## WE HAVE EXPANDED OUR TECHNOLOGICAL & INDUSTRIAL CAPACITY AND PROUDLY ANNOUNCE A NEW WATERJET DEPARTMENT AT MARENA INDUSTRIES INC.

Marena Industries, Inc., located in East Hartford, CT. has recently purchased and installed a new Mitsubishi Classica CL 3000 water jet cutting machine. Our machine can cut virtually any material within a 5' x 10' envelope, up to 6" in thickness.

*This includes, but is not limited to:*

- All types of Steel and Alloys
- Aluminum
- Ceramic
- Composites
- Titanium
- Stone, including Granite
- Plastic
- Rubber

Our trained and highly skilled technicians can easily program the CL3000 for short or long running projects. It's a whole new level of growth in achieving value and productivity in processing your parts. We welcome your inquiries in hopes of opening new avenues of business through water jet cutting.

## OUR WATER JET DEPARTMENT IS A CONTINUATION OF MARENA INDUSTRIES INC.'S ALREADY EXTENSIVE INDUSTRIAL SERVICES.

*We specialize in:*

- Contract CNC Machining
- Contract Surface & Slide Way Grinding
- New & Reconditioned Centerless Grinder Workrest Blades
- Shear Knives/Blades
- Lapping/Carrier Plates
- Sales and Purchase of New and Reconditioned Machinery

We have a long tradition in refurbishing and/or rebuilding machine tools throughout the metalworking industry. Your machine is received, disassembled, cleaned and inspected against the original manufacturer's specifications. All major castings are ground and/or scraped to restore proper form, fit and original alignment accuracy. Worn parts are repaired or replaced as required to insure trouble-free operation. Prior to assembly the entire machine is primed and painted to a finish color of your choice. The reassembled machine is then run off to insure that all functions perform correctly and that alignment accuracies have been achieved before shipment.

## The Newest and Finest in Vacuum Pump Protection

**MV Multi Trap®**  
A high-capacity, high conductance trap that protects pumps against corrosive chemicals and abrasive particles in your vacuum system.

**Oil Mist Eliminators**  
Attaches to your pump's exhaust line, directing the exhaust through pleated, low resistance microfiberglass coalescing filters to remove oil mist before it gets into room air.

**MV Posi-Trap®**  
A positive sealed trap that eliminates blow-by, protects your pump from process contamination and your system from oil backstreaming.

**VisiFlow Oil Filtration Systems**  
Compact, self-contained portable system continuously filters mechanical pump fluids, reducing maintenance and prolonging pump and fluid life.

Turn a conventional lift truck into a mobile scale for greater efficiency and tighter inventory control. The Avery Weigh-Tronix QTLTS Forklift Scale System includes a durable, front-mounted scale carriage with accurate Weigh Bar® electronic weight sensors and a choice of two in-cab instruments. The system allows operators to easily and quickly capture weight data en route, without extra steps.
