

United States Department of Agriculture

Plants for Planting Manual

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of any individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, SW., Washington, DC 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

The opinions expressed by individuals in this report do not necessarily represent the policies of the U.S. Department of Agriculture.

Purpose

The *Plants for Planting Manual* provides the background, procedures, and reference tables for regulating imported material of plants and vegetative parts that are for or capable of propagation, including buds, bulbs, corms, cuttings, layers, pollen, scions, seeds, tissue, tubers, and like structures.

The plants and vegetative parts from the countries of origin listed in this manual are regulated because just one destructive pest might be enough to start a pest outbreak that can cause millions of dollars in damage to crops, trees, flowers, or lawns. By their destructiveness, pests can increase the price and reduce the quality of food, lower property values, and ruin recreational areas. The extinction of just one plant species does away with the aesthetic, ecological, educational, historical, recreational, commercial, and scientific value of our world.

Scope

What the Manual Covers

The *Plants for Planting Manual* covers all imported regulated plants and plant parts that are for or capable of propagation, including buds, bulbs, corms, cuttings, layers, pollen, scions, seeds, tissue, tubers, and like structures.

The manual is divided into the following chapters:

- ◆ [Introduction](#)
- ◆ [General Restrictions](#)
- ◆ [Specific Restrictions](#)
- ◆ [Plants for Planting from Canada](#)
- ◆ [Postentry Quarantine](#)
- ◆ [Lists of Plants for Planting](#)
- ◆ [Plants in Growing Media Programs](#)
- ◆ [Preclearance Programs](#)
- ◆ [Protected Plants](#)

The manual includes the following appendixes:

- ◆ [Plant Inspection Stations](#)
- ◆ [Regulatory Action](#)
- ◆ [Forms](#)

The manual includes a [Glossary](#).

The [Introduction](#) provides basic information about the *Plants for Planting Manual*. This chapter includes the manual's purpose, scope, users, and application; a list of related documents that provide the authority for the manual's content; directions for using the manual; conventions (unfamiliar or unique symbols and highlighting) that appear throughout the manual; and contact information for problems with or suggestions for the manual.

The [General Restrictions](#) chapter provides the general requirements for importing plants for planting into the United States.

The [Specific Restrictions](#) chapter provides the specific requirements and restrictions for individual plants for planting taxa. [Specific Restrictions](#) are in addition to [General Restrictions](#).

The [Plants for Planting from Canada](#) chapter provides information about exemptions, requirements, and specific conditions for importing plants for planting from Canada.

The [Postentry Quarantine](#) chapter provides postentry requirements for certain plants for planting in the [Postentry Quarantine Program](#).

The [Lists of Plants for Planting](#) chapter provides alphabetized lists of regulated propagative material, prohibitions, specific requirements or restrictions, and authorities **other than** 7 CFR 319.37.

The [Plants in Growing Media Programs](#) chapter provides information about programs for plants for planting that are approved to be imported in approved growing media.

The [Preclearance Programs](#) chapter provides information about regulating bulbs and underground portions of dormant perennials and includes a list of species and genera of plants with structures that may be considered for Preclearance.

The [Protected Plants](#) chapter provides some information about plants for planting that are protected by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) or the Endangered Species Act (ESA) or both.

What the Manual Does Not Cover

The *Plants for Planting Manual* **does not** cover the following:

- ◆ Fresh, cut portions of plants imported for decoration or ornamentation, and are **not** for propagation (see the *Cut Flowers and Greenery Manual*)
- ◆ Fruits and vegetables intended for consumption (see the FAVIR and the *Fruits and Vegetables Manual*)
- ◆ Herbarium specimens (see the *Miscellaneous and Processed Products Manual*)
- ◆ Processed articles of plant and non-plant sources that might serve to introduce exotic pests and parasites (see the *Miscellaneous and Processed Products Manual*)
- ◆ Sprouting seeds for consumption and are **not** intended for planting or seeding (see the *Seeds Not for Planting Manual*)
- ◆ Unprocessed seeds imported for consumption, and are **not** intended for propagation (see the *Seeds Not for Planting Manual*)

Users

The *Plants for Planting Manual* is written for use by the following regulatory officers who work at airport, maritime, and land border locations:

- ◆ Customs and Border Protection (CBP) Officers
- ◆ CBP Agriculture Specialists (AS)
- ◆ Plant Protection and Quarantine (PPQ) Officers

The experience level of users will vary, but the assumption is that the officers minimally have a working knowledge of using PPQ's import manuals to make regulatory decisions.

Domestic, port, and international PPQ Officers and other PPQ regulatory officials reference this manual to answer questions related to importations that are asked by the public, importers, brokers, and other interested parties.

Importers and the general public may use this manual as a reference for current plants for planting import conditions and restrictions.

Related Documents

Authority

Enabling legislation provides the authority to carry out the mission of protecting American agriculture from plant pests. Legislative Acts are the fundamental authority granted by Congress to the Secretary of Agriculture to promulgate regulations to protect American agriculture. The regulatory authority for taking actions listed in this manual is contained in the following:

- ◆ [Code of Federal Regulations](#)
- ◆ [Plant Protection Act](#)
- ◆ [Federal Import Orders](#)
- ◆ [Federal Register Notices](#)
- ◆ [Final Rules](#)

Plant Protection Act

The Plant Protection Act (PPA), 7 USC 7701, Title IV, provides the authority to prohibit or restrict imports, exports, or interstate movement of plant pests, plants, plant products, noxious weeds, biological control agents, and means of conveyance.

Code of Federal Regulations

The Code of Federal Regulations (CFRs) provide the authority for the regulatory action taken and are enforced by CBP and PPQ.

7 CFR—Subpart Plants for Planting

The restrictions and prohibitions listed in this manual are covered by 7 CFR Subpart H—Plants for Planting.

7 CFR 319.37-1 (a-b) states that:

(a) Under section 412(a) of the Plant Protection Act, the Secretary of Agriculture may prohibit or restrict the importation and entry of any plant or plant product if the Secretary determines that the prohibition or restriction is necessary to prevent the introduction into the United States or the dissemination within the United States of a plant pest or noxious weed.

(b) The Secretary has determined that it is necessary to designate the importation of certain taxa of plants for planting as **not** authorized pending pest risk analysis, as provided in § 319.37-4. The Secretary has determined that it is necessary to restrict the importation into the United States of all other plants for planting and to impose additional restrictions on the

importation of specific types of plants for planting, in accordance with this subpart and as described in the *Plants for Planting Manual*.

Other restrictions and prohibitions that apply to specific plant taxa are listed in [Table 1-1](#).

Federal Orders

See [Federal Import Orders](#) on page 3-8 and a list of plants for planting [Federal Import Orders](#) on page B-2.

Federal Notices

See [Federal Notices](#) on page 3-8 and a list of plants for planting [Federal Register Notices](#) on page B-6.

Other Documents

The *Treatment Manual* provides the details of treatments when a commodity **must** be treated as a condition of entry based on pest findings.

Application

The *Plants for Planting Manual* informs CBP officials and PPQ officers of how to regulate consignments of propagative plant material.

Conventions

Conventions are established by custom and are widely recognized and accepted. Major conventions used in this manual follow.

Advisories

Advisories are used throughout this manual to bring important information to the user's attention. Please carefully review each advisory. The definitions coincide with the American National Standards Institute (ANSI) with the goal of making the advisories easy to recognize and understand, thus limiting the human and dollar cost of foreseeable errors and accidents.

The advisories are in the format shown below:

CAUTION

The Caution advisory is used for tasks involving minor to moderate risk of injury.

DANGER

The Danger advisory is used in the event of imminent risk of death or serious injury.

NOTICE

The Notice advisory is used to alert a reader of importer information or Agency policy.

SAFETY

The Safety advisory is used for general instructions or reminders related to safety.

WARNING

The Warning advisory is used in the event of possible risk of serious injury.

Boldface

Boldface type is used to emphasize important words throughout this manual. These words include: **always**, **cannot**, **do not**, **does not**, **except**, **lacks**, **must**, **neither**, **never**, **nor**, **not**, **only**, **other than**.

Change Bars

A black change bar (in the left margin) is used to indicate a change has been made on the revised page. Unfortunately, change bars **do not** always appear when text is merely deleted. Change bars from the previous update are deleted when a chapter or appendix is revised.

Contents

Every chapter has a table of contents that lists the first- and second-level headings with the chapter.

Control Data

Control data is located at the top and bottom of each page to help manual users keep track of where they are in the manual and of updates to specific chapters or appendixes, etc. At the top of each page is the chapter title and first-level heading for that page. At the bottom of each page is the transmittal number (month, year, number), manual title, page number, and unit responsible for content.

Decision Tables

Decision tables are used throughout the manual. The first (If) and middle (And) columns in each decision table represent conditions, and the last column (Then) represents the action to take after all conditions listed for that row are considered. Begin with the column headings and move left-to-right and if a condition **does not** apply, then continue, one row at a time until you find the conditions that do apply. If there is an arrow in a row cell, then move straight over to the next cell. See [Table 1-3](#), row 2 cell 2 below.

Table 1-3 How to Use Decision Tables

If you:	And:	Then:
Read this column cell and row first and the condition applies	You read this cell next and the condition applies	TAKE the action listed in this cell
Read this column cell next and the condition does not apply	—————→	GO to the next row below
Find the previous condition columns and rows do not apply, then read this cell	You read this cell next and the condition applies	TAKE the action listed in this cell
You read this cell next and the condition does not apply	—————→	EXIT this table

Examples

Examples are used to clarify a point by applying to a real-world situation. Examples appear in boxes as a means of visual separation from other information on the page.

EXAMPLE Examples appear in a box like this.

Footnotes

Footnotes comment on or cite a reference to text and are referenced by number. The footnotes used in this manual include general text footnotes, figure footnotes, and table footnotes.

General text footnotes are located at the bottom of the page after a thin green line across half the width of the page, and flow numerically throughout a chapter or chapter section.

When space allows, figure and table footnotes are located directly below the associated figure or table. However, for multi-page tables or tables that cover the entire length of a page, footnote numbers and footnote text **cannot** be listed on the same page. If a table or figure continues beyond one page, then the associated footnotes will appear on the page following the end of the figure or table. Each table's footnotes are individually numbered.

Heading Levels

Within each chapter, there may be up to four heading levels, each smaller in size than the previous-level heading:

- ◆ First-level heading is indicated by a horizontal line across both the right and left columns, with the heading language directly below the horizontal line and across both columns. The body text after a first level heading is located inside the right column after the heading;
- ◆ Second-level heading is located in the right column, with the body text following beneath;
- ◆ Third-level heading is located in the right column; and
- ◆ Fourth-level heading is located in the right column followed by a period and leading into the text.

Hyperlinks to Figures, Headings, and Tables

Figures, headings, and tables are cross-referenced in the body of the manual and are in hypertext (blue).

EXAMPLE See [Table 1-4](#) to determine where to report problems with this manual.

Italics

The following items are italicized throughout this manual:

- ◆ Cross-references to headings and titles
- ◆ Publication names
- ◆ Scientific names

Numbering Scheme

A two-level numbering scheme is used in this manual. The first number represents the chapter and the second number represents the page, figure, or title number. Dashes are used in page, figure, and title numbering to differentiate from decimal points.

Transmittal Numbers

The transmittal number contains the month, year, and a consecutively-issued number (beginning with -01 for the first edition and increasing consecutively for each update to the edition of the manual).

If **no** changes are made to a specific chapter, chapter section, or appendix, then the transmittal number remains unchanged. The transmittal number only changes for the entire manual when a new edition is issued or changes are made to the entire manual.

