---

## EUROPE

---

Iberian lynx, Spain. Once critically endangered, numbers are now increasing year on year thanks to a dedicated conservation programme

© Barrie Briton

Great white pelican, Danube Delta, Romania

Jo Haley © BBC NHU

European hamsters, surrounded by development, are now thriving in Vienna's graveyards

© Julian Rad

---

## NORTH AMERICA

---

A male roadrunner perches on a stump to get a better view of his territory in the Sonora desert of Arizona

Jo Avery © BBC NHU

A black bear cub calls to his mother for help on the slippery coastal rocks of British Columbia, Canada

Chadden Hunter © BBC NHU

A polar bear on the shores of Hudson Bay, Canada, heads towards the water to begin hunting

Chadden Hunter © BBC NHU

Puma cubs play on the rocks beside a freshwater lake in Torres del Paine National Park, Chile. Meanwhile their mother hunts Guanaco

© Lucas Salter Patterson

In the lowland forests of Colombia, critically endangered, the cotton-top tamarin is one of the rarest monkeys in the world

Jack Delf © BBC NHU

Lost to science for over 50 years and thought extinct, the Pinocchio lizard has since been rediscovered in one tiny patch of cloud forest in Ecuador

Sarah Whalley © BBC NHU

---

SOUTH AMERICA

---

---

## ANTARCTICA

---

A grey headed albatross chick sits on a large nest built out of mud and grass above the cold, wet ground  
Abigail Lees © BBC NHU

The Weddell seal is the most southerly living species of mammal on the planet  
© Espen Rekdal

Below the ice of the Ross Sea, the sea floor is carpeted with starfish and sea spiders the size of dinner plates. This rarely seen ecosystem is perhaps one of the most pristine left on earth  
© Espen Rekdal

---

ASIA

---

A male Sarada lizard on India's high plateaus displays in the hopes he will be noticed by a female

© BBC NHU

A Sumatran rhino, one of the world's rarest animals, surveys her forest home in Indonesia

Emma Napper © BBC NHU

Pacific walrus on Russia's remote arctic coast

Patrick Evans

---

AUSTRALIA

---

A wombat in snow - one of the few Australian animals that can survive above the snow line

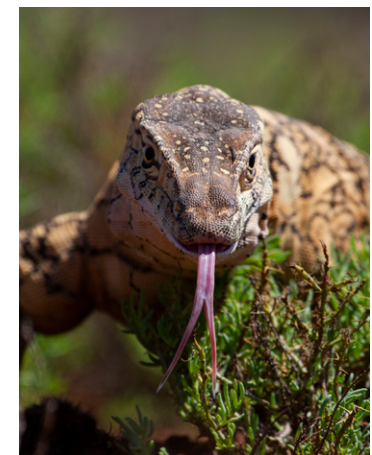

© Charles Davis

Eastern grey kangaroo and her joey look out for danger

Theo Webb © BBC NHU

At up to six feet long, the perentie is the largest lizard in Australia's desert

Emma Napper © BBC NHU

---

AFRICA

---

In the Luangwa Valley the red-billed oxpecker finds food from an unusual source - a hippopotamus  
© Barrie Britton

Northern white rhinoceros on the brink of extinction  
Alex Board © BBC NHU

Jackals and hyenas patrol the beaches of Namibia's Skeleton Coast in search of carrion and live prey  
Kiri Cashell © BBC NHU
