

# **PADI Discover Scuba Diving Experience**

*Have you ever wondered what it's like to breathe underwater?*

If you want to find out but aren't quite ready to take the plunge into a certification course, Discover Scuba Diving will let you try scuba to see if you like it.

While not an actual scuba certification, during the Discover Scuba Diving experience you'll learn how to use scuba equipment in shallow water and get a quick and easy introduction to what it takes to explore the underwater world.

## **The Fun Part**

There is nothing like breathing underwater for the very first time. It takes a little getting used to –after all, human beings weren't designed to do that – but after a few minutes of awestruck wonder, most participants realize how easy scuba diving really is. The biggest challenge instructors have with the Discover Scuba Diving program is not coaxing participants into the water, but coaxing them out when the program is over. The fun part? It's all fun, but getting a different perspective of the colorful reef and fish is a big part of it :-)

**Plus, you can get credit! If your Discover Scuba Diving program includes an actual scuba dive in open water, your experience may count toward PADI SCUBA DIVER or OPEN WATER DIVER certification, putting you a step ahead of the game when you decide to go for it.**

## **What You Learn**

You learn the basics you need to dive under the direct supervision of a PADI Professional. You will:  
Learn what wearing scuba equipment feels like and how easy it is to move around underwater while wearing it

Find out what it's like to breathe underwater and learn whether you can be comfortable there

Learn some basic skills and safety rules that will carry over to your full scuba certification course when you take the next step

## **The Learning Materials You Need**

Just your willingness and undivided attention

## **Prerequisites**

To take Discover Scuba Diving, you must be:

At least 10 years old

## **Your Next Adventure**

Once you complete a Discover Scuba Diving program, you'll want to check out:

**SCUBA DIVER** and **OPEN WATER DIVER** certification courses

## **Duration**

The **DSD** takes approx half a day to a day.

It consists of 1 Theory session, 1 confined water session with 1 dive attached to it.

The maximum depth allowed is 12m

# **PADI Scuba Diver Course**

*Short on time and long on the urge to become a certified diver?*

The PADI Scuba Diver certification might just be for you. This course requires less time than the PADI Open Water Diver course, covering only the first three of five sections of knowledge development, the first three of five pool sessions, and the first two of four open water training dives, resulting in a limited certification. Particularly if you expect to go scuba diving primarily in the company of a dive guide or if you have limited time to devote to scuba certification, consider becoming a PADI Scuba Diver.

This certification allows for ample dive experience and is a good warm-up for the Open Water Diver course, if that's your ultimate goal.

## **PADI Scuba Divers are qualified to:**

Dive under the direct supervision of a PADI Divemaster, Assistant Instructor or Instructor to a maximum depth of 12 metres / 40 feet

Obtain air fills, rent or purchase scuba equipment and participate in other diving activities as long as they have the required supervision

Continue their dive training and complete PADI Open Water Diver certification.

## **The Fun Part**

The Scuba Diver certification opens the door on the underwater world for anyone who's thought that a course would take too long or be too difficult.

Upgrade to Open Water Diver whenever you want! With less time than the Scuba Diver course takes, you can make the jump to Open Water certification and start scuba diving independently whenever time allows or you're up for more

## **What You Learn**

All the basics of scuba diving through knowledge development, a set of scuba skills in the pool that you'll use again during open water dives, and an appreciation for the underwater world that will keep you coming back for more bottom time every chance you get!

*During the course you'll cover material and practice skills related to topics such as:*

Buoyancy skills including comfortable ascents and descents, and breathing underwater; Staying warm underwater, streamlining your swimming skills and buddy diving techniques; diving environments and aquatic life you're likely to encounter; preventing common problems underwater; an introduction to boat diving procedures

## **The Learning Materials You Need**

PADI's Scuba Diver materials provide a comprehensive overview of basic scuba diving skills, terminology and safety procedures. For each concept you'll read a description and watch a video demonstration. Then you'll jump in the Red Sea for a Confined Water session to practice these skills with your instructor. Once you're a certified diver, use the course materials as a reference guide for future diving adventures.

**The PADI Open Water Diver manual and the Recreational Dive Planner**

## **The Prerequisites for This Course**

To take this course, you must be:

15 years old (or 10 years old for Junior Scuba Diver certification)

## **Duration**

The **Scuba Diver Course** takes 2 to 3 days (depending on the amount of students and your performance)

It consists of 3 Theory sessions, 3 confined water sessions and 2 Open Water dives.

The maximum depth allowed is 12m (on dive 1 and 2)

# **PADI OPEN WATER DIVER COURSE**

*Get Certified! Take a Scuba Lesson with the PADI Open Water Diver Course*

Get your PADI scuba certification. If you've always wanted to learn how to scuba dive, discover new adventures or simply see the wondrous world beneath the waves, this is where it starts. The PADI Open Water Diver course is the world's most popular scuba course, and has introduced millions of people to the adventurous diving lifestyle.

## **The Fun Part**

The fun part about this course is . . . well, just about all of it because learning to dive is incredible. You breathe underwater for the first time (something you'll never forget) and learn what you need to know to become a certified diver. During the course, you'll make five Confined Water Sessions (in the Red Sea) and four dives at local dive sites under the supervision of your PADI Instructor.

