	Request - Change Renewable Energy Provider Account Number for Customer	
PECO PA	A Specific Samples for CC97	131

ļ-	Version 6.8
	Summary of Changes
August 27, 1999 Version 1.0	 Added note section 3 under Meter Addition and Exchanges, when Meter Read Cycle is changed. Added an example to indicate a Meter Read Cycle change. Removed redlines, performed spell check, formatting changes.
August 31, 1999 Version 1.1	Removed redlines, performed spell check, formatting changes.
October 2, 1999 DRAFT Version 1.1a	 Set realistic dates in DTM*007 dates in Examples Clarified use of DTM*007 Added clarifying note to Unknown LIN05 codes in Notes section Added tables on 2 REF*TD pages stating what changes will ultimately be required by state and implementation date. Clarified PSE&G use of REF*45 Clarified NJ use of capacity and transmission obligation changes
November 4, 1999 Version 1.2	This is a FINAL version for Pennsylvania and New Jersey
November 1999 Draft version 1.2MD1	 Add Maryland use to document – the changes were added to the version 1.2 of the regional standards Add Table of Contents Maryland Open Items AMT*DP – need ability to indicate what taxes the tax exemption percent applies to Need ability to indicate load cycling device Need ability to indicate customer is on special billing cycle (every other month) – APS Can each LDC provide effective date (DTM*007) for day 1?
December 1999 Draft version 1.2MD2	- Several other fields specific utilities were looking into Added Data Dictionary
December 23, 1999 Version 1.2MD3	 Modified Data Dictionary Customer Name and Billing Name length to allow for 60 for Maryland Clarified APS use of N1*2C (Party to Receive Copy of Bills) Added 4 new AMT segments for the Maryland taxes (AAO-Local/County tax, BAK-Franchise tax, F7-State Sales Tax, N8-Environmental tax) Added 2 new AMT segments for Load Management program (L0-Water Heater, 5J-Air Conditioners)
January 17, 2000 Version 1.2MD4	 Add ability for supplier to change billing address if the supplier is providing ESP consolidated bill Added Rejection Reason codes ANQ (Billing Agent not certified by utility) and C02 (customer on credit hold) to support ESP Consolidated Billing in PA Added Rejection Reason code MTI (Maintenance Type Code Invalid)
February 24, 2000 Version 1.2MD5	 Clarified County field for N1*8R for Maryland Added City tax for MD Renumbered items in Data Dictionary for addition of City tax Add REF*TD for City Tax Add REF03 on REF*TD for Load Cycling devices (Air conditioner=AMT*5J, Water Heater=AMT=L0) Required changes for Market Opening for MD: Customer Name (all), Billing Address (all), Interval Detail (for PEPCO, BGE) Allow Load Mgmt device changes to be sent in same LIN loop for MD (AMT*5J and AMT*L0) Clarified use of Old Account Number (REF*45) Correct spelling of PJM LMP Bus Document what DTM*007 means for each LDC in MD

,	Version 6.8
	PA Change Control 011 – Add A91 as valid reject code
March 31, 2000 Version 1.2MD6	 Clarified use of DTM*007 for MD Correct Dual to Rate Ready example to reflect ESP rate code This transaction is considered FINAL for Maryland
March 31, 2000 Version 1.2MD7	Corrected LIN examples from LIN*SH to LIN*1*SH
May 14, 2000 Version 1.3	 Incorporate PA Change Request X020 – Two new REF*7G codes (NCB and NEB) for supplier consolidated billing Incorporate PA Change Request X021 – Correct Notes section on required field when switching from Rate ready to Bill Ready or Bill Ready to Rate Ready Incorporate PA Change Request X022 – Add clarification to Bill Cycle (REF*BF) as it relates to summary billing Incorporate MD Change Control M001 – Several tax exemption segments had been added for MD use. After further review, it was determined they are not needed to support generation charges. As MD was only state using these segments, the segments will be removed from the document. They are AMT*C (City Tax), AMT*BAK (Franchise Tax), AMT*AAO (County/Local Tax) and the AMT*N8 (Environmental Tax) segments. This document is a new finalized version of PA and MD. NJ is still using Version 1.2.
August 11, 2000 Version 1.3a	 REF*BF – modify NJ Use to reflect what use is. Note that had been added for PA was only addressed for PA. Indicate DE Delmarva and MD as same as NJ. Indicate PSEG does not provide Bill Address information (N1*BT). REF*7G responses for CE – Indicate following codes are not valid for NJ: ANQ, NCB, NEB, C02 Change LIN*1 to LIN*23451 to minimize confusion with people thinking this is a counter within the transaction. Incorporate PA Change Control X027 - Modify DTM*007 to indicate this may be sent by a supplier for a N1*BT change if the supplier is providing a consolidated bill.
September 10, 2000 Version 1.4	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware (Delmarva only).
January 10, 2001 Version 2.0	 PSEG CAS changes NJ Notes – added Billing type to LDC changes page 11 REF*BLT (Billing Type) – Changed note page 62 REF*7G (rejection Reason Code) update code "CO2" to also be valid in NJ page 57
October 19, 2001 Version 2.0rev01	 Incorporate PA Change Control 035 – Allow optional inclusion of "A" in REF*03 on REF*TD*N1PK Incorporate PA Change Control 033 – Allow optional inclusion of N1, N3, N4 segments when deleting party to receive copy of notices (REF*TD*N1PK) Incorporate Delaware Electric Coop (DEC) information for Delaware Incorporate PA Change Control 029 – ESP Account number should exclude punctuation, and must include significant leading and trailing zeros. Correct Data Element number (352) for REF03 in REF*BF and REF*SPL segments
December 13, 2001 Version 2.0rev02	Incorporate PA Change Control 038 – add clarification that PPL EU will send an accept transaction for an SNP response. Also, change PPL / PP&L to PPL EU.
January 9, 2002 Version 3.0	Incorporate SMECO specific comments for MD (MD Change Control 003) This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
January 20, 2006 Version 3.0.1D	 Incorporate NJ Change Controls 004 (Update transaction to reflect actual practices) Incorporate NJ Change Control 005 (NJ CleanPower program changes) Incorporate PA Change Control 42 - Modify language throughout EDEWG 814 change, enrollment, & reinstatement transactions to agree with the data dictionary for

