

Detailed Table of Contents

PART 1	Introduction	1
Chapter 1	Thinking Like an Economist	3
	Microeconomics and Macroeconomics	4
	The Cost-Benefit Approach to Decisions	4
	Example 1.1: Should I get out of my comfortable chair?	5
	The Role of Economic Theory	6
	Common Pitfalls in Decision Making	6
	Example 1.2: Should I go skiing today or work as a research assistant?	7
	Example 1.3: Should I go skiing today or wash dishes?	7
	ECONOMIC NATURALIST 1.1: Why are most university students under 30?	8
	ECONOMIC NATURALIST 1.2: Why can it be costly to use a free, money-off voucher?	8
	Example 1.4: Should I relocate my shop?	9
	Example 1.5: The pizza experiment	10
	ECONOMIC NATURALIST 1.3: Why do hotels charge a deposit?	10
	Example 1.6: Are you willing to walk 15 minutes in order to save €10?	11
	Example 1.7: Should Tom launch another boat?	12
	Example 1.8: How many boats should Tom launch?	13
	Using Marginal Benefit and Marginal Cost	14
	Example 1.9: How much should Susan talk to Hal each month?	14
	ECONOMIC NATURALIST 1.4: Why is airline food so bad?	15
	ECONOMIC NATURALIST 1.5: Why are smartphones so powerful?	16
	Would Parents Want Their Daughter or Son to Marry <i>Homo Economicus</i> ?	16
	Example 1.10: A friend phones you with an urgent request	16
	Positive Questions and Normative Questions	17
	ECONOMIC NATURALIST 1.6: Why does an efficient health service not do everything to keep people alive?	18
	Summary	18
	Questions for Review	19
	Problems	19
	Answers to In-Chapter Exercises	21
Chapter 2	Supply and Demand	23
	Chapter Preview	23
	Supply and Demand Curves	24
	ECONOMIC NATURALIST 2.1: Why do we want your lecturer to recommend this textbook?	26
	Equilibrium Quantity and Price	27
	Adjustment to Equilibrium	29

ECONOMIC NATURALIST 2.2: Why do people not haggle in supermarkets?	29
Some Welfare Properties of Equilibrium	30
Free Markets and Fairness	31
ECONOMIC NATURALIST 2.3: Why is denied boarding compensation fair?	31
Example 2.1: Suppose the rent control is lowered (strengthened) to €200/month	34
Price Supports	34
The Rationing and Allocative Functions of Prices	35
ECONOMIC NATURALIST 2.4: Why is it good that Uber increases prices in crisis situations?	35
Determinants of Supply and Demand	36
Predicting and Explaining Changes in Price and Quantity	38
ECONOMIC NATURALIST 2.5: Why do the prices of some goods, like apples, go down during the months of heaviest consumption while others, like beachfront cottages, go up?	39
Example 2.2: How does a price support programme in the soybean market affect the equilibrium price and quantity of beef?	40
The Algebra of Supply and Demand	40
<i>Summary</i>	41
<i>Questions for Review</i>	42
<i>Problems</i>	42
<i>Answers to In-Chapter Exercises</i>	43

Chapter 3	Game Theory	45
	Chapter Preview	46
	Social Dilemmas	46
	Example 3.1: Should I burn my leaves or haul them into the woods?	47
	ECONOMIC NATURALIST 3.1: Why does a confession not imply guilt?	48
	Example 3.2: Four students are working on an economics group project	49
	What Happened to the Invisible Hand?	50
	ECONOMIC NATURALIST 3.2: Why is it so hard to reduce CO₂ emissions?	51
	Repeated Games	52
	Nash Equilibrium	53
	Example 3.3: The cost of burning leaves is higher for Jack	54
	Example 3.4: Should Jack or Jill haul leaves?	55
	ECONOMIC NATURALIST 3.3: Why do governments typically build flood defences?	56
	Example 3.5: Should toy makers enter the Dutch market?	58
	Sequential Games	59
	Example 3.6: Does it pay to work on a Saturday?	59
	ECONOMIC NATURALIST 3.4: Why are you unlikely to get a bargain in a souq?	61
	Incomplete Information	62
	ECONOMIC NATURALIST 3.5: Why did mobile phone companies pay too much (or too little) for a 3G licence?	63