## **What You Learn**

- How much fun scuba diving is
- Scuba diving equipment considerations for your local diving environment
- How to plan, and execute actual dives
- How to prevent and manage problems

The PADI Open Water Diver course consists of three main phases:

- Knowledge Development to understand basic principles of scuba diving
- Confined Water Dives to learn basic scuba skills
- Open Water Dives to review your skills and explore!

If you've tried diving through a Discover Scuba Diving the skills you learned may be credited towards a portion of the full PADI Open Water Diver course certification.

## **The Learning Materials You Need**

PADI's Open Water Diver materials cover what you need to know about basic scuba diving skills, terminology and safety procedures. You'll read a description and watch a video demonstration. Then you'll jump in Red Sea for a Confined Water Session to practice these skills with your instructor. Later, as a certified diver, use the course materials as a reference guide for future diving adventures and to review what you learned.

**The PADI Open Water Diver manual and the Recreational Dive Planner**

## **Prerequisites**

To enroll in the PADI Open Diver course or Junior Open Water Diver course, you must *Be 10 years or older*

## **Duration**

The **Open Water Course** takes 4 to 5 days (depending on the amount of students and your performance)  
It consists of 5 Theory sessions, 5 confined water sessions and 4 Open Water dives.  
The maximum depth allowed is 18m (only on dive 3 and 4)

# **PADI ADVANCED OPEN WATER COURSE / ADVENTURE DIVER**

*Exploration, Excitement, Experiences.*

They're what the PADI Advanced Open Water course is all about. And no, you don't have to be "advanced" to take it – it's designed so you can go straight into it after the PADI Open Water Diver course. This course helps you to increase your confidence and build your scuba skills so you can become more comfortable in the water. This is a great way to get more dives under your belt while continuing to learn under the supervision of your PADI instructor.

This course builds on what you've learned and develops new capabilities by introducing you to new activities and new ways to have fun scuba diving. You'll hone your skills by completing five adventure dives that introduce you to: **Underwater Navigation; Deep Diving (up to 30 metres)**

A sampler of three more Adventure Dives of your choice.

**We make sure you'll get to see Dahab's Top Dive Sites!**

## **The Fun Part: Your Choice and Getting Dahab's best local Dive Sites!**

One reason you'll love the Advanced Open Water Diver course is that you and your instructor choose from different types of Adventure Dives to complete your course. You can try your hand at night diving, peak performance buoyancy, drift diving, multilevel diving, naturalist dive, fish identification as well as boat diving and underwater photography (both supplement).

**Get credit! Each Adventure Dive in the PADI Advanced Open Water Diver course may credit toward the first dive of the corresponding PADI Specialty Diver course.**

You can even integrate the PADI Nitrox course into your PADI Advanced Course (supplement 99 Euro).

## **What You Learn**

The knowledge and skills you get in the Advanced Open Water Diver Course vary with your interest and the adventures you have, but include: Practical aspects of deep diving; physiological effects of deeper scuba diving; more ways to use your underwater compass; how to navigate using kick-cycles; visual landmarks and time; how to better use your dive computer and Recreational Dive Planner; and much, much more, depending on the Adventure Dives you choose.

## **The Learning Materials You Need**

PADI's Adventures in Diving Manual on more than 16 types of specialty diving. You'll use them as a guidebook to improve your diving skills and prepare for new experiences and adventures.

***The PADI Adventures in Diving manual (including the data-carrier)***

## **Prerequisites**

To take this course, you must be:

A PADI Open Water Diver (or qualifying certification from another training organization)  
15 years old (12 for Junior Advanced Open Water Diver)

## **Duration**

The ***Advanced Open Water Diver Course*** takes 2 days and consists of 5 dives

The ***Adventure Diver Course*** takes 1 day and consists of 3 dives

# **PADI ENRICHED AIR "NITROX" SPECIALTY**

*Build your bottom time, and build your confidence, as you learn that diving with enriched air isn't rocket science or difficult!*

Enriched air replaces some of the nitrogen you breath underwater with oxygen, so that during a dive you absorb less nitrogen then you would when breathing normal air. This means that you have longer no-decompression limits for each depth than you do using air and are ultimately a safer diver - especially on repetitive dives.

## **The Fun Part**

You can typically stay down longer and get back the water sooner. No wonder many divers choose this as their very first specialty.

## **What You Learn**

Techniques for getting more dive time by using enriched air nitrox  
Enriched air scuba diving equipment considerations  
Enriched air considerations, including managing oxygen exposure, how to tell what's in your scuba tank and how to set your dive computer

## **Prerequisites**

To enroll in the PADI Enriched Air Diver course, you must  
Be 15 years or older  
Have a PADI Open Water Diver certification (or have a qualifying certification from another organization)

**Ask your PADI Instructor about how you can start your PADI Enriched Air Diver course during your PADI Open Water Diver course.**

## **The Learning Materials You Need**

**The Enriched Air Diver Manual** covers the procedures for diving with Enriched Air (up to 40%) using Nitrox dive computers.

## **Your Next Adventure**

Diving with enriched air Nitrox benefits all types of diving, but it goes especially well with these specialties: PADI Underwater Photographer/ Videographer and it is a prerequisite for all Technical Diving courses.

