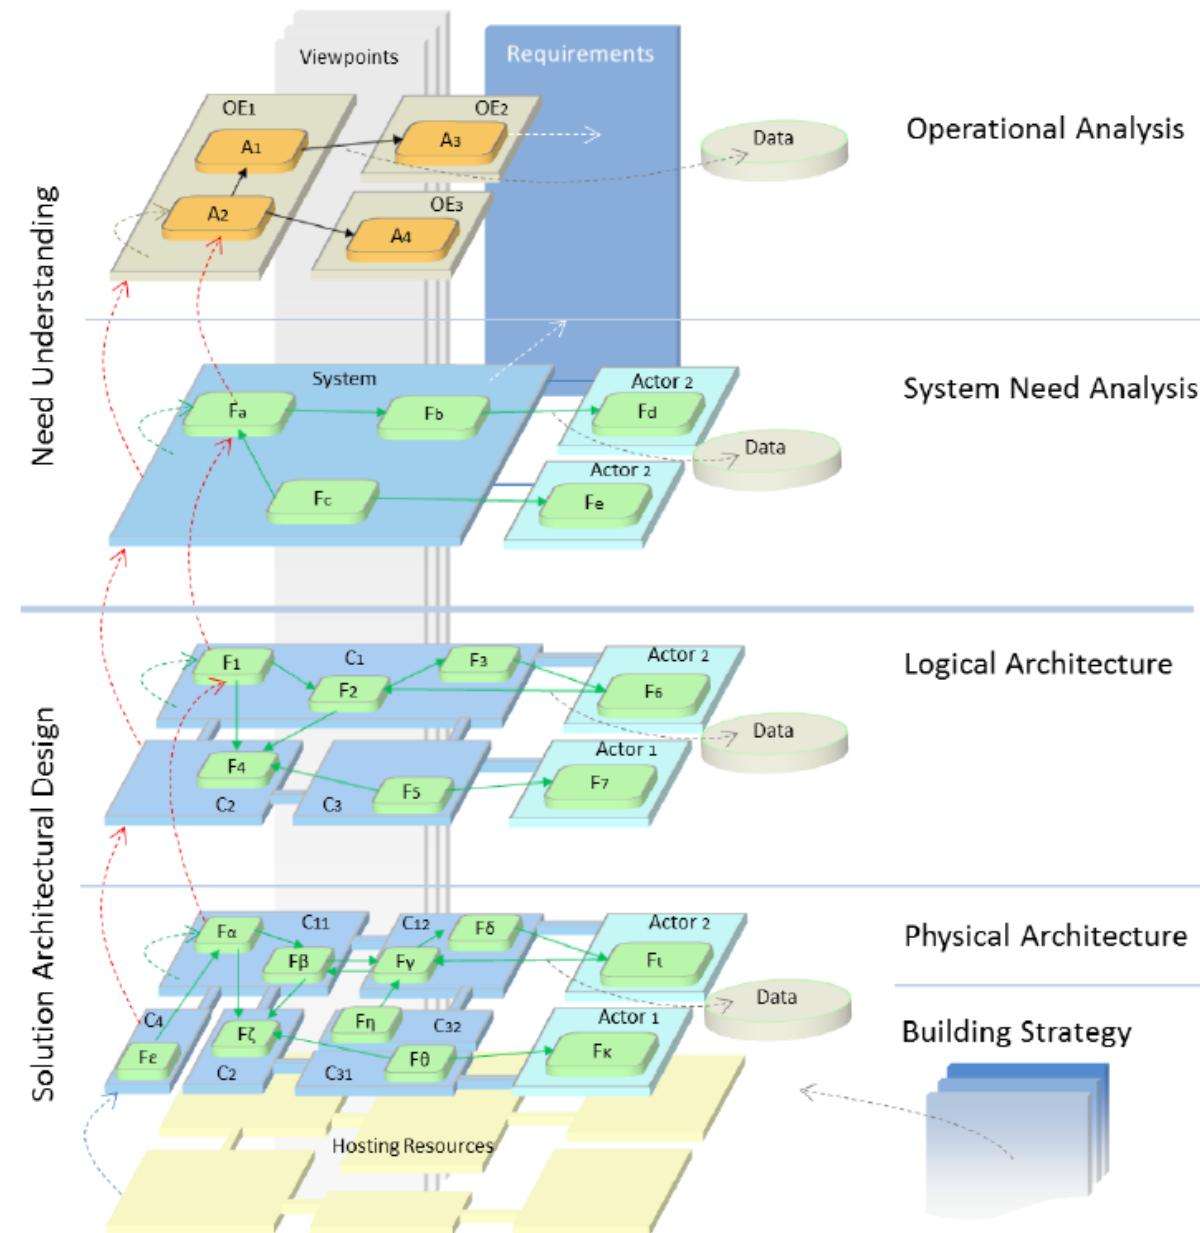

Research roadmap

1. Obso-Resilience: characterisation and quantification [Amel Soltane PhD]

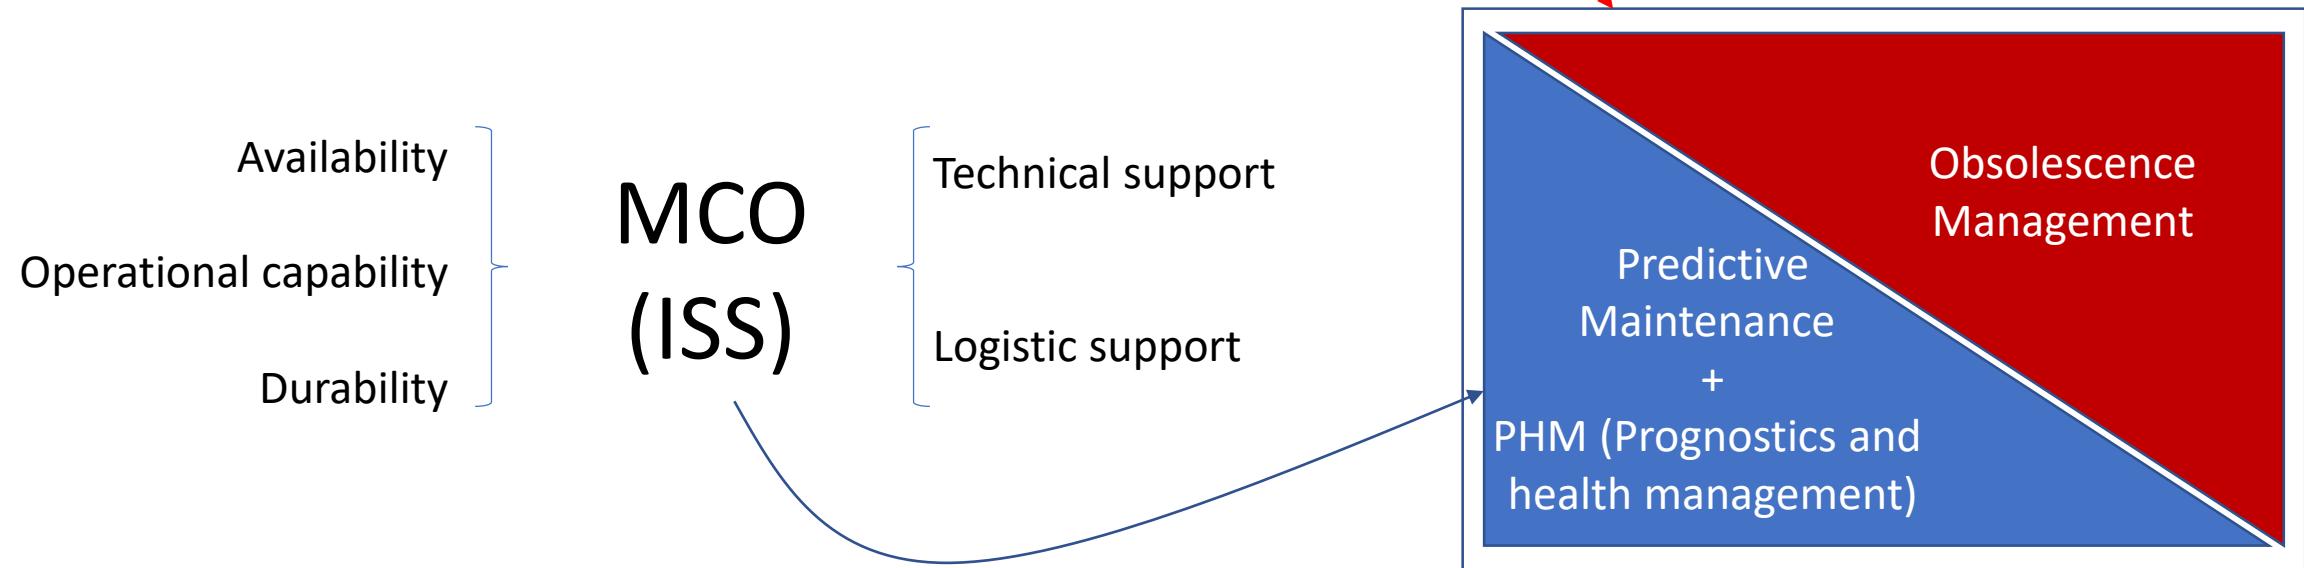

Research roadmap

1. Obso-Resilience: characterisation and quantification
2. **Obsolescence Resilient By Construct (ORByC)**

Research roadmap

1. Obso-Resilience: characterisation and quantification
2. Obsolescence Resilient By Construct (ORByC)
3. Obslescence management: In-Service Support*
 - Complex systems in
 - Extreme conditions

Research roadmap

1. Obso-Resilience: characterisation and quantification
 2. Obsolescence Resilient By Construct (ORByC)
 3. Obslescence management for defence: In-Service Support (Maintien en Conditions Opérationnelles*)
-
- Workshop Obsolescence and Innovation: 6th/7th April 2021
 - International Obsolescence and Innovation Days (P.Sandborn), since 2022
 - Sessions in international scientific conferences: ex. CIGI-QUALITA 2021
 - Special issues in Journals
 - Training and credential (students and professionals)
 - International working groups: academia + industry

Sectorial roadmap

- Defence

nexter

- Car industry

Valeo

RENAULT

Future of French Institute of Obsolescence?