	Version 0.8
	the LIN. Wording change is related to removal of word 'obligation' and replacement with 'contribution'.
	 Deleted note in first bullet under General Notes section, Unknown LIN05 codes, PA Rules. Also deleted all references to the SNP code in the REF*7G. The SNP code is not longer be in use by any PA EDC
	 Note: NJ Change Control 004 included ensuring separate boxes for each state's notes. The text of the other state's notes did not change
October 23, 2006 Version 3.0.2D	 Incorporate NJ Change Control 008 to reflect NJ CleanPower – unmetered usage for RECO)
	• Incorporate NJ Change Control 009 to reflect NJ CleanPower change for partial usage.
February 12, 2007	• Incorporate PA Change Control 044 to correct example (REF*RB)
Version 3.0.3F	Considered FINAL for PA and NJ
February 22, 2009 Version 3.0.4D	Incorporate NJ Change Control PSEG-E-Ref45
January 24, 2010 Version 3.1	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
November 4, 2010	Incorporate PA Change Control 060 (Admin/Cleanup for PA)
Version 3.1.1D	• Incorporate PA Change Control 065 (Add REFLF and REFSV to NM1 loop)
	 Incorporate PA Change Control 073 (Modify language throughout EDEWG 814 change, enrollment, & reinstatement transactions to update wording of AMT*KC and AMT*KZ to reflect appropriate PJM terminology. AMTKC = PLC & AMTKZ=NSPL
	Incorporate MD Change Control – Admin (Admin/Cleanup changes for MD)
February 28, 2011 Version 4.0	This transaction is a new FINAL version for Pennsylvania, New Jersey, Maryland, and Delaware.
February 16, 2012	Incorporate PA Change Control 085 (REF*KY)
Version 4.01	• Incorporate PA Change Control 090 (REF03 in REF*KY)
	• Incorporate PA Change Control 093 (Admin Updates)
M 1 0 2012	Incorporate MD Change Control 010 (PEPCO AMI/Smart Meter Support)
March 8, 2013 Version 6.0	Moving to v6.0 to align versions across all transaction sets Classed we reference to Allegham and ABS throughout decreases.
Version 0.0	 Cleaned up references to Allegheny and APS throughout document Incorporate PA Change Control 095 (REF03 in REF*KY)
	 Incorporate PA Change Control 095 (REF03 in REF*KY) Incorporate PA Change Control 096 (clarify AMT*DP)
	Incorporate PA Change Control 097 (PECO Summary/Interval Support)
	 Incorporate PA Change Control 102 (increase REF*BF length in Data Dictionary)
	Incorporate MD Change Control 012 (add NIA to REF02 values in REF*7G)
	Incorporate MD Change Control 014 (make REF*LF & REF*SV same as PA)
March 17, 2014	Incorporate MD Change Control 020 (PHI new CIS, changes to 814C)
Version 6.1	• Incorporate MD Change Control 028 (BGE support of 867IU)
	• Incorporate MD Change Control 030 ((Net Meter Indicator in REF*KY)
	• Incorporate NJ Change Control Electric 015 (Net Meter Indicator in REF*KY)
	• Incorporate NJ Change Control Electric 024 (ACE new CIS, changes to 814C)
	Incorporate NJ Change Control Electric 031 (Rockland removal from IG) A Control Electric 031 (Rockland removal from IG)
F.1. 10 2015	Incorporate NJ Change Control Electric 032 (PSE&G admin updates) Leading Control Electric 032 (PSE&G admin updates)
February 18, 2015 Version 6.2	Incorporate PA Change Control 118 (EGS response optional)
February 5, 2016 6.3	Incorporate PA Change Control 124 (Optional use of AMTKC & AMTKZ)
March 14, 2017 Version 6.4	 Incorporate MD Change Control 044 (Aggregate Net Energy Metering family identifier in REF*AN)
May 18, 2018 Version 6.5	 Incorporate NJ Change Control Electric 041 (Add REF*PG & GII code to REF*7G) Incorporate NJ Change Control Electric 044 (Update REF*KY gray box) Incorporate MD Change Control 050 (Update to REF*KY gray box)
	- meorporate with change control 0.50 (Optiate to KET KT gray 00x)

March 22, 2019 Version 6.6	 Incorporate MD Change Control 054 (Add new REF02 qualifiers to REF*AN Incorporate NJ Change Control NJE048 (End Clean Power Choice program NJ Notes)
March 31, 2020 Version 6.7	 Incorporate PA Change Control 153 (Add new REF02 code CAP to REF*7G) Incorporate NJ Change Control Electric 050 (Remove old list server references)
March 25, 2021 Version 6.8	Incorporate MD Change Control 060v2 (PHI supports change to REF*KY)