## **Duration**

The **Enriched Air „NITROX“ Specialty Course** takes two afternoons (no dive included) and can be done on top of your normal dive package. So you won't miss a single fun dive, but gain more safety and more time in the water. The course includes 2 Nitrox tanks to be use with your dive package

# **PADI DEEP DIVER COURSE**

*After your first few scuba dives, you soon want to explore a bit deeper. There's something exciting and mysterious about the depth that attracts dives.*

## **The Fun Part**

The fun part about this course is the opportunity to explore the deep (till max 40meters). It's exhilarating.

## **What You Learn**

Techniques for diving in the deeper range of 18-40 metres

Deep scuba diving equipment considerations

Experience in planning, organizing and making four deep dives under the supervision of your PADI Instructor

## **The Learning Materials You Need**

PADI's Deep Diver crewpak (DVD and manual) provides a thorough overview of the principles and techniques needed to complete the PADI Deep Diver specialty. In addition to previewing skills you'll practice with your instructor, the materials serve as a reference guide for deep diving in a variety of conditions and environments. You'll also find the answers to common questions such as :

Is it true that ascending no faster than your bubbles is a good ascent rate?

Can a slow ascent replace a safety stop?

**PADI Deep Dive Specialty manual**

## **Prerequisites**

To enroll in the PADI Deep Diver course, you must

Be 15 years or older

Have a PADI Adventure Diver certification (or have a qualifying certification from another organization)

Your Deep Adventure Dive in the PADI Advanced Open Water Diver / Adventure Diver course credits (at your instructor's discretion) as the first dive in the PADI Deep Diver course

## **Your Next Adventure**

Many shipwrecks are often found in deeper water. That's why the PADI Deep Diver course is a natural companion to the PADI Wreck Diver course. Sometimes you can take these two specialties concurrently. Other training to consider is the PADI Enriched Air Diver course on your way to PADI Master Scuba Diver

## **Duration**

The **Deep Diver Specialty Course** consists of maximum 4 dives / 3 dives if your instructor credits you the Adventure deep dive.

# **PADI PEAK PERFORMANCE BUOYANCY COURSE**

## *What is neutral buoyancy?*

Scuba divers like to be neutrally buoyant so they neither sink nor float. It can be a tricky thing. Divers who've mastered the highest performance levels in buoyancy stand apart. You've seen them underwater. They glide effortlessly, use less air and ascend, descend or hover, almost as if by thought. They interact gently with aquatic life and affect their surroundings minimally. The PADI Peak Performance Buoyancy course refines the basic skills you learned as a PADI Open Water Diver and elevates them to the next level.

## **The Fun Part**

The fun part of this course is giving your dive skills a polish you may not have thought possible.

## **What You Learn**

- How to trim your scuba gear so you're perfectly balanced in the water
- Nuances in determining weight so you're not too light nor too heavy by even a slight degree
- How to streamline to save air and move smoothly through the water
- How to hover effortlessly in both a vertical position and a horizontal position

## **The Learning Materials You Need**

**The PADI PPB DVD and the PADI PPB Specialty manual**

## **Prerequisites**

- To enroll in the PADI Peak Performance Diver course, you must
- Have a PADI Open Water Diver certification (or have a qualifying certification from another organization)
- Your Peak Performance Buoyancy Adventure Dive in the PADI Advanced Open Water / Adventure Diver course credits (at your instructor's discretion) as the first dive in the PADI Peak Performance Buoyancy course.

## **Your Next Adventure**

Part of mastering buoyancy control is learning how to use your BCD and weight system effectively, plus maintain streamlining. This makes the PADI Equipment Specialist course a natural companion, because you learn more about these pieces of gear and how to make them suit your specific diving styles.

## **Duration**

The **Peak Performance Buoyancy Course** consists of maximum 2 dives / 1 dive if your instructor credits you the Adventure PPB dive

# **PADI Sidemount Specialty Course**

## **The Fun Part**

Sidemount diving is not a new concept, but its application has spread from cave diving to open water recreational and technical diving. Sidemount presents divers with a different approach to equipment configuration, and a new set of skills to master, providing an introduction to the use, benefits and proper configuration of sidemount equipment for recreational diving, with an emphasis on safety.

## **What You Learn**

The goal of the course is to provide a systematic, methodical, approach to recreational sidemount diving, showing how to apply the skills developed using conventional backmounted equipment. It is important to note that this course does not train the diver to become a cave / cavern diver, and that, as with any other PADI course, to train the diver to dive in conditions similar to the conditions the training has been conducted.

Advantages of sidemount diving include:

- kitting up in the water so therefore less weight on your back walking in and out of the water
- any equipment issues such as free flow regulator, then the valve is within easy reach to shut the cylinder down
- plenty of redundancy air
- can be used as a stepping stone into technical diving, already teaching the diver about gas management

## **Duration**

The course consists of 4 dives in total: 1 confined + 3 open water, so making it a 2 day course, no exams, just knowledge reviews to complete.

# **PADI NATURALIST DIVER COURSES**

*Look closer to see more on your next dive.*

Look for symbioses, predator/prey and other relationships between aquatic plant and animal life. Learn not just what fish and animals are, but how they interact with each other and the environment.

## **The Fun Part**

Learn about why some creatures behave the way they do and what their role is in the aquatic ecosystem.

## **What You Learn**

You learn about

The major aquatic life groupings, interactions and factual information that dispels negative myths.

The role of aquatic plants, food chains and predator prey relationships

Responsible interactions with aquatic life

The underwater naturalist's view of organisms and their roles in the environment

You put this information into practice during your two open water dives.