⇒ Become the French Chapter in 2021

⇒ Two goals

Research

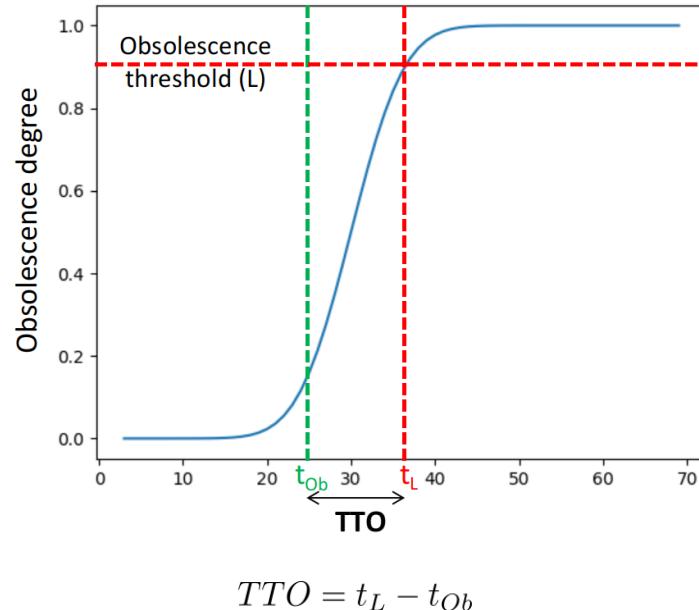

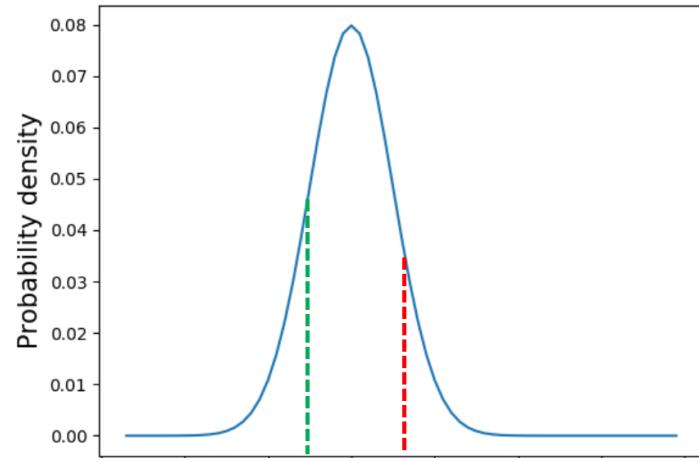

amp;

Training programs (Engineering – Business field) and credential

National and International Collaborative projects

Some research results

Obsolescence prediction [Trabelsi, 2021]

