TEMPO[®] ULTRA WP INSECTICIDE

For Pest Management Professionals and commercial use only. For broad-spectrum control of crawling, flying, and wood infesting insect pests for indoor and outdoor surfaces, as well as insect pests of trees, landscape ornamentals and residential and commercial lawns.

ACTIVE INGREDIENT: B-Cyfluthrin, cyano(4-fluoro-3- phenoxyphenyl)methyl 3-(2,2-dichloroethenyl)-	
2,2-dimethylcyclo-propanecarboxylate	. 10%
OTHER INGREDIENTS:	. 90%
	1000/

STOP - Read the label before use. Keep out of reach of children.

IN CASE OF MEDICAL, ENVIRONMENTAL, OR TRANSPORTATION EMERGENCIES OR INJURIES, CALL 1-800-334-7577 (24 HOUR/DAY) For Product Information, Call Toll Free: 1-800-331-2867

See inside leaflet for complete First Aid Instructions, Precautionary Statements, Directions for Use and Storage and Disposal Instructions.

BACKED by BAYER.

FIRST AID	
lf on skin	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.
lf inhaled	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
lf in eyes	Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If swallowed	 Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything to an unconscious person.
	ct container or label with you when calling a poison control center or for treatment. You may also contact 1-800-334-7577 for emergency

medical treatment.

Note To Physician: No specific antidote is available. Treat the patient symptomatically.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Harmful if swallowed, inhaled or absorbed through the skin. Do not get in eyes, on skin, or on clothing. Avoid breathing dust or spray mist. Wash thoroughly with soap and warm water after handling. Remove contaminated clothing and wash before reuse.

Wear safety glasses, goggles, or face shield when handling the undiluted material and wear a respirator when making general surface overhead treatments indoors. Do not allow children or pets to enter treated areas until surfaces are dry.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Remove from premises or tightly cover fish tanks and disconnect aerators when applying indoors where such containers are present. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Apply this product only as specified on this label. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems.

This pesticide is highly toxic to bees exposed to direct treatment or residues on crops or weeds. Do not apply

TEMPO® ULTRA WP insecticide or allow it to drift onto crops or weeds on which bees are actively foraging. Additional information may be obtained by consulting your Cooperative Extension Service.

PRO FACTS • Quick Knockdown & Residual Control • Low Odor • Non-staining • No phytotoxicity on a wide range of ornamentals	
TEMPO ULTRA WP	Wettable powder containing 10% beta-cyfluthrin
CONTROLS	Indoor Pests General Household Pests Pantry and Stored Product Pests Outdoor/Perimeter Pests Outdoor/Perimeter Pests Wood-Infesting Pests Turf and Omamental Pests For list of specific insects, see inside.

(Continued)

PRO FACTS (Continu	ed)
WHERE TO APPLY	 Apply where pests have been seen or found, or can find shelter. In and around buildings and structures On residential, commercial and recreational areas of turf On ornamentals in landscapes and interior plantscapes
COVERAGE	 Makes up to 42 gallons of finished spray solution for indoors. (420 g size) Treats up to 84,000 square feet. outdoors. (420 g size)
MIXING INFORMATION	 Mix the appropriate amount of TEMPO ULTRA WP with water. May tank mix with other pesticides currently registered for similar uses, unless specifically prohibited.
HOW TO APPLY	 General surface spot, mist, or crack & crevice application. Broadcast application to turf and foliar application to ornamentals.
RE-APPLY	 Every 7 to 10 days, if needed. For turf, reapply if needed, but not more than 6 times per year.
APPLICATION RESTRICTIONS	 Do not water the treated area to the point of run-off. Do not make applications during rain. All outdoor applications must be limited to spot or crack- and-crevice treatments only, except for the following permitted uses: Treatment to soil or vegetation around structures; Applications to lawns, turf, and other vegetation; Applications to building foundations, up to a maximum height of 3 feet. Other than applications to building foundations, all outdoor applications to building such as sidewalks,

(Continued)

PRO FACTS (Continued)	
APPLICATION RESTRICTIONS	driveways, patios, porches and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack- and-crevice applications, only. • Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.
RE-ENTRY	 Avoid contact with treated surfaces until dry. People and pets may re-enter after the treated area is dry.
QUESTIONS	For questions or comments, call toll-free 1-800-331-2867.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

IMPORTANT: Read entire label and Conditions of Sale before using this product. Do not formulate this product into other end-use products.

