## Part 1: Answer 4 of the following 5 questions in this part. Each problem you complete is worth 16 points.

1) Below is a side-by-side stem and leaf diagram representing the weights of the members of the boys and girl's basketball teams for St. Grace's Catholic Middle School:
BOYS' WEIGHTS STEMS GIRLS' WEIGHTS

|  |  |  |  |  | 4 | 8 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 4 | 4 | 4 | 5 | 0 | 1 | 1 | 2 | 3 | 4 |
| 9 | 8 | 7 | 7 | 6 | 6 | 1 | 1 | 2 | 3 | 4 | 5 |
|  |  | 3 | 3 | 0 | 7 |  |  |  |  |  |  |
|  |  |  | 7 | 6 | 8 | 5 |  |  |  |  |  |

Key: $\quad 87=7|8| 5=85$
a) Compute the standard deviation and the IQR for both girls and boys. Round to the nearest tenth.

|  | BOYS | GIRLS |
| :--- | :--- | :--- |
| Standard Deviation |  |  |
| Inter-Quartile Range |  |  |

b) Which gender has the greater range of weights and what is that range?

| Gender with the Greater Range | Range |
| :--- | :--- |
|  |  |

c) Compute the mean, median, and mode for both boys and girls. Round to the nearest tenth if necessary.

|  | BOYS | GIRLS |
| :--- | :--- | :--- |
| Mean |  |  |
| Median |  |  |
| Mode |  |  |

d) Find any outliers for EACH set of data, and eliminate them (if any), and then recalculate the median heights for each gender.

|  | BOYS | GIRLS |
| :--- | :--- | :--- |
| OUTLIERS |  |  |
| MEDIAN without the Outliers <br> (if applicable) |  |  |

e) With the outliers removed (if applicable), answer the following question: Jimmy weighs 54 pounds and Sheila weights 54 pounds. Who is closer to the median height for their gender?
2. Below is a table of 16 Canadian Provinces and the average precipitation each province receives.
$\left.\begin{array}{|c|c|}\hline \text { Canadian } \\ \text { Province }\end{array} \begin{array}{c}\text { Annual } \\ \text { precipitation } \\ \text { (mm) }\end{array}\right\}$
a. Calculate the mean and the standard deviation for the data. Round to the nearest tenth.
$\qquad$
Mean $=$ Standard deviation $=$ $\qquad$
b. What percent of the data lies within of 2 standard deviation from the mean? Round to the nearest percent.

ANSWER: $\qquad$
c. Find the percentile rank for Toronto.

ANSWER: $\qquad$
d. Find the approximate value of the $4^{\text {th }}$ decile.

ANSWER: $\qquad$
e. Find a $5 \%$ trimmed mean for the data. Round to the nearest tenth.
$\qquad$
3. The Willamette Valley is a 150 -mile ( 240 km ) long valley in the Pacific Northwest region of the United States.

Average rainfall in Willamette Valley

| Month | Jan. | Feb. | Mar. | April | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Rainfall <br> (ml) | 15 | 21 | 48 | 24 | 16 | 8 | 2 | 1 | 2 | 3 | 5 | 10 |

a. Calculate the mean absolute deviation for the data. ROUND TO THE NEAREST TENTH.

|  |  |  |  |
| :--- | :--- | :--- | :--- |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |

MEAN ABSOLUTE DEVIATION = $\qquad$
b. Calculate the IQ, and the lower and upper fences.
$\mathrm{IQ}=$ $\qquad$
$\qquad$ Upper Fence = $\qquad$
c. Identify any outliers for the data.

Outliers = $\qquad$
d. Create a modified box plot for the data. Draw it to scale.
4. A survey recorded the number of people living in each of 40 houses. The numbers were as follows:

| 3 | 4 | 10 | 4 | 3 | 2 | 2 | 5 | 4 | 12 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 4 | 9 | 2 | 6 | 3 | 5 | 5 | 2 | 4 | 1 |
| 4 | 3 | 4 | 2 | 4 | 4 | 6 | 2 | 4 | 3 |
| 2 | 5 | 4 | 5 | 6 | 4 | 2 | 3 | 2 | 4 |

a. Using the data, create a frequency distribution, relative frequency distribution, and a cumulative frequency distribution using 4 intervals.

| Interval | Frequency | Relative Frequency | Cumulative Frequency |
| :--- | :--- | :--- | :--- |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |

b. Draw a frequency histogram, relative frequency histogram, and a cumulative frequency histogram for the data. Be sure to label each axis for each histogram.