## **Prerequisites**

Must be a PADI Open Water Diver or Junior Open Water Diver (or qualifying certification from another organization)

## **Duration**

The **Naturalist Diver Specialty Course** consists of maximum 2 dives / 1 dive if your instructor credits you the Adventure Naturalist dive

# **PADI NIGHT DIVER COURSE**

As the sun sets, you don your dive gear, slip on your scuba mask and bite down on your dive regulator. A deep breath and you step off the boat – into the underwater night. Although you've seen this reef many times before, this time you drop into a whole new world and watch it come to life under the glow of your dive light.

## **The Fun Part**

Introduce yourself to the whole new cast of critters that comes out after the sun goes down. See your favorite dive sites from a whole new perspective at night.

## **What You Learn**

Learn about:

Night dive planning, organization, procedures, techniques and potential problems

How to control your buoyancy at night

Entries, exits and underwater navigation at night

Nocturnal aquatic life, since many of the plants and animals you'll see are different

## **The Scuba Gear You Use**

You will use the basic scuba diving equipment with a dive light and glow stick.

## **The Learning Materials You Need**

Night Diving – there's really nothing like it. With the right training and a little bit of planning, night dives can be as easy as diving during the day. PADI's Night Diver crewpak will help you prepare for your first night dives with a PADI Instructor.

Topics covered include:

tips for navigating at night, night diving etiquette, establishing an entry and exit point, and how to maintain your underwater light system.

**PADI Night Diver manual.**

## **Prerequisites**

You must be a PADI Open Water Diver or Junior Open Water Diver certification (or qualifying certification from another organization).

At least 12 years old.

## **Duration and pricing**

The **Night Diver Specialty Course** consists of maximum 3 dives / 2 dives if your instructor credits you the Adventure Night dive

# **PADI DIGITAL UNDERWATER PHOTOGRAPHER COURSE**

*Underwater photography is one of the most popular diving specialties, and the rise of digital underwater photography has made it easier and more fun than ever.*

This is why there are actually two PADI underwater photography courses. The PADI Digital Underwater Photographer course gets you going quickly with today modern digital equipment, whether you use a point-and-shoot snap camera or a sophisticated D-SLR like the pros. The PADI Underwater Photographer course is a more traditional photography course designed for conventional film equipment.

## **The Fun Part**

The fun part about this course is learning to capture images to share with your friends and family. It's a great way to relive the adventures you've had.

## **What You Learn**

How to choose the right underwater camera system for you  
The PADI SEA method for getting great shots quickly  
The three primary principles for good underwater photos

## **The Learning Materials You Need**

Avoid the frustration of learning underwater photography through trial and error. The **PADI Digital Underwater Photography crewpak** shortens the learning curve with tips and hints from the pros. Topics covered include :Basic photography tips; Strobe diagrams for a variety of effects; Tips for eliminating backscatter; An explanation of the various digital file formats; How to bring back the color in your images

The crewpak includes the PADI Digital Underwater Photographer Manual and submersible white balance slate. The course materials preview skills you'll practice with your instructor. Once the course is over, use your manual as a reference guide as you explore new environments and to evolve your skills.

**PADI Digital Underwater Photography crewpak**

## **The Prerequisites for This Course**

To enroll, you must have a PADI OPEN WATER certification (or have a qualifying certification from another organization)

## **Duration**

The **Digital Underwater Photography Course** consists of maximum 2 dives / 1 dive if your instructor credits you the Adventure Underwater Photography dive

# **The PADI Rescue Diver Course**

*“Challenging” and “rewarding” best describe the PADI Rescue Diver course.*

Building upon what you've already learned, this course expands on what you already know about how to prevent problems, and how to manage them if they occur.

## **The Fun Part**

The fun part about this course is rising to challenges and mastering them. Most divers find this course both demanding and rewarding, and at the end, say it's the best course they've ever taken.

## **What You Learn**

- Self rescue
- Recognizing and managing stress in other divers
- Emergency management and equipment
- Rescuing panicked divers
- Rescuing unresponsive divers

## **The Learning Materials You Need**

The PADI Rescue Diver crewpak includes all materials required to complete the PADI Rescue Diver course – including a pocket mask. You'll learn how to think like a rescue diver and preview skills you'll practice with your PADI Instructor. Once your Rescue Diver course is complete, you can review the DVD to refresh your dive safety skills as needed. This tool box of knowledge and technique will give you the expertise to handle almost any emergency situation.

**PADI Rescue manual cost 36 Euro**

## **Prerequisites**

- To enroll in the PADI Rescue Diver course, you must
- Be 15 years or older
- Have a PADI Advanced Open Water certification (or have a qualifying certification from another organization)
- Be trained and current for first aid and CPR within the previous two years (Ask at the counter about the Emergency First Response CPR and first aid courses).

## **Duration**

The **Rescue Diver Course** takes 3 days

# **PADI Divemaster Course**

*Looking for the first step in working with scuba as a career?*

Your adventure into the professional levels of recreational scuba diving begins with the PADI Divemaster program. Working closely with a PADI Instructor, in this program you expand your dive knowledge and hone your skills to the professional level. PADI Divemaster training develops your leadership abilities, qualifying you to supervise dive activities and assist instructors with student divers. PADI Divemaster is the prerequisite certification for both the PADI Ass. Instructor and PADI Open Water Scuba Instructor certifications.