STRUCTURAL PESTS

FOR RESIDUAL PEST CONTROL IN AND AROUND BUILDINGS, STRUCTURES, FOOD/FEED HANDLING ESTABLISHMENTS AND MODES OF TRANSPORT

Use TEMPO ULTRA WP as a general surface, spot, mist, or crack and crevice treatment in and around buildings and structures. This includes schools, factories, stores, warehouses, hospitals, food processing facilities, and modes of transport. For a list of common facilities where this product may be used, see Appendix.

INDOOR PES	TS (Continued)
INDOOR PESTS (Continued) RESTRICTIONS • Do not treat entire area of floor or floor coverings. • Do not apply where electrical short circuits can occur. Use dust or dry bait in these areas. • Do not apply in occupied hospital and/or nursing home roo Occupants may return when surfaces have dried. • Do not apply in occupied classrooms. • Do not apply in occupied classrooms. • Do not apply to furniture or upholstery where prolonged contact by humans will occur. • Do not apply as a space spray.	
ADDITIONAL	DIRECTIONS FOR FOOD AND FEED HANDLING ESTABLISHMENTS
WHERE TO APPLY	Applications may be made to both food/feed and non-food areas of food and feed handling establishments. Food/feed handling establishments are defined as places other than private residences in which exposed food/feed is held, processed, prepared, or served. Includes areas for: • receiving, storing and packing (canning, bottling, wrapping, boxing) food • preparing food • enclosed processing systems (mills, dairies, edible oils, syrups) of food. Serving areas where food is exposed and the facility is in operation are also considered food areas.
USE RATE	 Apply as a general surface spot, mist, or crack & crevice application. 0.025% 10 g (2 scoops) /gallon water 0.05% 20 g (4 scoops) /gallon water Use high rate for severe infestations, faster knockdown, and longer residual.
	8 (Continued)

ΔΠΠΙΠΠΟΝΔΙ	DIRECTIONS FOR FOOD AND FEED HANDLING ESTABLISHMENTS (Cont)
HOW TO APPLY (Also see INDOOR PESTS)	Encertions for front or the induction destruction in the structure
APPLICATIO	IN FOR INDOOR PESTS
GENERAL HOUSEHOLI PESTS Cockroache Crickets, Silverfish, Spiders, an others	and eaves. Treat areas where pests normally feed or hide such s, as baseboards, corners, around water pipes, under refrigerators, cabinets, sinks, and stoves, being sure to spray cracks & crevices. Spot treat floror or ugs beneath furniture, in closets,
ANTS	 Apply to ant trails on walls, tile, baseboards, around pipes, under cabinets, and other places where ants are active. Treat entry points such as windows and doors and the outdoor perimeter. For best results, treat nests when possible.
	g (Continued)

APPLICATION FOR IN	DOOR PESTS (Continued)
PANTRY AND STORED PRODUCT PESTS	 For best results, clean area before treating. Remove and destroy intested food. Discard food accidentally contaminated with spray. For cupboards, shekimg, or food storage areas: Remove utensils, exposed food, shelf paper, and other items before spraying. When dried, cover shelves with clean paper before replacing items.
COMMERCIAL STORED PRODUCT PESTS	 Commercial storage or transportation: Clean and treat warehouses, production facilities, storage areas, rail cars, truck beds, and other areas where products are stored before filling with the product.
PESTS IN AIRCRAFT	 For use only in aircraft cargo holds
PESTS IN LIVESTOCK HOUSING STRUCTURES including poultry houses & pet kennels	 Apply as a general surface and/or a crack and crevice syray. For best results, clean facilities before applying and treat outdoor perimeter areas. Do not apply indoors where animals other than cattle or horses are present. Do not apply to animal feedstuffs or watering equipment.
FLYING INSECTS	Apply to surfaces where pests collect or rest.