EXAMPLE 03/2017-01 was the first transmittal number used in this manual. The current transmittal number is located in the control data in the footer (bottom) of pages in this manual.

- 03 is the month
- 2017 is the year
- 01 is the beginning

Using the Plants for Planting Manual

Plants for planting are listed in this manual by scientific name. Review the [Contents](#) of this manual to get a feel for the scope of the covered material. Glance through the contents of each chapter or chapter section that you will be using and familiarize yourself with the organization of the information.

Reporting Problems with or Suggestions for the Manual

Use [Table 1-4](#) to determine where to report problems, disagreements or suggestions for improvement which directly affect the contents of the *Plants for Planting Manual*.

Table 1-4 Where to Report Problems, Disagreements, Improvements

If you:	Then:
<ul style="list-style-type: none"> ◆ Are unable to access the on-line manual ◆ Have a suggestion for improving the format (layout, spelling, etc.) 	CONTACT PPQ's Manuals Unit at 240-529-0350 or by e-mail deborah.j.briggs@usda.gov
Disagree with a policy, procedure, or the admissibility of a commodity	CBP: CONTACT the CBP Field Office Liaison through the chain of command with the reason for the disagreement and a recommendation PPQ: CONTACT PPQ Import Services Customer Support at 301-851-2046 or 1-877-770-5990
Have an urgent situation requiring an immediate response regarding a procedure or regulatory action	CBP: CONTACT the CBP Field Office Liaison through the chain of command PPQ: CONTACT PPQ Import Services Customer Support at 301-851-2046 or 1-877-770-5990

Manual Updates

The PPQ Manuals Unit issues and maintains on-line manuals on the [Complete List of Electronic Manuals](#). These manuals contain up-to-date information as soon as possible. Immediate update revisions to the manuals are issued via e-mail. Each immediate update contains the following information:

- ◆ Link to access and download the on-line manual
- ◆ List of page numbers containing revisions
- ◆ Purpose of each revision
- ◆ Transmittal number

Introduction

The [General Restrictions](#) chapter provides information to help stakeholders determine the import status of plants for planting and whether they meet the general admissibility requirements for importing plants for planting into the United States per the *Code of Federal Regulations (CFR)* Title 7 CFR— Subpart Plants for Planting (i.e., if the plants can be imported into the U.S. or **not**).

Plants are any plant (including any plant part) for or capable of propagation, including a tree, a tissue culture, a plantlet culture, pollen, a shrub, a vine, a cutting, a graft, a scion, a bud, a bulb, a root and a seed.

Plants for planting are plants intended to remain planted, to be planted, or replanted.

EXAMPLE Buds, bulbs, corms, cuttings, layers, pollen, scions, seeds, tissue, tubers, and like structures are some examples of propagative plant material.

Process for Determining Admissibility of Plants for Planting

Nearly all plants for planting **must** meet USDA-APHIS-PPQ general restrictions to be considered for import into the United States. Some plants for planting have specific restrictions and **must** meet both general restrictions and specific restrictions to be imported into the U.S.

Plants for planting that are **not** authorized entry (prohibited) are identified by taxon in the [Lists of Plants for Planting](#) and some are included in [Specific Restrictions](#). If the general restrictions and any specific restrictions for the plant taxon are **not** met, then the plants will be refused entry.

Follow the steps below to determine the admissibility (whether the plants may enter or **not**) of and import requirements for plants for planting:

1. Use the USDA accepted scientific name to determine if there are specific requirements for the plant you wish to import.

NOTICE

Plants may be known by multiple common names and outdated scientific names. Be sure you are using the USDA accepted scientific name, spelled correctly, to locate any restrictions for the plants being imported.

2. If you **do not** know the USDA accepted scientific name, then search (query) the USDA [National Plant Germplasm System \(GRIN\)](#) to find the accepted scientific name.
 - A. See [GRIN Taxonomy](#) and select either:
 - a. [Advanced Query of Species Data](#) and enter the plant's name in either *Genus or species name* block or the *Common name* block, then click Search; or
 - b. [Simple Query of Species Data](#) enter the plant's name (common name, genus name, scientific name, or family name) in the block and click *Search*.
 - B. If you **do not** find the scientific name in GRIN, then contact the local [Plant Inspection Stations](#) port botanist for assistance.
3. When you have the USDA accepted scientific name (genus and species), then look in Chapter 6, [Lists of Plants for Planting](#), *Plants for Planting Manual* to see if the plant taxon (genus, species, or family) is listed as **not** authorized or prohibited entry from the country of origin and see if there are any specific restrictions or requirements. (See the [Using the Plants for Planting Lists](#).)

If the USDA accepted family, genus and species name is **not** listed in this *Plants for Planting Manual* in the [Lists of Plants for Planting](#) and **does not** have any other specific restrictions (such as **not** authorized/prohibited

from, [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#), or [Prohibited from Other Regulatory Actions or Other Federal Agencies](#), precautionary treatment, postentry quarantine, or requires an additional declaration (A.D.) on the accompanying phytosanitary certificate, etc.), then the plant is subject to [General Restrictions](#).

4. All plants for planting that may be imported are subject to [General Restrictions](#) unless an exception is listed and the exception conditions are met.
5. Plants listed in this *Plants for Planting Manual* are subject to [General Restrictions](#) and may have other [Specific Restrictions](#) that apply to a specific plant taxa or country.
 - A. Some plants for planting have restrictions based on the country of origin:
 - ⇒ Plants from Canada (see [Plants for Planting from Canada](#) on page 4-1);
 - ⇒ Plants from Israel (see [Plants for Planting from Israel](#) on page 3-20); and
 - ⇒ Plants with roots from countries regulated for potato cyst nematodes (*Globodera pallida* or *Globodera rostochiensis*) (see [Potato Cyst Nematodes \(PCN\)](#) on page 3-56).
 - B. Plants with [Specific Restrictions](#) **must** meet both [General Restrictions](#) and [Specific Restrictions](#).
 - C. Use the USDA accepted scientific name and check by taxa in the [Lists of Plants for Planting](#) under the “Specific Requirements, Postentry, etc.” column; then refer to more detailed information that is used to determine admissibility.
6. When restrictions apply to the importation of plants for planting for which there are taxonomic synonyms, those restrictions apply to the importation of all the synonyms of that taxon as well.

Continue to [General Restrictions](#) on page 2-5.

General Restrictions

All plants for planting **must** meet USDA-APHIS-PPQ general restriction requirements to be considered for import into the United States, unless meeting exception conditions.

Some plants for planting have specific restrictions or requirements, too, and **must** meet **both** the general restrictions and specific restrictions to be considered for import into the U.S.

Meeting General Restrictions

Prior to importing plants for planting into the U.S., potential importers should be sure that the plants meet the following general restrictions or any exception conditions. Use the USDA accepted scientific name of each plant or plant part for import, and check that the general restriction requirements are met in the order listed below:

1. [Growing Media](#)
2. [Size and Age](#)
3. [Permits](#)
4. [Phytosanitary Certificate](#)
5. [Marking and Identity](#)
6. [Packing and Approved Packing Material](#)
7. [Notification of Arrival](#)
8. [Approved Ports of Entry](#)
9. [Inspection](#)
10. [Treatment](#) (when required)

If the general restrictions for a plant for planting are **not** met at any point in the inspection process, then the plant material may be delayed entry or **not** authorized entry into the U.S. by inspectors (PPQ Officers or CBP Officers).

[General Restrictions](#) **do not** apply to plants for planting imported under a Controlled Import Permit (CIP).

Growing Media

The growing media general restriction requires that all plants for planting at the time of importation or offer for importation into the United States **must** be free of sand, soil, earth, and other growing media, unless meeting [Exceptions to Growing Media General Restriction](#) conditions.

Exceptions to Growing Media General Restriction

The following plants are **exempt** from the growing media general restriction when meeting the conditions below:

- ◆ APHIS-approved plant taxa in an growing media program (see [Plants in Growing Media Programs](#));
- ◆ Epiphytic plants (including orchid plants) established **solely** on (see [Figure 2-1](#)) but **not** in (see [Figure 2-2](#) example), may be imported on the following growing media:
 - ❖ Coconut husks
 - ❖ Coconut fiber
 - ❖ New clay pots
 - ❖ New wooden baskets

NOTICE

New wooden baskets **must** meet all applicable requirements in [7 CFR §319.40](#).

- ❖ Tree fern slabs;

NOTICE

Tree fern slabs **must** meet all applicable requirements in 7 CFR 330, 7 CFR 355, the [Miscellaneous and Processed Products Manual](#), and if from CITES regulated tree species, 50 CFR 23 CITES and the CITES Timber Species Manual.

- ◆ Plants growing **solely** in agar or in other agar-like tissue culture media; and

NOTICE

Agar **must** be clear or translucent with enough visibility for inspection.

- ◆ Plants [from](#) Canada when meeting [Canadian Origin Plants in Growing Media](#) requirements.

Figure 2-1 Orchid Growing On (not in) a Tree Fern Slab
(Photo by Martin Gutierrez, APHIS)

Figure 2-2 Orchid Growing In (not on) Coconut Fiber (not acceptable)

Size and Age

The size and age general restriction requires that all plants for planting for import meet size and age requirements. Size and age restrictions are based on whether the whole plant or part of a plant is offered for import.

- ◆ Entire (whole) plant; see [Table 2-1 Size and Age Restrictions for Whole \(Entire\) Plants](#)
- ◆ Plant parts; see [Table 2-2, Size Restrictions for Plant Parts](#)

Size and Age Restrictions for Whole (Entire) Plants

Table 2-1 Size and Age Restrictions for Whole (Entire) Plants

If entire plant:	And is:	And the plant:	And propagated from:	And shows:	Then:	
Is woody (tree or shrub)	Artificially dwarfed ¹ tree or shrub (e.g. bonsai)	_____		_____→	SEE Artificially Dwarfed Plants on page 3-5	
	Naturally-dwarfed or naturally miniature cultivar ²	Shows 12 inches (305 mm) or less from the soil line		_____→	Is within size and age limits	
		Shows more than 12 inches (305 mm) from the soil line		_____→	Is not authorized entry; PROHIBIT ENTRY	
	Naturally-occurring size	Azalea or Rhododendron		◆ Buds	3 years or less growth from the bud or graft (if in doubt, then contact your local plant inspection station to determine if meets size-age restrictions)	Is within size-age limits
				◆ Grafts		
				◆ Cuttings	3 years or less growth	Is within size-age limits
					More than 3 years growth	Is not authorized; PROHIBIT ENTRY
				◆ Layers	2 years or less growth	Is within size-age limits
					More than 2 years growth	Is not authorized; PROHIBIT ENTRY
	◆ Seeds	3 years or less growth	Is within size-age limits			
More than 3 years growth		Is not authorized PROHIBIT ENTRY				

General Restrictions
Size and Age

Table 2-1 Size and Age Restrictions for Whole (Entire) Plants (continued)

If entire plant:	And is:	And the plant:	And propagated from:	And shows:	Then:
Woody (tree or shrub) (continued)	Naturally-occurring size	Is other than Azalea or Rhododendron	◆ Buds ◆ Grafts	2 years' growth or less from the bud or graft (if in doubt, then contact your local plant inspection station to determine if meets size-age restrictions)	Is within age limits
				More than 2 years' growth from bud or graft	Is not authorized entry; PROHIBIT ENTRY
			◆ Cuttings	2 years' growth or less	Is within age limits subject to inspector's determination
				More than 2 years' growth	Is not authorized; PROHIBIT ENTRY
			◆ Layers	1 year or less growth	Is within size-age limits
				More than 1 year's growth	Is not authorized; PROHIBIT ENTRY
			◆ Seeds	2 years or less of age	Is within age limits
				More than 2 years of age	Is not authorized; PROHIBIT ENTRY

