### OSHA Permissible Exposure Limits

Chemical Name	OSHA PEL	ACGIH TLV (TWA)
-	-	-

The TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equaled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak" is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

**Respiratory Protection:** Not applicable under normal conditions

**Emergency and First Aid Procedures**

**1- Skin:** Discontinue use of product. Apply cold compresses to affected areas to relieve any discomfort. If discomfort persists, you should contact a physician.

**2 - Eyes:** Immediately flush with clean, lukewarm water (low pressure) occasionally lifting eyelids. Seek medical attention if irritation develops.

**3 - Inhalation:** If respiratory irritation occurs, remove individual to fresh air.

**4 - Ingestion:** Accidental ingestion of product may necessitate medical attention. In case of accidental ingestion dilute with fluids (milk or water). Do not induce vomiting.

## Section 5: Fire-Fighting Measures

**Extinguishing Media:** Carbon dioxide, dry chemical, foam, or water spray.

**Fire Fighting Procedures:** Contact emergency personnel. Use self-contained breathing apparatus and full protective gear, if large quantities of product are involved.

**Unusual Fire Fighting Procedures:** None

## Section 6: Accidental Release Measures

**Environmental Precautions:** N/A

**Methods for cleaning up:** Soak up with absorbent materials and wash with water; place in non-leaking containers for appropriate disposal.

## Section 7: Handling and Storage

**Ventilation:**

No ventilation requirements

**Storage:**

Store upright at room temperature. In order to maintain product quality do not store near heat source or in direct sunlight.

**Other Precautions:** Avoid bacterial contamination. Keep containers tightly closed when not in use.

## Section 8: Exposure Controls/Personal Protection

**OSHA Permissible Exposure Limits**

Chemical Name	OSHA PEL	ACGIH TLV (TWA)
Isopropyl Alcohol (67-63-0)	400 ppm (ST) 500 ppm	200 ppm (ST) 400 ppm

The TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equaled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak" is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

**Respiratory Protection:** Not applicable under normal conditions

**Skin Protection:**

Resistant Plastic or rubber gloves (optional)

**Eye Protection:**

Safety glasses or goggles. (optional)