Frequency Histogram $\square$

Relative Frequency Histogram

Cumulative Frequency Histogram

5. Breathing rate of the freshwater Sunfish

| Temperature ( ${ }^{\circ} \mathbf{C}$ ) | Breathing Rate per minute |
| :---: | :---: |
| 10 | 15 |
| 15 | 25 |
| 18 | 30 |
| 20 | 38 |
| 23 | 60 |
| 25 | 57 |
| 27 | 25 |

a. Perform a quadratic, cubic, and exponential regression on the, and give their corresponding $a, b, c, d$, and $r$ values. Round to the nearest 3 decimal places.

|  | QUADRATIC | CUBIC | EXPONENTIAL |
| :--- | :--- | :--- | :--- |
| a |  |  |  |
| b |  |  |  |
| c |  |  | N/A |
| d | N/A |  | N/A |
| r |  |  |  |

b. Which model best represents the data?
c. Using the best regression type from part a, determine the temperature(s) (to the nearest degree) if the breathing rate is 43 .
d. Using the best regression type from part a, determine the breathing rate (to the nearest integer) if the temperature is 22 .

Part 2: Answer 3 of the following 4 problems in this part. Each problem you complete is worth 12 points for a total of 36 points.

1) A sample of 30 boys and 30 girls from the Karekare College population was surveyed and below are line plots and box and whisker plots of their heights.

a) Identify the approx. median height of the girls surveyed.
b) Identify the gender with the greater mode.
c) Identify the gender with the greater range.
d) Identify the gender with the greater interquartile range.
e) What is the percentile rank of a boy whose height is 168 cm ? e) $\qquad$
f) What is the percentile rank of a girl whose height is 173 cm ? f) $\qquad$
2) Answer BOTH parts to this problem:
a) The following is some student's grade report. This student just completed 15 credit hours.

| Course | Credits | Grades |
| :---: | :---: | :---: |
| Calculus | $\mathbf{5}$ | $\mathbf{C}$ |
| Statistics | $\mathbf{4}$ | A |
| English | $\mathbf{3}$ | D |
| Music | $\mathbf{2}$ | B |
| History | $\mathbf{1}$ | A |

The local university uses a 4 point grading system, i.e. $A=4$ points, $B=3$ points, $C=2$ points, $\mathrm{D}=1$ point. Find the student's grade point average to the nearest hundredth.
a) $\qquad$
b) Find the average weight of a vehicle crossing a bridge if 5 motorcycles each averaging $100 \mathrm{lbs}, 57$ cars each averaging $5,000 \mathrm{lbs}$, and 28 trucks each averaging $10,000 \mathrm{lbs}$ crossed a bridge one afternoon.
b)
3) Answer all three questions in this part.
a) Tommy and Jeremy are pitchers for the baseball team and are being evaluated by the coach. The speeds in miles per hour of each of their practices are shown below.

Practice Pitch Speeds

Which of the following statements is true regarding their performance?
A. Tommy has a lower mean speed.
B. Four of Tommy's speeds lie within 1 standard deviation of the mean of his data.
C. Tommy has a lower median speed.

| Tommy | Jeremy |
| :--- | :--- |
| 60 | 63 |
| 69 | 70 |
| 85 | 79 |
| 68 | 67 |
| 80 | 65 |
| 73 | 72 |
| 65 | 68 |

D. Jeremy's median speed is higher than Tommy's mean speed.

ANSWER: $\qquad$
b) The chart below shows the scores for each of the first 10 basketball games for the Hawks and the Blue Jays.

Which of the following is false?
A. The mode for the Hawks is more than the mode for the Blue Jays.
B. The mean for the Blue Jays is more than the mean for the Hawks.

| HAWKS | BLUE <br> JAYS |
| :--- | :--- |
| 95 | 91 |
| 93 | 103 |
| 93 | 93 |
| 93 | 76 |
| 82 | 91 |
| 81 | 95 |
| 80 | 90 |
| 103 | 104 |
| 87 | 95 |
| 98 | 95 |

C. The median for the Hawks is less than the median for the Blue Jays.
D. The range for the Hawks is less than the range for the Blue Jays.

ANSWER: $\qquad$
c) This histogram shows the ages of the last 150 people who rode The Beast at Kings Island.

Which of the following statements is correct about this histogram:

1. The mean will most likely be less than the median.
2. The mean will most likely be more than the median.
3 The mean will be exactly equal to the median.