Table 2-1 Size and Age Restrictions for Whole (Entire) Plants (continued)

If entire plant:	And is:	And the plant:	And propagated from:	And shows:	Then:
Simulates the growth of woody plants	◆ <i>Dracaena</i> spp.	Is from Costa Rica	—————→	—————→	SEE Table 3-17
		Is from other than Costa Rica	—————→	Shows 18 inches or less from the soil line	Is within size age limits
			—————→	Exceeds 18 inches (460 mm) from the soil line	Is not authorized; PROHIBIT ENTRY
	◆ Palms ◆ Plants whose growth simulates palms	—————→	—————→	Is 915 millimeters (mm) (approximately 36 inches) or less in length (stem plus leaves)	Is within size age limits
			—————→	Exceeds 915 mm (approximately 36 inches) in length (stem plus leaves)	Is not authorized; PROHIBIT ENTRY
	◆ Yuccas	Shows 18 inches or less from the soil line	—————→	—————→	Is within size age limits
		Exceeds 18 inches (460 mm from the soil line)	—————→	—————→	Is not authorized; PROHIBIT ENTRY
	Other than listed above	Shows 18 inches or less from the soil line	—————→	—————→	Is within size age limits
		Exceeds 18 inches (460 mm from the soil line)	—————→	—————→	Is not authorized; PROHIBIT ENTRY
	Other than listed in the cells above	—————→	—————→	—————→	Shows 18 inches or less from the soil line
—————→		—————→	—————→	Exceeds 18 inches (460 mm from the soil line)	Is not authorized; PROHIBIT ENTRY

- 1 Artificially prevented from reaching its normal size; such as by cutting stems, etc.
- 2 Cultivated, natural, permanent genetic miniature of an existing plant species.

Size Restrictions for Plant Parts

If plant parts (**not** an entire (whole) plant) are being imported as plants for planting, then see [Table 2-2](#) to determine if the parts meet size limits.

Table 2-2 Size Restrictions for Plant Parts Imported as Plants for Planting

If the plant part is imported as:	And:	And:	And the plant part:	Then:
<ul style="list-style-type: none"> ◆ Root clump ◆ Root crown 	Is from herbaceous perennials except epiphytes	Is with or without sprouts	Is 102 mm (4 inches) or less in diameter	Is within size limits
			Exceeds 102 mm (approximately 4 inches) in diameter	Is not authorized; PROHIBIT ENTRY
			Exceeds 1.83 meters (approximately 6 feet) in length	Is not authorized; PROHIBIT ENTRY
	Epiphytes	Is with or without aerial roots (without branches, leaves, and sprouts)	Is 102 mm (approximately 4 inches) or less in diameter and is 1.83 meters (approximately 6 feet) or less in length	Is within size limits
			Exceeds 102 mm (approximately 4 inches) in diameter	Is not authorized; PROHIBIT ENTRY
			Exceeds 1.83 meters (approximately 6 feet) in length	Is not authorized; PROHIBIT ENTRY
Is from other than herbaceous perennials		→	DO NOT apply size (or age) limits	
<ul style="list-style-type: none"> ◆ Stem cutting 	Cactus	Is without branches and roots (has no branches and no leaves)	Is 153 mm (approximately 6 inches) or less in diameter and 1.22 meters (approximately 4 feet) or less in length	Is within size limits
			Exceeds 153 mm (approximately 6 inches) in diameter	Is not authorized; PROHIBIT ENTRY
			Exceeds 1.22 meters (approximately 4 feet) in length	Is not authorized; PROHIBIT ENTRY
		Is other than in the cell above	Is 102 mm (approximately 4 inches) or less in diameter and 1.83 meters (approximately 6 feet) or less in length	Is within size limits
			Exceeds 102 mm (approximately 4 inches) in diameter	Is not authorized; PROHIBIT ENTRY
			Exceeds 1.83 meters (approximately 6 feet) in length	Is not authorized; PROHIBIT ENTRY
			→	CONTINUE to next page

Table 2-2 Size Restrictions for Plant Parts Imported as Plants for Planting (continued)

If the plant part is imported as:	And:	And:	And the plant part:	Then:
◆ Stem cutting (continued from previous page)	Dracaenas	Cane cuttings without leaves, roots, and sprouts (shoots) (has no leaves, no roots, and no sprouts)	Is 102 mm (approximately 4 inches) or less in diameter and 1.83 meters (approximately 6 feet) or less in length	Is within size limits
			Exceeds 102 mm (approximately 4 inches) in diameter	Is not authorized; PROHIBIT ENTRY
			Exceeds 1.83 meters (approximately 6 feet) in length	Is not authorized entry; PROHIBIT ENTRY
		Cane cuttings with leaves, roots, or sprouts		SEE Table 2-1 and REGULATE as whole (entire) plant
	Epiphytes	With or without aerial roots (without branches, leaves, and sprouts)	Is 102 mm (approximately 4 inches) or less in diameter and is 1.83 meters (approximately 6 feet) or less in length	Is within size limits
			Exceeds 102 mm (approximately 4 inches) in diameter	Is not authorized; PROHIBIT ENTRY
			Exceeds 1.83 meters (approximately 6 feet) in length	Is not authorized; PROHIBIT ENTRY
	Other than Cacti, Dracaenas, and Epiphytes	Without branches (canes), leaves, roots, and sprouts	Is 102 mm (approximately 4 inches) or less in diameter and is 1.83 meters (approximately 6 feet) or less in length	Is within size limits
			Exceeds 102 mm (approximately 4 inches) in diameter	Is not authorized; PROHIBIT ENTRY
			Exceeds 1.83 meters (approximately 6 feet) in length	Is not authorized; PROHIBIT ENTRY
With branches (canes, leaves, roots, or sprouts)			SEE Table 2-1 and REGULATE as whole (entire) plant	
Other than listed in cells above			Is 18 inches (460 mm) or less total length	Is within size age limits
			Exceeds 18 inches (460 mm) total length	Is not authorized; PROHIBIT ENTRY

Permits

The permit general restriction requires that plants for planting may be imported or offered for import into the United States **only** after issuance of a written permit by USDA-APHIS Plant Protection and Quarantine (PPQ), unless meeting [Exceptions to Import Permit Requirement](#) conditions.

Submit an application for an import permit, *PPQ Form 587, Application for Permit to Import Plants or Plant Products*, to APHIS-PPQ at least 30 days prior to arrival of the plants for planting at the first port of entry.

Other permits may be required for plants that have specific restrictions or requirements. For more information, see [Special Permits](#) in the [Specific Restrictions](#) chapter.

How to Apply for an Import Permit

Fill out an application for an import permit using one of the following:

- ◆ [Online Application](#)
- ◆ [Alternate Application Options](#)

Online Application

See [Plant Health Permits](#) application (ePermits) under “Apply on-line for a...,” click PPQ 587: Application for permit to import plants or plant products. Then access ePermits and complete the application online (fastest way to obtain a permit; a Level 2 eAuthentication account will be required).

Alternate Application Options

See [Plant Health Permits](#) under “Click on options listed below to print form (pdf),” click PPQ 587 - Application for permit to import plants or plant products. Complete the requested information, print the form, and send the completed application either by fax to 301-734-5676, or by mail to:

USDA-APHIS-PPQ
Permit Unit
4700 River Road, Unit 133
Riverdale, MD 20737-1236

The completed application **must** have the following information:

- ◆ Name, address, and telephone number of the importer;
- ◆ Scientific name(s) of taxon or taxa (plants for planting intended to be imported);
- ◆ Quantity (approximate) of plants for planting intended to be imported;

- ◆ Country (countries) or locality (localities) where the plants were grown;
- ◆ Plant parts (bulbs, cuttings, rhizomes, scions, seeds, etc.);
- ◆ United States port of entry (intended);
- ◆ Intended use (plants or plant parts for planting) (on-line application **only**, is **not** listed on pdf paper application);
- ◆ Means of transportation (air express, airfreight, airmail, express, freight, mail, baggage); and
- ◆ Date of Arrival (expected).

If after review of the application the plants for planting are deemed eligible to be imported into the United States, then APHIS-PPQ will issue a permit indicating the applicable conditions for importation.

However, even if such a permit is issued, the plants for planting may be imported **only** if all applicable requirements are met and **only** if an inspector at the port of entry determines that **no** remedial measures pursuant to the Plant Protection Act are necessary with respect to the plants for planting (to mitigate pest risk).

Always check the [Lists of Plants for Planting](#) in this manual for the current regulations of all plants for planting immediately prior to shipment, as the import status may have changed since the import permit was issued.

An inspector may hold, seize, quarantine, treat, apply other remedial measure to destroy, or otherwise dispose of plants, plant pests, or other articles in accordance with the Plant Protection Act.

NOTICE

Always read and follow the conditions and instructions listed on the import permit.

Exceptions to Import Permit Requirement

The following types of plants for planting are **exceptions** and **do not** require an import permit:

- ◆ **Precleared** bulbs of APHIS-approved taxa when from an approved preclearance program (see [Preclearance Programs](#));
- ◆ Seeds of most herbaceous plants (see [Nonpermit Seeds](#) and [Permit Seeds](#) for detailed lists);
- ◆ Shipments of 12 or fewer, if the plants for planting are **not** listed within this manual as having additional specific restrictions such as [Not](#)

[Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) or [Prohibited from Other Regulatory Actions or Other Federal Agencies](#), precautionary treatment, postentry quarantine, or requiring an additional declaration on the accompanying phytosanitary certificate;

- ◆ Most plants from Canada (see [Import Permits for Plants for Planting from Canada](#) and [Plants for Planting from Canada That Require a Permit](#)); and
- ◆ Sterile cultures of orchid plants.

Phytosanitary Certificate

The phytosanitary certificate general restriction requires that plants for planting offered for import into the United States **must** be accompanied by a phytosanitary certificate, unless meeting the [Exceptions to Phytosanitary Certificate Requirement](#) conditions.

The [phytosanitary certificate](#). **must** be an original or certified true copy issued **not** more than 15 days prior to shipment of the regulated plants for planting from the country in which grown, and **must** contain the following unless stated otherwise:

- ◆ Identify the genus of the accompanying plant(s) for planting;
- ◆ If individual species or cultivars within a genus have additional restrictions, then identify the species or cultivar of the accompanying plants for planting;

EXAMPLE *Artemisia austriaca* **must** be listed on the phytosanitary certificate because the plant is regulated by species. Listing *Artemisia* spp. **does not** meet the phytosanitary requirement.

- ◆ If there are **no** additional restrictions, then identification of the species or cultivar of the plants for planting is strongly preferred but is **not** required;
- ◆ If an intergeneric hybrid, then place the multiplication sign × before the name of the intergeneric hybrid;

EXAMPLE ×*Agropogon* spp.

- ◆ If an intraspecific hybrid, then place the multiplication sign × between the names of the parent taxa; and

EXAMPLE *Magnolia denudata* × *salsifolia*

- ◆ If the plant is budded, grafted, or otherwise contains interpolated plant parts, then list the identity of all plant parts (e.g., interstem, rootstock, or scion) that belong to restricted taxa to the lowest regulated taxon (genus, species, cultivar).

NOTICE

Information on the phytosanitary certificate, container, invoice, and packing list should match up for more efficient processing and to avoid delays.