Behavioural Game Theory	64
Summary	65
Questions for Review	65
Problems	65
Answers to In-Chapter Exercises	67

PART 2 The Theory of Consumer Behaviour 69

Chapter 4 Rational Consumer Choice 71

Chapter Preview	71
The Opportunity Set or Budget Constraint	72
ECONOMIC NATURALIST 4.1: Why do some students not spend enough time on their studies?	74
Example 4.1: Quantity discount for electric power	77
ECONOMIC NATURALIST 4.2: Why do bulk buy discounts lead to food waste?	78
Consumer Preferences	79
ECONOMIC NATURALIST 4.3: Why should you not forget to ask the price?	80
ECONOMIC NATURALIST 4.4: Why do restaurants not sell ice cream-topped pizza?	85
The Best Affordable Bundle	87
ECONOMIC NATURALIST 4.5: Why do Most people not consume English wine?	89
Example 4.2: Equilibrium with perfect substitutes: Jolt cola versus Coca-Cola	90
Example 4.3: Equilibrium with perfect complements: butter versus toast	90
An Application of the Rational Choice Model	91
Example 4.4: Is it better to give poor people cash or rent support?	92
ECONOMIC NATURALIST 4.6: Why do people often give gifts in kind instead of cash?	93
Theory of Choice and Household Production	94
Summary	95
Questions for Review	96
Problems	96
Answers to In-Chapter Exercises	98
Appendix 4: The Utility Function Approach to the Consumer Budgeting Problem	101
The Utility Function Approach to Consumer Choice	101
Finding the Best Affordable Bundle Algebraically	105

Chapter 5 Individual and Market Demand 111

Chapter Preview	111
The Effects of Changes in Price	112
The Effects of Changes in Income	114
ECONOMIC NATURALIST 5.1: Why does a family's choice of holiday tell us a lot about their income?	116

The Income and Substitution Effects of a Price Change	117
ECONOMIC NATURALIST 5.2: Why does a standard haircut cost anything from €20 to €2,000 depending on the stylist?	121
Example 5.1: Income and substitution effects for perfect complements: skis and bindings	122
Example 5.2: Income and substitution effects for perfect substitutes: tea and coffee	123
Consumer Responsiveness to Changes in Price	123
Market Demand: Aggregating Individual Demand Curves	125
Example 5.3: The market demand curve: lamb chops in a Wales town	126
Example 5.4: The market demand curve: ten consumers	127
Price Elasticity of Demand	128
ECONOMIC NATURALIST 5.3: Why has demand for university places in England and Wales increased despite the introduction of tuition fees?	134
Example 5.5: Price elasticity of demand: what is the optimal price on the Oresund Bridge?	136
Example 5.6: Price elasticity of demand: should the bus system raise or lower bus fares?	137
Income Elasticity of Demand	137
ECONOMIC NATURALIST 5.4: Why have pubs become good at cooking food?	139
Example 5.7: How does income affect the market demand curve for food?	139
Cross-Price Elasticities of Demand	141
Summary	142
Questions for Review	143
Problems	144
Answers to In-Chapter Exercises	146
Appendix 5: Additional Topics in Demand Theory	149
The Constant Elasticity Demand Curve	149
Generating Demand and Engel Curves Algebraically	150

Chapter 6 Applications of Rational Choice and Demand Theories 157

Chapter Preview	157
Using Price Elasticity of Demand	158
Example 6.1: How much extra revenue results from a 6 per cent increase in fares on the London Underground?	158
Tax Incidence	161
ECONOMIC NATURALIST 6.1: Why do banks oppose increased taxes on financial services?	163
ECONOMIC NATURALIST 6.2: Why does a subsidy for first-time house buyers help house builders more than house buyers?	165
Welfare Comparisons	166
Example 6.2: Price changes: was Jones better off this year or last year?	166
ECONOMIC NATURALIST 6.3: Why does a person's standard of living improve over time even if the quantity of goods and services they can afford stays the same?	169
The Income-Compensated Demand Curve	170