Ages of Riders of The Beast

$\qquad$
4) The following table shows the sales $S$ (in millions of dollars) for Guitar Center from 2005 to 2011 :

| YEAR | SALES |
| :---: | :---: |
| 2005 | 213.3 |
| 2006 | 296.7 |
| 2007 | 391.7 |
| 2008 | 620.7 |
| 2009 | 785.7 |
| 2010 | 938.2 |
| 2011 | 1101.1 |

1. Use the regression feature to find a linear model that fits the data and sketch it in the above viewing window. Round to the nearest 3 decimal places.
$\qquad$ $\mathrm{b}=$ $\qquad$
$\qquad$
$r=$
2. Describe the correlation that exists. (Circle one)
PERFECT STRONG MODERATE WEAK NONE
3. Estimate the sales for Guitar Center in 2018 to the nearest tenth of a million dollars.
4. Estimate the year when the sales for Guitar Center first reached $\$ 2$ billion.

## Part 1: Answer 4 of the following 5 questions in this part. Each problem you complete is worth 16 points.

1) Below is a side-by-side stem and leaf diagram representing the weights of the members of the boys and girl's basketball teams for St. Grace's Catholic Middle School:
BOYS' WEIGHTS STEMS GIRLS' WEIGHTS

|  |  |  |  |  | 4 | 8 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 4 | 4 | 4 | 5 | 0 | 1 | 1 | 2 | 3 | 4 |
| 9 | 8 | 7 | 7 | 6 | 6 | 1 | 1 | 2 | 3 | 4 | 5 |
|  |  | 3 | 3 | 0 | 7 |  |  |  |  |  |  |
|  |  |  | 7 | 6 | 8 | 5 |  |  |  |  |  |

Key: $\quad 87=7|8| 5=85$
a) Compute the standard deviation and the IQR for both girls and boys. Round to the nearest tenth.
b) Which gender has the greater range of weights and what is that range?
c) Compute the mean, median, and mode for both boys and girls. Round to the nearest tenth if necessary.
d) Find any outliers for EACH set of data, and eliminate them (if any), and then recalculate the median heights for each gender.
e) With the outliers removed (if applicable), answer the following question: Jimmy weighs 54 pounds and Sheila weights 54 pounds. Who is closer to the median height for their gender?
2. Below is a table of 16 Canadian Provinces and the average precipitation each province receives.
a. Calculate the mean and the standard deviation for the data. Round to the nearest tenth.
b. What percent of the data lies within of 2 standard deviation from the mean? Round to the nearest percent.
c. Find the percentile rank for Toronto.
d. Find the approximate value of the $4^{\text {th }}$ decile.
e. Find a $5 \%$ trimmed mean for the data. Round to the nearest tenth.

| Canadian | Annual <br> average <br> precipitation <br> (mm) |
| :---: | :---: |
| St. John's | 1482 |
| Charlottetown | 1201 |
| Halifax | 1474 |
| Fredericton | 1131 |
| Quebec | 1208 |
| Montreal | 940 |
| Ottawa | 911 |
| Toronto | 819 |
| Winnipeg | 504 |
| Regina | 364 |
| Edmonton | 461 |
| Calgary | 399 |
| Vancouver | 1167 |
| Victoria | 858 |
| Whitehorse | 269 |
| Yellowknife | 267 |

3. The Willamette Valley is a 150 -mile ( 240 km ) long valley in the Pacific Northwest region of the United States.

Average rainfall in Willamette Valley

| Month | Jan. | Feb. | Mar. | April | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Rainfall <br> (ml) | 15 | 21 | 48 | 24 | 16 | 8 | 2 | 1 | 2 | 3 | 5 | 10 |

a. Calculate the mean absolute deviation for the data.
b. Calculate the IQ, and the lower and upper fences.
c. Identify any outliers for the data.
d. Create a modified box plot for the data. Draw it to scale.
4. A survey recorded the number of people living in each of 40 houses. The numbers were as follows:

| 3 | 4 | 10 | 4 | 3 | 2 | 2 | 5 | 4 | 12 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 4 | 9 | 2 | 6 | 3 | 5 | 5 | 2 | 4 | 1 |
| 4 | 3 | 4 | 2 | 4 | 4 | 6 | 2 | 4 | 3 |
| 2 | 5 | 4 | 5 | 6 | 4 | 2 | 3 | 2 | 4 |

a. Using the data, create a frequency distribution, relative frequency distribution, and a cumulative frequency distribution using 4 intervals.
b. Draw a frequency histogram, relative frequency histogram, and a cumulative frequency histogram for the data. Be sure to label each axis for each histogram.
5. Breathing rate of the freshwater Sunfish

| Temperature ( ${ }^{\circ} \mathbf{C}$ ) | Breathing Rate per minute |
| :---: | :---: |
| 10 | 15 |
| 15 | 25 |
| 18 | 30 |
| 20 | 38 |
| 23 | 60 |
| 25 | 57 |
| 27 | 25 |

a. Perform a quadratic, cubic, and exponential regression on the, and give their corresponding $a, b, c, d$, and $r$ values. Round to the nearest 3 decimal places.
b. Which model best represents the data?
c. Using the best regression type from part a, determine the temperature(s) (to the nearest degree) if the breathing rate is 43 .
d. Using the best regression type from part a, determine the breathing rate (to the nearest integer) if the temperature is 22 .