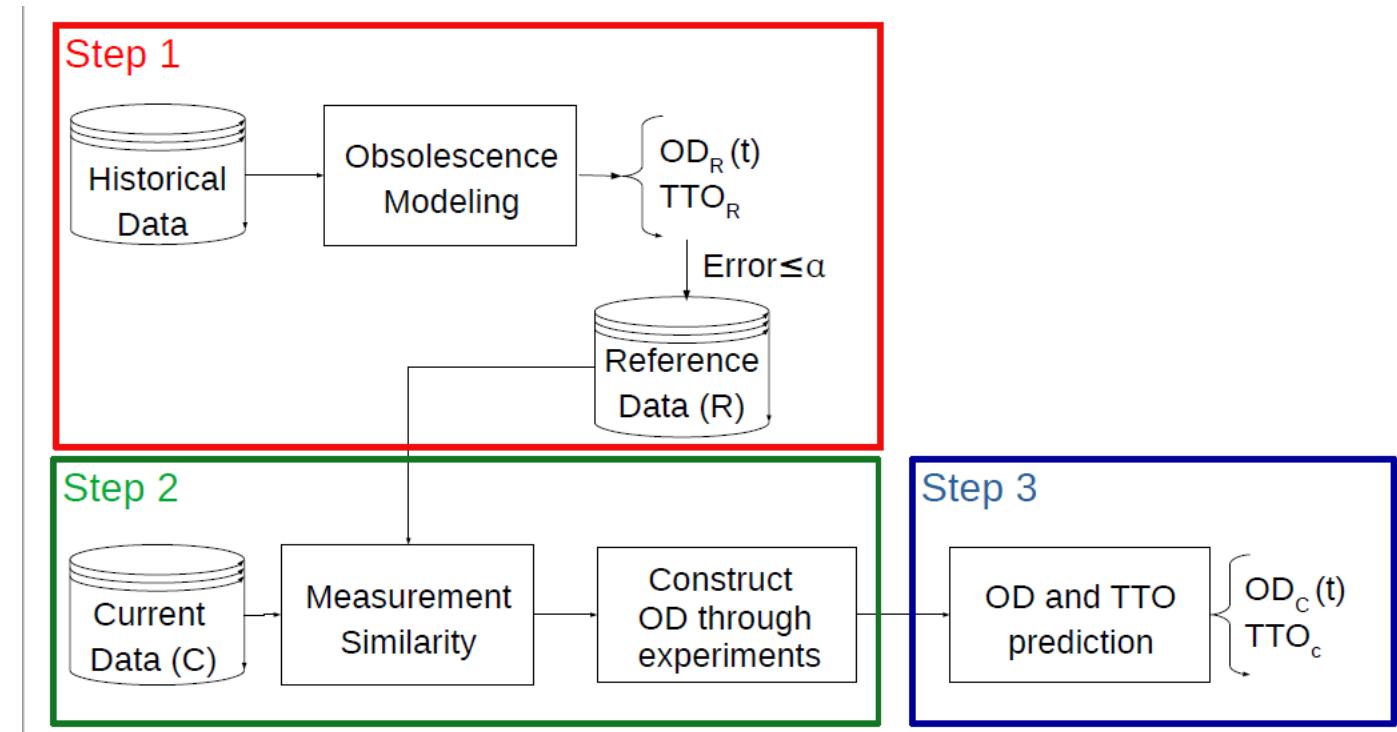

$$OD(e) = p(t \leq t_{Ob}) = \int_{-\infty}^{t_{Ob}} g(t, a, b, \dots) dt$$

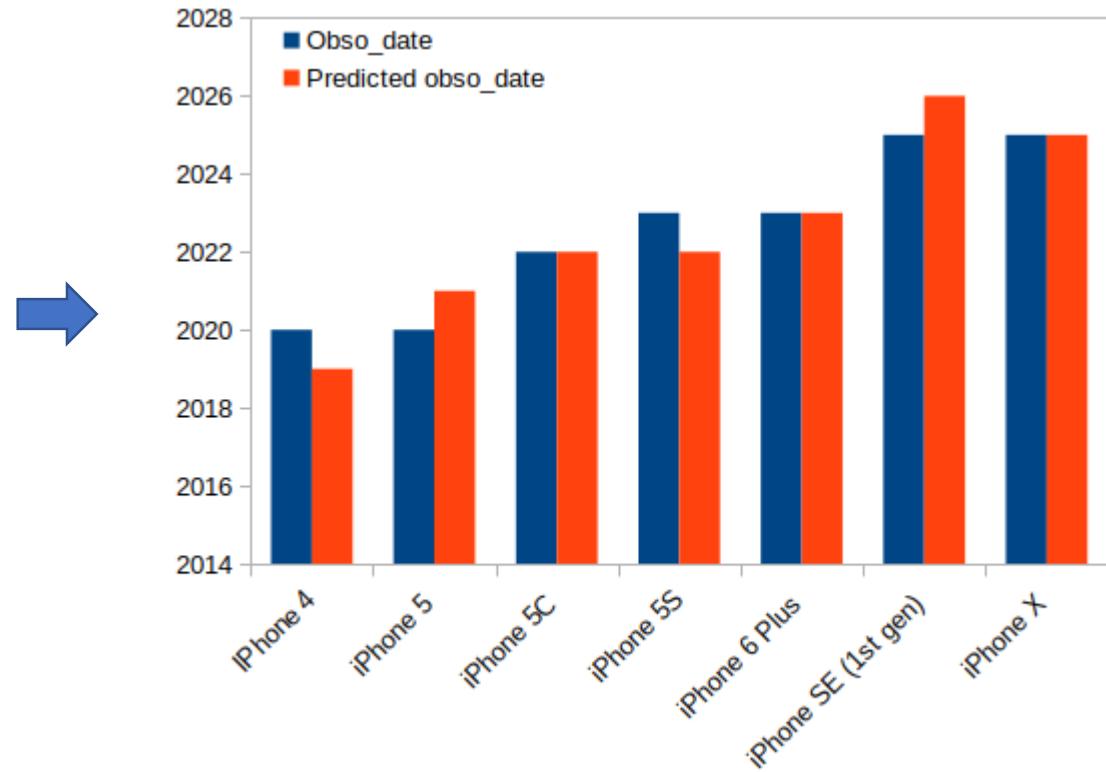

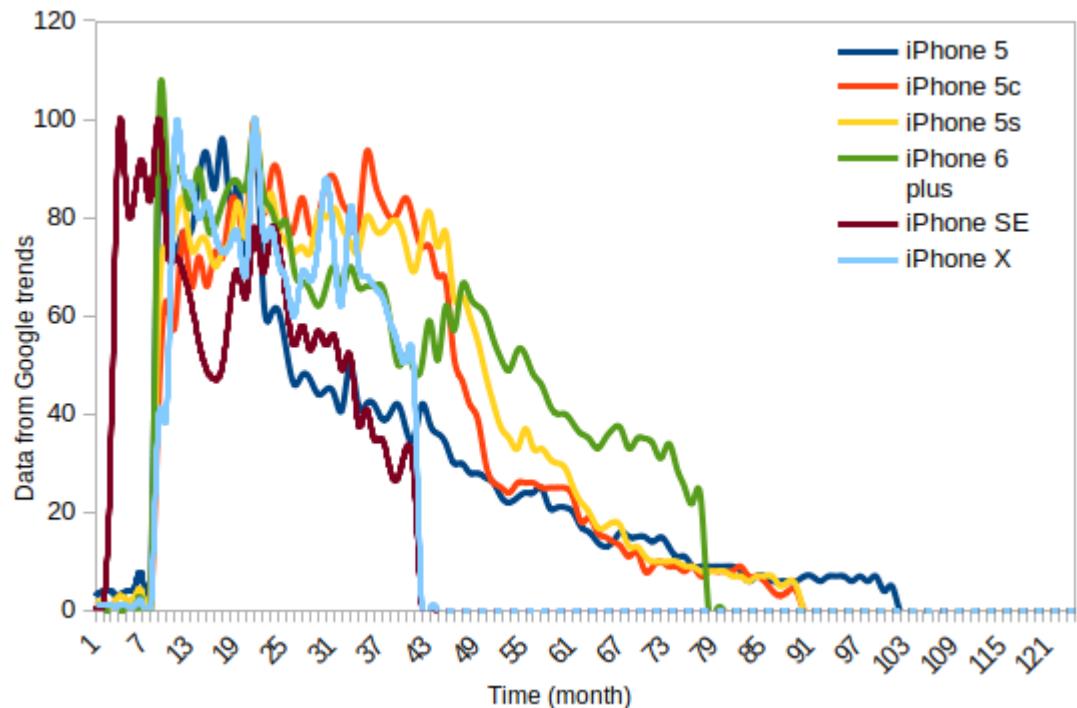

Weibull distribution:

$$g(t, k, \lambda, \theta) = \frac{k}{\lambda} \left(\frac{t-\theta}{\lambda} \right)^{k-1} e^{-\left(\frac{t-\theta}{\lambda} \right)^k}$$