## **What You Learn**

During the PADI Divemaster program, you learn dive leadership skills through both classroom and independent study. You complete water skills and stamina exercises, as well as training exercises that stretch your ability to organize and solve problems as well as help others improve their scuba. You put this knowledge into action through a structured internship.

## **Prerequisites**

To take this course, you must be:

18 years old

A PADI Advanced Open Water Diver (or qualifying certification from another training organization)

A PADI Rescue Diver (or qualifying certification from another training organization)

An EFR (or qualifying first aid and CPR training from another organization) course completion within the past 24 months.

Have at least 20 dives to begin the course and 60 for certification

Be fit for diving and submit a Medical Statement signed by a physician within the last 12 months.

## **Duration and pricing**

The ***Divemaster Course*** at Reef 2000 is done the internship way and takes between 3 to 4 weeks

# **CPR and First Aid: Emergency First Response Primary and Secondary Care**

*First aid and CPR are good skills for anyone involved in adventure sports – just in case. And, you need these skills for the PADI Rescue Diver course.*

Emergency First Response is a PADI affiliate that specializes in teaching these lifesaving skills – and they're for anyone, not just divers. Most PADI Instructors are also Emergency First Response Instructors!

## **The Fun Part**

The fun part about Emergency First Response training is learning serious medical emergency response skills in an upbeat, positive environment. You gain the confidence that you are prepared to help in an emergency.

## **What You Learn in the EFR Primary and Secondary Care Courses**

- BLS (Basic Life Support) CPR and rescue breathing at the layperson level
- AED (automated external defibrillator) use (optional)
- Preventing and caring for shock
- Spinal injury management
- Use of barriers to reduce disease transmission risk
- Basic first aid and first aid kit considerations

## **The Learning Materials You Need**

Through a combination of independent study and skill practice with an instructor, you'll build the confidence and skills to provide basic emergency care. The Primary and Secondary Care Manual and video on DVD preview emergency scenarios and provide step-by-step skill demonstrations. The Emergency First Response Care at a Glance card is a quick-reference guide for emergency situations. Designed to fit in a glove compartment or backpack, the Care at a Glance card is an important component for any first-aid or disaster preparedness kit.

**The Primary and Secondary Care Manual costs 13 Euro**

## **Prerequisites**

To enroll in Emergency First Response courses, you must

- Care about other people and want to be able to assist them in a medical emergency

## **Duration**

The **EFR course** takes 1 day or two afternoons (so you do not miss out on your normal diving)

# **CHECK DIVE & REFRESHER DIVE**

*Has it been a while since you've been scuba diving?*

Do you feel like your scuba skills and knowledge are a bit rusty? The Check Dive / Refresher Dive is just what you need. It reacquaints you with diving so that you're back to feeling comfortable in the underwater world in less than a day.

## **The Fun Part**

Brush up on your scuba knowledge and skills. Improve your diving ability, and get used to the Red Sea as a diving environment

## **What You Learn**

You will go over scuba knowledge you learned during your initial training. Then, practice fundamental skills in a confined water area (in the Red Sea!).

You will review:

Safe diving practices, dive planning fundamentals, problem management, breathing air at depth, recreational diving and dive tables: basic knowledge  
recreational diving and dive tables: dive planning

After you complete the knowledge assessment, you will go through main diving skills in a safe and easy environment. You review information about each skill, why it's important, points to remember when performing the skill.

The **Check Dive** is particularly beneficial if you:

Are a PADI Open Water Diver course referral student who wants a refresher prior to making your open water training dives

Are a PADI Scuba Diver who wants to upgrade to PADI OPEN WATER DIVER

or you just haven't scuba dived in a while and want to get acclimated again.

***(if you last logged dive is more than 6 month ago we will ask you to enroll in a Check Dive)***

The **Refresher Dive** is particularly beneficial if there are still skills to work on after the half day check dive or you feel you want to gain some more experience before joining the normal guided dives or you have not dived for long period of time and there more refreshing to do.

***(the decision if you need a Refresher Dive will be done after the Check Dive)***

## **Prerequisites**

To take the Check Dive or Refresher Dive you must:

Have a scuba certification or be enrolled in a scuba certification course

Be at least 10 years old

## **Duration and pricing**

The **Check Dive** takes half a day and consists of 1 Theory session, 1 skill session with 1 dive attached to it.

If you are using 1 dive from your dive package the **supplement is 15 Euro (tanks & weights)**

The **Refresher Dive** takes a day and consists of 2 Theory session, 2 skill sessions with 2 dives attached to it.

If you are using 2 dive from your dive package the **supplement is 35 Euro (tanks & weights)**

# **BOAT SAFARI**

***Every Wednesday*** we run a local boat safari to the remote untouched areas south of Dahab.

There only a few dive boat in Dahab, which ensures for uncrowded diving on the southern virgin reefs of Gabr El Bint and Shahira.

Although Dahab is predominantly a shore diving resort, Reef 2000 charts the Ghazallah VI dive boat and runs once a week trips down to the unspoilt reefs of Gabr El Bint, that lie to the south of Dahab and can be only reached by boat or camel.

It is always a great day out, and always a spectacular day of diving.

Included in the price are 2 dives (tanks & weights), lunch and unlimited soft drinks.