Consumer Surplus 173

Example 6.3: What is the loss in consumer surplus from an oil price increase? 174

ECONOMIC NATURALIST 6.4: Why do you have to be a member to book a tennis court? 177

ECONOMIC NATURALIST 6.5: Why do some amusement parks charge *only* a fixed admission fee, with no additional charge even for rides with long lines? 178

Tax Burden and Equivalent Variation 178

Summary 180

Questions for Review 181

Problems 181

Answers to In-Chapter Exercises 183

Chapter 7 Choice under Uncertainty and the Economics of Information 185

Chapter Preview 186

Choice under Uncertainty 186

Example 7.1: Maximizing expected utility: Smith and gambling 188

Example 7.2: Will you always accept a favourable bet? 190

ECONOMIC NATURALIST 7.1: Why do people (not) go to casinos? 191

Example 7.3: Should Sarah become a teacher or an actress?

What is the most she would pay for Smith's evaluation? 192

Example 7.4: Should Smith sue the manufacturer? 193

Expected Utility and the Rational Choice Model 194

The Search for High Wages and Low Prices 195

Example 7.5: Acceptance price if the cost of search increases 198

ECONOMIC NATURALIST 7.2: Why have price comparison websites made it less necessary to compare prices? 198

Insuring against Bad Outcomes 199

ECONOMIC NATURALIST 7.3: Why is it more difficult to get flood protection than fire protection (unless you live in a forest)? 200

Example 7.6: What is the most a consumer would pay for insurance against a loss? 201

ECONOMIC NATURALIST 7.4: Why should you get travel insurance for a trip to the USA but not buy an extended warranty on your smartphone? 201

The Economics of Information 202

Adverse Selection 203

ECONOMIC NATURALIST 7.5: Why do 'almost new' used cars sell for so much less than brand new ones? 203

Example 7.7: Why should Fred buy a car from John? 204

Example 7.8: Why will John only sell a car in bad condition? 204

ECONOMIC NATURALIST 7.6: Why should men pay more than women for car insurance? 206

Moral Hazard 207

Example 7.9: Claire owns a hairdressing salon and has employed Gilbert to go around town advertising the salon 208

Signalling 208

ECONOMIC NATURALIST 7.7: Why do online retailers have flagship stores? 210

ECONOMIC NATURALIST 7.8: Why would an exclusive restaurant not display its hygiene rating? 212

ECONOMIC NATURALIST 7.9: Why do residents of small towns spend less on their professional wardrobes than their counterparts in big cities? 213

Summary 214

Questions for Review 215

Problems 215

Answers to In-Chapter Exercises 218

Chapter 8 Explaining Tastes: The Importance of Altruism and other Non-egoistic Behaviour 219

Chapter Preview 220

The Present-aim Standard 220

Example 8.1: Should Mary vote or stay at work? 221

ECONOMIC NATURALIST 8.1: Why are Australians more likely to vote? 221

ECONOMIC NATURALIST 8.2: Is it altruistic to give to the poor? 223

Example 8.2: A utility-maximizing altruist: should Smith give some of his wealth to Jones? 223

Example 8.3: Will Hatfield and McCoy work together? 226

ECONOMIC NATURALIST 8.3: Why do shops exchange faulty goods? 226

ECONOMIC NATURALIST 8.4: Why are tickets for football matches so 'cheap'? 227

Evolution and Preferences 227

ECONOMIC NATURALIST 8.5: Why does peer punishment work in Zurich but not Athens? 231

