Occupational Therapy

1001 Pediatric Treatment Activities: Creative Ideas for Therapy Sessions

Ayelet H. Danto MS, OTR/L;
Michelle Pruzansky MS, OTR/L

304 pp, Spiral Cover, 2011, ISBN 13 978-1-55642-968-2,
Order# 39682, **\$48.95**

This quick and simple reference is organized and written in a way that enables the user to quickly open it and skim a chapter for new treatment ideas. More than 350 photographs are included

to supplement treatment activities that require further explanation. The durable spiral binding allows the book to lay flat in times when space is limited, such as in the classroom or clinic.

Activities: Reality and Symbol

Gail S. Fidler OTR, FAOTA;
Beth P. Velde PhD, OTR/L

192 pp, Hard Cover, 1999, ISBN 13 978-1-55642-383-3,
Order# 33837, **\$54.95**

Activity Analysis: Application to Occupation, Fifth Edition

Gayle I. Hersch PhD, OTR;
Nancy K. Lamport MS, OTR;
Margaret S. Coffey MA, COTA, ROH

192 pp, Soft Cover, 2005, ISBN 13 978-1-55642-676-6,
Order# 36763, **\$54.95**

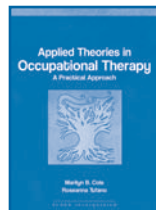

While *Activity Analysis: Application to Occupation, Fifth Edition* maintains the sequential process of learning activity analysis, this

step-by-step approach now helps students analyze activity for the purpose of optimizing the client's occupational performance. Gayle Hersch, Nancy Lamport, and Margaret Coffey successfully guide students through the development of clinical reasoning skills critical to planning a client's return to meaningful engagement in valued occupations.

264 pp, Soft Cover, 2012, ISBN 13 978-1-55642-971-2, Order# 39712, **\$49.95**

As the practice of occupational therapy evolves, so too should the resources that aid clinicians, faculty, and students in learning and achieving the skill of effective documentation. *Documentation*

Manual for Occupational Therapy: Writing SOAP Notes, Third Edition is designed to provide each part of the documentation process, while the worksheets are designed to let you practice each step as you learn it.

Crystal A. Gateley and Sherry Borcharding take the *Third Edition* and broaden the scope of the text to include SOAP notes relevant to

pediatric practice, driving assessment, balance, assistive technology, positioning and mobility, and other practice settings. Additionally, the authors have introduced in this updated edition, the COAST method of goal writing that emphasizes client-centered and occupation-based intervention and documentation.

The beginning chapters of this comprehensive text define the broad range of social skills, competencies, contexts, and cultural norms for social participation in everyday life, offering

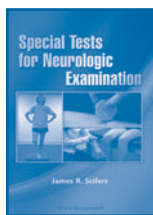

multiple opportunities for learning and practicing specific skills.

Section Two reviews social development from childhood to maturity providing a backdrop for a clearer understanding of the interplay of occupation and socialization in interpersonal relationships and natural community groups. Also covered are opportunities for development of social participation in professional education that illustrate theory application in classroom, fieldwork, and community settings for all age groups. Parameters for evaluating social participation situations, contexts, skills, and norms are discussed in Section Three.

Lastly, in Section Four, occupational intervention approaches designed to foster social skills and remove barriers will enable practitioners and students to facilitate social participation and development across the lifespan.

Visual Attention in Children: Theories and Activities

Kenneth A. Lane OD, FCOVD
240 pp, Soft Cover, 2012, ISBN 13 978-1-55642-956-9,
Order# 39569, **\$49.95**

Inside *Visual Attention in Children: Theories and Activities*, Dr. Kenneth A. Lane describes the positive aspects of attention that are needed for children to be successful in the classroom, such as concentration and vigilance, as opposed

to negative aspects that can lead to failure, such as distractibility and confusion.

This book is divided into two parts. The first eight chapters of the book explain attention and its relationship to vision and visual stimuli. The core topics discussed here include Autism, ADHD, Dyslexia, Executive Function, and Memory. The second half outlines a Vision Therapy program and consists of activities for improving visual attention in children. Over 100 activities are explained and illustrated.

