Introduction

JD Edwards EnterpriseOne One View Reporting enables end users to access data for simple to sophisticated reports using EnterpriseOne find browse applications with BI Publisher layout reporting and distribution features. One View applications combine essential transaction and master data including associated descriptions and category codes. Users have the ability to view data in the exact layout they desire using all the advanced capabilities of Oracle BI Publisher.

One View Reporting provides a host of pre-defined reporting templates designed to address some of the most common and highly demanded reports enabling you to realize value on day one. Delivered reports can be personalized by end users as needed and additional reports can be defined without IT support.

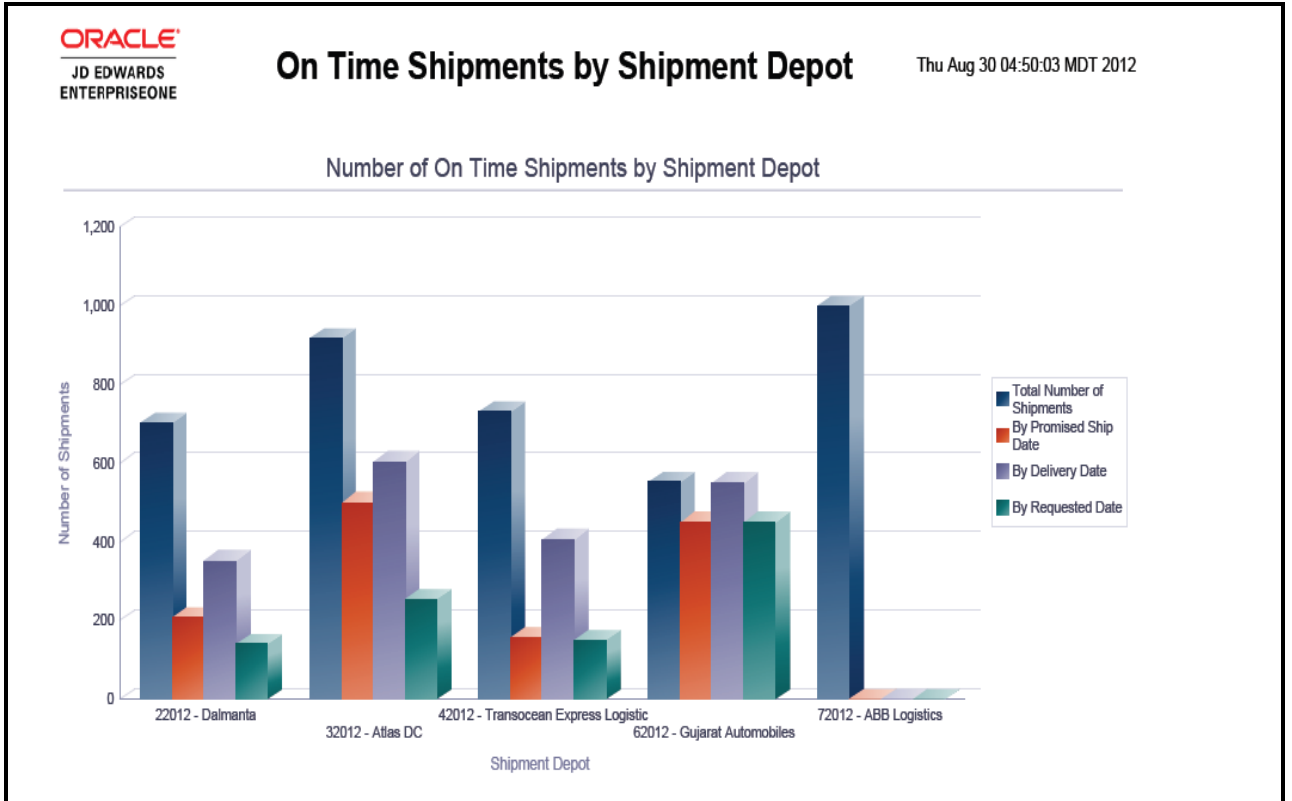

This document provides report samples delivered with One View for Transportation Management.

