

# STEADFAST COMMITMENT

## 2020 ANNUAL REPORT

Oklahoma  
OIL & NATURAL GAS

## A LETTER FROM

# Our Chairman

---

“ 2020 certainly wasn't what we expected, but the people of Oklahoma Oil & Natural Gas have continued to put our communities first. From virtual learning resources to cleaning up abandoned well sites, we were able to find innovative solutions to a challenging year.

You'll read about some of our work in this Annual Report. All of our programs are made possible by the voluntary support of oil and natural gas producers and royalty owners. Thank you to the people of Oklahoma Oil & Natural Gas for continuing to make our mission possible and building a better Oklahoma. With your support, we will continue our great work in 2021 and years to come.

We are looking forward to what the new year will bring for us and we are excited to work with industry professionals and educators to have another impactful year, together. ”

Sincerely,

Mike McDonald  
*OERB Chairman*

# STUDENT EDUCATION

Thanks to voluntary contributions from the people of Oklahoma Oil & Natural Gas, the OERB was able to stay relevant and valuable during this challenging school year by offering virtual resources. From YouTube classroom lessons taught by certified Oklahoma teachers to an online workshop that gives teachers the tools they need to keep students engaged both virtually and in person, we strive to keep the needs of our educators as our top priority.

**TEACHERS  
TRAINED BY OERB**

**424**  
in 2020

**17,183**  
since inception

## VIRTUAL WORKSHOPS

We also went virtual with our energy education workshops by offering “mini” versions of our normal training. During these two-hour webinars, the OERB master teachers show fellow educators how to teach pre-selected activities from our full curricula both virtually and in person. Teachers who attend receive a guide, a kit of materials to do the activities with their students and two professional development hours. These are a great way to provide hands-on STEM activities that are based on oil and natural gas concepts and aligned to state academic standards.

**\$66,153.56**  
total cost of kits

# BEHIND THE SCENES AT THE WAREHOUSE

---

Here is a behind the scenes look at the kits that were packed and shipped to teachers in the fall. All of this is made possible by the people of Oklahoma Oil & Natural Gas.

“

**"Once again, I am blown away with your awesome curriculum and generosity to us teachers! Thank you for continuing to do these workshops, even during a pandemic!!"**

# TOOLS FOR TEACHERS

---

After surveying hundreds of teachers across the state, the need for training related to virtual learning was evident. The OERB partnered with Operation Engagement, which was founded by Oklahoma teachers to provide high-quality, relevant training for teachers struggling to manage this difficult school year. These two-hour webinars provide teachers with new tech skills and ideas to keep students engaged virtually or in person. We cover topics like how to integrate existing lessons into the digital space, how to create easy online quizzes, how to keep students organized and provide lists of resources to support distance learning across all age levels.

attendees

“  
“I loved this workshop! It gave me so much more knowledge than I had going in and I implemented many of the resources into my virtual class ASAP. Thank you so much!”

# VIRTUAL CLASSROOM

---

To engage students at home with STEM education, the OERB has created virtual classroom lessons that are taught by certified Oklahoma teachers and aim to provide students with supplemental lessons during distance learning. The innovative, fun, and free programs cover social studies and history, but focus on science, technology, engineering and math (STEM).

Parents and teachers can browse our library of free hands-on STEM education lessons through our Virtual Classroom program, where kids grade K-12 can learn about oil and natural gas through fun STEM activities, all at home. We will continue to work with educators across the state to provide the tools and resources we all need to help keep young minds learning.

The logo for OERB Virtual Classroom features the text "OERB" in blue, "Virtual" in green, and "CLASSROOM" in red. To the left of "Virtual" is a yellow and blue icon of a calculator and a line graph. To the right is a blue and red icon of a microscope. The word "CLASSROOM" has a red play button icon integrated into the letter "O".

# RESTORATION CLEAN UP

Voluntary funding from today's oil and natural gas industry allows the OERB to clean historic well sites all across Oklahoma. We've returned the natural beauty to thousands of acres of land thanks to the deep-seated commitment our industry has to this state. The people of Oklahoma Oil & Natural Gas are proud to live here too.

This wooden tank in Rogers County was associated with production from 1910 to 1920. More than 100 years ago!