(Continued)

OUTDOOR/PERI	METER PESTS (Continued)
WHERE TO APPLY	 Apply where pests have been seen or found, or can find shelter. Apply to buildings, porches, patios, garages, fences and other areas where pests are found. To prevent infestation, treat the building foundation, walls, and around doors, windows, and sofflis where pests are active or may enter or hied, also treat the soil, turf, or other substrates adjacent to buildings.
USE RATE	 10 to 20 g (2 to 4 scoops)/1000 square feet See Table 1 for mixing directions. For fire ants and flying pests 0.025%10 g (2 scoops)/gallon water 0.05%20 g (4 scoops)/gallon water 0.05%20 g (4 scoops)/gallon water Always use the high rate for fire ants, bees, wasps, yellow jackets and hormets. Use high rate for severe infestations, faster knockdown, and longer residual.
HOW TO APPLY (Also see APPLICATIONS FOR OUTDOOR/ PERIMETER PESTS)	Perimeter Treatment: To help prevent infestation of structures, treat area adjacent buildings in a band up to 10 feet wide. Also treat the building foundation to a height of 2 to 3 feet in areas where pests are active or can find entrance. Apply just enough dilution to adequately cover the area without excessive dripping or runoff. Volume can vary depending on the surface bype treated. For example, mulch requires more spray than bare soil. If mulch is heavy, rake it back to expose soil before treating.
WHEN TO APPLY	When pests are seen or found Re-apply every 7 to 10 days if needed.
MIXING INFORMATION	Add product when filling spray tank with water; shake or agitate mixture.
	(Continued)

OUTDOOR/PERIMETER PESTS (Continued)		
MIXING INFORMATION	 Diluted spray mixture can be stored overnight. Agitate before using. Can be tank mixed with other pesticides currently registered for similar uses: To be sure of physical compatibility, first prepare a sample in a small jar using the proper proportions of water and products. Follow the most restrictive of labeling directions and precautions. Do not exceed label rates.

(Scoops of TEMPO ULTRA WP)		=	Percent Concentration
(Gallons of fin	ished spray) x 75.7	-	I GIGGIN ODIGGINATION

APPLICATION	FOR OUTDOOR/PERIMETER PESTS
ANTS	Locate and treat ant nests, if possible. Follow trails of foraging workers, check under objects near the structure, and inspect other likely nest sites. If ants are nesting in the soil, thoroughly drench or inject the nest and surrounding soil. Treat ant trails around windows and doors, along sidewalks, or other areas where seen. Apply a perimeter treatment as described above.
BEES, WASPS, Yellow Jackets, Hornets	Use Rate: 0.05% concentration Make pin stream applications directly to the nests. To help avoid stings treat nests in the evening when the insects are inside the nest. For best results, check nests within one or two days to ensure complete kill. Remove and destroy treated nests to prevent merry encore of newly hatched insects, secondary pest problems, and possible staining from honey. If removal is not possible, retreat nests if necessary.
BOXELDER BUGS	Apply directly to boxelder bugs that have congregated around doors and windows and similar areas where they may enter structures. Apply perimeter treatment as described above. For best results, treat infested trees early in the season. Tree spraying may require ormamental license - check with your local regulator.
CENTIPEDES, MILLIPEDES, PILLBUGS, SOWBUGS	Apply perimeter treatment to reduce the number of insects from entering the structure. Thoroughly treat mulched areas. Reduce moisture areas from around the structure.