	General Notes
Tracking number on Request and Response transactions	On the request, the LIN01 is a unique tracking number for each line item (LIN) in this transaction. This number must be unique over all time, and is assigned by the sender of the request transactions. This number must be returned on the response transaction (accept or reject), in the same element (LIN01).
One Account per 814	One customer account per 814.
Warning, Providing Data without a REF*TD	 Requester should only send data segment(s) that they want changed. Until LDCs have the programming in place to ignore the extra data, they may process the changes regardless of REF*TD being provided for that data segment Example: REF*TD*AMT7N AMT*7N Receiver must process due to REF*TD being present. AMT*KC Receiver may/may not process this segment as a change.
Multiple LINs	There may be multiple detail LIN loops for each customer account.
•	 It is important that the sender order the LIN loops in the order they would like them processed for all primary services. Refer to the LIN segment within this document for a better understanding of primary and secondary services. The sender may send one service per account per 814 instead of using multiple LIN segments.
Response per LIN	There must be one response LIN for each request LIN.
	• These responses may be created and sent at different times in different 814 transactions, but all LINs must be responded to within the time limits set by the Commission. (see Pennsylvania notes section below for additional PA information)
Rejection vs. Acceptance with Status Reason code	A Status Reason code is different than a Rejection Reason code. The Status Reason code is used to give additional information to the receiving party (an FYI). For example, if a request for Historical Usage is sent and the transaction is valid, but historical usage is not available for that customer, the transaction is accepted and a status reason code is provided to explain that the historical usage will not be sent. If a transaction is rejected, the requester is expected to follow up and resubmit; whereas if a transaction is accepted with a status reason code, the requester is not expected to take any further action.
Meter Additions, Removals, Exchanges and Meter Level Information Changes	 Assumptions: There will be only one NM1 Loop per Meter or Unmetered Service (i.e., if a meter has multiple units of measure, they will all be represented within the one NM1 loop). The NM101 indicates the action to be taken for the specified meter If a meter reading date (meter reading cycle) is changed, LDC may need to notify any suppliers of the consequent change in their effective start or end dates. LDC will send these changes (REFTZ, REFBF, and either DTM150 or DTM151) concurrently and along with effective start or end date.
	4. What must be sent?Meter Addition: NM1*MA

REF*TD*NM1MA

All Meter Level Information for the new meter

- Meter Level Information Change:
 - For change in the items listed below:

Load Profile (REF*LO) *

LDC Rate Class (REF*NH) *

LDC Rate Subclass (REF*PR) *

ESP Rate Code (REF*RB)

Meter Cycle (REF*TZ)

The following must be sent:

NM1*MO

REF*TD(s) associated with segment(s) listed above

Item that is changing

- * The Load Profile, LDC Rate Class and LDC Rate Subclass may be sent in combination on one 814 Change transaction or separately.
- For change in the meter attributes listed below:

Meter Type (REF*MT)

Meter Constant (REF*4P)

Number of Dials (REF*IX)

Information Sent on 867 (REF*TU)

The following must be sent:

NM1*MQ

REF*TD*NM1MQ

REF*MT

REF*4P for each Unit of Measure

REF*IX for each Unit of Measure

REF*TU for each Meter Type for each Unit of Measure

- * Note that a change in any one of these attributes requires that all attributes be resent.
- Meter Removal:

NM1*MR

REF*TD*NM1MR

Meter Exchange:

The following must be sent:

NM1*MX

REF*TD*NM1MX (Required for Request, Optional for Response)

REF*MT

REF*4P

REF*IX

REF*TU

REF*LO

REF*NH

REF*PR

REF*RB

REF*TZ

REF*46 (implies meter removed)

- 5. Expectations:
 - Add Meter(s):

One NM1*MA Loop for each meter added

- Meter Level Information Change
- One NM1*MQ Loop with the appropriate change(s) for that meter. Please see

rules regarding which changes may be sent in combination. Remove Meter(s): One NM1*MR Loop for each meter removed 1-to-1 Exchange: One old meter replaced with one new meter One NM1*MX Loop **1-to-2 Exchange**: One old meter replaced with two new meters One NM1*MX Loop, One NM1*MA Loop for the meter being added **2-to-1 Exchange**: Two old meters replaced with one new meter One NM1*MX Loop including the old meter number of the meter exchanged One NM1*MR Loop for the meter being replaced. Use of REF*TD The REF*TD segment is used to indicate to the receiver what type of change to expect. segment At least one REF*TD is required on a Request transaction. The REF*TD(s) may optionally be returned on the Response transaction. The REF*TD will be located in one of two locations within the document. Any field that changes within the Header or LIN level will have the associated REF*TD in the LIN loop Any field that changes within the NM1 loop will have the associated REF*TD in the NM1 loop. Example: If ESP account number is being changed, the document will contain a segment REF*TD*REF11 as well as the associated REF*11 segment with the new ESP Account Number (REF*11*2349710802189) The transaction is intended to have only one change per LIN loop. It is recognized that there Changing related fields are a few fields that must be sent in conjunction with each other to take effect. The only as it relates to one change per LIN valid fields that may be sent in combination are the ones documented here. If any other changes are sent in combination within one LIN/NM1 loop, they may be rejected by the receiving party. Change from DUAL Bill to LDC Rate Ready Following REF*TD codes must be sent: REF*TD*REFBLT, REF*TD*REFPC, REF*TD*REFRB, and REF*TD*AMTDP **Note:** REF*TD*REFRB is in NM1 loop. Following fields must be sent: Bill type (REF*BLT), Bill Calculator (REF*PC), ESP Rate Code (REF*RB), Tax Exemption Percent (AMT*DP). Change from DUAL Bill to LDC Bill Ready Following REF*TD code must be sent: REF*TD*REFBLT Following field must be sent: Bill type (REF*BLT) Change from LDC Rate Ready to DUAL Bill Following REF*TD codes must be sent: REF*TD*REFBLT and REF*TD*REFPC Following fields must be sent: Bill type (REF*BLT), Bill Calculator (REF*PC) LDC will initialize following fields - ESP Rate Code (REF*RB), Tax Exemption Percent (AMT*DP). Change from LDC Bill Ready to DUAL Bill Following REF*TD codes must be sent: REF*TD*REFBLT Following field must be sent: Bill type (REF*BLT) Change from LDC Rate Ready to LDC Bill Ready Bill Following REF*TD code must be sent: REF*TD*REFPC Following field must be sent: Bill Calculator (REF*PC) Change from LDC Bill Ready to LDC Rate Ready Bill Following REF*TD codes must be sent: REF*TD*REFPC, REF*TD*REFRB, REF*TD*AMTDP