Exceptions to Phytosanitary Certificate Requirement

The following plants for planting are **exempt** from the phytosanitary certificate requirement when meeting the conditions below:

- ◆ Plants imported from Canada through the U.S.-Canada Greenhouse Certification Program (see [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP Revised 2016\)](#) and [U.S./Canada Greenhouse-Grown Plant Certification Program \(Legacy GCP\)](#));
- ◆ Seeds from Canada (Canadian seeds) (see [Seeds Imported from Canada](#));
- ◆ Small lots of seed meeting the requirements under [Small Lots of Seeds](#) and are accompanied by a Small Lots of Seed Permit;
- ◆ Small packages of bulbs offered to travelers returning to the United States from the Netherlands and accompanied by a special certificate that lists **all** of the following information:
 - ❖ Country of the bulb(s) origin
 - ❖ Date on which the special certificate expires
 - ⇒ Expiration date **must** be within 6 weeks after the issuance of the phytosanitary certificate held by the national plant protection organization of the Netherlands
 - ❖ Scientific name of the bulb(s)
 - ❖ Serial number
 - ⇒ Serial number **must** refer to a phytosanitary certificate issued, held, and retrievable upon request by the national plant protection organization of the Netherlands.

Shipments of bulbs from the Netherlands accompanied by this certificate may be imported into the United States **without** preclearance by APHIS.

Marking and Identity

The marking and identity general restriction requires that all plants for planting for importation into the United States **must** be properly marked and identified as follows:

- ◆ [Identity of Plants for Planting on Invoice and/or Packing List](#);
- ◆ [Marking and Identity of Plants for Planting Imported By Mail or Courier](#) (U.S. Postal Service (USPS) or courier (DHL, FedEx, UPS, etc.);
- ◆ [Marking and Identity of Plants for Planting Imported By Other Than Mail or Courier](#) (air cargo; maritime shipment (sea cargo); tractor trailer, truck, van, etc.).

NOTICE

Marking information and identity on the phytosanitary certificate, container, invoice, and packing list should match up (be the same) for more efficient processing and to avoid delays.

Identity of Plants for Planting on Invoice and/or Packing List

All plants for planting offered for import (by mail or otherwise) into the United States, at the time of arriving at the first port of arrival, **must** be accompanied by an invoice or packing list indicating the contents (scientific name to the lowest regulated taxon, quantity of each taxon expressed in number of plant units or in the case of seeds, by weight in grams or kilograms) of the [consignment/shipment](#). A packing list should be present that lists the contents of each box/container and references a box number that is **both** on the packing list and the physical box. **Without** the packing list, the inspection will be delayed or the time to complete the inspection will be significantly extended.

Marking and Identity of Plants for Planting Imported By Mail or Courier

Plants for planting offered for import by mail (U.S. Postal Service (USPS) or courier (DHL, FedEx, UPS, etc.) **must** be as follows:

- ◆ Correctly and plainly addressed and mailed to the Plant Protection and Quarantine Program at one of the [Approved Ports of Entry](#) to receive plants for planting for import;
- ◆ Accompanied by a separate sheet of paper within the package, plainly and correctly bearing the name, address, and telephone number of the intended recipient
- ◆ Plainly and correctly on the outer container, have the following information:

- ❖ General nature and quantity of the contents;
- ❖ Country and locality where grown;
- ❖ Name and address of shipper, owner, or person shipping or forwarding the plants for planting; and
- ❖ Number of the written permit authorizing the importation, if one (written permit) is required under 7 CFR § 319.37-5.

Marking and Identity of Plants for Planting Imported By Other Than Mail or Courier

Plants for planting at the time of importation or offer for importation into the United States by **other than** mail or courier (i.e., air cargo; maritime shipment (sea cargo); tractor trailer, truck, van, etc.), **must** plainly and correctly bear on the outer container (if in a container) or be attached to the plants for planting (if **not** in a container) the following information:

- ◆ General nature and quantity of the contents;
- ◆ Country and locality where grown;
- ◆ Name and address of shipper, owner, or person shipping or forwarding the plants for planting;
- ◆ Name and address of consignee;
- ◆ Identifying shipper's mark and number; and
- ◆ Number of written permit authorizing the importation, if one (written permit) was required under 7 CFR § 319.37-5.

Packing and Approved Packing Material

The packing material general requirement requires that any plants for planting for importation or imported into the United States **must not** be packed in the same container as plants for planting whose importation into the United States is **not** authorized pending pest risk analysis in accordance with 7 CFR § 319.37-4. Plants for planting in packing material **must** meet the conditions listed under [Packing Material Requirements](#).

Packing Material Requirements

Plants for planting may **only** be shipped in approved packing material when meeting **all** of the following conditions:

- ◆ Plants are packed in the packing material **immediately** prior to shipment;
- ◆ Packing material is free from sand, soil, or earth, **except** as listed under [Approved Packing Material](#);
- ◆ Packing material has **not** been previously used as packing material or otherwise used as growing media (see [Growing Media](#)); and
- ◆ Packing material is approved by the USDA-APHIS as **not** posing a risk of introducing quarantine pests (see [Approved Packing Material](#)).

NOTICE

Plants **must not** be established or growing in any packing material. See [Growing Media](#) on page 2-6 for more information.

EXAMPLE Try shaking the packing material off the plants. If you can shake the material (such as sphagnum peat moss) off, then it's packing material, but **must** be [Approved Packing Material](#).

Fomites (nonliving objects, such as flats, liners, etc.) that may have been contaminated with animal diseases through contact with animals or animal products **cannot** be used to transport plants and plant material into the United States.

Approved Packing Material

Packing material approved by USDA-APHIS is listed in [Table 2-3](#). The packing material **must** meet the conditions under [Packing Material Requirements](#).

General Restrictions

Packing and Approved Packing Material

Table 2-3 USDA-APHIS Approved Packing Material

Baked or expanded clay pellets
Buckwheat hulls
Coral sand from Bermuda if the plant is packed in such sand and is accompanied by a phytosanitary certificate containing an accurate additional declaration from the national plant protection organization that such sand is free from soil
Excelsior
Exfoliated vermiculite
Ground cork
Ground peat
Ground rubber
Paper
Perlite
Polymer stabilized cellulose
Quarry gravel
Rock wool
Sawdust
Shavings, cork
Shavings, wood
Sphagnum moss
Stockosorb superabsorbent polymer
Vegetable fiber when free of pulp, includes coconut fiber and Osmunda fiber (except cotton fiber and sugarcane fiber)
Volcanic rock

Commingling

Admissible plants for planting imported into the U.S. **must not** be packed together (commingled) in the same container with plants for planting whose importation is **not** authorized pending pest risk analysis (NAPPRA).

Regulatory action will be based on the taxa in the shipment with the most restrictive import requirements.

EXAMPLE Two taxa are commingled (in the same container).

One taxa is found to be admissible. The other taxa is **not** authorized pending pest risk analysis (NAPPRA) and **does not** have a PPQ 588 Controlled Import Permit (CIP).

The entire container will be refused entry based on the more restrictive **not** authorized (NAPPRA) status.

Plants of different admissible taxa should **not** be mixed or packed (placed) together in the same container (box, etc.). Please **do not** mix species of multiple taxa in the same container. Mixing species of multiple admissible taxa in the same container may delay inspection and processing of a shipment, and take longer to complete.

Notification of Arrival

The notification of arrival general restriction requires that promptly upon arrival of any plants for planting at a port of entry (preferably 24 hours in advance of arrival), the importer **must** notify the Plant Protection and Quarantine Program (PPQ) of the shipment's arrival by sending **one** of the following to the PPQ plant inspection station at the port of entry:

- ◆ Broker's document
- ◆ Commercial invoice
- ◆ Commercial packing list
- ◆ Customs entry document
- ◆ Notice form (i.e., PPQ Form 368, Notice of Arrival)
- ◆ Manifest
- ◆ Waybill

The advance notice of arrival alerts Plant Inspection Station staff and helps with scheduling and inspection of shipments. Contact your local plant inspection station for notification of arrival and any local procedures for inspection appointments, etc. See [USDA Plant Inspection Stations](#) for contact information.

Approved Ports of Entry

The approved ports of entry general restriction requires that plants for planting required to be imported under a written permit **must** be imported (enter) through one of the approved Customs and Border Protection (CBP) ports of entry before moving to the closest designated USDA plant inspection station listed in [Table 2-4](#), unless meeting the [Exceptions to Movement from CBP Port of Entry to Plant Inspection Station Requirement](#) conditions.

NOTICE

Plants for planting that are **not** required to be imported under a written permit may enter at any [Customs Port of Entry](#) and **do not** require movement to a USDA plant inspection station.

Table 2-4 Approved CBP Ports of Entry and Designated USDA Plant Inspection Stations

Approved Customs (CBP) Port of Entry		Designated USDA Plant Inspection Station
	SEE Customs Port of Entry for address of designated ports	SEE USDA Plant Inspection Stations for address and phone number
Arizona	Nogales	Nogales
California	Long Beach, Los Angeles	Los Angeles (located in El Segundo)
	San Diego, San Ysidro	San Diego
	Oakland, San Francisco	South San Francisco
Florida	Ft. Lauderdale - plants may be moved from Ft. Lauderdale to Miami under U.S. Customs bond	Miami
	Miami	Miami
	Orlando	Orlando
Georgia	Atlanta	Atlanta
Guam	Agana	Barrigada
Hawaii	Honolulu (Airport)	Honolulu
Maryland	Laurel (plant germplasm only)	Laurel (plant germplasm only)
New Jersey	Elizabeth, Newark; New York (maritime)	Linden
New York	Jamaica (JFK)	Jamaica

Table 2-4 Approved CBP Ports of Entry and Designated USDA Plant Inspection Stations (continued)

Approved Customs (CBP) Port of Entry		Designated USDA Plant Inspection Station
Puerto Rico	San Juan	Carolina
Texas	Houston	Houston (located in Humble)
	Los Indios	Los Indios
Washington	Seattle	Seattle

Exceptions to Movement from CBP Port of Entry to Plant Inspection Station Requirement

The following plants for planting require [Meeting General Restrictions](#) and any [Specific Restrictions](#) unless meeting exception conditions. The plants for planting listed below may enter through any [CBP port of entry](#) and **do not** require movement to a USDA plant inspection station:

- ◆ *Cenchrus* spp. seeds (synonym *Pennisetum* spp.)
- ◆ *Chionachne* spp. seeds
- ◆ *Coix* spp. seeds
- ◆ *Echinochloa* spp. seeds
- ◆ *Gossypium* spp. seeds
- ◆ *Miscanthus* spp. seeds
- ◆ Obscured seeds (see [Obscured Seeds](#))
- ◆ *Panicum* spp. seeds
- ◆ *Polytoca* spp. seeds
- ◆ Precleared dormant bulbs and underground portions of dormant perennials from approved countries (see [Prclearance Programs](#), [List of Bulbs and Underground Portions of Dormant Perennials](#), and [Exceptions to Phytosanitary Certificate Requirement for Precleared Shipments](#))
- ◆ *Sclerachne* spp. seeds
- ◆ *Setaria* spp. seeds
- ◆ *Solanum tuberosum* true seed from New Zealand and the X Region of Chile
- ◆ Some plants from Canada
 - ❖ *Chaenomeles* spp.
 - ❖ *Cydonia* spp.

- ❖ *Fraxinus* spp. from counties or areas in Canada that are **not** regulated for emerald ash borer (EAB) but that are within an EAB-regulated province or territory
- ❖ *Malus* spp.
- ❖ *Pinus* spp.
- ❖ *Prunus* spp.
- ❖ *Pyrus* spp.
- ❖ *Rubus* spp.
- ❖ *Vitis* spp.
- ◆ *Trilobachne* spp. seeds
- ◆ *Tripsacum* spp. seeds
- ◆ *Zea* spp. (corn) seeds

Removal of Plants for Planting from Port of First Arrival

Plants for planting **cannot** be removed from the port of first arrival until the inspector has determined that all requirements of the plants have been satisfied.