Sustaining Cooperation 231

Tastes Not Only *Can* Differ, They *Must* Differ 237

ECONOMIC NATURALIST 8.6: Why are so few donations anonymous? 238

Summary 239

Questions for Review 239

Problems 240

Answers to In-Chapter Exercises 241

Chapter 9 Cognitive Limitations and Consumer Behaviour 243

Chapter Preview 244

Bounded Rationality and Two Systems 244

The Difficulty of Actually Deciding 248

ECONOMIC NATURALIST 9.1: Why do real estate agents often show clients two houses that are nearly identical, even though one is both cheaper and in better condition than the other? 249

The Asymmetric Value Function 249

Example 9.1: What contents insurance should Andre get for his flat? 251

ECONOMIC NATURALIST 9.2: Why does it pay to be careful with special offers? 252

ECONOMIC NATURALIST 9.3: Why did spectators at London 2012 not sell their tickets to watch Usain Bolt? 253

Example 9.2: Choice over lotteries with an asymmetric value function 254

ECONOMIC NATURALIST 9.4: Is it better to save lives or sacrifice lives? 255

ECONOMIC NATURALIST 9.5: Why do people buy lottery tickets? 256
Judgemental Bias and Heuristics 256

ECONOMIC NATURALIST 9.6: Why does it not pay to work from home? 257

ECONOMIC NATURALIST 9.7: Why can it make sense to charge a high price? 260

Intertemporal Choice 260

ECONOMIC NATURALIST 9.8: Why do supermarkets put chocolate near the checkout? 263

Nudge and Behaviour Change 263

Summary 265

Questions for Review 265

Problems 266

Answer to In-Chapter Exercise 267

PART 3 The Theory of the Firm and Market Structure 269

Chapter 10 Production 271

Chapter Preview 272

The Input-Output Relationship, or Production Function 272

ECONOMIC NATURALIST 10.1: Why do housewives (and husbands) not get paid? 274

Short Run and Long Run 274

ECONOMIC NATURALIST 10.2: Why does it take so long to produce a blockbuster movie? 275

Production in the Short Run 275

ECONOMIC NATURALIST 10.3: Why can't all the world's people be fed from the amount of grain grown in a single flowerpot? 277

Example 10.1: Maximizing total output (I): should the allocation of boats of a fishing fleet be altered? 281

Example 10.2: Maximizing total output (II): how should the allocation of the boats in a fishing fleet be altered? 282

Example 10.3: What is the optimal amount of time to spend on each exam question? 283

Production in the Long Run 283

Returns to Scale 287

ECONOMIC NATURALIST 10.4: Why do builders use prefabricated frames for roofs but not for walls? 288

Summary 290

Questions for Review 291

Problems 291

Answers to In-Chapter Exercises 293

Appendix 10: Mathematical Extensions of Production Theory 295

The Average-Marginal Distinction 295

Some Examples of Production Functions 298

A Mathematical Definition of Returns to Scale 300

Chapter 11 Costs 303

Chapter Preview 304

Costs in the Short Run 304

Example 11.1: Graphing the total, variable and fixed cost curves 307

Example 11.2: Graphing the average fixed, average variable, average total and marginal costs 310

Example 11.3: Graphing the average total cost, average variable cost, average fixed cost and marginal cost curves 312

The Relationship between MP, AP, MC and AVC 313

Cost Minimization and Allocating Production between Two Processes 314

Example 11.4: What is the least costly way to produce a total of 32 units of output? 315

ECONOMIC NATURALIST 11.1: Why would a bathroom equipment manufacturer bake the image of a housefly onto the centre of its ceramic urinals? 316

Costs in the Long Run 316

ECONOMIC NATURALIST 11.2: Why is gravel made by hand in Nepal but by machine in Europe? 319

ECONOMIC NATURALIST 11.3: Why do unions support minimum wage laws so strongly? 320

Long-Run Costs and the Structure of Industry 324

The Relationship between Long-Run and Short-Run Cost Curves 325

Summary 327

Questions for Review 328

Problems 328

Answers to In-Chapter Exercises 329

Appendix 11: Mathematical Extensions of the Theory of Costs 331

More on The Relationship between Long-Run and Short-Run Cost Curves 331

The Calculus Approach to Cost Minimization 334

Chapter 12 Perfect Competition 341

Chapter Preview 341

The Goal of Profit Maximization 342

Example 12.1: What is a printing company's profit if they own their own printing machine? 343

