# ITU WP5D IMT-2020 Vision: 5G Key Features

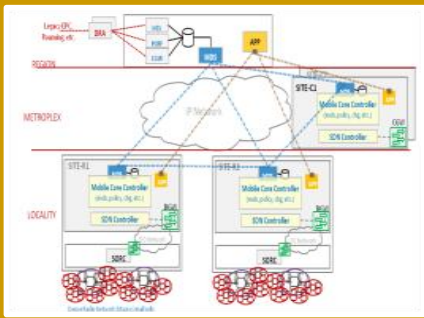

- Network slicing
- Cloudlet computing
  - <10 ms latency, high reliability
- Flatter network and data center consolidation
- Flexible mobility
- Massive signaling and data demands

Details in: [IMT Vision – “Framework and overall objectives of the future development of IMT for 2020 and beyond”](#)

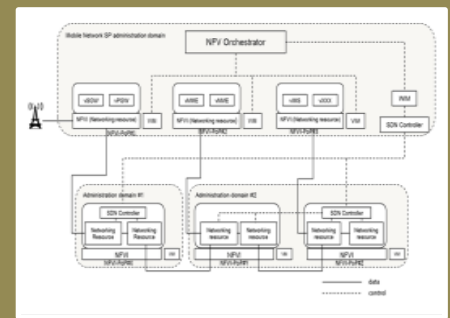

# Building Blocks of 5G Network : Open is Fundamental

Flexible/Scalable Architecture

Flexible/Scalable Data Distribution, Synchronization, and Mobility

Cloud, NFV, and SDN

Flexible Network that Enables Service Agility

Open Source Framework ( OPNFV, ONOS, OpenStack, etc.)