## **Pricing**

If you have already bought a dive package, the **supplement is 60 Euro**

There is always an option for a 3<sup>rd</sup> dive of the boat.

**The third dive costs 20 Euro**

*There will be beers in the fridge for the journey home (beers not included in price ... sorry)*

**Book the boat & camel safari and receive a 15% discount on both of them!!**

# CAMEL SAFARI

*Camel Safaris are a specialty unique to Dahab and are an experience not to be missed.*

Get to see uncrowded unspoiled reefs and get an idea of the bedouin life and hospitality. Strap your dive gear onto the side of your camel, hop on board, and tell it to head north!

We start from the Blue Hole where the camels await to take us to the ancient Bedouin settlement of *Ras Abu Gallum*. This pristine stretch of coastline holds some of the Sinai's most colourful virgin reefs. You'll be one of a privileged few to experience this unspoiled region.

A traditional Bedouin lunch is cooked over an open fire, ready for you to feast on in between dives.

This is a real desert day out where we do things the Bedouin way. A highly enjoyable and recommended experience.

## **Schedule (1 day safari):**

Meeting @ the dive club: 6:30h to 7:00h (depending on the time of year) heading by jeep to the Blue Hole. Camel ride to the national park of „Gabr el Bint“ (takes approx 1,5 hours)

Bedouin tea at Salah's bedouin tent

Dive one, lunch, dive two, camel ride to the Blue Hole and then jeep ride home.

We will be returning between 5 and 6 o'clock.

**To bring:** Towel, sun protection, sun glasses, loose fitting clothes

## **Pricing**

If you have already bought a dive package, the **supplement is 60 Euro**

*included:* jeep transfer to the Blue Hole, camel transfer from Blue Hole to Ras Abu Gallum, lunch (as well vegetarian possible), water, tea, guide, 2 guided dive

**Book the boat & camel safari and receive a 15% discount on both of them!!**

## **GUIDED DIVE PACKAGES**

All our guided dives are done with a maximum Divemaster / Instructor to diver ratio of 6:1  
The transportation to the dive site will be done by Jeep and all guided dive packages include tanks & weights.

If your friends and family would like to join you and snorkel along with you at the dive site, this is absolutely no problem. The transportation to dive site for snorkelers is € 10 per day

## **EARLY MORNING DIVES**

An Early Morning dive is the perfect possibility to ensure an uncrowded dive site. Usually you can see even the shy creatures, who are usually hiding as soon as too many divers pass by. If you are interested in an Early Morning Dive, please talk to your Instructor/ Divemaster or the Reef 2000 counter.

**Price:** If you hold a dive package the **supplement is € 15**

*Please note we need a minimum amount of divers to offer the dive.*

## **NIGHT DIVES**

Night diving, amidst the spectacular phosphoresce picked out in the moonlight, is one of our most amazing experiences, when new life emerges and the diver is afforded the chance to see the beautiful Featherstar and Spanish Dancer in all their glory. Because of the Red Sea's clear water, a dive on a Full Moon is possible even without torchlight.

**Price:** If you hold a dive package the **supplement is € 15**  
The torch (incl. Batteries) costs € 5

*Please note we need a minimum amount of divers to offer the dive.*

# **TECHNICAL DIVES**

*(for safety and quality reasons all technical dives will be supervised by a member of staff)*

## **GUIDED:**

Reef 2000 Dive Club offers Technical Guided Dives till 100m. With a maximum guide to customer ratio of **3:1!** Due to the exposed location of Dahab on the Gulf of Aqaba which features spectacular underwater geography it is possible to reach greater depth very close to the shore. Many different reef structures offer the beginner and the experienced Technical Diver a variety of interesting Technical dives. Dahab provides ideal diving conditions all year round. Benefit from our experienced local Technical Guides to get the best and safest view on famous technical dive sites like the "Arch" at the Blue Hole (*picture!*), the bottom of the Blue Hole or the Canyon & the Canyon Cave. In addition to the already mentioned dive sites there are many more suitable for technical divers like for example the Little Canyon, C19, Gabr el Bint or Rolfes Reef.

## **SUPERVISION:**

For the experienced Technical Divers (if approved by the head of the technical department) we offer gases, logistics and surface support. We are able to cater you with Nitrox, Trimix and due to our booster pump high-pressure Oxygen (up to 200bar).

## **Technical Guided Dives include:**

- Guide, transport, 2x 12 liter manifold with air, but excludes equipment, Nitrox or Trimix.
- The maximum ratio on guided technical dives will be three technical divers to one instructor or technical guide!
- Supervised technical dives might be possible after the customer has done 2 guided technical Dives to the satisfaction of the head of the Reef 2000 technical department (Florian Herzberg). So non-guided technical dives can never be guaranteed.

## **TECHNICAL EQUIPMENT**

- Reef 2000 owns a booster-pump, offers Nitrox- and Trimix-fills, a wide selection of tanks (3, 7, 10, 12, 15 and 2x12 liter) and in case you do not own technical kit: DiveRite Technical BCDs and Apex regulators (DIN)
- For Buddy Inspiration users we offer three sets of 3 liter Inspiration-tanks (so you can save on excess luggage), high-pressure Oxygen fills and Sofnolime.
- We are happy to produce and laminate custom-made deco tables for our customers and provide you with any support you might want.