	version 0.8
	 Following field must be sent: Bill Calculator (REF*PC), ESP Rate Code (REF*RB), Tax Exemption Percent (AMT*DP)
	• If customer is already LDC Rate Ready, and only the ESP Rate Code (REF*RB) is changing, this may be sent alone. The associated REF*TD will be REF*TD*REFRB.
	• If customer is already LDC Rate Ready, and only the Tax Exemption Percent (AMT*DP) is changing, this may be sent alone. The associated REF*TD will be REF*TD*AMTDP.
Response Transaction	The Change Response Transaction will be formatted as follows:
	 An Accept Response will provide the "Required" fields and the optionally REF*TD(s) from the Request Transaction. It will not provide the segment that was changed.
	 A Reject Response will provide the "Required" fields, the rejection reason and optionally the REF*TD(s) from the Request Transaction. It may also provide, optionally, the segments that were in error.
Adding ESP Account Number	Note that the change transaction may be used to request that the LDC start to carry the ESP account number, if one had not been provided on the initial Enrollment Request transaction.
Interval Summary	 Changing the Summary Interval option requires a separate LIN loop from all other changes. Requires LIN05=SI, whereas all other changes require LIN05=CE
LDC Definitions:	The term LDC (Local Distribution Company) in this document refers to the utility. Each
	state may refer to the utility by a different acronym:
	• EDC – Electric Distribution Company (Pennsylvania, Delaware)
	 LDC – Local Distribution Company (New Jersey)
	EC – Electric Company (Maryland)
ESP Definitions:	The term ESP (Energy Service Provider) in this document refers to the supplier. Each state
	may refer to the supplier by a different acronym:
	EGS – Electric Generation Supplier (Pennsylvania) TREE - This is Boundary of the Company o
	• TPS – Third Party Supplier (New Jersey)
	ES – Electric Supplier (Delaware) ES – Electric Supplier (Man land)
D	ES – Electricity Supplier (Maryland) The Company of the Comp
Renewable Energy Provider Definition:	The term Renewable Energy Provider in this document refers to the party that provides Renewable Energy Credits (RECs). This party does not provide generation to the account.
r iovidei Deimidoli.	Each state may refer to the Renewable Energy Provider by a different acronym:
	GPM – Green Power Marketer (New Jersey)
	Note: The transaction will either have an ESP or a Renewable Energy Provider, but not both.

	Version 6.8
	Pennsylvania Notes
LDC Initiated Changes	If the following fields are changed within the utility's system, a supporting 814 Change document must be sent to the supplier: • LDC account number • Meter read cycle • Customer name • Service Address • Capacity contribution • Transmission contribution
	PECO only - the Capacity and Transmission contribution changes are not sent via EDI 814 Change. Instead PECO updates these values and posts to their electric supplier website. Annual updates are posted in December and updated weekly to add new accounts, corrections, etc.
	All other changes are considered optional upon implementation of version 4010. They may be made mandatory at a later time. Please refer to the two REF*TD pages for the required implementation dates for Pennsylvania.
ESP Initiated Changes	The utilities must support receiving the following changes: • ESP account number
	 Interval data – summary or detail (If utility allows by account number) Billing determinants of Bill type, Bill Calculator, EGS Rate Code (Rate Ready), tax exemption percent (Rate Ready)
Unknown LIN05 codes	If an LDC receives a request for a service that the state does not support, the LDC should reject it with a REF*7G*SDE*SERVICE DOES NOT EXIST
Response Transactions	The EGS has the option of sending 814 change response transactions to the LDC. The 997 Functional Acknowledgement is required by all parties. In the event the EGS opts out of sending the 814 response, the 997 becomes more critical being the proof the EGS processed the utility request.

	Version 6.8
	New Jersey Notes
LDC Initiated Changes	If the following fields are changed within the utility's system, a supporting 814 Change document must be sent to the supplier: • LDC account number • Meter read cycle • Billing cycle • Peak Load Contribution • Network Service Peak Load • Billing Type • Interval data – summary or detail (If utility allows by account number) All other changes are considered optional upon market opening. They may be made
	mandatory at a later time. Please refer to the two REF*TD pages for the required implementation dates for Delaware.
ESP Initiated Changes	 The utilities must support receiving the following changes: ESP account number Billing determinants of Bill type, Bill Calculator, ESP Rate Code (Rate Ready), tax exemption percent (Rate Ready)
Unknown LIN05 codes	If an LDC receives a request for a service that it does not support (whether the state supports it or not), the LDC should accept it, but then send a status code REF*1P*SNP*SERVICE NOT PROVIDED
Rockland Electric Co (RECO)	Rockland Electric Co. does not follow this regional EDI implementation guideline. Instead RECO utilizes the New York EDI standards.
Requesting Summary Only information for Monthly Interval Data	 PSE&G – all interval accounts will receive interval details. Accounts that have both interval and non-interval meters will receive the 867IU with information relating to both interval and non-interval meters. JCP&L and Atlantic City Electric – A supplier can request to receive either interval detail (867IU) or interval summary (867MU) by sending an 814 Change transaction with a LIN loop with LIN05 = SI and REF*17*SUMMARY (for an 867 MU) or a LIN loop with LIN05 = SI and REF*17*DETAIL (for an 867 IU).
Government Energy Aggregation	 The following information pertains to the Government Energy Aggregation for the NJ Electric Utilities The REF*PG segment is required when the customer is being enrolled into GEA program. In the event the Supplier omits the REF*PG in the enrollment request, the enrollment will process as a regular enrollment request. The Supplier may send EDI 814 Change once the customer becomes active. If the 814 Change adding REF*PG is sent while the customer is pending enrollment, the utility will reject the change. The REF03 element containing the BPU Docket Number of the GEA filing is supported as follows PSEG: Optional, will store if sent ACE / JCP&L: Not Used, will not store if sent
NJ Clean Power Choice	Pursuant to Board Order, Docket No. QO18040393, dated June 22, 2018, the Clean Power Choice Program is scheduled to end effective February 28, 2019. The EDI segments and data elements used for Clean Power Choice will remain in the EDI Implementation Guidelines to support any cancel/rebill scenarios or for future use in the event another program is established that may need these data elements.

