NOTICE TO READERS
 Although the safety line and floats should remain on the pool at all times, some have been removed for photographic purposes only. Safety lines should be permanently attached when ever the pool is in use. Fox Pool Corporation also strongly recommends the use of handrails or grab rails with all pool stairs and ladders for user safety and convenience.

Your Dreams Can Come True!

A swimming pool can add a whole new dimension to your lifestyle. In addition to the beauty that only a spacious body of water can provide, a pool becomes an integral part of your life.

It keeps your family together. It provides a healthful place to exercise. And, it gives you a unique all family center for summertime fun, entertainment and relaxation. And, it's yours to use everyday, whenever you wish. Just open your backdoor and let Fox open a new and exciting world of lasting pleasure.

Because a pool becomes a *permanent* part of your home, make sure that you invest in a quality product.

Fox began building pools in 1957 and offers you decades of expertise and innovation. Fox was the first to perfect and patent its famous **X-BRACE™** pool concept, so strong the pool will stand with *or without* water, so well engineered that your deck can be completed *before the pool is filled*. Your pool and your landscaping can all be finished *together*.

FoxGard® protected components give you a pool that's protected by Fox for as long *as you own it!* Ask your dealer for details on this outstanding Fox warranty.

The Perfect Pool For You!

Owning your own swimming pool lets you open your backdoor on a whole new life style.

Because Fox manufactures a complete line of pools, from standard shapes to contemporary freeform designs, you can easily find the perfect pool for you. Or, with the Fox X-BRACE™ concept and the unique Fox panel design, you and your dealer can even custom create the pool of your dreams!

You'll Save Money!

When you own a pool, there's no need to drive, no packing, no waiting in traffic, no hassles. You'll stay home more often because your home has now become your own, private vacation resort.

You'll Feel Better!

Swimming means healthful exercise and is the ideal way to stay in shape. It's been endorsed by the American Heart Association and the President's Council on Physical Fitness. And, exercising in water is easier on your muscles and joints, no tennis elbows or jogger's knee problems in buoyant water!

Safety First Ensures a Lifetime of Enjoyment

A pool can give you and your family a lifetime of fun and pleasure but, like many other products, it is important that you use it safely.

Each Fox pool is delivered with a complete Owner's Manual and many other booklets from the National Spa and Pool Institute (NSPI) that relate to safe pool use. It is important that you read and understand this information.

Fox pre-packaged pools are engineered to meet all NSPI safety standards. Explicit dig drawings ensure that bottom depths, in diving and in non-diving pools, meet these standards for your swimming safety.

You must be aware that, even in diving pools, it is *unsafe to dive from the decks or to dive into the shallow end*. **This applies to all residential swimming pools.**

To help you remember this vital safety rule — and for the benefit of all pool users — “NO DIVING” signs are supplied with all Fox pools and liners. The words “no diving label” are embossed into the liner bead at all appropriate locations. Be sure your builder installs these “NO DIVING” signs to prevent accidents that could cause permanent injury or loss of life. Do not allow anyone to remove or deface these important warning signs.

Fox supplies an Area Sign with each pool and liner, indicating proper pool usage. It must be displayed so that all pool users will see it.

If you choose to install a diving board, be certain that the manufacturer's size and placement instructions are followed exactly. Diving boards must also be installed in accordance with NSPI safety guidelines, available from your builder or from NSPI, 2111 Eisenhower Avenue, Alexandria, VA 22314. Failure to comply with these instructions may also lead to permanent injury or even death. Fox does not sell or recommend the use of slides or jump boards.

Be sure your pool is properly lighted for nighttime safety. Discuss this with your builder.

Pools should be surrounded with an enclosure at least 4' high with a self-locking gate. Be sure your builder meets all local fencing, barrier and electrical codes.

Steps, or a ladder, should be installed in the shallow end if the water is over 2' deep. A lad-

der or other approved device must be provided in the deep end of the pool.

Never allow children or infants to use the pool without constant adult supervision. Never swim alone or when under the influence of prescribed drugs or alcohol.

Again, be sure to read all the safety information Fox provides. Extra copies of this - - or the safety signs - - are yours without charge.

FoxGard® Structural Components

The wall and bracing system is literally the backbone of any swimming pool. Fox uses heavy gauge steel, the unquestioned preferred material whenever great strength is required.