# OPNFV's Role

**Speedup the adoption of NFV within the industry**

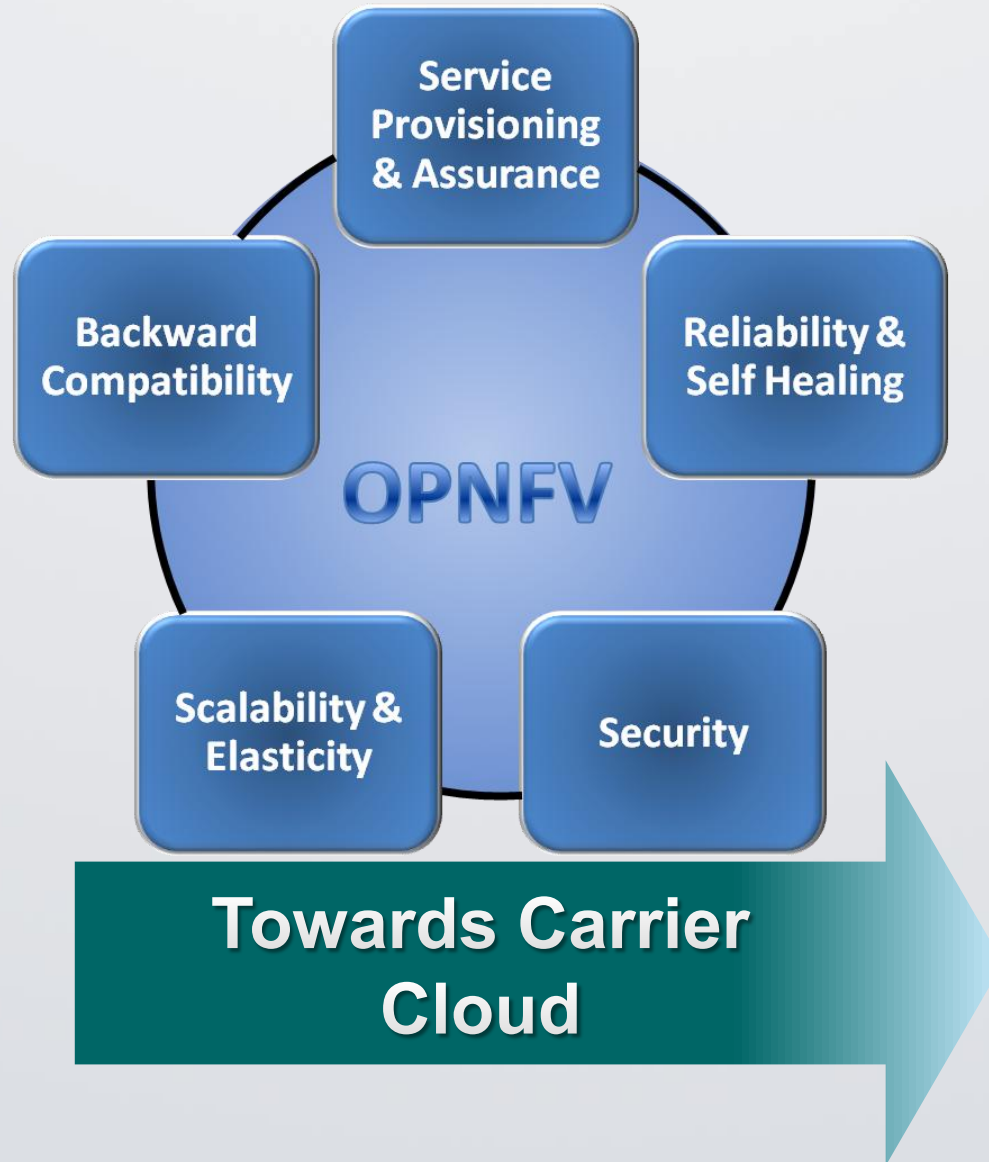

**Reference Carrier Cloud Platform**

- Forum for industry consensus on current gaps in the NFV Platform
- Work together with upstream communities to close the gaps
- Deliver the recipe book on integration of upstream components and their recommended settings
  - Repository of needed upstream code
- OPNFV compliance