Example 12.2: If the annual interest rate on cash savings is 5 per cent, how much economic profit will a self-employed developer make? 343

The Four Conditions for Perfect Competition 345

ECONOMIC NATURALIST 12.1: Why are eBay, Alibaba and Amazon marketplaces good for consumers? 347

The Short-run Condition for Profit Maximization 347

ECONOMIC NATURALIST 12.2: Why do North Sea oil operations continue at a loss? 351

The Short-Run Competitive Industry Supply	351
Example 12.3: What is the industry supply curve for an industry with 200 firms?	352
Short-Run Competitive Equilibrium	352
The Efficiency of Short-Run Competitive Equilibrium	355
Producer Surplus	355
Example 12.4: Should the legislature ban fireworks?	357
Adjustments in the Long Run	358
The Invisible Hand	361
ECONOMIC NATURALIST 12.3: Why does an airline ticket from London to Frankfurt cost only €10?	362
The Long-Run Competitive Industry Supply Curve	363
ECONOMIC NATURALIST 12.4: Why do people clean their own toilets?	365
The Elasticity of Supply	366
Applying the Competitive Model	367
ECONOMIC NATURALIST 12.5: Why should we pay farmers to plant hedgerows?	369
ECONOMIC NATURALIST 12.6: Why is self-checkout becoming the norm in shops?	370
Example 12.5: Will EU investment improve the livelihood of poor farmers?	371
<i>Summary</i>	372
<i>Questions for Review</i>	373
<i>Problems</i>	373
<i>Answers to In-Chapter Exercises</i>	375

Chapter 13 Monopoly 377

Chapter Preview	377
Defining Monopoly	378
Five Sources of Monopoly	379
ECONOMIC NATURALIST 13.1: What is a just reward for designing the iPhone or finding a treatment for cancer?	380
The Profit-Maximizing Monopolist	382
Example 13.1: Finding a marginal revenue curve for a given demand curve	388
Example 13.2: What is a monopolist's profit-maximizing price, and how much economic profit is earned?	389
ECONOMIC NATURALIST 13.2: Why is wine more expensive in a restaurant than a supermarket?	390
A Monopolist Has No Supply Curve	392
ECONOMIC NATURALIST 13.3: What is the optimal price for sweets at Legoland Windsor?	393
Adjustments in the Long Run	393
The Efficiency Loss from Monopoly	394
Example 13.3: Will the monopolist introduce a new light bulb that lasts 10,000 hours?	395
Public Policy Towards Natural Monopoly	396
ECONOMIC NATURALIST 13.4: Why have SNCF and Deutsche Bahn not been privatized?	398
ECONOMIC NATURALIST 13.5: Is the EU powerless against Google?	401

Price Discrimination 402

Example 13.4: Finding and graphing the monopolist's quantity and price in the home market 402

ECONOMIC NATURALIST 13.6: Why do some doctors and lawyers offer discounts to people with low incomes? 404

ECONOMIC NATURALIST 13.7: Why do cinema owners offer student discounts on admission tickets but not on popcorn? 404

Example 13.5: What membership fee should a tennis club charge students and faculty? 406

Example 13.6: Why does an executive membership package increase the profits of a tennis club? 408

ECONOMIC NATURALIST 13.8: Is Amazon good for society? 411

Summary 412

Questions for Review 412

Problems 413

Answers to In-Chapter Exercises 415

Chapter 14 Imperfect Competition 417

Chapter Preview 418

Monopolistic Competition 418

ECONOMIC NATURALIST 14.1: How many restaurants does a university town need? 421

ECONOMIC NATURALIST 14.2: Are out-of-town shopping centres a good thing? 422

A Spatial Interpretation of Monopolistic Competition 423

ECONOMIC NATURALIST 14.3: Why are there fewer grocery stores in most cities now than there were in 1930? And why do residential neighbourhoods in Paris have more grocery stores than residential neighbourhoods in Los Angeles? 427