TO I NT 4
Delaware Notes

LDC Initiated Changes	If the following fields are changed within the utility's system, a supporting 814 Change document must be sent to the supplier: • LDC account number • Meter read cycle • Billing cycle • Peak Load Contribution • Network Service Peak Load
	All other changes are considered optional upon market opening. They may be made mandatory at a later time. Please refer to the two REF*TD pages for the required
	implementation dates for Delaware.
ESP Initiated Changes	The utilities must support receiving the following changes:
	ESP account number
	 Billing determinants of Bill type, Bill Calculator
	 Interval data – summary or detail (If utility allows by account number)
Unknown LIN05 codes	DE (Delmarva) Rules:
	If an LDC receives a request for a service that it does not support (whether the state supports
	it or not), the LDC should accept it, but then send a status code REF*1P*SNP*SERVICE NOT PROVIDED

	Maryland Notes
LDC Initiated Changes	If the following fields are changed within the utility's system, a supporting 814 Change document must be sent to the supplier: • LDC account number • Meter read cycle • Billing cycle • Customer Name • Billing Address • Interval Detail (for BGE and PEPCO only) • Peak Load Contribution • Network Service Peak Load All other changes are considered optional upon market opening. They may be made mandatory at a later time. Please refer to the two REF*TD pages for the required implementation dates for Maryland.
ESP Initiated Changes	The utilities must support receiving the following changes: • ESP account number • Billing determinants of Bill type, Bill Calculator, ESP Rate Code (Rate Ready), tax exemption percentage (Rate Ready) Interval data – summary or detail sent in LIN=SI with REF*17.
Sending of Load Mgmt Device changes	 Maryland will support sending changes for the Load Mgmt devices in the same LIN loop or separate LIN loops. That is, an LDC could send either of the following: one LIN loop with both the REF*TD*AMTL0 and the REF*TD*AMT5J the LDC could send 2 LIN loops, one for the REF*TD*AMTL0 change and one for the REF*TD*AMT5J change
Unknown LIN05 codes	If an LDC receives a request for a service that it does not support (whether the state supports it or not), the LDC should accept it, but then send a status code REF*1P*SNP*SERVICE NOT PROVIDED

How to Use the Implementation Guideline

814 General Request, Response or Confirmation X12 Structure

42	Line Item Transaction Reference Number	Unique Tracking Number for each line item in this transaction. This number must be unique over time.	LIN01		X(20)
43	Generation Services Indicator or Renewable Energy Certificate Service or Summary Interval	Indicates a customer request to switch to the designated ESP / Renewable Energy Provider with which he or she has signed a contract.		LIN02 = SH LIN03 = EL LIN04 = SH	X(2)
44	Action Code	Indicates that the transaction is a request, or whether this transaction has been accepted or rejected.	ASI01= Request: 7 Accept Response: WQ Reject Response: U	LIN: ASI02= 001	X(2)
	Note that the following	REF segments may appear in any order of	n the actual	EDI transactio	n.
50	Reason for Change	Code explaining reason for change. This will apply to changes for all fields, except where the fields reside in the NM1 loop (meter level information)	REF02	LIN: REF01= TD	X(30)
51	Rejection Reason Code	Code explaining reason for rejection.	REF02	LIN: REF01= 7G	X(3)
52	Rejection Reason Text	Text explaining rejection.	REF03	LIN: REF01= 7G	X(80)
53	Status Reason Code	This is used to convey status reason codes on a request and Response to a Request.	REF02	LIN: REF01= 1P	X(3)
54	Status Reason Text	Text to provide status information.	REF03	LIN: REF01= 1P	X(80)
55	ESP Account Number	ESP Customer Account Number	REF02	LIN: REF01= 11	X(30)
56	LDC Account Number	LDC Customer Account Number	REF02	LIN: REF01= 12	X(30)
56.2	LDC Account Number - unmetered	LDC Customer Account Number – Unmetered	REF03	N1: N101 = 8R REF01 = 12 REF03 = U	X(80)
57	Old Account Number	Previous LDC Customer Account Number	REF02	LIN: REF01= 45	X(30)
58	LDC Billing Cycle	LDC Cycle on which the bill will be rendered	REF02	LIN: REF01= BF	X(4)
60	Billing Type	Indicates type of billing - LDC consolidated Billing (REF02=LDC) - ESP consolidated Billing (REF02=ESP) - Dual bills (REF02=DUAL)	REF02	LIN: REF01= BLT	X(4)
61	Billing Calculation Method	Indicates party to calculate bill LDC calculates bill (REF02=LDC) - Each party calculates its portion of the bill (REF02=DUAL)	REF02	LIN: REF01= PC	X(4)