**FULL TECHNICAL EQUIPMENT rental per day of diving: €35**

# IANTD COURSES

All IANTD courses are run by our local IANTD Instructor Trainer Florian "Floh" Herzberg or by our IANTD Advanced Recreational Trimix Instructor Adam Andrews.

Floh is qualified as: IANTD Normoxic Trimix Instructor Trainer, IANTD Technical Instructor Instructor Trainer, IANTD Advanced Recreational Trimix Instructor Trainer, IANTD Advanced Nitrox Instructor Trainer, IANTD Open Water Scuba Instructor Trainer, IANTD Advanced EANx Instructor, IANTD Technical Instructor, IANTD Normoxic Trimix Instructor, IANTD full Trimix Instructor, IANTD Nitrox Blender Instructor, IANTD Trimix Blender Instructor, PADI Master Scuba Diver Trainer, PADI Specialty Instructor (Nitrox, Deep, UW Photography, Equipment, Night), IAHD Instructor, TV cameraman, DAN Oxygen Provider)

**Floh** has been a professional diver since 1997 and has been one of Dahab's first Technical Divers (still unbent). Benefit from more 10 years experience in Technical Diving. Floh's primary objectives are creating safe, competent and knowledgeable Technical Divers and make them get the best out of Dahab's technical dives sites.

On technical courses at the Reef 2000 Dive Club we limit the maximum student to instructor ratio from Full / Adv. Trimix to 2:1. In all other courses the ratio is 3:1. This ratio insures high safety standards and high quality training.

## – **Advanced Nitrox Diver** (equivalent of TDI Advanced Nitrox & TDI Deco. Procedures)

This program is designed to extend the divers knowledge with O<sub>2</sub> mixes of 22 to 40% and up to 100% for decompression. It further develops diving skills and provides a greater understanding of the Nitrox diving concept. This program qualifies divers to do dive to 140 fsw (42 msw) and do decompression stops required dives up to 15 minutes.

### **Prerequisites:**

Must be qualified as an IANTD EANx Diver and IANTD Deep Diver with proof of a minimum of (we think) 100 logged dives or sufficient experience to satisfy the instructor that the student has the ability and knowledge to continue into this level of training.

Must be a minimum of 15 years of age with a parent or guardian authorization, or a minimum of 18 years of age without guardian approval.

## – **Advanced Recreational Trimix Diver**

This program is designed to extend the divers knowledge with recreational Trimix mixtures mixes starting from and Oxygen content of 24% and up to 100% for decompression. The maximum END (Equivalent Narcotic Depth) will be 24 msw. It further develops diving skills and provides a greater understanding of the Nitrox / Trimix diving concept. This program qualifies divers to do dive to 48 msw and do decompression stops required dives up to 15 minutes. The maximum END (Equivalent Narcotic Depth) will be 24 msw.

### **Prerequisites:**

Must be qualified as an IANTD EANx Diver and IANTD Deep Diver with proof of a minimum of (we think) 100 logged dives or sufficient experience to satisfy the instructor that the student has the ability and knowledge to continue into this level of training.

Must be a minimum of 15 years of age with a parent or guardian authorization, or a minimum of 18 years of age without guardian approval.

– **Technical Diver** (equivalent of TDI Extended Range Diver)

This Program is designed to train divers to conduct dives to depths between 100 fsw (30 msw) and at the instructors option up to 170 fsw (51 msw) using custom blend breathing gas mixtures; and to provide greater understanding of custom blend breathing gas mixtures, a complete knowledge of the limits of any EANx mixture, and the use of EANx and oxygen for decompression.

The knowledge and skills taught in this program are more than adequate to qualify divers to perform Dives outside of training up to 180 fsw (54 msw)

**Prerequisites:**

Must be qualified as an IANTD Advanced EANx Diver.

Must provide proof of a minimum of 100 logged dives, of which at least 30 were deeper than 90 fsw (27 msw) or sufficient experience doing technical dives to satisfy the instructor that the student has the ability and knowledge to continue into this level of training."

Must be a minimum of 18 years of age.

– **Normoxic Trimix Diver** (equivalent of TDI Trimix)

This Program is designed to train those who wish to dive to depths between 130 fsw (39 msw) and 200 fsw (60 msw), but who do not wish to breathe air below 130 fsw (39 msw). Trimix affords a means of reducing narcosis on dives to such depths. The knowledge and skills taught in this program are more than adequate to qualify divers to perform Trimix Dives outside of training up to 200 fsw (60 msw).

**Prerequisites:**

Must be qualified as an IANTD Advanced EANx Diver. Divers qualified as Technical Diver will be able to do a shorter course.

Must provide proof of a minimum of 100 logged dives, of which at least 30 were deeper than 90 fsw (27 msw) or sufficient experience doing technical dives to satisfy the instructor that the student has the ability and knowledge to continue into this level of training.

Must be a minimum of 18 years of age.

– **Trimix Diver** (equivalent of TDI Advanced Trimix)

This Program is designed for those individuals already involved in deep diving activities, but is not intended to be used as an enticement to divers who are content to remain in Sport or EANx diving limits.

Trimix affords a safer means for deep-water exploration for divers who dive deep or perform with a clear head at depth. The IANTD Trimix Diver Program requires the diver to be self-sufficient/reliant.