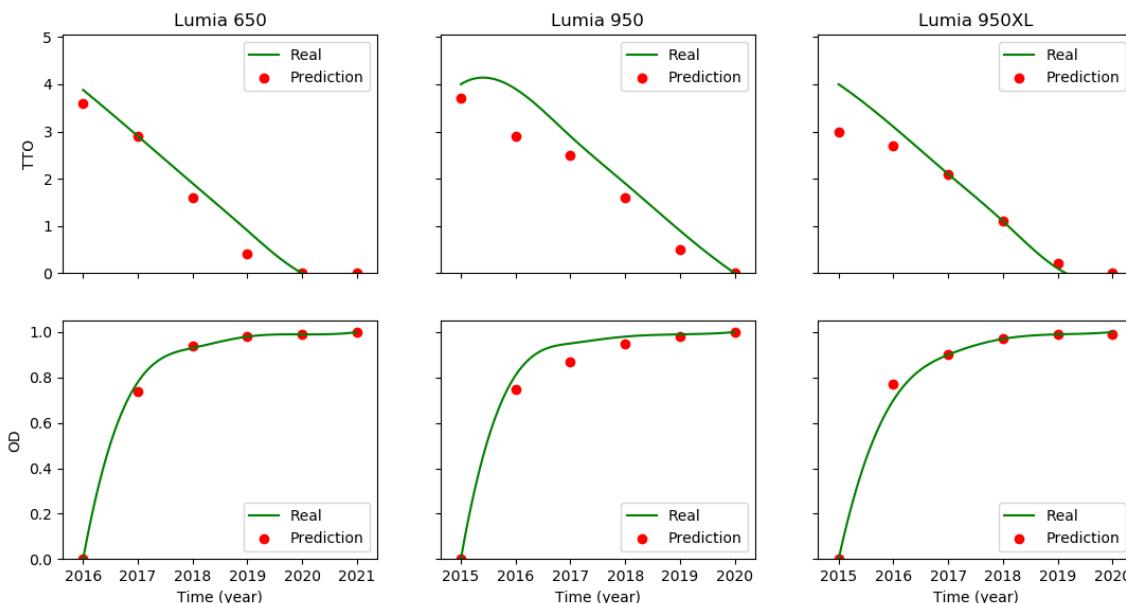

$$OD(t) = P(t \leq t_{Ob}) = 1 - e^{-\left(\frac{t}{\lambda} \right)^k}$$

trends

Usability test for
Microsoft
smartphones

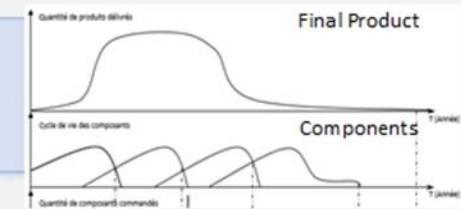

ORByC

[Soltan, 2021]

Key Issues

- Difference between **the life cycles** of systems and their components
- Obsolescence Propagation In the System architecture

Research Work: ORByC

System Models

Define Obsolescence:
-Scenarios
-Perimeter

Identify the **architecture** elements (component, function...)