۲

(Continued)

APPLICATION	FOR OUTDOOR/PERIMETER PESTS (Continued)
FIRE ANTS	Use Rate: 0.05% concentration Thoroughly drench or inject the entire mound. When using injection treatment, you must treat the bottom of the mound. Apply dilution or feam using a downward and upward motion of the injector tool. For complete distribution, inject in several points throughout the mound. Treat new mounds as they appear. Do not use in pastures or areas of food crop production.
FLEAS & TICKS	Make a perimeter treatment, concentrating on areas where pets rest or run. For ticks, treat likely harborage areas like along paths, tall grass and other vegetation. For best results, treat the entire area where ticks could be present. Begin treating in the spring. Ticks may be re-introduced from surrounding areas by host animals. Continue treating until frost to control both larvae and adult ticks.
FLIES	Use Rate: 0.025% to 0.05% concentration Apply low-volume mist or spray to outside surfaces of buildings, porches, patios, garages, fences, and other areas where flies rest. CLUSTER FLIES: Treat in late summer or fall, just before flies begin looking for winter shelter. Spray siding, eaves, around windows and doors, window screens, and attics. To help reduce infestations, treat cracks and crevices, attics and other indoor winter hiding places. Note: Cluster flies may appear during winter warm spells, while snow is still on the ground.
MOSQUITOES	Spray around landscape plants, turf and ground cover, under decks, around building foundations and other places where mosquitoes may rest.
SCORPIONS	Treat around piles of firewood and other areas where scorpions may hide. When possible, remove piles of materials that can harbor the pests. Apply a perimeter treatment.

	STRUCTURAL PESTS			
WOOD-INFESTING	PESTS			
<u>Beetles</u> Ambrosia Deathwatch False powderpost	Old house borer Powderpost	Carpenter ants Carpenter bees	<u>Termites</u> Subterranean Formosan Drywood	
WHERE TO APPLY	Apply where pests have been seen or found, or can find shelter.			
USE RATE	0.05% 20 g (4 sco	oops)/gallon water		
HOW TO APPLY (Also see Application section)	Apply spray or foam as described in application section. Avoid contact with treated surfaces until dry.			
WHEN TO APPLY	When pests are seen or found Re-apply every 7 to 10-days if needed.			
MIXING INFORMATION	 Add product when filling spray tank with water; shake or agitate mixture. Diluted spray mixture can be stored overnight. Agitate before using. Can be tank mixed with other pesticides currently registered for similar uses. To be sure of physical compatibility, first prepare a sample in a small jar using the proper proportions of water and products. Follow the most restrictive of labeling directions and precautions. Do not exceed label rates. Exam applications: Mix end-use dilution with manufacturer's recommended volume of foaming agent for 0.025% to 10.05% concentration. 			

	ADDI JOATION FOR WOOD INFECTING PECTO		
	APPLICATION FOR WOOD-INFESTING PESTS		
CARPENTER	In houses and other structures: Apply around doors and windows and other places where carginenter ants may enter. Spray or foam into cracks & crevices, or spray, mist or foam through small drilled holes into voids where ants or nests are present. Use enough spray or foam to cover the area. Do not exceed 1 gallon of dilution per 1000 square feet. Inside trees, utility poles, fencing and decking materials and similar structural members: Drill to find the interior infested cavity and inject dilution or foam using an appropriate treatment tool with a splashback guard. Junneling in soil Apply as a soil drench or inject the dilution or foam in the soil at intervals of 8 to 12 inches. Use 1 gallon of dilution per 8 square feet. Establish a uniform vertical barrier at the edge of walls, driveways or other hard surfaces where ants are tunneling beneath the surfaces. Protecting firewood from cargenter ants: Treat soil beneath firewood before stacking at 1 gallon of dilution per 8 square feet. Do not treat firewood with this product.		
CARPENTER BEES	In structures: Spray or foam directly into gallery entrance holes. Leave entrance open for 24 hours to be sure that returning adult bees are killed. When there is no activity, the hole may be sealed with a suitable sealant.		
WOOD- INFESTING BEETLES	On surfaces in homes, apartments, and other structures for small areas, brush or syrary evenly on word surfaces. For large or overhead areas, thoroughly cover wood surfaces with a coarse spray. Protect surfaces below the treated area from accidental dripping by covering with disposable plastic sheeting or other material that can be thrown away after treatment. In localized areas: Apply dilution or foam to voids and galleries in damaged wood, in spaces between wooden structural members,		

