

REXTON

SSANGYONG

PRACTICAL ELEGANCE

Characterised by a blend of elegance and traditional 4x4 values the latest Rexton brings things bang up to date. The exterior styling has been enhanced by a new grille, projector headlamps and LED positioning lights which create a totally contemporary look.

The introduction of a new 2.2 litre diesel engine has taken Rexton's performance to new levels. With 400Nm of torque from just 1400 rpm, the new engine gives great driving flexibility and now features the Mercedes-Benz 7 speed E-Tronic automatic transmission which makes Rexton the ultimate towing and off-road vehicle.

REXTON ELX

The new range-topping five-seat Rexton ELX adds a number of enhancements to the EX model, including an electric sunroof, front parking sensors, an automatic dipping rear view mirror, heated rear seats and a touch-sensitive satellite navigation unit which features DAB radio.

REXTON ELX INTERIOR STYLE

The interior features luxurious beige and grey leather seat trim – this colour combination features throughout the interior creating a practical and upscale ambience that befits Rexton's flagship model.

SPACE AND LUXURY

There is a feeling of desirable luxury on entering the cabin – leather seats are complemented by metal grain trim and a chunky new steering wheel fitted with audio, telephone and cruise controls and there's updated instrumentation to further enhance the interior.

Automatic air conditioning makes controlling your environment straightforward and the in car entertainment unit provides CD, RDS radio, iPod connectivity and connects to your phone via Bluetooth.

The front seats are electrically adjustable and heated, to add comfort for those chilly days. The driver's seat features a memory function to make adjusting your seat position child's play.

Seven seats are standard (excluding ELX), with the rear row conveniently folding when extra luggage space is required – to maximise internal space, a five seat option is available.

HARD WORKING

NEW E-XD1220 DIESEL ENGINE

Rexton's new 2.2 litre Euro 6 engine offers maximum power of 178PS@4,000rpm and maximum torque of 400Nm@1,400-2,800rpm and is designed to provide low end torque for effortless cruising whatever the conditions and whatever the load.

4 X 4

The selectable 4x4 system provides reassurance whatever the job and whatever the weather. When the going gets really tough you can select low range which splits the torque equally between front and rear axles to provide all round traction and ensure optimum grip across the most challenging terrain.

TOWING

Rexton will make light work of hauling a large caravan, horsebox, boat or work trailer. The strong ladder chassis provides a substantial towing platform; add to that 4x4 capability, and Rexton can handle all your towing requirements.

TRANSMISSION

There's a choice of 6 speed manual transmission and Mercedes-Benz 7 speed E-Tronic automatic transmission, ensuring world class durability and a smooth gear change.

* At maximum towing weight the trailer must have remote braking capability. ** A guide to fuel economy and CO2 emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO2 emissions. CO2 is the main greenhouse gas responsible for global warming.