# OPNFV's Focus: Carrier Cloud for 5G

Strong movement to the Cloud in the IT industry

# An Active Contributor to OPNFV

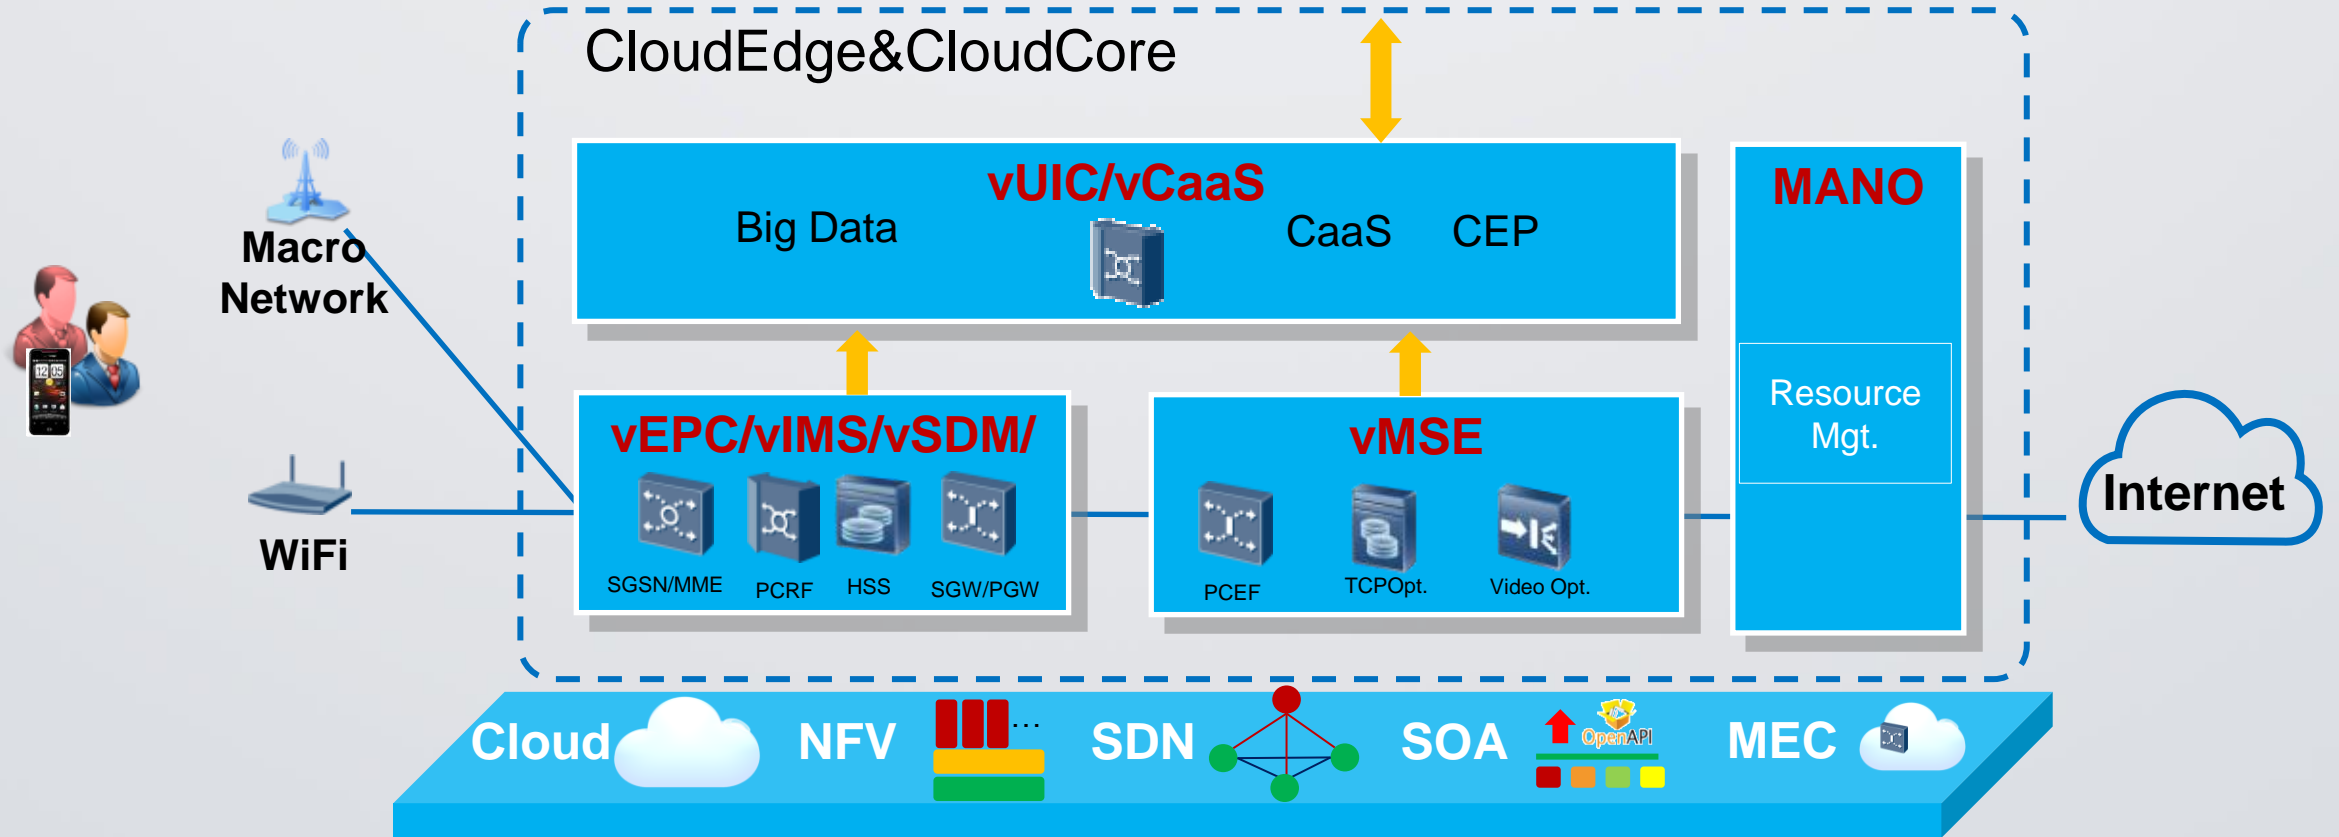

Source: bitergia

# Huawei Provides Test Labs to the OPNFV Community

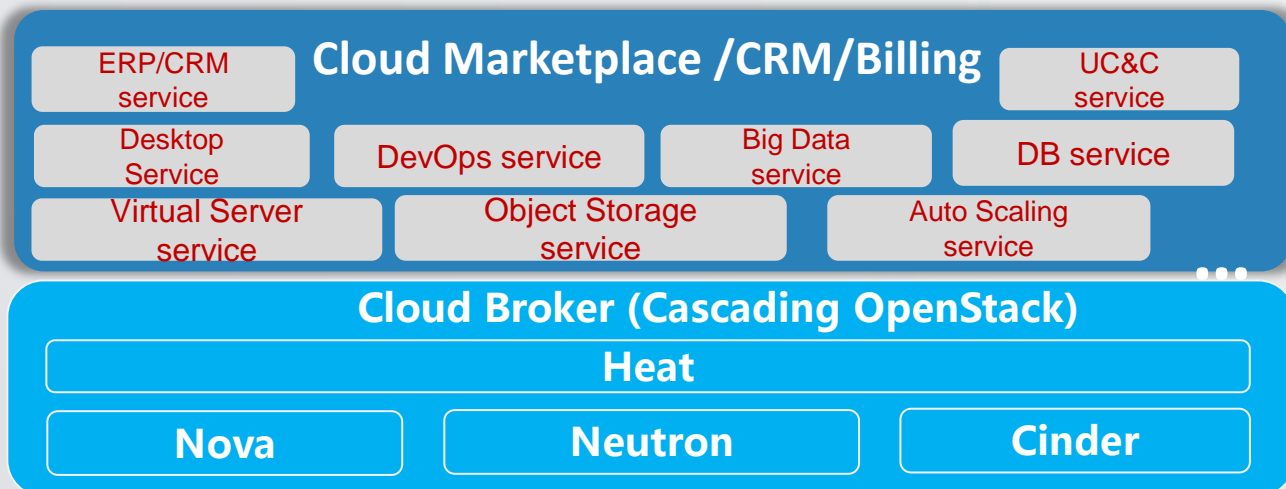

Build the open ecosystem	Joint solution development	Industrial organization cooperation	Training/certification
Joint innovation	Requirement analysis and design	Development implementation	Test and verification
Build the multi-vendor integration capability	Multi-vendor integration capability development	Project pre-integration test	Tool and methodology study

# CloudEdge and CloudCore: Building upon OPNFV Framework

# FusionCloud : 'Cloud over Clouds'

- Open cloud ecosystem
- Unified operations for all clouds
- Seamless movement between clouds
- Simple scale across clouds
- Secure network across clouds