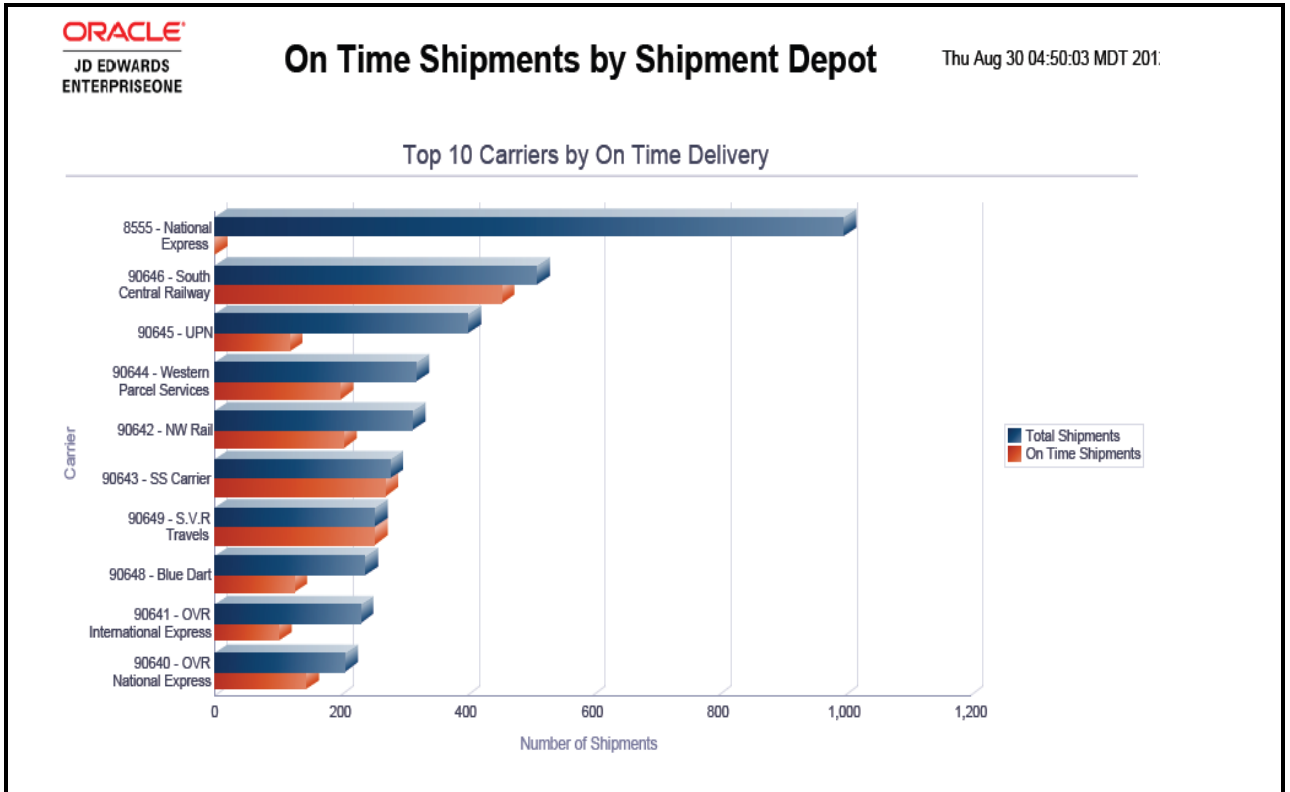

For information on setting up and running the reports, see the [JD Edwards EnterpriseOne Applications 9.1 OneView Reporting for Transportation Management Functional Overview](#).

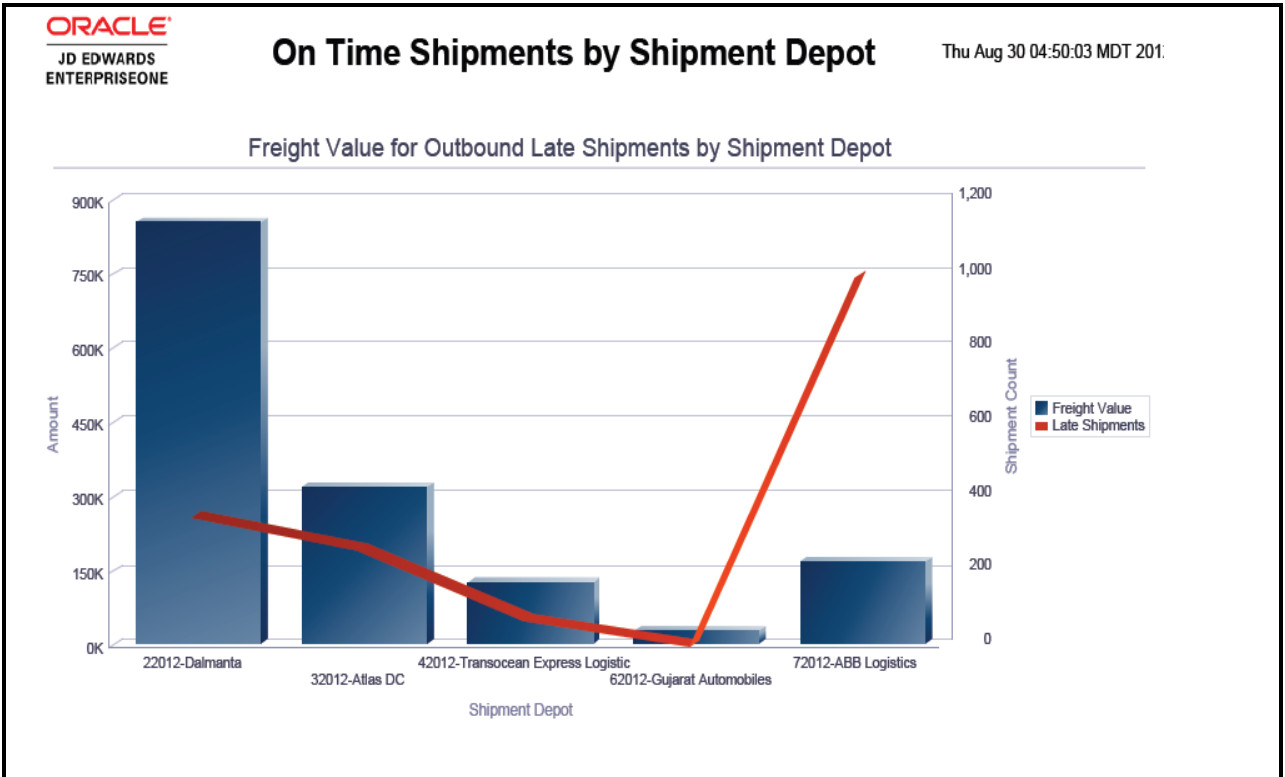

Application: One View Transportation Shipment Inquiry P49270

Business View: V49270A [One View Transportation Shipment Inquiry - F4215 and F4941]
