# IWI **ISRAEL** WEAPON INDUSTRIES

The success of a manufacturer is measured by its longevity. 2020 marks IWI's 87th year as a global leader in firearms design and production.

Since its inception, IWI has worked in close collaboration with the Israeli Defense Forces to produce innovative, premier quality weapons that function in even the harshest battlefield conditions. Just as the soldiers of the IDF are conditioned to perform and succeed anytime, anywhere and in every situation, so are its weapons of choice. IWI is proud to set the standard of weapons chosen by the IDF and many other military and law enforcement agencies worldwide, who trust us to protect them at every crucial moment. The research and developmental partnership between the IDF and IWI continues as we develop new, cutting-edge weapons for personal defense and the global war on terror. As 2020 marks a new decade of technological innovation, IWI is proud to present MASADA striker-fired pistol (9X19mm), the TAVOR TS12 tactical shotgun and the TAVOR 7 bullpup rifle (7.62X51mm).

IWI is regarded worldwide for its excellence as a producer of assault rifles, light machine guns, precision sniper rifles, sub-machine guns, grenade launchers and pistols.

Names like TAVOR, X95, GALIL-ACE, GALIL Sniper, DAN.338, JERICHO and UZI serve daily as a reminder to all their users of our mission of security and reliability for which we strive. Our products, created to MIL-STD and ISO 9000 Standards, continue to be proven on and off the battlefield around the world.

Our superb design and manufacturing processes have garnered us a reputation of prestige, particularly in the United States. In 2014, the TAVOR was awarded the NRA's American Rifleman Golden Bullseye Award for "Rifle of the Year". In 2017, Shooting Illustrated awarded the X95 the Golden Bullseye for "Rifle of the Year".

The stringent standards to which our firearms are held make them the perfect choice for gun matches, long-range precision competition and pistol matches. Most importantly, they are the ideal choice for personal defense. The JERICHO and MASADA are perfect for EDC—every day carry. It is the reliability you can depend on.

IWI is a proud member of the SK Group— a privately held technology and innovation holding company specializing in global frontline defense, para-military solutions, marine infrastructures and property development. With a history of research, development and manufacturing spanning over 85 years, the SK Group provides small arm systems, electro-optic and laser solutions, imaging systems, naval solutions and more. Drawing on Israel's innovation and field-proven solutions, SK's companies offer an unparalleled track-record of technology, experience and excellence.

# CHOOSE YOUR STYLE

HAMMER OR STRIKER

## JERICHO

One of the most popular and respected hammer pistols in the world with a variety of features and models to create outstanding performance and reliability

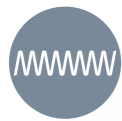

## MASADA

Striker fired pistol with fully ambidextrous controls and enhanced ergonomics which provide a natural and instinctive pointing grip angle

Pistol: MASADA ORP  
Sight: MEPRO microRDS  
Shirt: by Sparta Tactical

# STRIKER — FIRED PISTOL MASADA

-  9X19mm
-  104mm Barrel Length
-  640g / 655g

# MASADA PISTOL

Created to withstand the rigors of combat and to earn a soldier's trust for its reliability, the MASADA is an ideal pistol for competition and more importantly, personal safety. **IWI, TRUST IT.**

The 9X19mm MASADA pistol was developed to provide an advanced solution to modern battlefield requirements. More than just another striker-fired pistol, the polymer framed MASADA features a low-profile barrel to reduce perceived recoil. Fully ambidextrous slide-stop lever and magazine release for the 17 + 1 magazine along with enhanced ergonomics to provide a natural, instinctive, pointing grip.

Three interchangeable wrap around back-straps coupled with the deep beavertail enable the MASADA pistol to fit most hand sizes.

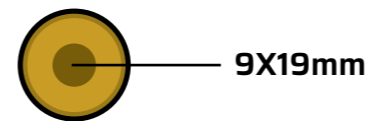

The MASADA features a polygonal rifled, cold hammer forged barrel with 1:10 RH twist rate. The frame is made of high strength, impact resistant fiberglass reinforced polymers. A lower Picatinny rail allows you to attach a weapon mounted light or laser. Like all IWI firearms, it is built to function reliably anywhere, anytime and in every situation. Ruggedly built, it will withstand the resulting abuse of battlefield conditions.

The MASADA's trigger is designed to enhance the shooter's accuracy and safety. The trigger pull averages 5.5 to 7 lb. with a clean, crisp break with a positive reset. Utilizing a built-in trigger safety, the pistol will not fire unless the trigger is pulled. The shooter's personal safety is further enhanced as there is no need to pull the trigger to break down the weapon for cleaning and maintenance. It utilizes a modular serialized high-grade steel trigger mechanism housing that can be easily removed.