Part 2: Answer 3 of the following 4 problems in this part. Each problem you complete is worth 12 points for a total of $\mathbf{3 6}$ points.

1) A sample of 30 boys and 30 girls from the Karekare College population was surveyed and below are line plots and box and whisker plots of their heights.

a) Identify the approx. median height of the girls surveyed.
b) Identify the gender with the greater mode.
c) Identify the gender with the greater range.
d) Identify the gender with the greater interquartile range.
e) What is the percentile rank of a boy whose height is 168 cm ?
f) What is the percentile rank of a girl whose height is 173 cm ?
2) Answer BOTH parts to this problem:
a) The following is some student's grade report. This student just completed 15 credit hours.

| Course | Credits | Grades |
| :---: | :---: | :---: |
| Calculus | $\mathbf{5}$ | $\mathbf{C}$ |
| Statistics | $\mathbf{4}$ | $\mathbf{C}$ |
| English | $\mathbf{3}$ | A |
| Music | $\mathbf{2}$ | D |
| History | $\mathbf{1}$ | B |
|  |  | A |

The local university uses a 4 point grading system, i.e. $\mathrm{A}=4$ points, $\mathrm{B}=3$ points, $\mathrm{C}=2$ points, $\mathrm{D}=1$ point. Find the student's grade point average to the nearest hundredth.
b) Find the average weight of a vehicle crossing a bridge if 5 motorcycles each averaging $100 \mathrm{lbs}, 57$ cars each averaging $5,000 \mathrm{lbs}$, and 28 trucks each averaging $10,000 \mathrm{lbs}$ crossed a bridge one afternoon.
3) Answer all three questions in this part.
a) Tommy and Jeremy are pitchers for the baseball team and are being evaluated by the coach. The speeds in miles per hour of each of their practices are shown below.

Practice Pitch Speeds

Which of the following statements is true regarding their performance?
A. Tommy has a lower mean speed.
B. Four of Tommy's speeds lie within 1 standard deviation of the mean of his data.
C. Tommy has a lower median speed.

| Tommy | Jeremy |
| :--- | :--- |
| 60 | 63 |
| 69 | 70 |
| 85 | 79 |
| 68 | 67 |
| 80 | 65 |
| 73 | 72 |
| 65 | 68 |

D. Jeremy's median speed is higher than Tommy's mean speed.
b) The chart below shows the scores for each of the first 10 basketball games for the Hawks and the Blue Jays.

Which of the following is false?
A. The mode for the Hawks is more than the mode for the Blue Jays.
B. The mean for the Blue Jays is more than the mean for the Hawks.
C. The median for the Hawks is less than the median for the Blue Jays.
D. The range for the Hawks is less than the range for the Blue Jays.

| HAWKS | BLUE <br> JAYS |
| :--- | :--- |
| 95 | 91 |
| 93 | 103 |
| 93 | 93 |
| 93 | 76 |
| 82 | 91 |
| 81 | 95 |
| 80 | 90 |
| 103 | 104 |
| 87 | 95 |
| 98 | 95 |

c) This histogram shows the ages of the last 150 people who rode The Beast at Kings Island.

Which of the following statements is correct about this histogram:

1. The mean will most likely be less than the median.
2. The mean will most likely be more than the median.
3 The mean will be exactly equal to the median.

Ages of Riders of The Beast

4) The following table shows the sales $S$ (in millions of dollars) for Guitar Center from 2005 to 2011 :

| YEAR | SALES |
| :--- | :--- |
| 2005 | 213.3 |
| 2006 | 296.7 |
| 2007 | 391.7 |
| 2008 | 620.7 |
| 2009 | 785.7 |
| 2010 | 938.2 |
| 2011 | 1101.1 |

1. Use the regression feature to find a linear model that fits the data and sketch it in the above viewing window. Round to the nearest 3 decimal places.
2. Describe the correlation that exists.
PERFECT STRONG MODERATE WEAK NONE
3. Estimate the sales for Guitar Center in 2018 to the nearest tenth of a million dollars.
4. Estimate the year when the sales for Guitar Center first reached $\$ 2$ billion.