					Version 6.8
62	PJM LMP Bus	Point at which the customer is connected to the transmission grid	REF03	LIN: REF01= SPL	X(80)
63	LDC Budget Billing Status	Transmits the current budget billing status shown for this customer on the LDC system.	REF02= Y or N	LIN: REF01= NR	X(1)
64	Interval Level Indicator	Indicates the level of information the ESP will receive for an interval metered account. (REF03=SUMMARY) information, or detail and summary (REF03=DETAIL) information for an interval usage account. For PECO this is Account-Level Detail data only. (REF03=METERDETAIL) information for an interval usage account at meter level (PECO only)		LIN: REF01= 17	X(7)
65	Special Meter Configuration Code	Used to convey there's a special meter present on the account. For example, Net Metering	REF02	LIN: REF01 = KY	X(3)
66	Special Meter Configuration Information	PPLEU-used to report the max K1 (demand) the special meter supports	REF03	LIN: RF01 = KY	X(80)
66.1	Aggregation Code	Used to indicate the customer is being enrolled into GEA program (NJ Only)	REF02	LIN: REF01 = PG	X (3)
66.2	Aggregation Information	PSEG NJ Only – OPTIONAL BPU Docket Number of applicable GEA filing.	REF03	LIN: REF01 = PG	X (80)
67	Change Effective Date	The date that this change will take or has taken effect	DTM02	LIN: DTM01= 007	9(8)
68	Service Period Start	Date on which energy is expected to flow to this customer for the designated ESP.	DTM02	LIN: DTM01= 150	9(8)
69	Service Period End	Date on which energy is expected to stop flowing to this customer from the designated ESP.	DTM02	LIN: DTM01= 151	9(8)
	Note that the following A	AMT segments may appear in any order or	n the actual	EDI transaction	on.
70	Participating Interest	Percent of the customer's load the ESP is requesting service for. If an ESP is only responsible for half of the customer's eligible load, the amount .5 will be returned.	AMT02	LIN: AMT01= 7N	9(1).99999
71	Eligible Load Percentage	Percent of the customer's load that is eligible for competition. For example, if 2/3 of the customer's load is eligible, the amount .66667 will be returned.	AMT02	LIN: AMT01= QY	9(1).99999
72	Percent Tax Exemption	Customer's Tax Exemption Percentage - Residential usually 100% (send 1), Commercial/Industrial - anything other than 0% requires you secure tax exemption certificate. (e.g., if 50% send .5)	AMT02	LIN: AMT01= DP	9(1).9(4)

73					
	State Sales Tax Exemption	Customer's state sales tax exemption. Anything other than zero, supplier is required to secure tax exemption percent. If 100% tax exempt, send 1.	AMT02	LIN: AMT01= F7	9(1).9(4)
74	Air Conditioners in Load Management Program	Number of air conditioners that are part of load cycling program	AMT02	MT02 LIN: AMT01= 5J	
75	Water Heaters in Load Management Program	Number of water heaters that are part of load cycling program	AMT02	LIN: AMT01= L0	9(2)
76	Peak Load Capacity	Peak load contributions provided to PJM for Installed Capacity calculation (coincident with PJM's peak)	AMT02	LIN: AMT01= KC	9(9).99
77	Network Service Peak Load	Customer's peak load contribution provided to PJM for the transmission service calculation (coincident with LDC peak)	AMT02	LIN: AMT01= KZ	9(9).99
79	Meter Maintenance Code	Code explaining level of meter change; i.e., specific meter related, applies to all meters, or applies to unmetered portion of account	NM109= [meter number] or UNMETER ED or ALL	NM101= MA, MQ, MR, or MX NM102= 3 NM108= 32	X(80)

				<u>_</u>	cision 0.6
	The following thr	ree fields each require that the Meter Type	e be shown in 1	REF03:	
91	Meter Constant/Meter Multiplier	Some factor multiplied by the meter reading to give billed usage.	REF02	NM1: REF01= 4P REF03 = Meter Type (See REF*MT)	9(9).99
92	Number of Dials / Digits and related decimal positions	Needed to determine usage if meter reading rolls over during the billing period. Number of dials on the meter displayed as the number of dials to the left of the decimal, a decimal point, and number of dials to the right of the decimal.	REF02	NM1: REF01= IX REF03 = Meter Type (See REF*MT)	9.9
93	Type of metering used for billing	Indicates the type of metering information that will be sent on the 867 transaction.	43	NM1: REF01 = TU REF03 = Meter Type (See REF*MT)	X(2)

ST Transaction Set Header **Segment:**

010 **Position:**

Loop:

Level: Heading **Usage:** Mandatory

Max Use:

Purpose:

To indicate the start of a transaction set and to assign a control number

Syntax Notes:

Semantic Notes: The transaction set identifier (ST01) is used by the translation routines of the

interchange partners to select the appropriate transaction set definition (e.g., 810

selects the Invoice Transaction Set).

Comments:

PA Use:	Required
NJ Use:	Required
DE Use:	Required
MD Use:	Required
Example:	ST*814*000000001

Must Use	Ref. <u>Des.</u> ST01	Data Element 143	<u>Name</u> Transaction Set Identifier Code	<u>X12</u> M	Attributes ID 3/3
			Code uniquely identifying a Transaction Set 814 General Request, Response or Co	onfirmation	
Must Use	ST02	329	Transaction Set Control Number	M	AN 4/9
			Identifying control number that must be unique within the transaction by the originator for a transaction set	on set function	al group assigned

Segment: BGN Beginning Segment

Position: 020

Loop: Level:

Heading Mandatory

Usage: Max Use: 1

Purpose: To indicate the beginning of a transaction set
 Syntax Notes: 1 If BGN05 is present, then BGN04 is required.
 Semantic Notes: 1 BGN02 is the transaction set reference number.

2 BGN03 is the transaction set date.

3 BGN04 is the transaction set time.

4 BGN05 is the transaction set time qualifier.

5 BGN06 is the transaction set reference number of a previously sent transaction affected by the current transaction.

Comments:

Comments.	
PA Use:	Required
NJ Use:	Required
DE Use:	Required
MD Use:	Required
Request Example:	BGN*13*199904011956531*19990401
	(Note: BGN06 not used in the request.)
Response Example:	BGN*11*199904020830531*19990402***199904011956531
	(Note: BGN06 is optional on the response.)