Steel will not crack or split due to earth movement or temperature changes. And, it withstands the powerful pressures of earth and water on pool side walls. But Fox takes a forward step to ensure lasting value: each pre-galvanized steel component is totally encapsulated with a special powder coating, fusion-bonded to the steel at 400° F to seal out rust and corrosion.

FOXGARD® Components Give You These Benefits:

1. Total coverage includes corners, edges and welds.
2. Fusion-bonding to pregalvanized steel means a strong union for lasting protection.
3. State-of-the-art electrostatic application prevents drips, sags or other surface imperfections.
4. Low thermal conductivity with an insulating property that gives the FOXGARD® components a warm effect.
5. The surfaces of FOXGARD® components resist chipping, cracking or marring.
6. FOXGARD® components can pass a salt spray test of 2500 hours per ASTN B117-73.

Unlimited Warranty Protection

Because FOXGARD® offers such lasting protection, the warranty states: "Fox warrants that pool wall system components...will not deteriorate as a result of corrosion...and extends for the life of the original purchaser." See the actual warranty for details.

The powder coating process begins and ends at this point: parts travel by conveyor through many stages.

Each component is surrounded in a mist of epoxy particles, electrostatically applied, prior to the bonding process at 400° F. in a special oven.

FOXGARD® Process Proved in Action!

Many products on today's market are now protected by the powder coating process. It is especially used when steel is the best material of choice and where there is a need for lasting protection from rust and corrosion.

- Truck fenders
- Military applications
- Piping in the oil industry
- Stadium seats
- Outdoor furniture
- Water meters
- Vehicle beds
- Recreational equipment

Be sure that any steel product you buy today, especially if you plan to use it outdoors, has the added layer of protection only available with today's superior powder coatings.

Fox begins with heavy gauge galvanized steel and ends with a FOXGARD® component. Note that edges and predrilled holes are fully protected.

FOX X-BRACE® CONSTRUCTION MEANS A POOL THAT'S SELF-STANDING AT ALL TIMES

The John Hancock Skyscraper

With a Fox Pool, your builder can backfill the pool, install the liner, and even pour and complete the deck before filling the pool.

A San Francisco Skyscraper

Fox pools use the principles applied in the construction of skyscrapers, many automobile frames, bridges, water towers and any application where maximum strength is required.

In a swimming pool, thousands of gallons of water inside the pool and thousands of pounds of earth and water pressure outside the pool, make it clear that maximum strength is required.

The Fox X-Brace™ pool building concept gives you this kind of structural integrity. Patented by Fox, and perfected through the years, this engineering principle has been authenticated in an exclusive Engineering Report, prepared by an independent consulting engineering firm. Ask your builder to show you a copy...your assurance of lasting strength in any Fox pool you select.

It's Patented by Fox!

Fox X-Brace™ pools embody concepts invented and perfected by Fox. U.S. Patents No. 33,721,455; 4,429,425; 4,457,119.

A cross section cutaway showing the Fox underground structure.

With a Fox pool, your builder can install the liner and fill the pool before backfilling or installing the deck.

As shown on these pages, there's no need to equalize water and backfill pressures when constructing a Fox pool. With an X-BRACE™ or a Z-Bar every 2', vertical walls are extra strong. Braces are bolted and Z-Bars are welded with a non-corrosive silicone bronze (and even that is powder coated for even more protection!).

On straight walls, Fox uses heavy gauge steel U channel stiffeners at the top and L channel stiffeners at the bottom to assure that all walls are perfectly straight.

Benefits to You!

- Pool is self-standing at all times.
- Pool protected from frost upheaval.
- Drain your pool with no fear of wall collapse or distortion.
- Pool will retain its like-new shape for as long as you own it, protecting your investment and giving you lasting value.

Z-Bar vertical stiffeners, top stiffeners and wall braces in the Fox X-Brace™ design are illustrated. Z-Bar stiffeners are covered by U.S. Patent No. 4,797,957. Note that the entire steel structure is FOXGARD® protected.

Once your pool is completed, the crowning touch is the pool's finished appearance...the vinyl liner. It holds the water but also can give your pool a beautiful look. Every Fox X-Brace™ pool comes with an elegant patterned liner as shown here.