16

(Continued)

ADDI IGATION FOR WOOD INFECTING DECTS (Continued)		
	ATION FOR WOOD-INFESTING PESTS (Continued)	
WOOD-INFESTING BEETLES	and between the sill plate and foundation. Apply to inaccessible areas by drilling, and then injecting, spraying, or misting the dilution or foam into the damaged wood or wall voids.	
DRYWOOD AND ABOVE-GROUND SUBTERRANEAN TERMITES	This type of application is intended to be a supplemental treatment for control of drywood and above-ground subterranean termites and other wood-infesting insects. In localized areas: Apply dilution or foam to voids and galleries in damaged wood, to spaces between wooden structural members, and between the sill plate and foundation. Apply to inaccessible areas by drilling, and then injecting, spraying, or misting the dilution or foam into damaged wood or wall voids. <u>Swaming or reproductive stages:</u> Apply dilution to the swarm or area on which the termites collect. Make applications to attics, crawl spaces, unfinished basements or man-made voids with a coarse fan spray to control exposed reproductive forms of termites. Above-ground termites inside trees, utility poles, fencing and decking materials and similar structural members: Drill to find the infested cavity and inject dilution or foam using an appropriate to with a splashback guard. Termite carton nests: Inject dilution or foam into building voids or the cavities using a pointed injection tool. Several injection points to varying depths may be needed. For best results, remove carton nest material when possible. Protecting firewood from termites: Treat soil beneath firewood before stacking at 1 gallon of dilution per 8 square feet. Do not treat firewood with this product.	

TURF PESTS			
TEMPO ULTRA WP controls designated pests on landscape and recreational turf.			
TURF PESTS	USE RATE		
Ants Grasshoppers Armyworms Japanese beetles (adult) Crickets Sod webworms Cutworms Ticks (including deer tick Earwigs	5 to 10 grams (1 to 2 scoops) per 1000 square feet or 7.7 to 15.4 oz per acre Use high rate for severe infestations, faster knockdown, and longer residual.

APPLY turf grown for research, other commercial use. Not for use on golf cour Apply where pests have Permitted areas include business complexes, ap parks, playgrounds, rec	For use on landscape and recreational turfgrass. Not for use on turf grown for research, commercial seed production, sale, or other commercial use. Not for use on golf course turf. Apply where pests have been seen or found, or can find shelter. Permitted areas include but are not limited to: Home lawns, business complexes, apartment buildings, airports, cemeteries, parks, playgrounds, recreational fields, institutional grounds, athletic fields, and other landscape turf grass.		

(Continued)

	TURF PESTS (Continued)
HOW TO APPLY (Also see Application For turf pests)	Use an accurately calibrated sprayer. Apply uniformly using spray nozzles with a coarse droplet size such as flood jet nozzles. Keep children and pets off treated areas until lawn has dried.
WHEN TO Apply	Apply when pests first appear. Reapply as needed based on pest reinfestation. Do not treat more than 6 times per year. Consult your state Cooperative Extension Office for the specific timing in your area.
MIXING INFORMATION	 Add product when filling spray tank with water; shake or agitate mixture. Diluted spray mixture can be stored overnight. Agitate before using. Can be tank mixed with other pesticides currently registered for similar uses. Pollow the most restrictive of labeling directions and precautions. Do not exceed label rates. COMPATABILTY: Compatible with commonly used fungicides, mitcides, liquid fertilizers and other insecticides. To be sure of physical compatibility, first prepare a sample in a small jar using the proper proportions of water and products.
RESTRICTIONS	 Do not apply this product by aerial application or by any type of chemigation system. Do not apply when the average wind speed is greater than 15 mph. Do not allow drift onto ponds, streams, or lakes. Do not apply when utry grass areas are water logged or the soil is saturated with water (i.e., will not accept irrigation).

