Optical Flares Installation - Windows

Step One:

- Login to your Video Copilot account https://www.videocopilot.net/account/
- Once logged-in to your account, click on the "Downloads" tab.
- Find the Optical Flares product and click on the download button.
- Download the correct Windows version for your version of After Effects (32bit or 64bit). *If you're using After Effects CS5 or later, use the 64bit version. If using AE7 through CS4, you'll need the 32bit version.*
- Once the download is complete, extract the "opticalflares_64-bit_win.1.3.3" folder to an area such as your Desktop. The extracted folder will be named **Optical** Flares.

Step Two:

Drag the entire **Optical Flares** folder into your Adobe After Effects Plug-ins folder.

Here is an example path:

C:\Program Files\Adobe\Adobe After Effects CS6\Support Files\Plug-ins

Install into the version of After Effects that you have if not CS6, as shown in example below

Step Three:

• Open Adobe After Effects, create a new composition, create a new solid, and then apply Optical Flares to the solid. See screenshot below for how to open Optical Flares.

Adobe After Effects - Untitled Project.aep *

			Optical Flares	

• Once it opens, copy or write down the HW-ID Fingerprint that is displayed (example below).

Step Four:

- Log back into your Video Copilot download account. Click on the Optical Flares download button to get to the page where you downloaded the plug-in during Step One. The license generator will be on that page.
- Enter in your HW-ID Fingerprint exactly as it's shown. Sometimes "5's" can be confused with "S's" and "1's" for "I's" which can cause an invalid HWID error. **Then click SUBMIT.** Your license file will be downloaded to your computer.

	Plug-in License The product may be installed on 1 workstation and 1 personal system such as a laptop or home computer. This applies only if the systems are used by the same person and not multiple users. Please read our License Agreement for more
	information.

Step Five:

- Open the **Optical Flares** folder that you put inside of your AE Plug-ins folder.
- Then drag the Optical Flares license file "*OpticalFlaresLicense.lic*" directly into the *Optical Flares* folder.

Make sure you drag the **OpticalFlaresLicense.lic** file **directly** into the "Optical Flares" folder and not the "AE Plug-ins" folder

Optical Flares folder path: C:\Program Files\Adobe\Adobe After Effects CS6\Support Files\Plugins\Optical Flares

Install into the version of After Effects that you have if not CS6, as shown in example below

You have successfully installed Optical Flares!