Made from 24 (or 20) mil virgin vinyl, it's formulated with ultraviolet inhibitors and anti-bacterial agents. It's made to withstand even severe winter weather. By maintaining the proper chemical balance (vital in any swimming pool) and by adding chemicals correctly, your liner should give you many years of service. Ask your builder for proper chemical instruction.

With a Fox liner you have the luxury look of tile, with no tiles to replace, the beauty of paint with no painting. And no peeling, chipping or cracking. No excessive interior maintenance is required as is often needed with other types of pool interiors.

Each Fox liner is form-fitted to the pool's interior. Therefore, it is not subjected to the stresses and strains that serve to "thin" or weaken the vinyl. In a properly constructed Fox pool, the liner should retain its proper thickness throughout the pool.

Fox also designs its liners to prevent stress at the seam areas. And all welds are lap welds, much stronger than butt welds.

With Fox liners, the interior surface of the pool is smooth to the touch with no abrasive surfaces to scratch elbows, knees or toes.

Yes, Fox gives you a smooth, virtually maintenance-free pool interior, tastefully styled to add real and lasting beauty to your yard.

Patented Fox Foxite II Coping

Coping adds the finishing touch by accenting the perimeter of the pool. Fox-designed connectors let your builder “lock” the coping sections together to give your pool a continuous, smooth, pure white edge.

As the name “Foxite II” implies, the coping serves two functions. The lower track holds the liner securely in place while the upper track is designed to hold the Fox Lock-In® Cover.

Foxite II coping, is protected by **U.S. Patent No. 4,457,119**.

The bead at the top of the liner, and at the edge of the Lock-In® Cover, that fits into the coping track, is covered by **U.S. Patent No. 4,429,425**.

Foxite II was first introduced by Fox, the company that continues to set new standards in engineering excellence for residential swimming pools throughout the world!

Fox Lock-In® Covers

Until Fox perfected its exclusive Lock-In® Cover concept, pools were traditionally protected during non-swimming months by covers that rested on the deck, held in place with water bags. This, of course, destroyed the “look” of the pool and, worse, often caused deck staining.

The Fox Lock-In® Cover lets you put the cover where it belongs, *under the deck, inside the pool*. It “locks in” just below the decorative Foxite II coping.

For added strength, the virgin vinyl Lock-In Cover is tailored with a 20 mil sidewall, welded to a 12 mil bottom. The heavier side wall helps withstand ice damage.

The entire cover is covered with a 3 Year Limited Warranty, not one year as with many covers.

ADDED BENEFITS

- Your pool looks beautiful even over the winter months.
- No unsightly deck clutter.
- No leaves or insects can get under the cover.
- No cover-caused deck staining, often difficult or impossible to remove.

Fox Pool Accessory Selections

Fox Walk-In® Stairs

Increase your pool enjoyment with Fox Walk-In® Stairs for an easy, comfortable and beautiful way to enter or exit your pool. All stairs should be installed at the shallow end of the pool for convenience and safety.

Select from a wide range of sizes and types: straight for pools with straight walls or ends and radius stairs for pools with curves. There's even a graceful French Curve design for a truly ornate look and Cantilever Stairs for use with cantilever coping (this is a type of coping that overhangs the pool).

All Fox Stairs come complete with handrails in stainless steel or optional white, anchor sockets and decorative escutcheon plates.

Sparkling white Fox stairs are made from tough, durable weatherable material help withstand earth movement and even severe temperature changes. A unique Dead-end Block encapsulates all screws to prevent leaks. Each stair comes with a BLOCK BUSTER® Stair support system for simple and accurate installation.

Other features include:

- Precision grooved face plate for a leak tight seal.

- An attractive grain-type finish for easy cleaning.
- A smooth radius corner face plate for Total Liner Care (TLC). With this design advance, there are no sharp corners inside your pool.
- Many other engineering and design concepts.

*TLC U.S. Patent
No. 5,557,904*

*Stairs covered by:
U.S. Pat. No. 4,873,802
U.S. Pat. No. 4,589,237
Canada Pat.No. 1,234,670*

This Fox 22' x 38' Celebrity was constructed by Fox Pools of Indianapolis, IN

8' Swim-Out

Designed for installation in the deep end of the pool, here's a comfortable way to exit the pool.