ECONOMIC NATURALIST 14.4: Why does mineral water cost so much in a restaurant? 430

Some Specific Oligopoly Models 432

Example 14.1: Deriving the reaction functions for Cournot duopolists 434

Example 14.2: Finding the equilibrium price and quantity for Bertrand duopolists 435

ECONOMIC NATURALIST 14.5: Why are house prices so high and mortgage rates so low? 436

Example 14.3: Finding the equilibrium price and quantity for a Stackelberg leader and follower 436

Entry Deterrence 439

ECONOMIC NATURALIST 14.6: Why would a firm build a factory with more capacity than it would ever need? 440

Example 14.4: Stackelberg leadership as a sequential game 441

ECONOMIC NATURALIST 14.7: Why are there so many unicorns? 443

Collusion 443

ECONOMIC NATURALIST 14.8: Why do so many firms offer price matching? 445

ECONOMIC NATURALIST 14.9: Why are energy prices artificially high? 445

Advertising 447

ECONOMIC NATURALIST 14.10: Why did a ban on cigarette advertising help the cigarette companies? 447

ECONOMIC NATURALIST 14.11: Why a hotel can benefit if a competitor advertises through an influencer 448

Summary 450

Questions for Review 450

Problems 451

Answers to In-Chapter Exercises 452

PART 4 Factor Markets 453

Chapter 15 Labour 455

Chapter Preview 455

The Perfectly Competitive Firm's Demand for Labour 456

ECONOMIC NATURALIST 15.1: Why do firms benefit from the gig economy? 457

An Imperfect Competitor's Demand for Labour 460

The Supply of Labour 461

Example 15.1: The labour supply curve for someone with a target level of income 463

ECONOMIC NATURALIST 15.2: Why is it so hard to find a taxi on rainy days? 464

Example 15.2: The optimal leisure demand for someone who views income and leisure as perfect complements 465

ECONOMIC NATURALIST 15.3: Why can a tax on the rich harm the poor? 468

The Market Supply Curve 469

Example 15.3: How do rising MBA enrolments affect the salaries and employment of economists in liberal arts schools? 469

Compensating Wage Differentials 471

ECONOMIC NATURALIST 15.4: Why would people who are willing to work in a dusty mine want safety regulations even if it lowers their wage? 473

Monopsony 476

Minimum Wage Laws 479

Labour Unions 481

International Labour Market 483

ECONOMIC NATURALIST 15.5: Why do we buy clothes made in sweatshops? 483

Discrimination in the Labour Market 485

Example 15.4: Why firms cannot discriminate in a competitive market 486

Example 15.5: What wage will economics graduates be paid? 487

Example 15.6: What effect does a productivity test have on wages? 488

Example 15.7: Why do maths graduates get paid more than economics graduates? 489

Winner-Takes-All Markets 490

Example 15.8: Why does the best lawyer get paid a lot of money? 490

ECONOMIC NATURALIST 15.6: Why do chief executives of leading companies earn more than 100 times the average salary? 491

Summary 491

Questions for Review 492

Problems 492

Answers to In-Chapter Exercises 495

Chapter 16 Capital 499

Chapter Preview 500

Financial Capital and Real Capital 500

The Intertemporal Choice Model 501

ECONOMIC NATURALIST 16.1: Why do people simultaneously save for retirement and borrow on credit cards? 508

Example 16.1: Will an increase in the interest rate lead to more saving? 510

The Demand for Real Capital 511

ECONOMIC NATURALIST 16.2: Why is the rent for a property often lower than the mortgage payments for the same property? 512

Interest Rate Determination 513

ECONOMIC NATURALIST 16.3: Why do we get bank runs? 514

The Market for Stocks and Bonds 515

ECONOMIC NATURALIST 16.4: Why are share prices typically more volatile than bond prices? 519

ECONOMIC NATURALIST 16.5: Why is owning stock in a highly profitable company no better than owning stock in a company making normal profit? 519

