Why did we create this catalogue?

Startup Refugees helps asylum seekers and migrants start new businesses in Finland. We offer support and give workshops in Finnish business culture, legal issues, network building, mentoring, market validation and seed funding, to mention a few.

Within the past years, we have helped co-create some wonderful business concepts that we thought you should know about. We handpicked the best of them all and gathered those businesses under one catalogue.

Ordering a service is this easy: send an email to info@startuprefugees.com, and we will connect you with the business team in question.

All proceeds from your purchase go directly to the business team through the Startup Refugees co-operative. Each business team in this catalogue has gone through training by us and we have tested and qualified their services.

Cooking Classes

Planning a team day? Always wanted to learn how to prepare hummus the authentic way? Let your team get creative in a hands-on cooking class.

At the Startup Refugees' cooking class, participants get tips and tricks from skilled chefs, learn stories behind traditional dishes and have fun while cooking. At the end of the class, sit down together to share a meal and a couple of good stories.

This is an excellent activity as so many people from different teams in the company joined and cooked together. I also really loved that at the end we all sat at the big tables and tasted what we had cooked while having a great conversation.

Starting at 100€/person.