A spacious lounge area gives you a place to relax in comfort. It can even be equipped with hydrotherapy jets to help relax tired muscles.

This attractive Swim-Out comes with a stainless steel handrail, anchor sockets, escutcheon plates and a safety line kit with floats.

The Fox Buddy Seat® In-Pool Lounge Center

For user safety, the Buddy Seat should be installed in the shallow end of the pool.

For the first time ever, the Fox Buddy Seat™ lounge center give your two, contoured lounge seats so you can *sit* inside your pool, cool off and relax in real comfort! Rotating hydrotherapy jets give you a complete back massage. The center console gives you above-water place for playing cards, plastic beverage containers or your favorite book.

The adjustable umbrella provides a welcome oasis of shade, ideal for sensitive skin or those

allergic to the sun. Here's a complete in-pool relaxation station the whole family will enjoy for as long as you own your pool.

Photo courtesy of Sun Design Pools, Inc., NY.

The Fox Waterfall™ Spa

Now Fox gives you three products in one! It's a graceful, in-pool waterfall, soothing to watch and listen to. It's a six person spa, complete with hydrotherapy jets and hot water.

And, it's the world's first wading pool for toddlers. Just add the removable insert and transform your Fox WaterFall spa in a child's playland. It's the perfect addition to any pool.

Watch children at all times!

Even teenagers enjoy it!

Pool Ladders

Gleaming stainless steel ladders, with non-corrosive white treads, add beauty and safety to your pool. Three tread design means easy entry or exiting.

In-Wall ladders install flush with the pool wall, will not entrap most automatic cleaners and can be used with automatic covers. Dead-end block design assures a leak-tight installation.

Ladders include handrails, escutcheon plates and anchor sockets. White rails optional.

Add the Elegance of Real Ceramic Tile to Your Fox Pool

This Fox 22' x 40' Kidney was constructed by Fox Pools of Nashville, Inc., TN

***U.S. Patent Nos. 3,628,198 and 4,980,934
Canada Patent No. 928,901***

Now you can add the beauty and permanence of real ceramic tile to your Fox pool with the Fox Tile Coping System. It can be applied to rectangles or freeforms. This unique and patented system has been tested for over 10 years and, with the recommended use of 6" **FROSTFREE** tile, has withstood even harsh Northeast winters. **FROSTFREE** tile must be used in all areas subject to freezing.

The Tile Coping System snaps or wedges into the coping track, directly above the liner bead, leaving the upper track open for the Fox **Lock-In**® Cover. No grouting or gluing is required. The tiles simply "drop" into the holder and are butted together to form a continuous border of real ceramic tile that frames your entire pool. Tiles are easily cut to fit around stairs

and skimmers. The system can be retrofitted to most existing pools or added to a new Fox pool during installation. A wide range of tile colors and patterns are available from your local tile suppliers.

The Tile Coping System gives your pool the lasting touch of elegance. You enjoy all the benefits of a vinyl liner pool plus the permanence, beauty and easy maintenance of a real ceramic tile border. It's the best of both worlds!

This Fox Nautilus pool was constructed by Skyview Pools, Inc., PA

**Fox Has the Perfect Pool For You
 with Over 80 Sizes and Shapes including
 Exercise Pools, Lagoon Designs and Lots More**

*Clear Water Pools, Inc., St. Johnsbury Ctr., VT
 built this 16' x 32' Rectangle enclosed pool.*

*3rd Place 1999
 Fox Photo Contest*

Since 1957, Fox has pioneered and perfected the vinyl liner pool. The tile patterned liner holds the water, ending the need for concrete walls and, in turn, eliminating the need for periodic painting, sand blasting, repairing cracks or other problems that can occur with other types of pools.

Fox X-Brace™ pools are engineered with an underground network of steel that not only supports the walls but also the decking resulting in a pool that will stand *with or without water*.

A typical 22' x 36' Kidney pool holds about 80 tons of water - a lot of weight! Fox pools are designed to hold up under these tremendous pressures.

Prepunched panels and braces line up to allow your builder to create a pool that is both strong and geometrically perfect.