- 13 If either LIN28 or LIN29 is present, then the other is required.
- 14 If either LIN30 or LIN31 is present, then the other is required.

Semantic Notes: Comments:

1 LIN01 is the line item identification

1 See the Data Dictionary for a complete list of IDs.

2 LIN02 through LIN31 provide for fifteen different product/service IDs for each item.

For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU. **UIG Notes:** Version 4010 restricts the use of LIN03 to identify the product (electric vs. gas) and LIN05 to identify the service being requested. For example, LIN*23451*SH*EL*SH*CE indicates that the product is electric and 'generation services' is the service being requested. Multiple LINs may be sent to request multiple services for one account. Other examples: LIN*23451*SH*EL*SH*HU\ requests historical usage of electric service LIN*23451*SH*GAS*SH*MI\ requests meter information on the gas service PA Use: Request: Required Accept Response: Required Reject Response: Required if it was provided on the request.

NJ Use: Same as PA

DE Use: Same as PA

MD Use: Same as PA

Examples: LIN*CHG1999123108000001*SH*EL*SH*CE

Segment: ${f REF}$ Reference Identification (TD=Reason for Change)

Position: 030
Loop: LIN
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To specify identifying information

Syntax Notes: 1 At least one of REF02 or REF03 is required.

If either C04003 or C04004 is present, then the other is required.
 If either C04005 or C04006 is present, then the other is required.

Semantic Notes: 1 REF04 contains data relating to the value cited in REF02.

Comments:

Notes: This convention of the REF segment is used for account maintenance, to convey change reason codes. The codes used in REF02 are maintained by the UIG. The first portion of the code identifies the segment that contains the data that has been changed; the remaining portion of the code identifies the relevant code qualifier for the data that has been changed. The changed data will appear in the appropriate element of the identified segment. For example, a REF02 code of AMT7N indicates that data in the AMT segment that is identified by the qualifier 7N (i.e., Percentage of Service Supplied) has been changed to the value now shown in AMT02. PA Use: Request: Required if change is at an account (LIN) or header level Response: **Optional** NJ Use: Same as PA **DE Use:** Same as PA MD Use: Same as PA **Example:** REF*TD*REFBLT REF*TD*N1PK*D

	Ref.	Data		
	Des.	Element	<u>Name</u>	X12 Attributes
Must Use	REF01	128	Reference Identification Qualifier	M ID 2/3

Code qualifying the Reference Identification

7G Data Quality Reject Reason

Reject reasons associated with a reject status notification.

Rules for Rejection Reason Codes

The codes on the next several pages have been identified to convey rejection reasons. Only the codes listed for each service are valid for that service.

"A13" (Other) must **only** be used when an existing error code does not convey the reason correctly. Each time "A13" (Other) is used for a new purpose, the utility must inform the EDI working group who will determine whether a new code is needed.

					Version 6.8
Must Use	REF02	127	Reference Identification	X	AN 1/30

Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier

008	Account exists but is not active
A13	Other

REF03 Required. Send email to edewg@ls.eei.org each

time A13 is used for a new purpose.

A76 Account not found

This includes invalid account numbers as well as no

account number being found.

A84 Invalid Relationship (not ESP of record)
A91 Service is not offered at customer's location

Service is not offered at customer's location For instance, used to indicate that this is a gas only

account, no electric service exists on the account.

ABN Duplicate request received

ANL Service provider not licensed to provide requested

service

Also used if supplier sends billing address change, and

is not the billing agent.

ANQ Billing Agent not certified by utility

Not valid in NJ

API Required information missing (REF03 Required)
CAP Invalid Bill Type or Rate Code for CAP Customer

PA – Duquesne Light & FirstEnergy only

C02 Customer on Credit Hold

Valid in PA and NJ when consolidated bill requested for customer who has been switched to DUAL billing due to delinquencies when making the other party whole.

C11 Change reason (REF*TD) missing or invalid
C13 Multiple Change Request Not Supported
FRB Incorrect Billing Option (REF*BLT) Requested
FRC Incorrect Bill Calculation Type (REF*PC) Requested

GII Government Energy Aggregation Information Invalid/Missing

Valid in NJ Only

MTI Maintenance Type Code (ASI02) invalid

NCB EGS not certified to provide requested bill option

Not valid in NJ

NEB Customer not eligible for requested bill option

Not valid in NJ

NIA Not Interval Account SDE Service Does Not Exist

PA Rules: Used ONLY when the LDC receives a

request for a service that the **state** does not support. REF*1P*SNP is used if the LDC receives a request that

the state supports, but the LDC does not.

NJ Rules: In NJ it is valid to use the REF*1P*SNP at

AN 1/80

X

this time.

UND Cannot identify ESP UNE Cannot identify LDC

W05 Requested Rate not found or not in effect on the

requested date (Rate Ready Only).

A free-form description to clarify the related data elements and their content

Description

Optional

REF03

352

Used to further describe the Rejection Reason Codes sent in REF02. Codes "A13" and "API" require text explanation in this element.

.5	.66667	.33333 (33%)

Segment: AMT Monetary Amount (DP=Tax Exemption Percent)

Position: 060
Loop: LIN
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To indicate the total monetary amount

Syntax Notes: Semantic Notes: Comments:

PA Use:

This field is used for the non-billing party to tell the billing party the tax exemption amount that should be entered into the billing party's system in order to calculate a bill on the sender's behalf. This is required only for rate-ready LDC Consolidated billing where the LDC has loaded the ESP rates into their system, the LDC calculates the ESP charges, and places the ESP charges on the LDC bill. The following generic rules are offered to better explain the use of the segment for PA:

- Residential customers default to '1' (AMT*DP*1~) as 100% tax exempt unless the residence is used for business purposes or vacation home.
- Commercial customers default to '0' (AMT*DP*0~) being 0% tax exempt unless the customer presents a sales tax exemption certificate. Should the customer have a tax exemption percentage less than 100% but greater than 0%, the value would be reported as a decimal (AMT*DP*.5~). A tax exemption certificate must be secured from the customer.