Obsolescence of one or more items

Dependency Analysis

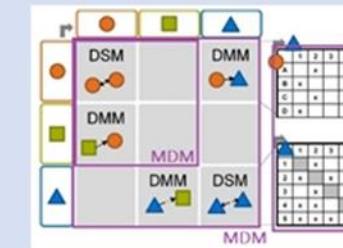

Change Propagation Analysis

Relationships between items

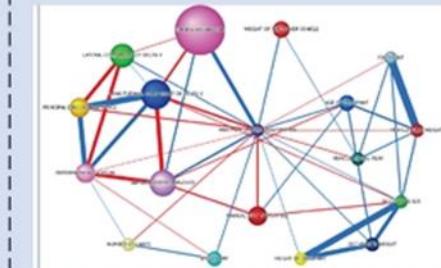

Methods and Tools used

System Engineering: ARCADIA + Capella

DSM, DMM

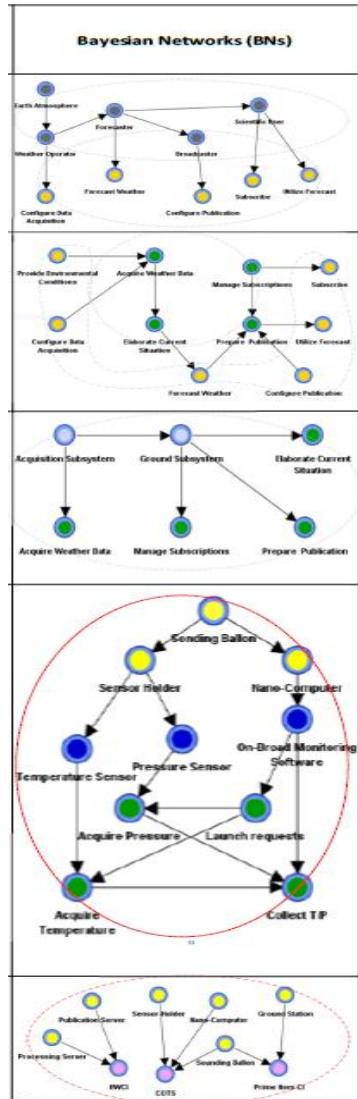

Bayesian Network

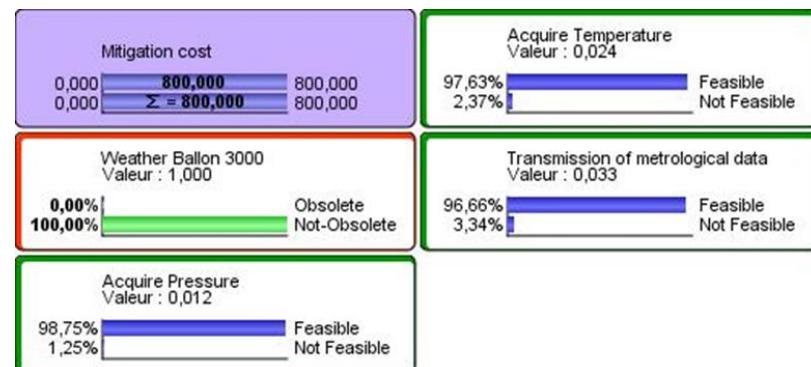

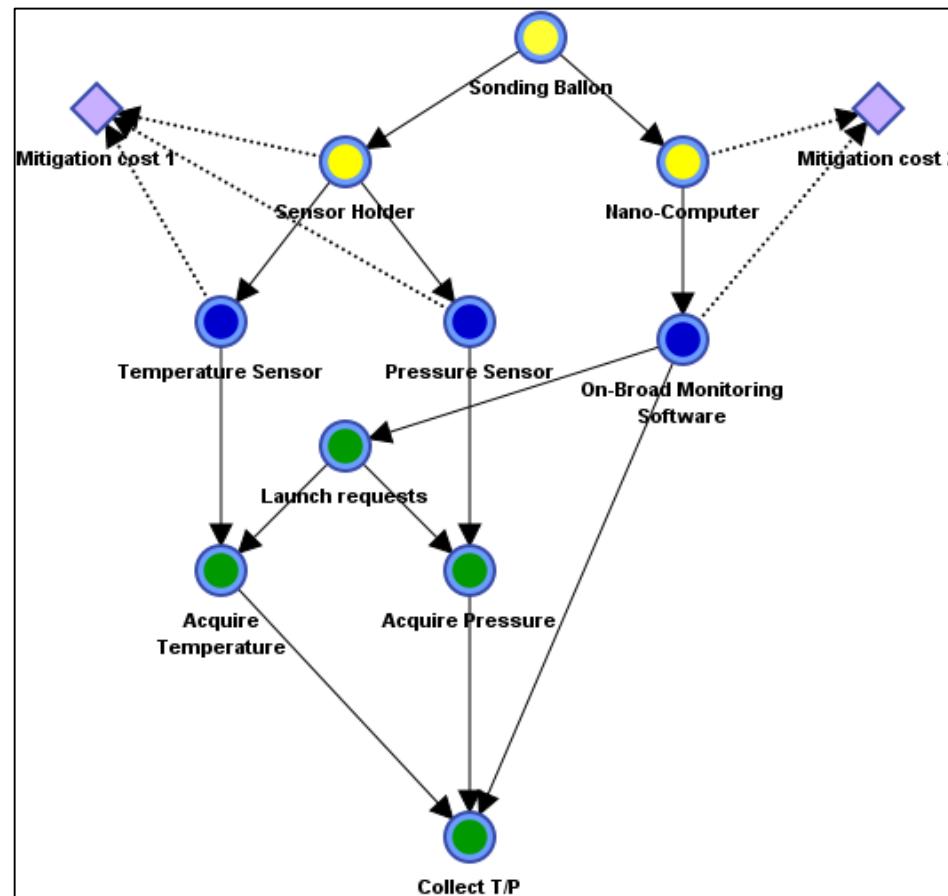

Results

Obsolescence Resilient Design

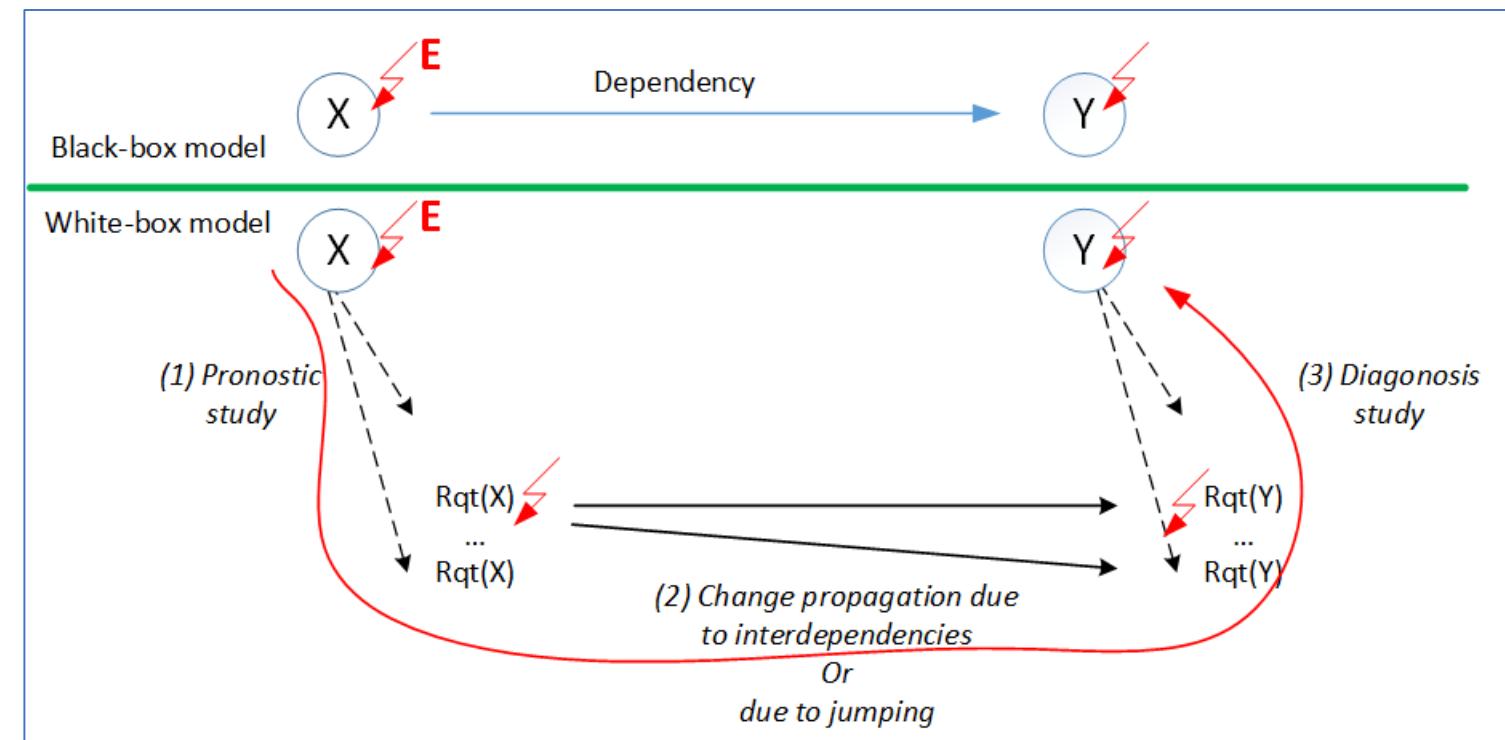