All the steel used in the Fox pool structure is galvanized and then *totally encapsulated* with a fusion-bonded powder coating (not just paint) to protect these FOXGARD® components from rust and corrosion.

A pool is a permanent part of your home. Make sure the pool you select will withstand severe temperature changes, can be drained with no danger of wall collapse or distortion and retains its original shape for years. Don't settle for anything less than a Fox Pool!

In addition, Fox has brought to the industry such innovations as the Buddy Seat® in-pool lounge center, the WaterFall™ Spa (a waterfall, spa and wading pool all in one!), the WallPak® Inground filtration system, Fox Smart™ automatic pool and spa control system, new Fiber Optic lighting options and much, more.

Baxter Construction Company of Virginia Beach, Virginia Beach, VA built this 20' x 36' Ionic with stairs, ladder and Fox all-white rails.

AN INSIDE LOOK AT HOW YOUR FOX POOL IS CONSTRUCTED

The Pool That's Self-Supporting With Or Without Water

More than a promise, this claim is fully supported by a complete Engineering Report produced by an independent professional engineering firm.

After selecting the ideal location, the pool is laid out.

The pool is excavated to the dimensions provided on the Fox drawing.

FOXGARD® components are placed in position around the pool.

This brace, installed every 4', coupled with the vertical Z-bar® stiffeners – welded every 2' – gives your X-Brace™ pool outstanding strength. This Fox-created design concept has been imitated but not duplicated. All Fox claims are backed – in writing – in a detailed Engineering report.

* U.S. Patent No. 4,797,957

Fox Panels and Braces are assembled and the pool walls are plumbed and leveled. Several tons of concrete are poured around the Braces and Panels, to serve as a permanent footer. Note the bulwark of braces.

Here the walls have been backfilled and the decking partially poured, visual proof that the pool can be backfilled and the deck poured with no need to equalize backfill with internal water pressure.

The Fox recommended construction method applies to rectangular and free form pools. Here a sand, vermiculite or sand/cement bottom is shaped and smoothed to the dimensions provided on the Fox "dig" drawing.

The liner is installed and the pool is ready to be filled. In this case, the pool could be completely filled before backfilling or pouring the deck, further evidence of the Fox statement that the pool is self-supporting.

* A variety of panel lengths meaning customizing capabilities, "Z" stiffeners span the total height of each panel for rigidity, strength and support.

* All panels are precision drilled for accurate alignment, accurate brace assembly and location of rebar for footer and deck supports.

* Preradiused corners eliminate the need for fillets, wedges or other fillers – curved transition eliminates tight angle corners, improving water circulation.

* Specially plated bolts and fasteners assure a corrosion-free underground structure for lasting performance and beauty.

* Entire pool structure, braces, panels and straight wall stiffeners are FOXGARD® brand – these are entirely encapsulated in a protective material for lasting corrosion protection.

Only Fox X-BRACE™ Pools Give You All These Outstanding Features and Benefits

There are many reasons why homeowners around the world have made Fox pools their first choice. Here are some of them:

- Wall panels in Fox X-Brace™ pools feature braces every 4' and Z-bar stiffeners every 2' for total vertical rigidity. Horizontal top and bottom stiffeners keep straight lines

straight. Thus, Fox pools will stand *with or without water*.

- The entire underground galvanized steel structure consists of FOXGARD® components, completely encapsulated in a fusion-bonded powder coating to seal out rust and corrosion.

Not a paint, it's an epoxy coating, specially formulated for the underground environment.

- Fox gives you its exclusive, patented Foxite II coping, one track for the liner, a second for the inside-the-pool Lock-In® cover. Liners are manufactured from virgin vinyl with ultraviolet inhibitors and anti-bacterial agents. Fox tile patterned liners add a unique, custom look to every pool. And, our Tile/Coping system lets you rim your entire pool with real ceramic tile.

- Enhance your swimming enjoyment with the Fox BUDDY SEAT® In-Pool Lounge Center. Two contoured seats, with hydrotherapy jets, let you sit in your pool in real comfort, with an umbrella to provide a welcome circle of shade on hot days.

