## ios Email Setup

Go to settings on iphone/ipad (next/save is in the upper right corner of screen) →

- Go to Mail, Contacts, Calendar
- Pick Other
- Type in the Name, Email address, Password, and the name of the email provider
- NEXT
- Select POP or IMAP
- Fill in the appropriate incoming mail server information with settings from above, email address and password (host name is the incoming server)
- NEXT
- Fill in the appropriate outgoing mail server information with settings from above email address and password (host name is the outgoing server on this one)
- NEXT
- **REMEMBER TO USE FULL EMAIL ADDRESS FOR ANY SPOT THAT SAYS USERNAME!!!!!!**
- Enable mail by tapping on the slider button
- SAVE

### **Edit/check Incoming/outgoing ports on ios 7**

- Go to settings
- Tap mail, contacts, and calendars
- Tap the email account
- here you can edit the incoming and outgoing server settings
  - Incoming mail port and settings
- The host name here is the incoming server
- **MAKE SURE THE USER NAME IS THE FULL EMAIL ADDRESS!!!!!!**
- Tap advanced
- Check to see if SSL is needed from settings above, if needed tap the slider
- Make sure the port is right also
  - Outgoing mail port and settings
- Tap the line that says SMTP and gives a server name
- Tap the primary server name
- The host name here is the outgoing server
- **MAKE SURE THE USER NAME IS THE FULL EMAIL ADDRESS!!!!!!**
- Double check the password
- Make sure “use SSL” is on, if it is not on tap the slider
- Authentication should be password
- Make sure the port is right
- Tap done

In outlook the email address should be the full email. And the user name should be the full email also

i.e. user info

**your name:** John Doe

**email address:** Johndoe@example.com

server info

**account type:** \_\_\_\_\_

**incoming mail server:** \_\_\_\_\_

**outgoing mail server:** \_\_\_\_\_

logon info

**user name:** Johndoe@example.com

← **NEEDS TO BE FULL EMAIL ADDRESS!!!!!!**

**Password:** \*\*\*\*\*

Godaddy email settings,

Every godaddy email is different. Go to google and search "godaddy port outlook 2013 settings" and click on the one that says Outlook 2013: setting up email. The url starts with "support.godaddy.com". on the page that pops up click on the "email setup center" link. It is in the before you start section. Third paragraph down. Have the client type in their email and password and it will pull up the server/port settings.