APPLICATION FOR TUP	RF PESTS		
ARMYWORMS, CUTWORMS, SOD WEBWORMS	Do not water or mow for at least 24 hours following application.		
BILLBUGS	Apply when adults first appear in the spring. In temperate climates, this application will also control overwintering chinch bugs.		
CHINCH BUGS	For best results, water the turf immediately after application to aid in the penetration of the active ingredient into the thatch laver where chinch buos dwell.		
TICKS (Including ticks that transmit Lyme Disease and Rocky Mountain Spotted fever)	For best results, treat the entire area where ticks could be present. Begin treating in the spring. Ticks may be reintroduced from surrounding areas by host animals. Continue treating until frost to control both larvae and adult ticks.		
ORNAMENTAL PESTS			
TEMPO ULTRA WP controls designated pests on trees, shrubs, foliage plants and flowers in outdoor landscaped areas and interior plantscapes where these plants are grown.			
Ants Aphids Armyworms Azalea caterpillars Bagworms Black vine weevil (adul Boxelder bugs	Bristly rose slugs Budworms California oakworms Casebearers Casebearers t) Clover mites Cockroaches	Crickets Cutworms Em leaf beetles Elm spanworms *Emeraid Ash Borer (Adult) Flea beetles Flies	

* For emerald ash borer, make a minimum of two applications per season. The first application should be made in late-Maylearly June, or when adult beetles begin flying. Subsequent applications should be made approximately one month after the previous application.

ORNAMENTAL PESTS (Continued)

WHERE TO APPLY	Use in landscapes and interiorscapes. Permitted areas include but are not limited to: Parks, recreational areas, athletic fields, institutional grounds, hotels, mails, office buildings, and airports. Not for use on plants or turf grown for research, commercial seed production, sale, or other commercial use. Not for use in greenhouses or nurseries. Apply where pests are seen, have been found, or can find shelter among trees, shrubs, evergreens, ground covers, flowers, and foliage plants. No phytotoxicity has been observed on a wide range of ornamentals tested under various environmental conditions. If in doubt, first try this product on a small sample.			
USE RATE	55 to 190 grams TEMPO ULTRA WP per 100 gallons of water Use high rate for severe infestations, faster knockdown, and longer residual.			

(Continued)

ORNAMENTAL PESTS (Continued)		
HOW TO APPLY (Also see APPLICATION FOR ORNAMENTAL PESTS)	Apply as a dilute spray just to the point of run-off but do not allow excess run-off. For hard-to-wet foliage such as holly, pine or ivy, adding a spreader/sticker may enhance knockdown and residual activity. For best results, spray thoroughly for good coverage including the underside of leaves for pests that feed or rest there. Spray plants in bloom at time when pollinating insects are not present, such as early morning or late evening.	
WHEN TO APPLY	 Apply when pests first appear. Reapply as needed based on pest infestation. Consult your state Cooperative Extension Office for the specific timing in your area. 	
MIXING INFORMATION	 Add product when filling spray tank with water; shake or agitate mixture. Diluted spray mixture can be stored overnight. Agitate before using. Can be tank mixed with other pesticides currently registered for similar uses. Follow the most restrictive of labeling directions and precautions. Do not exceed label rates. COMPATABILTY: Compatible with commonly used fungicides, miticides, liquid fertilizers and other insecticides. To be sure of physical compatibility, first prepare a sample in a small jar using the proper proportions of water and products. 	
RESTRICTIONS	 Do not apply to any food crop. Do not allow drift onto ponds, streams or lakes. 	

APPLICATION FOR ORNAMENTAL PESTS	
ANTS, CRICKETS, SPIDERS, MIDGES, WASPS AND FLIES	Apply as a general spray, concentrating on damp areas beneath shrubbery, around foundations and in areas of tall grass or weeds in ornamental areas and areas adjacent to buildings.
BAGWORMS	Spray when bagworms first begin to hatch. If possible, apply directly to the larvae. Young larvae are easier to control.
BLACK VINE WEEVIL (adult)	Use rate: 75 to 190 grams per 100 gallons of water. Apply as needed when adults and damage are first noticed in spring and at 3 to 4 week intervals while weevils and notching are observed. Addition of a spreader/sticker at recommended rates may enhance control of insects on certain species of ornamentals having difficult to wet foliage.
COCKROACHES	Spray hiding or resting places such as under shrubbery, in ground covers and mulching materials, in hollow trees, etc.
SCALE (CRAWLERS)	Spray thoroughly, including foliage, trunk, limbs, and twigs.