- The Fox WATERFALL™ combines a graceful water fall, a six person hot water spa and, with an optional insert, it becomes a wading pool for children.. It's another Fox first!
 - All Fox Pools are engineered to meet or exceed all current safety standards when built to Fox specifications.
 - All filters, pumps and motors are properly sized and non-corrosive for long effective life.
 - Select from over 80 stan-

dard sizes and shapes, from rectangles to freeforms, even new Lagoon designs. Plus exercise and Sport™ Pools. And, you can even custom design your own shape should you so desire.

- The Fox Walk-In® stair

brand uses a weatherable material that resists crazing or discoloration. Many sizes available, even a French Curve and stairs for use with cantilever decks.

- Fox Smart™ Pool and/or Spa Automatic Control system lets you control your filter, heater, pool and/or landscape lighting, all from inside your home. the software is programmable to your specific desires.

- Fiber-Optic lighting both inside and around your pool.
- The Fox WALL-PAK® In-ground Pool Filtration System eliminates around the pool plumbing lines, conserves water and chemicals.

This Fox 22'x 38' Celebrity pool with Buddy Seat® and Socializer® Spa was constructed by Fox Pools of Spartanburg, SC.

*Honorable Mention
1998 Fox Photo
Contest*

Fox Grecian Pools

This Fox 19' x 35' Grecian pool, with Fox Waterfall Spa™, was constructed by Fox Pools by Aqua Rest, KY.

In the Fox Grecian pool, shown above, note the classic design, enhanced with Fox's special curved coping and corner panels. Because the coping is preformed and not mitered, it flows smoothly around the entire pool. Note, also, how the corner is perfectly suited to a Fox 6' Walk-In® Stair. Fox Grecian come in a variety of sizes and are available as diving or non-diving pools.

The Exclusive Fox WALL-PAK® InGround Filtration System

The Fox Wall-Pak® In-Ground Filtration System eliminates long, under-the-deck or around-the-pool plumbing lines. All you see is the access lid to the two cartridges which is the white rectangle to the left of the ladder in the pool pictured above. Two simple water lines run directly to the pump and motor remotely located.

A wide mouth skimmer assures effective skimming action. Directional flow returns, below the skimmer mean better water circulation inside the pool for truly effective filtration. And, there's even a fitting for the Fox Automatic Pool Cleaner.

To clean the filter, simply remove the cartridges and hose off (or, if necessary, soak in a cartridge cleaner). Because there's no back washing, you save water and chemicals.

A typical filter cartridge. Two are supplied with every Fox Wall-Pak®

MORE FOX ACCESSORIES FOR MORE POOL PLEASURE

FOX SMART™ The Ultimate, Fully Automatic Pool/Spa Control System!

With the FOX SMART™ system all it takes to turn on your pool or spa, adjust the temperature, turn on pool or landscape lighting, control waterfalls or other special effects is the touch of a button!

FOX SMART is easily programmed to automatically turn your filter on and off as well as turn heaters on or off in either pool, spa or both. It can also monitor water temperature to prevent freezing or over-heated water. Telelink® even let you call your FOX SMART system from a telephone to activate the various commands. Ask your dealer for more details on this exciting advancement!

Fiber Optic Lighting

Make your pool a nighttime showplace with Fiber Optic lighting. Your pool will glow in full color or *ever changing* colors. Both in-the-pool and full perimeter lighting is available. Fox even offers a special *new coping* to hold the illuminated perimeter fiber. Your system can also be expanded to include landscape lighting, too.

Such Fox options as the Buddy Seat®, WaterFall Spa®, Socializer™ Spa, heaters and Fiber Optic lighting can all be activated automatically from this Fox Smart™ control center.

Fox Automatic Pool Cleaner

With the Fox Automatic Pool Cleaner, you spend more time enjoying your pool, relaxing, sunning or swimming. The Automatic Pool Cleaner keeps dirt and debris circulating and carried to your filter through the skimmer and main drain. It's operated by your filter's pump and motor with additional electricity required.

Fox Filters

Sand filters are frequently used in residential swimming pools. Fox gives you one of the very best available today. The Fox sand filter features:

- Superior Spherical Design.
- Roto-Molded base for more strength.
- High Performance.
- Very Cost Efficient.
- Ultra dependability.

Other Filters

Fox also offers a quality line of **DE filters** (diatomaceous earth) filters as well as Cartridge filters in a wide range of sizes. See page 25 for information on the **Fox Wall-Pak® cartridge** filter system.