It's the ESP's responsibility to ensure the value in the AMTDP is accurate based on the customer's tax status. Under Rate Ready billing, correcting inaccurate customer bills due to incorrect tax exemption is not the LDC's responsibility and in most cases requires the Supplier to address directly with the customer.

LDC to ESP Request:

Not Used Not Used

Response:

Optional

ESP to LDC Request: Accept Response:

Optional Optional

Reject Response:

Same as PA

Note: Since rate must include taxes, ESP should always set this to 100% tax exempt in NJ.

DE Use:

NJ Use:

Same as PA

MD Use:

Not Used

Maryland tax exemptions apply to a specific tax. Each tax has a separate AMT segment. The current applicable tax is State Sales tax (AMT*F7)

Examples:

AMT*DP*.75

AMT*DP*.7599

X AN 2/80

Code identifying a party or other code

Meter Number

UNMETERED – for Unmetered Services

ALL – for ALL meters on the Request Transaction ("ALL" is only valid for a Meter Level Information Change). Used to change information that is transmitted at the meter level, but applies to "ALL" meters for this customer, i.e., REF*LO, REF*NH, REF*PR, REF*TZ, REF*RB

Position: 130
Loop: NM1
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To specify identifying information

Syntax Notes: At least one of REF02 or REF03 is required.

If either C04003 or C04004 is present, then the other is required. If either C04005 or C04006 is present, then the other is required.

Semantic Notes: REF04 contains data relating to the value cited in REF02.

Comments:

Comments:					
UIG Notes:	This convention of the REF segment is used for Account Maintenance and Update transactions, to convey meter-level and entity relationship change reason codes. The codes used in REF02 are maintained by the UIG. The first portion of the code identifies the segment that contains the data that has been changed; the remaining portion of the code identifies the relevant code qualifier for the data that has been changed. The changed data will appear in the appropriate element of the identified segment. For example, REF02 code of REFVR indicates that data in the REF segment that is identified by the qualifier VR (i.e. Meter Installer) has been changed to the value now shown in REF02 of the REF*VR segment.				
PA Use:	Request:	Required if change is at a meter level			
	Response:	Optional

				Meter Type		
Must Use	REF02	127	Reference Ide	ntification	X	AN 1/30
			Reference informa	tion as defined for a particular Transaction Set or a	s specified l	w the Reference

Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier

When REF01 is MT, the meter type is expressed as a five-character field. The first two characters are the type of consumption, the last three characters are the metering interval. "COMBO" is used for a meter that records more than one measurement. Valid values can be a combination of the following values:

Type of Consumption Metering Interval

K1	Kilowatt Demand	Nnn	Number of minutes from 001 to 999
K2	Kilovolt Amperes Reactive Demand	ANN	Annual
K3	Kilovolt Amperes Reactive Hour	BIA	Bi-annual
K4	Kilovolt Amperes	BIM	Bi-monthly
K5	Kilovolt Amperes Reactive	DAY	Daily
KH	Kilowatt Hour	MON	Monthly
T9	Thousand Kilowatt Hours	QTR	Quarterly

For Example:

KHMON Kilowatt Hours Per Month

K1015 Kilowatt Demand per 15 minute interval **Other Valid Codes**

COMBO

This code is used to indicate that the meter has multiple measurements, e.g., one meter that measures both kWh and Demand.

Optional

REF03 352 Description

X AN 1/80

A free-form description to clarify the related data elements and their content Atlantic City Electric, Delmarva DE, PEPCO MD & Delmarva MD Use: As of 4/1/12, will send 'SMART' in the REF03 to denote meter is an AMI/Smart meter.

PECO PA Use: When REF01 is MT, valid values for REF03 are:

I – Interval data available

M – Interval data NOT available

Position: 130
Loop: NM1
Level: Detail
Usage: Optional
Max Use: >1

Purpose: To specify identifying information

Syntax Notes: 1 At least one of REF02 or REF03 is required.

REF*4P*100*K1MON

If either C04003 or C04004 is present, then the other is required.
If either C04005 or C04006 is present, then the other is required.

Semantic Notes: 1 REF04 contains data relating to the value cited in REF02.

Comments:

Comments.				
PA Use:	There will be one REF*4P segment for each Meter Type. This means that there may be more than one REF*4P segment per meter. For instance, when meter type is "COMBO", there may be a REF*4P to indicate the meter constant for the demand (example: REF*4P*1200*K1015) and a REF*4P to indicate the meter constant for the kWh (example: REF*4P*2400*KH015).

Example: PHI Companies 814 Change for Special Meter Configuration (REF*KY)

PHI Companies (Delmarva MD, Delmarva DE, PEPCO MD, PEPCO DC and Atlantic City Electric can only pass an A in the REF*03 segment for REF*02 = KY. The following are the scenarios...

- Non net energy meter exchanged for a net energy meter NM1MR change request will be sent with the meter being removed and NM1MA change request will be sent with the new meter. NM1MA will indicate REFKY = NETMETER.
- Net energy meter exchanged for a net energy meter NM1MX change request will be sent with old and new meters. NM1MX will indicate REFKY = NETMETER.
- Non net energy meter exchanged for a non-net energy meter NM1MX change request will be sent with old and new meters.
- Net energy meter exchanged for a non-net energy meter NM1MR change request will be sent with the meter being removed and NM1MA change request will be sent with the new meter.
- Net energy meter added to an account that already has a net energy meter NM1MA change request will be sent with new meter. NM1MA will indicate REFKY = NETMETER.
- Multiple net energy meters on an account and one is removed NM1MR change request will be sent to indicate the meter being removed.

Example as part of a Meter Exchange to Add Net Meter