The exception is when a shipment of regulated plants for planting arrives at a port that **does not** have a USDA plant inspection station and CBP/PPQ agree to forward the shipment to the nearest plant inspection station.

Inspection

All plants for planting may be sampled and inspected by an inspector at the port of first arrival and/or under preclearance inspection arrangements in the country of origin.

Plants for planting will be inspected by PPQ staff at a USDA plant inspection station and may be inspected by CBP staff at the port of entry when USDA inspection is **not** required. CBP may also inspect plants for planting shipments for non-phytosanitary reasons. See [Approved Ports of Entry](#) to determine which permitted plant material may be inspected at a CBP port of entry and which **must** be inspected at a USDA plant inspection station.

The services of a PPQ Inspector during regularly assigned hours of duty and at the usual places of duty shall be furnished **without** cost to the importer.

Plants for Planting Not in Compliance

The importer of any plants for planting that are denied entry for noncompliance **must** at the importer's expense and within the time specified on *PPQ Form 523, Emergency Action Notice* (EAN), follow the action as determined by the inspector (to prevent the introduction of quarantine pests into the United States), and listed on the EAN which may be one or more of the following:

- ◆ Destroy
- ◆ Ship to a point outside the United States (re-export)
- ◆ Treatment
- ◆ Other safeguards as needed

Treatment

If treatment is ordered by an inspector, then any plants for planting **must** undergo treatment in accordance with regulations in 7 CFR §305, at the owner's expense. See [Plants for Planting that Require Treatment for Entry](#).

Destruction or Shipment Outside the United States

Any plants for planting found upon inspection to contain or be contaminated with quarantine pests that **cannot** be eliminated by treatment will be denied entry at the first United States port of arrival and **must** be destroyed or shipped to a point outside the United States (re-exported) at the owner's expense.

Seeds

[General Restrictions](#) apply to all plants for planting including seeds, unless meeting exception conditions. Some seeds may have additional exemptions, requirements, or restrictions listed in Chapter 6, [Lists of Plants for Planting](#), Chapter 3, [Specific Restrictions](#), or elsewhere in this manual.

Shipments of imported seeds for planting from all countries require a phytosanitary certificate from the country of origin, unless meeting the [Exceptions to Phytosanitary Certificate Requirement](#) conditions.

Federal Seed Act Seeds

Certain agricultural and vegetable seeds are covered under the Federal Seed Act (7 CFR 361). The Federal Seed Act requires accurate labeling and purity standards for seeds for planting and prohibits the importation and movement of adulterated and misbranded seeds.

Federal Seed Act seeds are identified as FSA-A (Federal Seed Act Agricultural) or FSA-V (Federal Seed Act Vegetable) in the [Lists of Plants for Planting](#).

In addition to the plants for planting regulations, seeds in this category are subject to the import provisions of the Federal Seed Act and **must** be as follows:

- ◆ Each lot **must** be accurately labeled as to kind, origin, variety, and lot designation;
- ◆ If the seeds are treated, then the substance **must** be identified on the label.

Inspectors will sample and inspect each lot of FSA-A and FSA-V seeds at the port of entry as specified in 7 CFR 361.5.

For more information, see [7 CFR 361, Importation of Seed and Screenings Under the Federal Seed Act](#). If Federal Seed Act Seeds are from Canada, then continue to [Federal Seed Act Seeds from Canada](#).

Nonpermit Seeds

Nonpermit seeds are seeds that **do not** require an import permit for entry. Nonpermit seeds include all seeds for planting **other than** those types of seeds listed under [Permit Seeds](#).

Permit Seeds

The following seeds require an import permit for entry:

- ◆ *Cenchrus* spp. seeds (including synonym *Pennisetum*)
- ◆ *Chionachne* spp. seeds
- ◆ *Coix* spp. seeds
- ◆ *Echinochloa* spp. seeds
- ◆ *Eleusine* spp. seeds
- ◆ *Euchlaena* spp. seeds
- ◆ *Gossypium* spp. seeds
- ◆ *Miscanthus* spp. seeds
- ◆ *Panicum* spp. seeds
- ◆ *Polytoca* spp. seeds
- ◆ *Sclerachne* spp. seeds
- ◆ Seeds that require treatment (see the [Lists of Plants for Planting](#) and [Specific Restrictions](#) to determine if treatment is required based on country of origin):
 - ❖ *Abelmoschus* spp. (okra) seeds
 - ❖ *Castanea* spp. (chestnut) seeds
 - ❖ *Guizotia abyssinica* (niger) seeds
 - ❖ *Hibiscus* spp. (hibiscus, rose mallow) seeds
 - ❖ *Lathyrus* spp. (peavine, sweet pea) seeds
 - ❖ *Lens* spp. (lentils) seeds
 - ❖ *Quercus* spp. (oak) seeds
 - ❖ Rutaceae family seeds
 - ❖ *Vicia* spp. (fava bean, vetch) seeds
- ◆ Seeds of herbaceous plants that are obscured (coated, pelleted, or embedded in a substrate that obscures visibility) (see [Obscured Seeds](#))
- ◆ Seeds of woody plants (trees or shrubs) from all countries, **except** when from Canada
- ◆ *Setaria* spp. seeds
- ◆ *Sorghum* spp. seeds
- ◆ Small lots of seeds imported under a [Small Lots of Seed Permit](#)
- ◆ *Trilobachne* spp. seeds
- ◆ *Tripsacum* spp. seeds

- ◆ True seed of *Solanum tuberosum* from New Zealand and the Tenth (X) Region of Chile (that area of Chile between 39° and 44° South latitude)
- ◆ *Zea* spp. seeds

Obscured Seeds

Obscured seeds include seeds that are coated ¹, pelleted ², or embedded in tape, mats or in any other substrate that obscures visibility.

EXAMPLE Seeds in closed containers, such as cans, opaque packages, or educational kits that **cannot** be inspected because of obscured visibility.

Obscured seeds **must** meet **all** of the following conditions for import into the United States:

- ◆ Bare seed sample **must** accompany the shipment of obscured seed and be presented to the Customs and Border Protection-Agriculture Inspection (CBP-AI) Officer for inspection at the port of entry;
- ◆ Phytosanitary certificate issued by an authorized official of the National Plant Protection Organization (NPPO) of the country of exportation **must** accompany each shipment;
- ◆ Seeds **must** be accompanied by a USDA permit, *PPQ 587, Permit to Import Plants and Plant Products* issued for Obscured Seed;
- ◆ Seeds **must** be generally admissible into the U.S. under a *PPQ Form 587, Permit to Import Plants or Plant Products*, **not** require treatment, and have **no** specific restrictions (see [Process for Determining Admissibility of Plants for Planting](#));
- ◆ Seeds **must** be of herbaceous or suffrutescent plants; and
- ◆ Seeds **must** be accompanied by an officially drawn and sealed sample ³ of seed drawn from the lot before the seed was coated, embedded, or pelleted (bare seed sample) and be identified as “Official Seed Sample”;

Obscured seed that **does not** meet the conditions above are **not** admissible because the seed **cannot** be properly inspected. If CBP-AI inspectors find any

-
- 1 Coated seed is any seed unit covered with any substance that changes the size, shape, or weight of the original seed. Seeds coated with ingredients such as but **not** limited to dyes, pesticides, and rhizobia are excluded.
 - 2 Pelleted seed is any seed unit covered with a substance that changes the shape, size, or weight of the original seed in order to improve the plantability or singulation of the seed.
 - 3 Bare seed that is packaged and identified with the marks of the lot sampled and then closed in such a way that the package **cannot** be opened to gain access to the seed and closed again **without** either destroying the seal or leaving evidence of tampering. The package is clearly marked “Official Seed Sample”.

quarantine pests for the United States (U.S.), then the shipment will be refused entry into the U.S.

Seeds in Pulp

All seeds for planting **must** be free of pulp from all countries **except** Canada. If from Canada in pulp, then see [Seeds in Pulp of Canadian or U.S. Origin](#).

Small Lots of Seeds

Any quantity of seed for planting may be imported with a phytosanitary certificate and an import permit **except** if listed as having specific restrictions, including treatment.

Shipments of small lots of seed that meet **all** the small lots of seed permit requirements may be imported **without** a phytosanitary certificate when accompanied by a small lots of seed permit. Continue to [Small Lots of Seed Permit](#).

NOTICE

A [Small Lots of Seed Permit](#) **cannot** be issued for small lots of *Capsicum* spp. seeds or small lots of *Solanum lycopersicum* seeds due to specific requirements for entry.

Small Lots of Seed Permit

A *Small Lots of Seed Permit* may be issued for seed taxa that are admissible with **no** restrictions beyond the port of entry inspection. If inspectors (CBP or PPQ Plant Inspection Station) find prohibited or restricted seeds in the shipment, then they will seize and destroy the ineligible seeds.

Small lots of seed accompanied by a *Small Lots of Seed Permit* may be imported **without** a phytosanitary certificate when meeting **all** of the following conditions:

- ◆ Importation of the seed is authorized by a written permit specifically for small lots of seed (*Small Lots of Seed Permit* is usually valid for 3 years and covers multiple importations);
- ◆ Seed is **not** listed as [Not Authorized Pending Pest Risk Analysis \(NAPRA\)](#);
- ◆ Seed is **not** of any Federal noxious weed species ([Federal Noxious Weed List](#));
- ◆ Seed **does not** require an additional declaration on a phytosanitary certificate;
- ◆ Seed **does not** require treatment;
- ◆ Seed is **not** a [parasitic plant](#);
- ◆ Seed is **not** regulated under [7 CFR 340](#) (see [Biotechnology Regulatory Services Permits, Notifications, and Petitions website](#));
- ◆ Seed is **not** pelleted, coated, or embedded in growing media, seed tape, cloth, or similar materials;
- ◆ Seed shipment **must** be free from soil, plant material **other than** seed, other foreign matter or debris, seeds in the fruit or seed pod, and living organisms such as parasitic plants, pathogens, insects, snails, mites;
- ◆ Seed shipment **must** be sent to an approved port of entry and APHIS plant inspection station listed in the permit;
 - ❖ Hand-carry in personal baggage is **not** authorized
- ◆ Seed of field/agricultural crop (FSA-A) or vegetable (FSA-V) **must** meet the requirements of the Federal Seed Act import provisions in 7 CFR 361;
- ◆ Seed regulated under the Convention on International Trade in Endangered Species ([CITES](#)) **must** meet the additional CITES requirements;
- ◆ Seed regulated under the Endangered Species Act (ESA) **must** meet the additional ESA requirements (see [U.S. Fish & Wildlife Service Endangered Species; and Endangered Species Act](#)), (seeds of threatened

(ESA-T) plants are **not** regulated if they come from cultivated plants);
and

- ◆ Seed meets **all** of the following packaging and shipping requirements:
 - ❖ Seed list or invoice typed or legibly printed with the following information **must** accompany each shipment:
 - ⇒ Name of the collector/shipper
 - ⇒ Scientific names at least to genus, preferably to species level listed alphabetically
 - ⇒ Country of origin for each taxon
 - ⇒ Country shipped from for each taxon
 - ⇒ Code for each lot may be included (see below)
 - ❖ Invoice or seed list may provide a code for each lot, which may be used on the seed packets in lieu of the full list of required information. In this case, each packet **must** at least include the appropriate code, which is referenced to the entry for that packet on the seed list/invoice;
 - ❖ Each seed packet is clearly labeled with the following:
 - ⇒ Name of the collector/shipper
 - ⇒ Country of origin
 - ⇒ Scientific name at least to the genus and preferably to the species, level
 - ❖ Maximum of 50 seeds of 1 taxon (taxonomic category such as genus, species, cultivar, etc.) per packet OR maximum weight **not** to exceed 10 grams of seed of 1 taxon per packet;
 - ❖ Maximum of 50 seed packets per shipment;
 - ❖ Seeds are free from pesticides;
 - ❖ Seeds are securely packaged in packets or envelopes and sealed to prevent spillage.