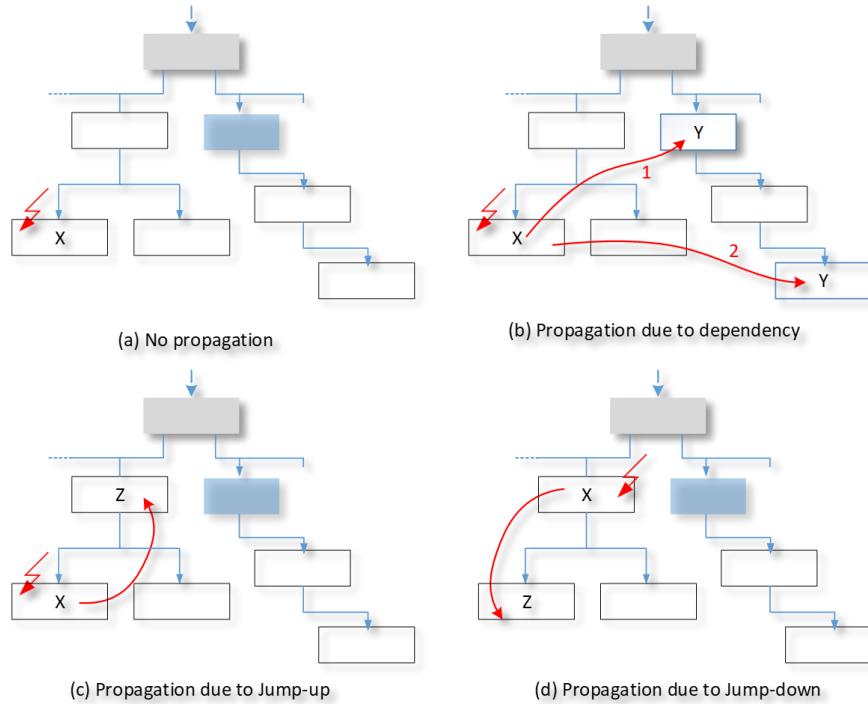

ORByC: Bayesian network

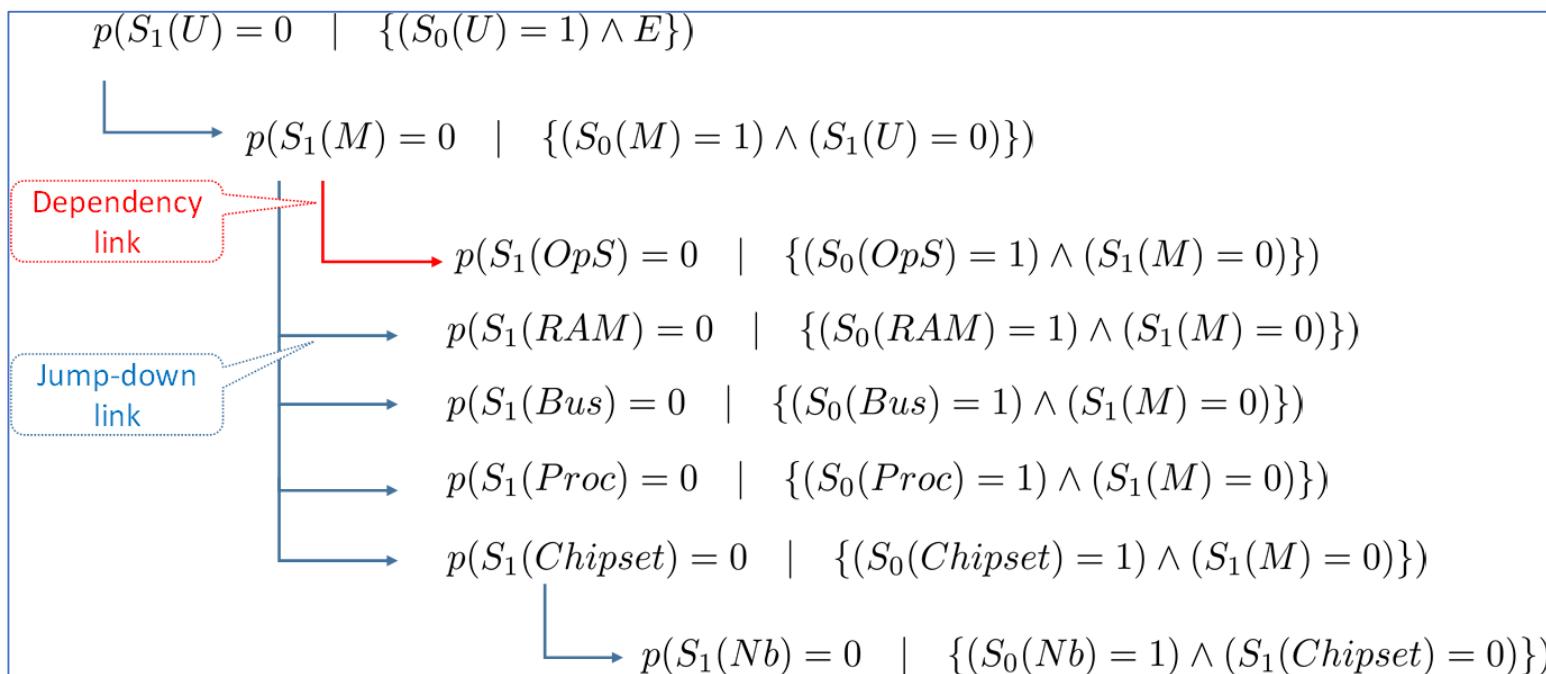

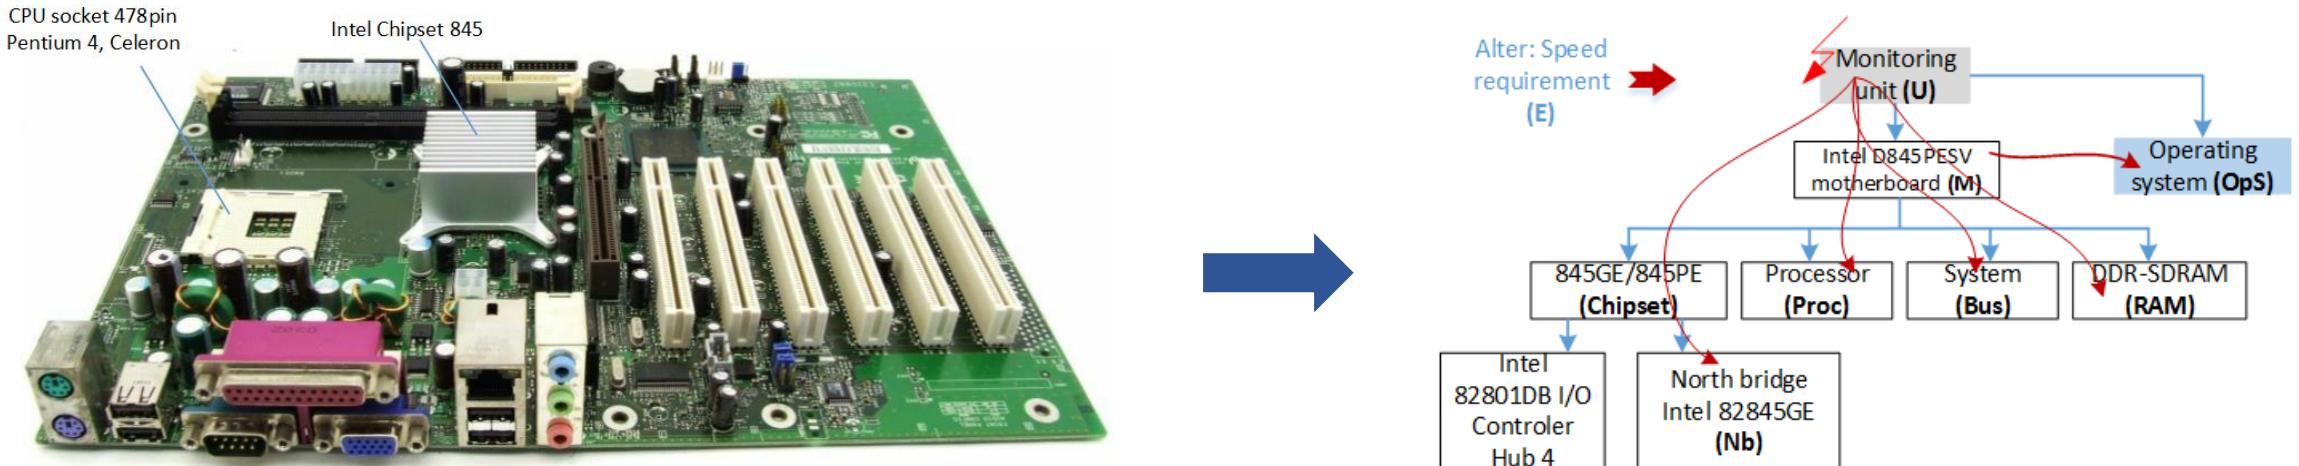

EOLE BN

Obsolescence propagation [Zolghadri, 2021]

Obsolescence propagation [Zolghadri, 2021]
