### How and why to use payroll results?

- Posting run fills planning cluster
- For future periods, this can be based on a simulation
- Very tempting: looks accurate and no little extra config

### The downside:

- If all comes from payroll, dependencies are not ,known' to cost planning, so detail planning won't work
- Master data and configuration for the whole planning period must be available so payroll can run
- Performance issues (may run for hours or even days)
- You may not have payroll for all countries running in SAP

### Blended solution

· Often some elements are taken from PAST payroll results (e.g. overtime) as basis for forecast

# **Data Collection for Employee**

- Run Report (transaction PHCPDCEM)
- Data collection
  - ▶ Infotype 0008 basic pay
  - ▶ Infotype 0015 Additional Payments
- View Infotype 0666 "Planning of Pers. Costs"
- Manipulate data (transaction PHCPDCUI)
- Delete data basis (transaction PHCPDCDL)

Slide 17

## **Organisational Data**

### ■ Data collection methods

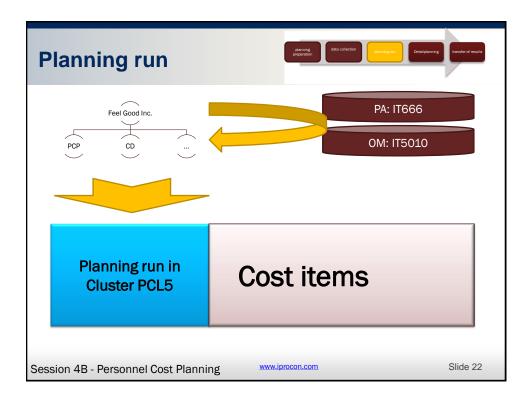

- ▶ Infotype 1005 planned compensation
- ▶ Data from connected objects (e.g. averages)
- ▶ Data for vacant positions
- ▶ Data from quota planning
- ► TEM (Training cost)
- ► Custom data (Enhancement)

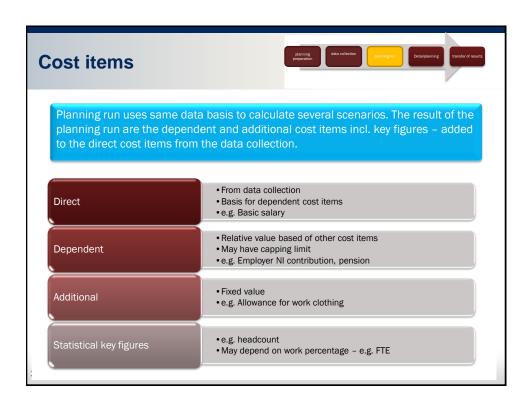

Session 4B - Personnel Cost Planning

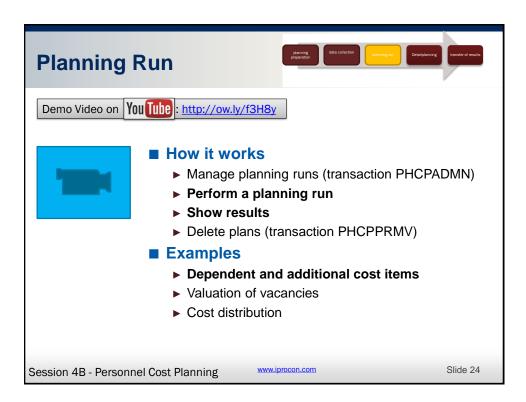

www.iprocon.com

Putting a £-Sign to Vacancies			
Infotype "Planned Compensation" (Positions)	Jobs	Occupier	
Transparent	Transparent	No data maintenance	
High data maintenance effort	Low data maintenance effort	Several cost items	
One cost item only	Possibly several cost items	Not transparent	
	Requires proper job catalogue

## **Transfer of plans**

- Transfer into CO module
  - Cost items are linked to symbolic accounts
  - Symbolic accounts linked to GL accounts
  - Activity types only possible via modification
- Creating budgets (CO as well as compensation management)
- Transfer into BI

  - ▶ Preparation
  - ▶ Data collection
  - ► Planning run
  - ▶ Detail planning and data transfer
- **■** Selected Best practices

Session 4B - Personnel Cost Planning

www.iprocon.com

# Selected Best Practices - Absence Valuation - Plan vs. Actual: rolling forecast - Accumulate cost items - Manual maintainance of infotype 5010 Simplifying the process Higher quality in the results

# Valuation of absences

# SAP standard can consider absences

- But deletes all cost items for absence period of defined absences
- In some cases, you want only some cost items deleted or change valuation