NOTICE

We recommend that seeds are packed in resealable, clear, plastic envelopes to facilitate inspection.

U.S. Origin Seeds Returning

Seeds that were grown in the United States (U.S.), exported, and are now returning to the U.S. may be imported back into the U.S. as U.S. Origin seed **only** when accompanied by **all** the following documents at the time of arrival at the first port of entry in the U.S.:

- ◆ Export documents indicating:
 - ❖ Quantity of seed and number of containers
 - ❖ Date of exportation from the United States
 - ❖ Distinguishing marks on the containers at the time of exportation
 - ❖ Name and address of the United States exporter;
- ◆ Document issued by a Customs or other government official of the country to which the seed was exported indicating that the seed was **not** admitted into the commerce of that country; and
- ◆ Document issued by a Customs or other government official of the country to which the seed was exported indicating that the seed was **not** commingled with other seed after being exported to that country.

U.S. origin seeds that **lack** all of the above documents **must** meet the import requirements for the country from which the seeds are being exported.

If from Canada, see [Seeds of U.S. Origin Returning from Canada](#).

Introduction

The [Specific Restrictions](#) chapter provides the specific requirements and restrictions for individual plants for planting taxa. The specific restrictions listed in this chapter are in addition to the [General Restrictions](#) and the requirements and restrictions listed for specific plant taxa in [Lists of Plants for Planting](#).

These additional specific restrictions on the importation of specific types of plants for planting are necessary to effectively mitigate the risk of introducing quarantine pests into the U.S. through the importation of plants for planting. Specific restrictions may be placed on the importation of the entire plant or on certain plant parts.

A reference to a scientific name includes **all** plants for planting within the taxon represented by the scientific name regardless of whether the common name or names are as comprehensive in scope as the scientific name. When restrictions apply to the importation of a taxon of plants for planting for which there are taxonomic synonyms, those restrictions apply to the importation of all the synonyms of that taxon as well.

Artificially Dwarfed Plants

Any artificially-dwarfed plant (e.g. bonsai or penjing) imported into the United States from all countries (**except** Canada), **except** for plants that are **less than** 2 years old **must** have been grown and handled in accordance with the requirements listed below and **must** be accompanied by a phytosanitary certificate that was issued by the government of the country where the plants were grown.

The plants **must** be as follows:

- ◆ Any growing media, including soil **must** be removed from the artificially-dwarfed plants (bonsai or penjing) prior to shipment to the United States
 - ❖ **Except** for plants to be imported in accordance with [Approved Taxa for Plants in Growing Media Program](#)
- ◆ Artificially dwarfed plants **must** be grown in accordance with the following requirements and the required phytosanitary certificate **must** contain the following additional declarations that those requirements have been met:
 - ❖ Artificially dwarfed plants **must** be grown for at least 2 years in a greenhouse or screenhouse in a nursery registered with the government of the country where the plants were grown;
 - ❖ Greenhouse or screenhouse in which the artificially dwarfed plants are grown **must** have screening with openings of **not** more than 1.6 mm on all vents and openings, and all entryways **must** be equipped with automatic closing doors;
 - ❖ Artificially dwarfed plants **must** be grown in pots containing **only** sterile growing media during the 2-year period when they are grown in a greenhouse or screenhouse in a registered nursery;
 - ❖ Artificially dwarfed plants **must** be grown on benches at least 50 cm above the ground during the 2-year period when they are grown in a greenhouse or screenhouse in a registered nursery; and
 - ❖ Plants and the greenhouse or screenhouse and nursery where they are grown **must** be inspected for any evidence of pests and found free of pests of quarantine significance to the United States at least once every 12 months by the plant protection service of the country where the plants are grown.

Continue to [Artificially Dwarfed Plants That Are Hosts of ALB/CLB](#) to determine if meets conditions for entry.

Artificially Dwarfed Plants That Are Hosts of ALB/CLB

Artificially dwarfed plants for planting that are hosts of *Anoplophora chinensis* (CLB) and/or *Anoplophora glabripennis* (ALB) **must** have been grown under the conditions listed under [Artificially Dwarfed Plants](#) throughout their life or for a period of at least **three** years immediately prior to export. These plants **must** be accompanied by a phytosanitary certificate from the country of origin with the additional declarations under [Artificially Dwarfed Plants](#) on page 3-5 **and** an additional declaration stating:

The plants for planting in this shipment, including all plant parts (e.g. rootstock, scion, etc.) were solely grown in the *[insert name of exporting country]* under the conditions of Federal Order #DA-2013-18 dated May 9, 2013 and the place of production and the plants are and have been found free of signs and presence of *A. chinensis* and/or *A. glabripennis*.

See [Anoplophora chinensis \(CLB\) and Anoplophora glabripennis \(ALB\)](#) for more information about regulating host plants (**except** seeds) of ALB and CLB.

Controlled Substances That Are Plants for Planting

Although **not** regulated specifically as a controlled substance by APHIS regulations, some plants for planting may be prohibited entry as a controlled substance by another U.S. authority's regulations.

EXAMPLE *Cannabis sativa* and *Papaver somniferum* seeds can be used to grow plants that can be the source of depressant drugs.

Apply all APHIS restrictions for plants for planting and then contact a CBP Officer to determine admissibility as a controlled substance.

Cannabis sativa

Per the Agricultural Marketing Service's Act of 1949, the term "**hemp**" is defined as *C. sativa* plant and plant products and all derivatives, with a delta-9 tetrahydrocannabinol (THC) concentration of **not more than** 0.3% on a dry weight basis. Such plants and plant products, including seeds, of *C. sativa* are **not** regulated by the Drug Enforcement Agency (DEA). Plant and plant products, including seed, of *C. sativa* with a THC content **greater than** 0.3% are regulated by the DEA.

Questions or requests for information regarding hemp can be sent to farbill.hemp@usda.gov.

See requirements for importation of hemp from [Canada](#).

Hemp seeds from all countries **other than** Canada may be imported into the United States if accompanied by a phytosanitary certificate from the exporting country's National Plant Protection Organization (NPPO) to verify the origin of the seed and to confirm **no** plant pests are detected.

Hemp plants may be imported into the United States from **other than** Canada if accompanied by **both**: 1) a phytosanitary certificate from the exporting country's NPPO to verify the origin of the plant and to confirm **no** plant pests are detected; **and** 2) a PPQ 587 permit.

Hemp seed and plant shipments will be inspected upon arrival at the first port of entry by Customs and Border Protection (CBP) and/or at a USDA Plant Inspection Station (PIS) to ensure USDA regulations are met, including certification and freedom from plant pests.

Not Authorized and Prohibited Plants

These regulatory actions notify that certain plants for planting are **not** authorized or prohibited entry:

- ◆ [Federal Import Orders](#)
- ◆ [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#)
- ◆ [Prohibited Articles List](#)

Federal Import Orders

A Federal Order (Federal Import Order) is a legal document issued in response to an APHIS decision that emergency regulatory action is necessary to protect American agriculture or to prevent the entry and establishment of a pest or disease in the United States.

A Federal Import Order may add taxa to the list of plants that are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) or may impose restrictions such as pest mitigation measures on the import of host genera from countries that have a significant import history of those plants with the U.S. and are **exempt** from NAPPRA.

[Federal Import Orders](#) remain in effect until revised by another Federal Import Order or until an interim rule or Federal Notice on the same subject is published.

Federal Notices

A Federal Notice (*Federal Register* Notice) is published in the *Federal Register* to alert and inform the public that APHIS is taking an action or going to take an action.

Final Rules

A Final Rule is published in the *Federal Register*. See [Final Rules](#).

Not Authorized Pending Pest Risk Analysis (NAPPRA)

A **Not** Authorized Pending Pest Risk Analysis (NAPPRA) designation allows APHIS-PPQ to take prompt action on evidence that the importation of a taxon of plants for planting may pose a risk and allows public participation in the process.

All other plants for planting import prohibitions and restrictions in 7 CFR 319 Subpart H—Plants for Planting, Federal Notices, and Federal Orders apply. See specific plant genera in Chapter 6, [Lists of Plants for Planting](#).

APHIS-PPQ may propose to designate plant taxa as NAPPRA under **either** of the following conditions:

- ◆ When APHIS-PPQ has evidence that a plant taxon is a host of a quarantine pest and is from a country with little or **no** recent import history, then PPQ proposes to add the country/plant combination as NAPPRA; or
- ◆ When APHIS-PPQ has evidence that a plant taxa itself is a quarantine pest and the plant is **not** known to occur in the U.S. or is under official control, then we propose to add that species as NAPPRA from all countries.

If APHIS-PPQ determines that a taxon is either a quarantine pest or a host of a quarantine pest, then we propose the plant to be designated and added as NAPPRA by publishing a notice in the *Federal Register* announcing our determination that a taxon is a quarantine pest or is a host of a quarantine pest, citing the scientific evidence APHIS-PPQ considered in making the determination, and giving the opportunity for the public to comment on the determination. If we receive **no** comments that change our determination, then the taxon will be added to the category NAPPRA.

To import a plant that has been designated as and added to NAPPRA, a pest risk analysis (PRA) **must** be requested and completed. See the [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) website for more information.

Consolidation of Plants for Planting Regulations

Specific requirements for some plants for planting were previously covered in other 7 CFR part 319 subpart commodity-specific regulations. The restructuring of regulations on the importation of plants for planting removes those specific provisions from other subparts in 7 CFR part 319 and consolidates the requirements into 7 CFR 319.37-1 through 319.37-23 regulations. See [Table 3-1](#).

Table 3-1 Consolidation of 319 Subparts for Plants for Planting to 7 CFR 319.37-1 through 319.37-23

319.8	Foreign Cotton and Covers: Moved specific prohibitions or restrictions (including any plant parts for planting) to 319.37-1 through 319.37-23
319.15	Sugarcane: Moved specific prohibitions or restrictions for plants (including any plant parts) for planting to 319.37-1 through 319.37-23
319.24	Corn Diseases: Moved specific prohibitions or restrictions for plants (including any plant parts) for planting to 319.37-1 through 319.37-23
319.28	Citrus Fruit: Moved specific prohibitions or restrictions for plants (including any plant parts) for planting to 319.37-1 through 319.37-23
319.40	Logs, Lumber, and Other Wood Articles: Moved specific prohibitions or restrictions for plants (including any plant parts) for planting to 319.37-1 through 319.37-23
319.41	Indian Corn or Maize, Broomcorn, and Related Plants: Moved specific prohibitions or restrictions for plants (including any plant parts) for planting to 319.37-1 through 319.37-23
319.55	Rice: Moved specific prohibitions or restrictions for plants (including any plant parts) for planting to 319.37-1 through 319.37-23
319.59	Wheat Diseases: Moved specific prohibitions or restrictions for plants (including any plant parts) for planting to 319.37-1 through 319.37-23
319.69	Packing Materials
319.73	Coffee: Moved specific prohibitions or restrictions for plants (including any plant parts) for planting to 319.37-1 through 319.37-23

Prohibited Articles List

Before the Restructuring of Regulations on the Importation of Plants for Planting, effective April 18, 2018, the regulations in 7 CFR 319.37-2(a) included a table that listed prohibited articles (plants and seeds **only** if specifically mentioned), foreign places from which the plants were prohibited from being imported or offered for entry into the United States, and quarantine pests existing in the places named and capable of being transported with the prohibited article. Plants for planting on the Prohibited Articles List could **only** be offered for import under a controlled import permit. Most of the commodities that were listed in 7 CFR 319.37-2(a) table are now added to the list of those whose importation is [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#).