STORAGE A	AND DISPOSAL	
Do not con	Do not contaminate water, food, or feed by storage or disposal.	
Storage:	Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, or feed. Protect from freezing. Store in original containers and out of the reach of children, preferably in a locked storage area. Handle and open container in a manner as to prevent spillage.	
Pesticide Disposal:	 Pesticide wastes are hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. 	

(Continued)

STORAGE A	ND DISPOSAL (continued)		
Pesticide Disposal:	 If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. 		
Container Disposal:	 Non-refiliable container. Do not reuse or refill this container. Offer for recycling if available. Offer for reconditioning, if appropriate, Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ½ full with water and recap. Shake for 10 seconds. Pour finsate into application equipment or a mix tank for store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Do not use container in connection with food, feed, or drinking water. Dispose of container in connection with food, feed, or drinking water. Dispose of container in connection grand participation. Or puncture and dispose of container in a sanitary landfill, or by incineration, or, if allowed by state and local authorities by burning. If burned, stay out of smoke. 		
Spills:	If the container is leaking or material is spilled for any reason or cause, carefully sweep material into a pile. Refer to Precautionary Statements on label for hazards associated with the handling of this material. • Do not walk through spilled material. • Dispose of as directed for pesticides above. • Keep unauthorized people away. • You may contact the Bayer Emergency Response Team for decontamination procedures or any other assistance at 1-800-334-7577.		

IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once.

By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

CONDITIONS: The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness or other unitended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control Bayer CropScience LP. All such risks shall be assumed by the user or buyer.

DISCLAMER OF WARRANTIES: TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BAYER CROPSCIENCE LP, MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABLITY OR OF FITNESS FOR A PARTICULAR PUPPOSE OR OTHERWISE, THAT EXTEND BEYOND THE STATEMENTS MADE ON THIS LABEL. No agent of Bayer CropScience LP is authorized to make any warranties beyond those contained herein or to modify the warranties contained herein. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, Bayer CropScience LP discistents any liability whatsbever for special, incidental or consequential damages resulting from the use or handling of this product.

LIMITATIONS OF LIABILITY: TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER FOR ANY AND ALL LOSSES, INJURIES OR DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, WHETHER IN CONTRACT, WARRANTY, TORT, NEGLIGENCE, STRICT LIABILITY OR OTHERWISE, SHALL NOT EXCEED THE PURCHASE PRICE PAID, OR AT BAYER CROPSCIENCE LP'S ELECTION, THE REPLACEMENT OF PRODUCT.

Do not con	taminate water, food, or feed by storage or disposal.
Storage:	Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, or feed. Protect from freezing. Store in original containers and out of the reach of children, preferably in a locked storage area. Handle and open container in a manner as to prevent spillage.
Pesticide Disposal:	 Pesticide wastes are hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
Container Disposal:	 Non-refiliable container. Do not reuse or refill this container. Offer for recycling, if available. Offer for reconditioning, if appropriate, Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Do not use container in connection with food, feed, or drinking water. Dispose of container by offering for recycling or reconditioning. Or puncture and dispose of container in a sanitary landfill, or by incineration, or, if allowed by state and local authorities by burning. If burned, stay ut of smoke.
Spills:	If the container is leaking or material is spilled for any reason or cause, carefully sweep material into a pile. Refer to Precautionary Statements on label for hazards associated with the handling of this material. • Do not walk through spilled material. • Dispose of as directed for pesticides above. • Keep unauthorized people away. • You may contact the Bayer Emergency Response Team for decontamination procedures or any other assistance at 1-800-334-7577.
