### Setting the Stage

How many of you are entrepreneurs?

How many of you are employees?

How do you know the difference?

How many of you know someone who works in the accounting field?

Who do you think uses accounting information?

How many of you have a job that provides a paycheck?

- Accurate records for each employee are important

# LESSON

### **1-1** Accounting in Action

- Describe the different users of accounting information.
- Prepare a net worth statement and explain its purpose.

- Data must be recorded and reported in accounting reports.
- Then, the information can be provided to business owners, managers, investors, and others to make business decisions and measure performance.

### What Is Accounting?

- Accounting is the process of planning, recording, analyzing, and interpreting financial information.
- An accounting system is a planned process designed to compile financial data and summarize the results in accounting records and reports.
- Financial reports that summarize the financial condition and operations of a business are called financial statements.

# Accounting in Personal Life

- A net worth statement allows the person extending the loan to see the financial position of a borrower on a specific date and make a lending decision.
- Anything of value that is owned is called an asset.
- An amount owed is called a liability.
- The difference between personal assets and personal liabilities is called personal net worth.
  - In business, net worth is also called equity.
- Equity is the difference between assets and liabilities.

# The Accounting Equation

Assets - Liabilities = Owner's Equity (net worth)
The equation shows the relationship among
items of value a person has and the financial
rights to the items

1-2 How Business Activities Change the Accounting Equation

- Classify accounts as assets, liabilities, or owner's equity and demonstrate their relationship in the accounting equation.
- Analyze the effects of transactions on the accounting equation.
- Distinguish between cash and on account transactions.

### **Brainstorm**

- What are some situations in which having the same standards or rules is necessary?
- What are some assets the school would own?
- What is the accounting equation?
- If an amount is added or subtracted from one side of the equation, what must be done to keep the equation equal?

# Financial Literacy

• Rule of 72

### The Business—Delgado Web Services

- A business that performs an activity for a fee is called a service business.
- A proprietorship is a business owned by one person.
  - A proprietorship is sometimes referred to as a sole proprietorship.
  - Why would a business organize as a proprietorship?
  - Characteristics
- A business plan is a formal written document that describes the nature of a business and how it will operate. (Delgado's plan. P10)

### Accounting Standards and Rules

- The standards and rules that accountants follow while recording and reporting financial activities are commonly referred to as generally accepted accounting principles or GAAP.
- Some examples of GAAP concepts you will be accountable for learning and applying to assignments

### Unit of Measurement

Business activities are stated in numbers that have common values.

# **Business Entity**

A business's financial information is recorded and reported separately from the owner's personal financial information

- Financial rights to the assets of a business are called equities.
- The amount remaining after the value of all liabilities is subtracted from the value of all assets is called owner's equity.
- The equation showing the relationship among assets, liabilities, and owner's equity is called the accounting equation.

# The Accounting Equation

- Accountants call any business activity that changes assets, liabilities, or owner's equity a transaction.
- A record that summarizes all the transactions pertaining to a single item in the accounting equation is called an account.
- The name given to an account is called an account title.
- The difference between the increases and decreases in an account is called the account balance.
- An account used to summarize the owner's equity in a business is called a capital account.