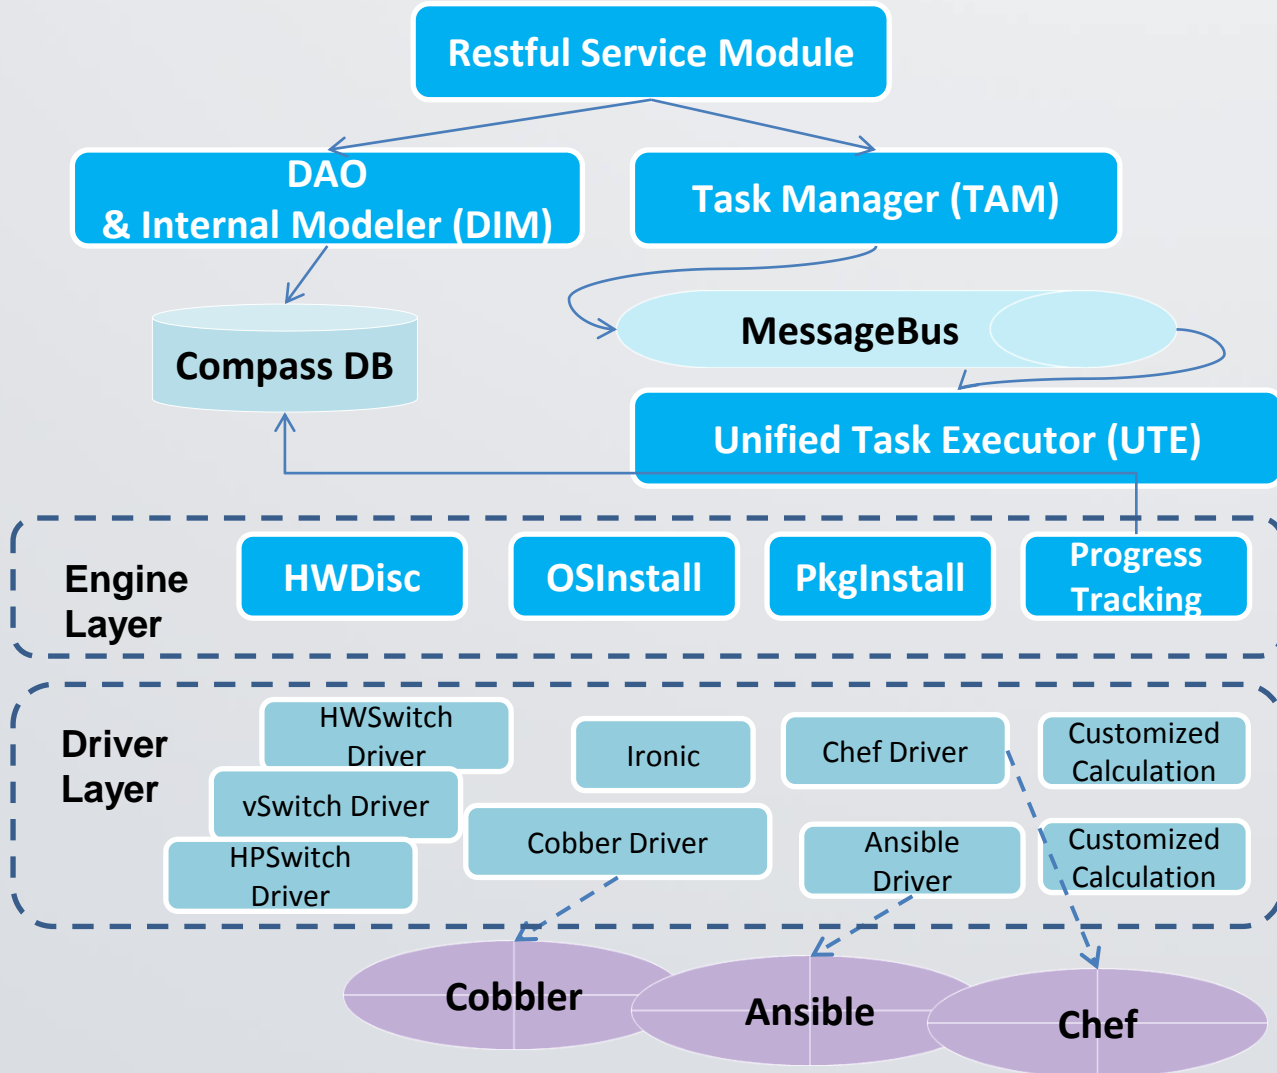

# Huawei's Demos at the Summit

- **Compass for OPNFV.**
  - Compass is a Huawei leading open source installer and DevOps tool for OPNFV with advanced software architecture, friendly GUI and rich features
- **VNFs over OPNFV.**
  - Huawei's vEPC and vIMS components will run over the OPNFV platform with Huawei's MANO component.
- **ONOS for OPNFV.**
  - A carrier grade open source SDN controller.
  - An important option for carrier grade OPNFV platforms.