Economic Rent 521

Exhaustible Resources as Inputs in Production 522

Example 16.2: How much will the price of oil increase if interest rates are 5 per cent? 522

Example 16.3: At what point will oil be used up? 523

Example 16.4: How does a breakthrough in solar power change the price of oil? 525

Summary 526

Questions for Review 526

Problems 527

Answers to In-Chapter Exercises 528

PART 5 Externalities, Public Goods and Welfare 529

Chapter 17 General Equilibrium and Market Efficiency 531

Chapter Preview 531

A Simple Exchange Economy 532

ECONOMIC NATURALIST 17.1: Why should you enter a prize draw to win a Ferrari even if you do not drive? 535

ECONOMIC NATURALIST 17.2: Why is it easier to buy fresh tomatoes in the UK than in Russia? 541

Efficiency in Production 542

Efficiency in Product Mix 544

Gains from International Trade 547

Example 17.1: General equilibrium and market efficiency 548

Taxes in General Equilibrium 549

Other Sources of Inefficiency 550

ECONOMIC NATURALIST 17.3: Why do the latest technology goods sell out so quickly? 551

ECONOMIC NATURALIST 17.4: Why are European countries not nationalizing mobile phone provision? 552

Summary 552

Questions for Review 553

Problems 553

Answers to In-Chapter Exercises 555

Chapter 18 Externalities, Property Rights and the Coase Theorem 557

Chapter Preview 558

Externalities and Market Efficiency 558

Example 18.1: Will your loud music annoy the neighbours? 558

Example 18.2: How loud should Anders play his music? 559

Example 18.3: How loud should Anders play music if he feels guilty about annoying Lars? 560

Example 18.4: What is the efficient amount of electricity in the presence of externalities? 561

ECONOMIC NATURALIST 18.1: Why are footballers paid so much? 562

Example 18.5: Efficiency can be higher with a monopoly supplier if there are externalities 563

The Reciprocal Nature of Externalities 563

Example 18.6: Confectioner is liable for noise damage caused to a doctor 564

Example 18.7: Why can it be efficient for the confectioner to continue operating? 565

Example 18.8: The consequences of a soundproofing device 566

Example 18.9: Negotiation costs can result in inefficient outcomes 567

ECONOMIC NATURALIST 18.2: Why did it take 6 years to build the Channel Tunnel and more than 11 years to build the Channel Tunnel rail link? 568

ECONOMIC NATURALIST 18.3: Why can Austrians not avoid nuclear power? 568

Example 18.10: How students can negotiate asking the lecturer a question 569

Property Rights 569

ECONOMIC NATURALIST 18.4: Why does the law permit airlines to operate flights over private land without permission? 571

ECONOMIC NATURALIST 18.5: Why does the law of trespass not apply in the mountains? 571

ECONOMIC NATURALIST 18.6: Why are property laws often suspended during storms? 572

The Tragedy of the Commons 572

Example 18.11: If village residents make their investment decisions independently, how many of their steers will graze on the commons? 572

ECONOMIC NATURALIST 18.7: Why has Iceland had more success than the EU in maintaining fish stocks? 575

Positional Externalities 575

ECONOMIC NATURALIST 18.8: Why are houses near good schools more expensive? 576
ECONOMIC NATURALIST 18.9: Have students got cleverer during the last 30 years? 577
ECONOMIC NATURALIST 18.10: Why do workers choose zero-hours contracts? 578
Taxing Externalities 579
 Example 18.12: The optimal tax on electricity 579
 Example 18.13: The optimal tax on a confectioner 579
 Example 18.14: Why is a tax on pollution preferable to regulation of pollution? 581
ECONOMIC NATURALIST 18.11: Why should diamond rings be expensive? 583
Summary 583
Questions for Review 584
Problems 584
Answers to In-Chapter Exercises 588

Chapter 19 Government 591

Chapter Preview 591
Public Goods 592
ECONOMIC NATURALIST 19.1: Why do houses rented out to students typically end up in a worse condition than those rented to families? 595