Gait, Goniometry, Manual Muscle Testing

SLACKinteractive.com

The pages of a textbook can only take you so far, the hours in a day that a mentor can give are limited; what is needed is quick and easy access—24 hours a day—7 days a week—**slackinteractive.com** brings you that instant access that today's healthcare professionals and students are seeking.

Now you can have access to information previously only made available in textbook and CD-ROM format at your fingertips.

Video shows the application of each test

- Watch as the clinician positions the patient and performs the necessary test.
- Watch as the patient favors the injury
- Watch as the clinician accounts for this in their testing and results.

Narration explains the elements of each test

- Listen as each step being performed by the clinician is explained in accurate detail.
- Listen as the patients' actions are explained and how they play a role in the diagnosis.

A study quiz promotes problem-solving skills

- Review what you have learned and see what areas may need more attention and study.

Glossary of terms

- Throughout the videos key words are called out with their definitions—taking learning to the ultimate level.

What does Manual Muscle Testing cover:

- Over 60 different movements covered demonstrating both dynamic and break testing
- Against gravity, gravity minimized, palpation and common substitutions demonstrated
- Muscles and innervations listed for each movement
- Proper examiner and patient positions discussed
- Muscle grading scales discussed
- Self assessment quiz

What does Goniometry cover:

- Over 50 different movements covered
- Fundamental concepts discussed including degrees of freedom, end feels capsular patterns and instrumentation
- General procedure for measurement demonstrated including alternate positions
- Notation and recording addressed
- Self assessment quiz

What does Gait cover:

- Both Traditional and Rancho methods described
- Detailed description and demonstration of each phase of the gait cycle including kinetics, kinematic and muscle activity
- Each joint evaluated independently and in conjunction with other joints being tested
- Self assessment quiz

Organized in a user-friendly format, this text provides a unique, compact, and concise summary of over 95 special tests and exam procedures. Each special test is described in terms of clinician action, normal findings, positive findings, special considerations, and references. Each major body region covered also includes a brief section on its history.

In addition to the special tests categories, a submaximal exercise evaluation section has been added for clinicians who believe exercise is an excellent preventive and rehabilitative tool but who may be unfamiliar with the topic.

Features:

- More than 125 photographs and illustrations, including “how-to” photographs
- Specific references based upon the latest evidence available
- Includes 6 appendices covering topics such as Maximal Aerobic Power, Treadmill Calibration, and Astrand-Rhyming Nomogram
- User-friendly, spiral, lay-flat binding

Spinal Manual Therapy: An Introduction to Soft Tissue Mobilization, Spinal Manipulation, Therapeutic and Home Exercises, Second Edition

Howard W. Makofsky PT, DHSc

320 pp, Hard Cover, 2010, ISBN 13 978-1-55642-882-1, Order# 48821, **\$61.95**

This text is an easy-to-follow manual of clinical techniques for the spine, pelvis, and temporomandibular joint. The text provides “tools” rather than “recipes” and immerses the reader in the process of “thinking as a manual therapist,” rather than functioning as a technician. The clinical utility of this revised *Second Edition* combines the art and science of present day spinal manual therapy.

This text mirrors a course on the introduction to spinal manual therapy and will be welcomed into physical therapy curriculums, as well as appreciated by clinicians when entering clinical practice.

Teaching and Learning in Physical Therapy: From Classroom to Clinic

Margaret Plack PT, EdD; Maryanne Driscoll PhD
304 pp, Soft Cover, 2011, ISBN 13 978-1-55642-872-2,
Order# 48722, **\$43.95**

This text offers a systematic approach to designing, implementing, and evaluating effective teaching-learning experiences. It is grounded in current literature and has a theoretical basis in reflective practice, active learning strategies, and brain

compatible instruction. Also included in this text are practical strategies that allow students, educators, and clinicians, working with both students and patients, to enhance their critical thinking and clinical decision-making processes in a variety of settings and situations.