# Compass on OPNFV

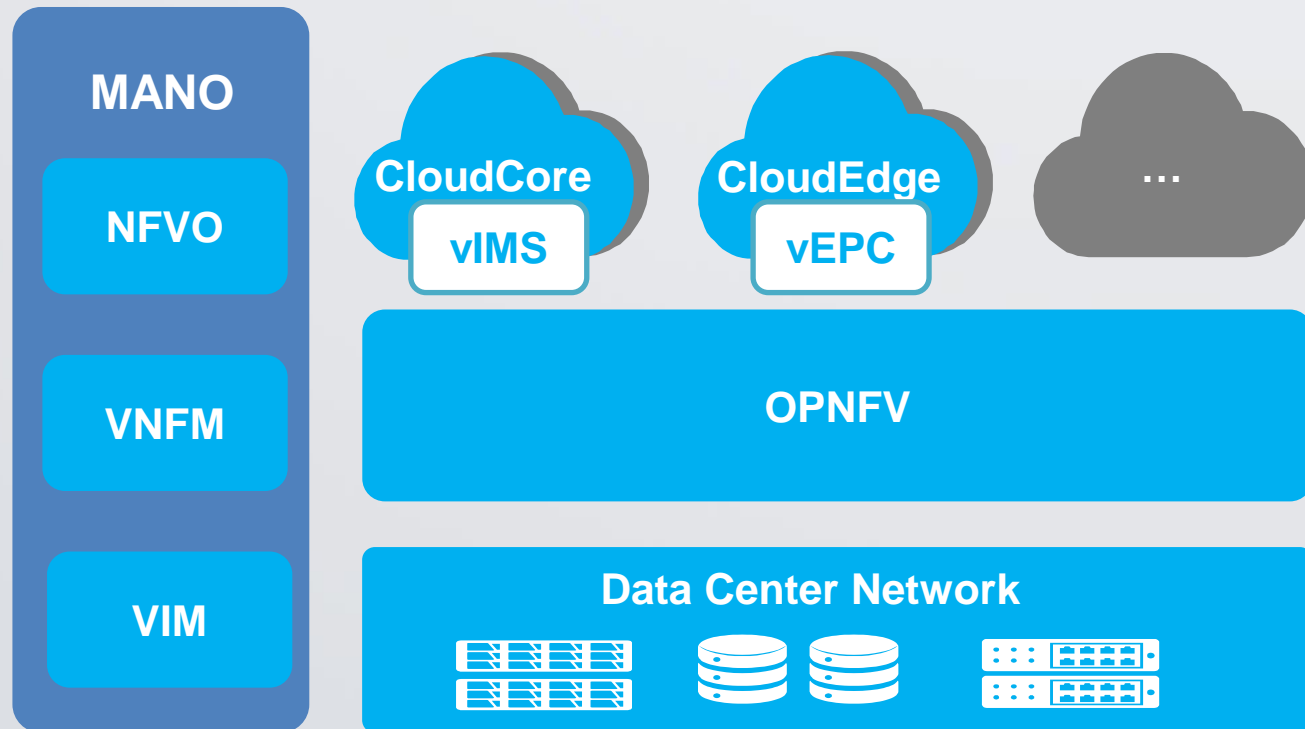

## Better DevOps for OPNFV

- Automated deployment of OPNFV Platform
- Automated management of OPNFV Platform
- Essential validation Capabilities