Underwater Lights

For your safety, in-pool lighting is a "must".

Fox offers a wide range of in-pool lights both niche type and nicheless. In-pool lighting adds a real touch of beauty to your pool and helps make after-dark swimming safer.

Spectrum Amerilite with revolving colors to create an exciting in-pool spectacle of color.

Diving Boards

Top quality, long lasting all white boards, mounted on the Fox Astrostand to end deck clutter and bolts. *Be sure manufacturers instructions on placement are followed exactly in full accordance with NSPI safety guidelines. Fox will send you a copy. Failure to comply could lead to serious injury or loss of life. Fox doesn't sell or recommend slides/ jump boards.*

Fox Socializer® Spa Helps Complete Your Home Recreation Center

This Fox 14' x 30' Sport Pool™ was constructed by Fox Pools of Central Oklahoma, Oklahoma City, OK.

*Honorable Mention 1997
Fox Photo Contest*

The unique Fox Socializer™ Spa has been engineered to be fully compatible with your Fox pool. The Socializer Spa can be installed beside your pool or remotely located.

You enjoy the pure comfort and relaxation that only comes with swirling water, air bubbles and warming heat. After a day at work, a round of golf or house or yard work, you'll find the Socializer to be your best friend!

Socializer® Spa Features:

- Popular Octagon shape.
- Comfortable seating for up to six people
- Durable, decorative, easy-to-care-for colorful acrylic finish.
- A wide range of jets allows you to control the hydrotherapy action to your liking, from a full body massage to gentle action.
- Air control means positive, effective air flow to all jets.
- Bottom drain for easy maintenance.
- In-Wall skimmer for truly effective cleaning performance.

The Fox "WaterFall" Circulation System For More Effective Filtration in Fox Rectangular shaped pools!

The Fox "WaterFall" circulation system provides highly effective and efficient corner-to-corner circulation because water "falls" from one end of the pool

to the other. All filtered water is returned at one end while two skimmers at the other end receive the water. The smooth, curved transition, from the walls to the corners, assures maximum performance. Pools are easily

treated with chemicals and, in heated pools, no hot spots can be created. This system is standard with all Fox rectangular type pools over 800 sq. ft. and optional with all others.

CUSTOM DESIGNED POOLS

The Fox pool building method, using the X-Brace™ concept and Fox-made liners, allows your builder to design a pool that is limited only by your imagination and budget. All custom pools must conform to current NSPI safety standards.

If you have a specific idea or would like to let your imagination flow, talk to your dealer about creating a custom pool, just for you!

The pools here may give you some ideas.

This Fox 24' x 54' Custom Freeform was constructed by Sun Design Pools, Inc., NY.

Non-Diving Pools Designed For Fun, Aquatic Exercise, In-Pool Games and Lap Swimming.

Because of the growing interest in physical fitness, Fox has designed several specialty pools for such activities.

Diving pools, with a deep end to permit safe diving, are not easily used for in-pool games like badminton or volleyball, whereas pools like the Fox *SportPool*®, Grecians and others, give you a wedge-type bottom with equal sides for comfortable in-pool games.

Non-diving pools, such as the *Patio Pool*® line, give you a variety of shapes that will fit into yards with limited space.

And, the Fox pool line also includes a number of pool designed especially for lap swimming and exercise.

This Fox 19' x 32' Roman pool was constructed by Fox pools of Central Oklahoma, Oklahoma City, OK. Note Buddy Seat® and Fun Kit net.

International Pools

Fox Serves the World with Pools and Products Second to None!

No matter where you travel, you'll find a satisfied Fox pool owner. From Canada to Europe, from China to Trinidad, people everywhere have looked to Fox for the very best in home swimming pools.

Fox has earned the President's "E" Award for exporting. To qualify, the manufacturer must show a substantial increase in exports over a 3-year period. The company must also demonstrate breakthroughs in competitive markets, introduce new products into its U.S. export trade and open new markets. Fox did all this and is *the first in the swimming pool industry to receive this coveted award.*

Since 1971, Fox pool dealers have won many international awards for pool excellence from

the National Spa and Pool Institute, the Canadian CANSPA show and the Chelsea Flower Show in England, a record virtually unmatched by any other company in the pool industry!