See Chapter 6, [Lists of Plants for Planting](#), where individual taxa formerly listed as prohibited articles in 319.37-2(a), are identified by taxa in the first column and in the last column as, “[Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from [Prohibited Articles List, Final Rule Effective April 18, 2018](#)”.

Prohibited from Other Regulatory Actions or Other Federal Agencies

Plants for planting that are identified as prohibited entry into the U.S. are as follows:

- ◆ Emergency Action
- ◆ Federal Noxious Weeds
- ◆ Parasitic Plants
- ◆ Plants are still **not** enterable after completing a pest risk analysis (PRA) or that are prohibited by some other regulation that specifically says “prohibited”
- ◆ Other regulations that specifically identifies the plants as prohibited

Plant taxa that are prohibited from other regulatory actions or other Federal Agencies are identified in Chapter 6, [Lists of Plants for Planting](#), in the last column.

Commodity Import Approval Process (How to Request a PRA)

To obtain access to U.S. markets (commercial distribution) for a taxa of plants for planting that is **not** already an approved commodity, the requester **must** initiate a Commodity Import Request. The commodity import approval process includes a pest risk analysis (PRA).

The commodity import approval process is as follows:

1. Determine if the commodity is an [approved commodity](#) or [currently undergoing a pest risk analysis](#).
2. If the commodity (plant for planting) is **not** approved or is currently undergoing a pest risk analysis, then submit a [commodity import request](#).
3. APHIS will conduct a [pest risk analysis](#) and an environmental review to determine potential pests likely to remain on the commodity upon importation and potential mitigations that may be required to avoid, reduce, or eliminate the risk of pest introduction.
4. If APHIS determines that the commodity can be safely imported into the United States, then APHIS will initiate the [regulatory administrative process](#) to seek public comment.

USDA's Animal and Plant Health Inspection Service (APHIS) analyzes the risk of agricultural commodities to determine how they **must** be inspected, treated, or certified to be imported safely into the United States. If you have a question about importing a commodity or requesting approval for the importation of a new commodity, please call our Customer Service Support office at 301-851-2046 or 877-770-5990.

See the [Commodity Import Approval Process website](#) for more information.

Special Permits

Controlled Import Permits

A *Controlled Import Permit* (CIP) is the permit type authorizing the importation of prohibited or restricted plant taxa. Plants and plant parts that are prohibited or restricted from entering the United States identified in the *Plants for Planting Manual* as **not** authorized pending pest risk analysis (NAPPRA) or **not** authorized (prohibited) may **only** be considered for import for the following purposes under a CIP:

- ◆ Developmental purposes (evaluate, monitor, or verify plant material for plant health risks and/or adaptability of plant material for certain uses or environments, i.e., development of new varieties);
- ◆ Experimental purposes (scientific testing to collect data and perform analytical processes under controlled conditions, i.e., research); or
- ◆ Therapeutic purposes (specific scientific processes designed to eliminate, isolate, or remove potential plant pests or diseases; i.e., treatment to provide pest-free stock).

[General Restrictions](#) **do not** apply to plants for planting imported under a CIP. See the [Controlled Import Permits website](#) for more information.

Pest Permits

A PPQ 526 Pest Permit is required for the importation of plants that APHIS has identified as parasitic plants or weeds. For more information, see [Regulated Organism and Soil Permits](#).

Protected Plant Permits

Plants for planting that are protected under the Convention for International Trade in Endangered Species of Wild Fauna and Flora (CITES) or the Endangered Species Act (ESA) require a USDA Protected Plant Permit be obtained for those engaged in the business of importing, exporting, or re-exporting CITES and ESA regulated plants and plant products. See [Plant Health Permits](#) for PPQ 621, Application for Protected Plant Permit to engage in the business of importing, exporting, or re-exporting terrestrial plants or plant products that are protected, and PPQ 587, Application for Permit to Import Plants or Plant Products.

Federal Noxious Weed Plants

Federal noxious weeds are **prohibited** entry from **all** countries into the United States as quarantine pests under the authority of 7 CFR 360 to prevent their introduction into the United States and their dissemination within the United States. Federal noxious weeds are included in the [Lists of Plants for Planting](#).

Federal noxious weeds **cannot** be moved into or through the United States or interstate unless all of the following conditions are met:

1. Apply for a PPQ Form 526 permit to move a Federal noxious weed in accordance with 7 CFR 360, Federal Plant Pest Regulations; Plant Pests.
2. Permit application is approved.
3. Movement is specific with the specific conditions contained in the permit.

See [Federal Noxious Weed List](#) for more information about the noxious weeds and *PPQ Form 526, Application for permit to move live plant pests, biological control agents, or noxious weeds*.

Parasitic Plants

Parasitic plants are **prohibited** entry from all countries into the United States as quarantine pests under the authority of the Plant Protection Act, 7 CFR 330. Parasitic plants are included in the [Lists of Plants for Planting](#).

Parasitic plant pests **cannot** be moved into or through the United States or interstate unless **all** of the following conditions are met:

1. Apply for a permit to move a plant pest in accordance with 7 CFR Part 330, Movement of Plant Pests; complete *PPQ Form 526, Application for permit to move live plant pests, biological control agents, or noxious weeds*.
2. Permit application is approved.
3. Movement is specific with the specific conditions contained in the permit.

See the list of [Parasitic Plant Genera](#). See [Federal Noxious Weeds](#) website for more information about the parasitic plants and *PPQ Form 526, Application for permit to move live plant pests, biological control agents, or noxious weeds*.

Plant Indexing

Indexing is a procedure for using plant material or its extracts to determine the presence or absence of one or more pests in or on the tested plant material. For the purposes of importing plants for planting, indexing is performed in foreign countries to test the parent stock of designated plant material that **must** meet special foreign inspection and certification requirements listed in the *Plants for Planting Manual* to be eligible for importation into the United States. The results of indexing tests are used by the plant protection services of foreign countries to issue phytosanitary certificates declaring plant material free of specified diseases. The following indexing procedures are authorized for use with the specified plant genera, if the procedures are performed using protocols acceptable to the plant protection service that issues phytosanitary certificates based on them:

- ◆ Electron microscopy for *Dianthus* and *Prunus*;
- ◆ Graft transmission of the pest to an indicator plant for *Chaenomeles*, *Cydonia*, *Malus*, *Prunus*, *Pyrus*, *Rubus*, and *Syringa*;
- ◆ Mechanical transmission of the pest to an indicator plant for *Dianthus*, *Malus*, *Prunus*, *Rubus*, and *Syringa*;
- ◆ Nucleic acid probes for *Chaenomeles*, *Cydonia*, *Malus*, and *Pyrus*; and
- ◆ Serology for *Dianthus*, *Malus*, *Prunus*, *Pyrus*, *Rubus*, and *Syringa*.

See [Chaenomeles spp.](#), [Chaenomeles spp. from Canada](#); [Cydonia spp.](#), [Cydonia spp. from Canada](#); [Dianthus spp.](#), [Dianthus spp. from Great Britain](#), [Dianthus spp. from the Netherlands](#); [Dianthus spp. Cuttings from Kenya](#); [Malus spp.](#), [Malus spp. from Belgium](#), [Malus spp. from Canada](#), [Malus spp. from France](#), [Malus spp. from Germany](#), [Malus spp. from Netherlands](#); [Prunus spp.](#), [Prunus from the Netherlands](#); [Pyrus spp.](#), [Pyrus spp. from Canada](#); [Rubus spp.](#), [Rubus spp. from Canada](#), [Rubus spp. from United Kingdom](#).

Plant Sampling Requirements

Sampling may be required for certain taxa of plants for planting, as follows:

- ◆ Hosts of Asian longhorned beetle (ALB) and/or citrus longhorned beetle (CLB)
- ◆ *Malus* spp.
- ◆ *Prunus* spp.

Sampling of ALB and CLB Hosts

Destructive sampling of plants over 10mm in diameter may be required for all host material of Asian longhorned beetle (ALB) and citrus longhorned beetle (CLB) from all countries. Shipments will be denied entry if any life stage of these two pests or any signs of the presence of wood borers are found. [Federal Order Effective May 20, 2013](#).

See [Table 3-3, Host Plants \(except seeds\) of *Anoplophora chinensis* \(CLB\) and/or *Anoplophora glabripennis* \(ALB\)](#).

Seasonal Sampling of *Malus* and *Prunus*

Samples of the following will be collected by plant inspection station staff and sent to the USDA Plant Germplasm Quarantine Center for testing and evaluation:

- ◆ *Malus* spp. when imported from the Belgium, France, Germany, and the Netherlands
- ◆ *Prunus* spp. when imported from the Netherlands

Each variety, clone, or rootstock of *Malus* and *Prunus* from each nursery will be sampled once each season.

Plants for Planting that Require Treatment for Entry

Certain plants for planting may be imported into the United States (U.S.) from designated countries and localities **only** if they have been treated for the specified pests. Treatment may also be required for entry of plants that are **not** in compliance, i.e., pest found. See [Plants for Planting Not in Compliance](#).

Treatment at APHIS Approved Facilities Outside the U.S.

Seeds and bulbs treated prior to importation into the U.S. **must** be treated in accordance with 7 CFR 305. An inspector may require treatment within the U.S. of plants that have been treated prior to importation from outside the U.S. if such treatment is deemed to be necessary.

Treatments performed outside the U.S. **must** be certified in accordance with the conditions below:

- ◆ **Must** be monitored and certified by an APHIS inspector or an official authorized by APHIS from the plant protection service of the exporting country at an APHIS approved facility;
- ◆ **Must** be accompanied by a phytosanitary certificate with the following additional declaration stating, “The consignment of *[fill in botanical name]* has been treated in accordance with 7 CFR part 305.”; and
- ◆ During the entire interval between treatment and export, the consignment **must** be stored and handled in a manner that prevents any infestation by quarantine pests.

Continue to [Table 3-2, Plant Material Requiring Treatment for Entry](#).