## Demo Summary

- Deploy OPNFV on Bare Metal
- Deploy OPNFV on VM

# Fully Support VNFs on OPNFV

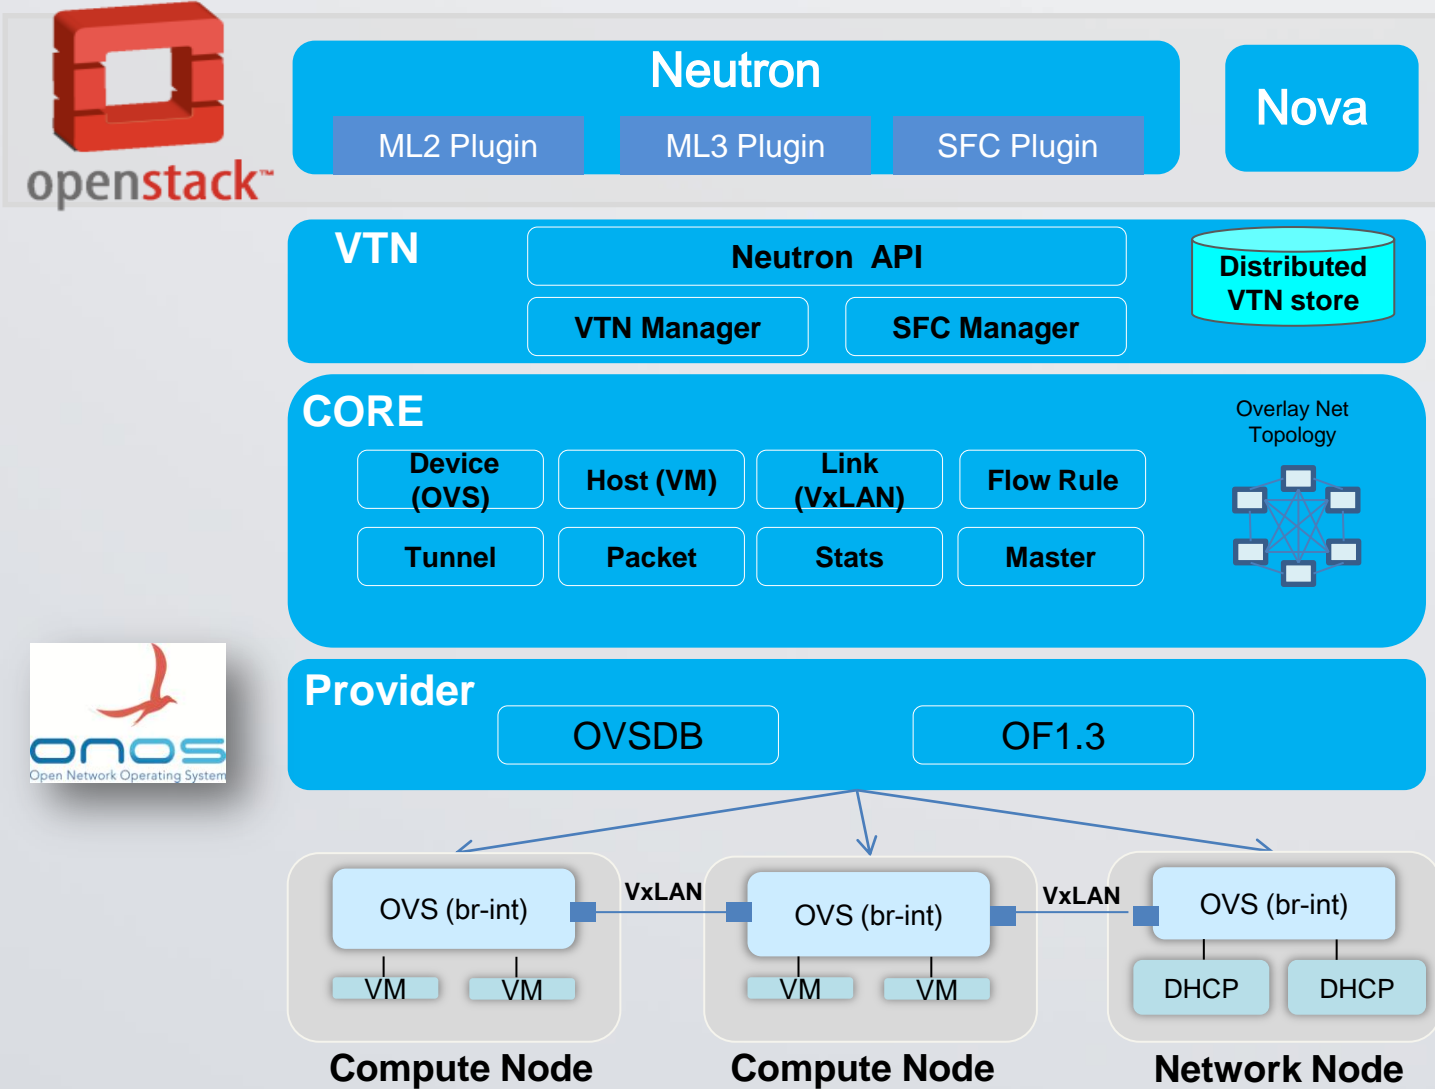

## Driving OPNFV to Commercial

- Mature Solutions:
  - CloudCore
  - CloudEdge
- Fully Support on OPNFV Platform

## Demo Summary

- Deploy VNFs on OPNFV
- Provide services by VNFs
- Graceful Scaling on OPNFV

# VTN of ONOS on OPNFV

## Provide

- Network Service
- OVSDB
- OpenFlow

## Demo Summary

- ONOS performance evaluation
- ONOS high availability
- VTN manage & host live migration

# THANK YOU

## BUILDING A BETTER CONNECTED WORLD