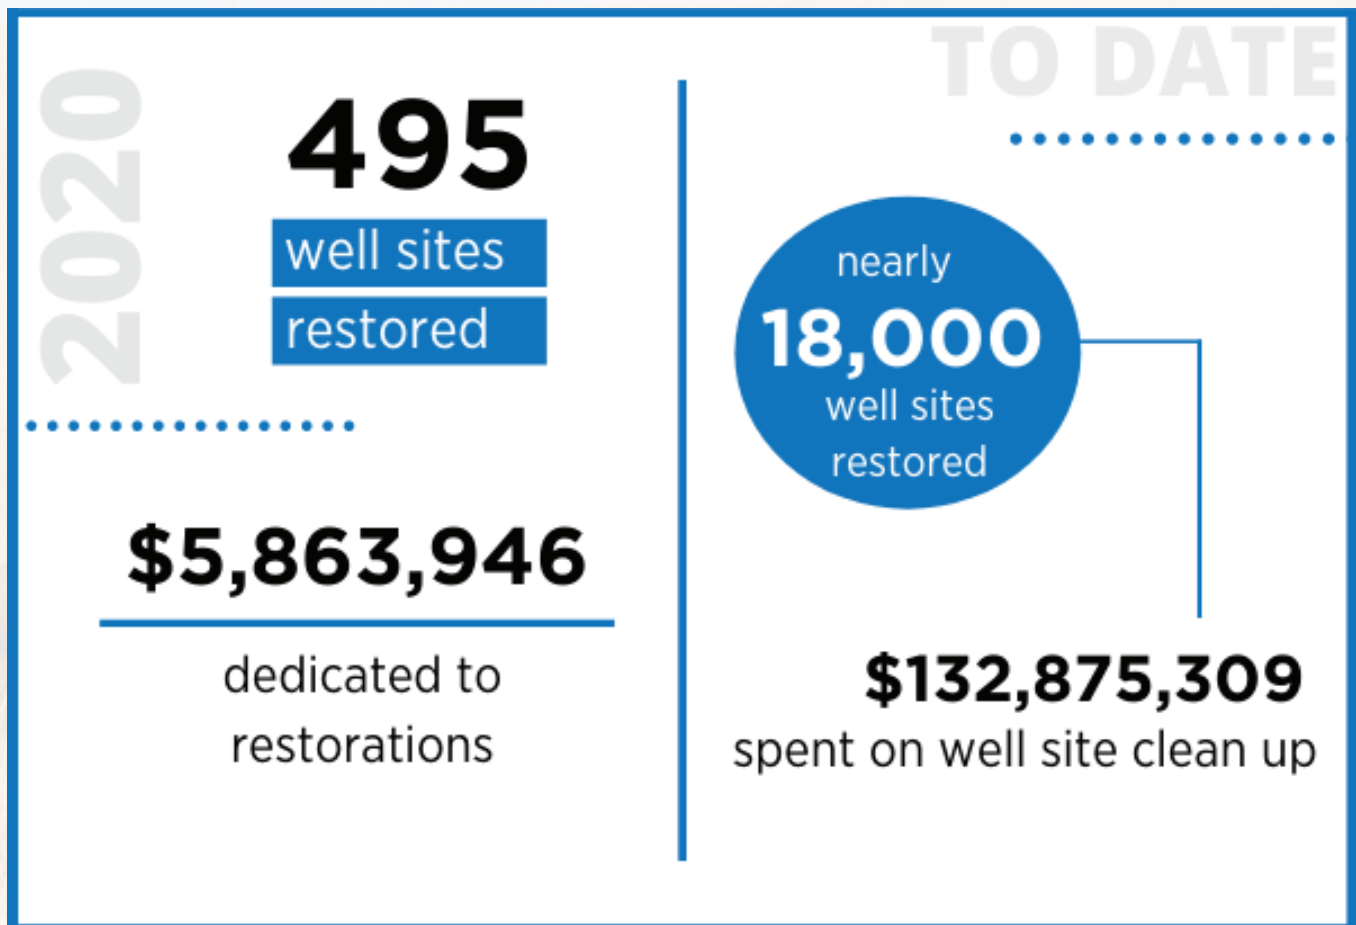

This site located near Slick, Oklahoma was a concrete powerhouse base for a well drilled in 1944.

As with our other programs, we were also able to find new ways to increase efficiencies in our well site cleanup program. We cleaned nearly 500 historic well sites across Oklahoma. These sites were left 50 to 100 years ago, well before today's producers were in operation.

However, through the voluntary contributions from the oil and natural gas industry and royalty owners, the OERB is able to clean land across the state.

**Here are the highlights from 2020 and beyond:**

# SOER

SUSTAINING OKLAHOMA'S  
ENERGY RESOURCES

## ONLINE WORKSHOPS

---

In 2020, SOER also went virtual with their industry education workshops. The challenge quickly turned into an opportunity as SOER constituents were given more convenient ways to attend workshops for free.

## DIRECTORY

---

The people of Oklahoma Oil & Natural Gas, the OERB and SOER are proud to offer the Oklahoma Oil & Gas Directory as a resource that is needed more than any other time.

Due to the cancellation of the Oklahoma Oil & Gas Expo, unique networking opportunities were missed and this Directory can help to fill in that gap.

The Directory can serve as a resource for producers who want to network with more than 150 industry-related companies. We believe you will find this directory as a helpful tool to connect with industry peers and provide you with the assets you need to be successful.

[Click here to view the full directory.](#)

# PETROED

---

In the spirit of e-learning and as part of SOER's mission to provide valuable educational resources for oil and natural gas producers, including royalty owners, the committee has established PetroEd as an online learning system. PetroEd is a self-paced program that will let participants have access to any available courses for 12 months. Our curriculum will include relevant topics ranging from general petroleum to product operations.

Please note this is only available to the first 100 applicants.  
All applicants must be based in Oklahoma for approval.

# SOERCONNECT

---

Another new resource developed in 2020, the SOERCONNECT App. It's an easy way to connect with the local oil and natural community and gain access to industry resources. Through the app you can access free industry materials like industry workbooks, webinar recordings from the latest workshops and other educational videos.

You can also submit a question to get advice from other industry professionals when faced with difficulties in the field. The app also has quick and easy access to SOER's Lease Pumper's Handbook with searchable filters and links.

SOERCONNECT is a native app, so it can be easily accessed in a remote location without Wi-Fi or internet. It is now available for free download in the App Store.

## OIL & NATURAL GAS 101 VIDEO

---

Do you need a resource that offers introductory information on the oil and natural gas industry? Look no further as SOER has that covered too! The Oil & Natural Gas 101 video, created by Oklahoma's industry professionals and produced in Oklahoma, verbally explains and visually illustrates industry terminology that can be easily understood. This free video highlights ownership, leasing and negotiations, geology and production.

# JOHN C. GODWIN MEMORIAL GOLF TOURNAMENT

Thank you to all of our sponsors and attendees at the annual John C. Godwin Memorial Golf Tournament on October 8, 2020. We had perfect weather and great networking for the 138 players. Thanks to the generosity of this industry, we raised a total of \$5,700 for the Bedouin Shrine Transportation Fund in honor of John C. Godwin.