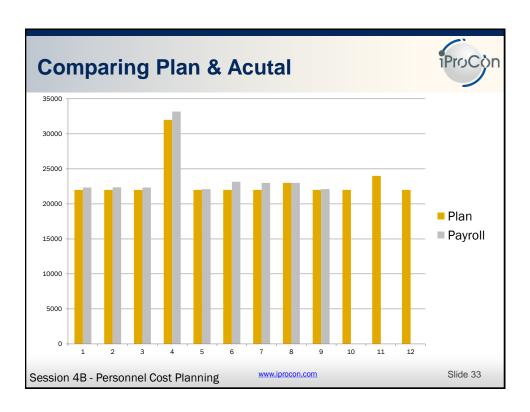

## **Custom solution:**

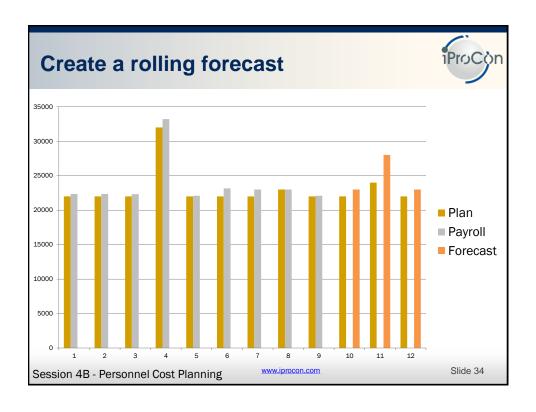

- Selectively delete or change cost items in absence periods
- BAdI HRHCPOO\_DC\_COSTITEMS

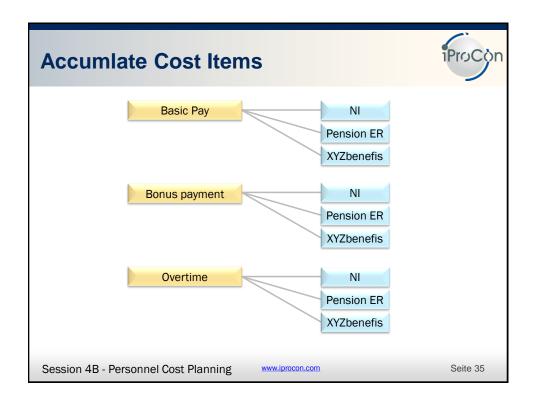

Session 4B - Personnel Cost Planning

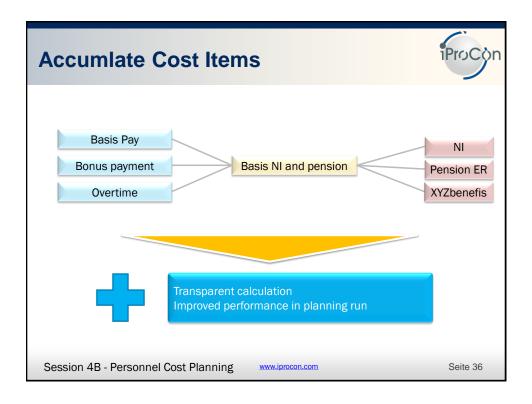

www.iprocon.com

# **Manual Maintenance of Infotype 5010**

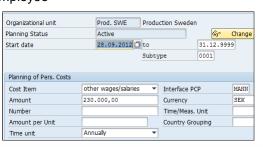

# Some elements difficult to forecast based on existing HR data

- E.g. overtime depends on future business volume more than data from past
- Requires judgement from line manager
- ▶ Based on business data like sales forecasts
- ▶ Not assigned to particular employee

### ■ Pragmatic solution:

- Estimate overtime volume and capture it directly in IT 5010 for department
- ► Also applicable for training cost, recruitment cost, entertainment,...

www.iprocon.com

### **Further Proven Enhancements**

### **Recruitment Wave**

### Simulated leavers

- By age
- According to contract end date in infotype 0016

### **Integrating pensioners**

• In SAP standard, they are not part of OM and therefore excluded from cost planning

### **UK pension schemes:**

• Custom data collection method for infotype 0071

### Get overtime and shift allowances from payroll

 Selective reading of payroll results – may even shift to different periods (e.g. for overtime at Easter)

### UK NI calculation and BUPA without using payroll results

**Integration into Processes & Forms**

# **Project examples**

Client	Scope	Time / effort
Chemicals, 1,000 staff, UK + German subsidiary	Pragmatic implementation incl. detail planning and BI, but no line manager involvement	<ul><li>10 weeks</li><li>15 consultant days</li></ul>
Bank, Germany, 4,000 staff	Complex implementation incl. detail planning with line managers and 3 <sup>rd</sup> party CO interface	<ul><li>9 months</li><li>60 consultant days</li></ul>
International organisation, 2,000 staff	Complex implementation with many bespoke planning elements (e.g. recruitment wave)	- 6 months - 50 consultant days
IT service provider, 800 staff	Building a pragmatic pilot without line manager involvement	<ul><li>2 weeks</li><li>5 consultant days</li></ul>
Group of universities, >50,000 staff	Full redesign and performance optimisation	- 3 months - 20 consultant days