The knowledge and skills taught in this program are more than adequate to qualify divers to perform Trimix Dives outside of training up to 333 fsw (100 msw).

**Prerequisites:**

Must be qualified as an IANTD Technical Diver or Technical Cave Diver or Technical Wreck Diver or Normoxic Trimix Diver or equivalent.

Must provide proof of a minimum of 200 logged dives, of which at least 25 were to depths between 140 fsw (42 msw) and 200 fsw (60 msw) or sufficient experience doing technical dives to satisfy the instructor that the student has the ability and knowledge to continue into this level of training.

Must be a minimum of 18 years of age.

# **IANTD BLENDER COURSES**

## **EANx Gas Blender**

This Program is designed to train qualified personnel in safe handling of Oxygen and the preparation of Nitrox mixes.

### **Prerequisites:**

- Must be working for s dive facility and must have the need to become a EANx Blender

### **Duration: 1 days**

- 1 full day theory , Oxygen cleaning and blending of EANx mixes

## **Trimix Gas Blender**

This Program is designed to train qualified personnel in safe handling of Oxygen and the preparation of Trimix & Heliox

### **Prerequisites:**

- Must be an IANTD EANx Blender or equivalent  
- Must be working for s dive facility and must have the need to become a Trimix Blender

### **Duration: 1 days**

- 1 full day theory , Oxygen cleaning and blending of Trimix mixes

# **IANTD INSTRUCTOR COURSES**

## **Open Water Scuba Instructor Development Program**

### **Prerequisites:**

Must be qualified as an IANTD Divemaster or equivalent

Must provide proof of a minimum of 100 logged dives, of which at least 15 were to depths between 27msw and 39msw

Must have assisted on at least 1 Open Water & 1 Advanced Open Water course

Must hold current CPR & First Air qualification and be qualified as Oxygen Provider to be able to teach Nitrox  
The OW instructor must hold Nitrox qualification with at least 10 logged dives on Nitrox

## **Open Water Scuba Instructor Crossover**

### **Prerequisites:**

Must be qualified as Sport Diving Instructor in active teaching status of a internationally accredited Scuba association

Must provide proof of a minimum of 110 logged dives

Must hold current CPR & First Air qualification and be qualified as Oxygen Provider to be able to teach Nitrox  
the OW instructor must hold Nitrox qualification with at least 10 logged dives on Nitrox

## **Advanced Nitrox Instructor Development Program**

### **Prerequisites:**

Must be qualified as an IANTD Divemaster or equivalent & IANTD Advanced Nitrox Diver

Must provide proof of a minimum of 100 logged dives, of which at least 50 were to

depths between 27msw and 39msw and 25 Advanced Nitrox dives must have assisted on at least 3 courses from one or more of the following: Open Water & Advanced Open Water course, Nitrox, Deep Diver and Advanced Nitrox Diver

Must hold current CPR & First Air qualification and be qualified as Oxygen Provider

## **Advanced Nitrox Instructor Crossover**

### **Prerequisites:**

Must be qualified as Sport Diving Instructor in active teaching status of a internationally accredited Scuba association

Must be qualified as IANTD Advanced Nitrox Diver Must provide proof of a minimum of 125 logged dives, of which at least 25 were on.

Nitrox Must hold current CPR & First Air qualification and be qualified as Oxygen Provider

# **IANTD INSTRUCTOR COURSES**

## **Advanced Recreational Trimix Instructor**

### **Prerequisites:**

Must meet all the requirements for the Advanced Nitrox Instructor.  
Be qualified as either IANTD Advanced Recreational Trimix or Normoxic Trimix Diver  
Must provide proof of a minimum of 100 logged dives, of which at least 50 were to depths between 27msw and 45 msw with at least 25 dives on Nitrox or Trimix mixtures  
Must hold current CPR & First Air qualification and be qualified as Oxygen Provide

## **Technical Instructor**

### **Prerequisites:**

Must be qualified as IANTD Advanced Nitrox Instructor or IANTD Recreational Trimix Instructor in active teaching status  
Must have a minimum of 2 year teaching experience  
Must be qualified as IANTD Technical Diver  
Must have assisted on min one IANTD Technical Diver course  
Must have taught a minimum of 3 OW, 3 AOW, 3 Nitrox & 3 Advanced Nitrox programs  
Must provide proof of a minimum of 350 logged dives, of which at least 100 were deeper than 39msw and at least 30 dives were on EANx  
Must hold current CPR & First Air qualification and be qualified as Oxygen Provider

## **Normoxic Trimix Instructor**

### **Prerequisites:**

Must be qualified as IANTD Advanced Nitrox Instructor or IANTD Recreational Trimix Instructor in active teaching status  
Must have a minimum of 2 year teaching experience  
Must be qualified as IANTD full Trimix Diver  
Must have assisted on min one IANTD Normoxic Trimix Diver course (can be done prior to course)  
Must have taught a minimum of 3 OW, 3 AOW, 3 Nitrox & 3 Advanced Nitrox programs  
Must provide proof of a minimum of 350 logged dives, of which at least 100 were deeper than 39msw and at least 25 dives were on Trimix  
Must hold current CPR & First Air qualification and be qualified as Oxygen Provider

**All IANTD Instructor programs will be conducted in English or German by Floh**

**FOR FURTHER INFORMATION AND PRICES - PLEASE CONTACT FLOH THROUGH THE COUNTER**