Specific Restrictions

Plants for Planting that Require Treatment for Entry

Table 3-2 Plant Material Requiring Treatment for Entry

Plant Material	Country or Locality	Pest(s) for which Treatment is required	Treatment
<i>Abelmoschus</i> spp. (okra) seeds	All countries and localities	<i>Pectinophora gossypiella</i> (pink bollworm)	T203-g-1, T203-g-2, or T203-g-3
<i>Allium sativum</i> (garlic) bulbs	Algeria, Armenia, Austria, Azerbaijan, Belarus, Croatia, Czechia (Czech Republic), Egypt, France, Georgia, Germany, Greece, Hungary, Iran, Israel, Italy, Kazakhstan, Kyrgyzstan, Republic of Moldova, Morocco, Portugal, Serbia and Montenegro, Slovakia, Slovenia, Republic of South Africa, Spain, Switzerland, Syria, Russian Federation, Tajikistan, Turkey, Turkmenistan, Ukraine, Uzbekistan	<i>Brachycerus</i> spp. <i>Dyspessa ulula</i>	T202-j or T202-j-1
<i>Castanea</i> (chestnut) seeds	All countries and localities except Canada and Mexico	<i>Curculio elephas</i> , <i>Curculio nucum</i> , <i>Cydia splendana</i> , <i>Pammene fasciana</i> and other insect pests of chestnut and acorn	T203-e or T203-e-1
<i>Dioscorea</i> spp. (yam) including, but not limited to mini-setts, tubers, yam-setts	All countries except Japan, Dominican Republic into Puerto Rico, West Indies into U.S. Virgin Islands	<i>Aspidiotosis hartii</i> (yam scale), <i>Palaeopus holistic</i> (yam weevil), and a diversity of other internal and external feeders	T202-d
<i>Guizotia abyssinica</i> (niger) seeds	All countries	<i>Cuscuta</i> spp. and other Federal noxious weeds (see Federal Noxious Weed List)	T412-a, T412-b-1, or T412-b-2
<i>Hibiscus</i> spp. (except <i>Hibiscus cannabinus</i> (hibiscus, rose mallow)) seeds	All countries	<i>Pectinophora gossypiella</i> (pink bollworm)	T203-g-1 or T203-g-3
			continue to next page

Table 3-2 Plant Material Requiring Treatment for Entry (continued)

Plant Material	Country or Locality	Pest(s) for which Treatment is required	Treatment
<i>Hibiscus cannabinus</i> seeds	All countries except Mexico when moving into pink bollworm infested areas or suppressive areas of <ul style="list-style-type: none"> ◆ Arizona (entire State) ◆ California (Fresno County, Imperial County, Inyo County, Kern County, Kings County, Los Angeles County, Madera County, Merced County, Orange County, Riverside County, San Bernardino County, San Benito County, San Diego County, Tulane County) ◆ New Mexico (entire State) ◆ Texas (entire State) 	<i>Pectinophora gossypiella</i> (pink bollworm)	T203-g-1 or T203-g-3 7 CFR 301.52-2a
<i>Lathyrus</i> spp. (sweet pea, peavine) seeds	All countries except Belize, Canada, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, North America, and Panama	Insects of the family Bruchidae	T203-b
<i>Lens</i> spp. (lentil) seeds	All countries except Belize, Canada, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, North America, and Panama	Insects of the family Bruchidae	T203-b
<i>Quercus</i> spp. (oak) seeds	All countries except Canada and Mexico	<i>Curculio elephas</i> , <i>Curculio nucum</i> , <i>Cydia splendana</i> , <i>Pammene fusciana</i> , and other insect pests of chestnut and acorn	T203-e or T203-e-1
Rutaceae seeds of all species in family	Afghanistan, Andaman Islands, Cambodia, Caroline Islands, Congo (Democratic Republic of the), Cote d'Ivoire, Fiji Islands, Home Island in Cocos (Keeling) Islands, Hong Kong, Korea, Democratic People's Republic of (North Korea), Korea, Republic of (South Korea); Mozambique, Oman, Rodrigues Island, Seychelles, Thursday Island, United Arab Emirates	<i>Xanthomonas citri</i> ssp. <i>citri</i>	T203-p
<i>Vicia</i> spp. (faba bean, fava bean, vetch) seeds	All countries except Belize, Canada, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, North America (Canada, Mexico), and Panama	Insects of the family Bruchidae	T203-c-1 or T203-d-2

Plants for Planting from Israel

Plants for planting (**except** bulbs, dormant herbaceous perennials, and seeds) from Israel are regulated to prevent the entry of the plant pest *Spodoptera littoralis* and other quarantine pests. Details are in the [Spodoptera Exclusion Program](#).

Dormant bulbs and dormant perennials from Israel may enter if meeting the conditions of the [Pecleared Bulbs and Underground Portions of Dormant Perennials Preclearance Program](#).

Continue to [Fragaria spp. from Israel](#), [Pelargonium spp.](#), [Spodoptera Exclusion Program](#), [Pecleared Bulbs and Underground Portions of Dormant Perennials Preclearance Program](#), and the specific plant taxon in Chapter 6, [Lists of Plants for Planting](#).

Fragaria spp. from Israel

Fragaria spp. plants for planting (**except** seeds) from Israel are regulated to prevent the entry of red stele disease and other damaging strawberry pathogens.

Fragaria spp. plants for planting (**except** seeds) from Israel **must** be accompanied by a phytosanitary certificate with an additional declaration that states:

“The parent stock was found free of red stele disease pathogen as well as any other damaging strawberry pathogens, based on visual inspection and [indexing](#).”

Indexing procedures authorized by APHIS for *Fragaria* spp. are mechanical transmission of the pest to an indicator plant and nucleic acid probes.

If the phytosanitary certificate **lacks** the required additional declaration, then prohibit entry.

Fragaria spp. from Israel **must** also meet the requirements of the [Spodoptera Exclusion Program](#).

***Pelargonium* spp.**

Pelargonium spp. plants for planting from Israel **must** be accompanied by a phytosanitary certificate with an additional declaration that states, “*Ralstonia solanacearum* race 3 biovar 2 is **not** known to occur in Israel.”

Pelargonium spp. from Israel **must** also meet the requirements of the [Spodoptera Exclusion Program](#).

See [Pelargonium spp.](#) for more information.

Precleared Bulbs and Underground Portions of Dormant Perennials Preclearance Program

Specific dormant bulbs and underground portions of dormant perennials from Israel may enter under the Preclearance Program. See [Preclearance Programs](#) for a list of admissible dormant plant taxa and requirements.

If the bulbs and dormant herbaceous perennials from Israel are **not** listed in the Preclearance Program or **do not** meet the requirements of the Spodoptera Exclusion Program, then they are **not** admissible into the U.S., prohibit entry.

***Spodoptera* Exclusion Program**

When from Israel, plants for planting (**except** bulbs, dormant herbaceous perennials, and seeds) are regulated to prevent *Spodoptera littoralis* and other quarantine pests found in Israel from entering the United States.

Plants for planting (**except** bulbs, dormant herbaceous perennials, and seeds) from Israel may **only** be imported into the U.S. when meeting the following requirements:

Must be accompanied by a phytosanitary certificate at the time of arriving at the port of first arrival in the United States and **must** contain the following additional declarations stating,

“Plants were produced in an approved Israeli production site that is operated by a grower participating in the export program for plants established by the national plant protection organization (NPPO) of Israel.” (see list of [Approved Israeli Nurseries Spodoptera Exclusion Program](#))

and

“Plants were grown under conditions specified by APHIS as described to prevent infestation or contamination with *Spodoptera littoralis* or other quarantine pests.”

Grower Registration and Agreement

Persons in Israel who produce plants for export to the United States **must**:

- ◆ Be registered and approved by the NPPO of Israel; and
- ◆ Enter into an agreement with the NPPO of Israel whereby the producer agrees to participate in and follow the export program for plants established by the national plant protection organization of Israel.

Growing Requirements

Growers in Israel who produce plants for export to the U.S. **must** meet the following requirements for inclusion in the [Spodoptera Exclusion Program](#) established by the NPPO of Israel:

- ◆ Plants destined for export to the United States **must** come from a production site devoted solely to production of such plants;
- ◆ Production sites in which such plants are produced **must** be registered with the NPPO of Israel;
- ◆ Production sites **must** employ safeguards agreed on by APHIS and the NPPO of Israel to prevent the entry of *Spodoptera littoralis*, including, but **not** limited to insect proof screening over openings and double or airlock-type doors. Any rips or tears in the insect-proof screening **must** be repaired immediately;
- ◆ Each production site in which plants destined for export to the U.S. are grown **must** have at least one blacklight trap for one year following any of the following events:
 - ❖ Construction of the production site,
 - ❖ Entry of the production site into the approved plants export program,
 - ❖ Replacement of the covering of the production site, or
 - ❖ Detection and repair of a break or tear in the plastic or screening in the production site.

Inspections

Inspections undertaken in the [Spodoptera Exclusion Program](#) established by the NPPO of Israel will include, but may **not** be limited to the following:

- ◆ NPPO of Israel will inspect the plants and the production site weekly to ensure that **no** quarantine pests are present;
- ◆ Plants **must** be inspected to ensure that they are free of quarantine pests before being allowed into the screened area of the production site;
- ◆ NPPO of Israel will inspect the plants to ensure that **no** quarantine pests are present prior to export;

- ◆ Packing materials and shipping containers for the plants **must** be inspected and approved by APHIS to ensure that they **do not** introduce pests of concern to the plants;
- ◆ Either APHIS or the NPPO of Israel will inspect the production site of the plants to ensure that they meet standards of sanitation approved by APHIS;
- ◆ Inspectors from both APHIS and the NPPO of Israel will have access to the production site as necessary to ensure that growers are employing the safeguards prescribed by the program and that those safeguards and procedures are correctly implemented; and
- ◆ NPPO of Israel will provide APHIS with access to the list of registered and approved growers at least annually.

Ineligibility for Participation

Growers will be ineligible for participation in the [Spodoptera Exclusion Program](#) established by the NPPO of Israel and their production sites will lose approved status if any **one** of the following occur:

- ◆ Live *Spodoptera littoralis* are found in a production site;
- ◆ Live *Spodoptera littoralis* are found at a port of inspection two times during the shipping season in shipments from the same grower; or
- ◆ Growers violate the requirements set out in this section and by the export program established by the NPPO of Israel.

Reinstatement

A grower may be reinstated, and the grower's production sites may regain approved status by requesting re-approval and submitting a detailed report describing the corrective actions taken by the grower. Re-approval will **only** be granted upon concurrence from the NPPO of Israel and APHIS.

Termination

APHIS may terminate the entire program if there are repeated violations of procedural or biological requirements.

Trust Fund

The government of Israel **must** enter into a trust fund agreement with APHIS before each growing season. The government of Israel or its designated representative is required to pay in advance all estimated costs that APHIS expects to incur through its involvement in overseeing the execution of the [Spodoptera Exclusion Program](#).

These costs will include administrative expenses incurred in conducting the services enumerated in the [Spodoptera Exclusion Program](#) and all salaries

Specific Restrictions

Plants for Planting from Israel

including overtime and the Federal share of employee benefits, travel expenses including per diem and expenses, and other incidental expenses incurred by the inspectors in performing these services. The government of Israel or its designated representative is required to deposit a certified or cashier's check with APHIS for the amount of the costs estimated by APHIS.

If the deposit is **not** sufficient to meet all costs incurred by APHIS, the agreement further requires the government of Israel or its designated representative to deposit with APHIS a certified or cashier's check for the amount of the remaining costs, as determined by APHIS, before the services will be completed. After a final audit at the conclusion of each shipping season, any overpayment of funds would be returned to the government of Israel or its designated representative or held on account until needed.

See list of [Approved Israeli Nurseries, Spodoptera Exclusion Program](#).

Plant Pest Specific Restrictions

Specific regulated plant pests, their host plants, and specific restrictions follow:

- ◆ *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB)
- ◆ Emerald Ash Borer (*Agrilus planipennis*)
- ◆ Khapra Beetle
- ◆ *Phytophthora kernoviae*
- ◆ *Phytophthora ramorum* (sudden oak death)
- ◆ Potato Cyst Nematodes (PCN)

All other plants for planting import prohibitions and restrictions for the host genera in this *Plants for Planting Manual* apply, unless meeting exception conditions for entry.

Specific Restrictions

Anoplophora chinensis (CLB) and *Anoplophora glabripennis* (ALB)

***Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB)**

Plants for planting (**except** seeds) that are hosts of *Anoplophora chinensis* (citrus longhorned beetle) (CLB) and *Anoplophora glabripennis* (Asian longhorned beetle) (ALB) are regulated by the following:

- ◆ [Federal Register Notice, Not Authorized Pending Pest Risk Analysis \(NAPPRA\), Round 1 Plants for Planting Quarantine Pest Evaluation Data Sheets; Hosts of Quarantine Pests – Final](#) effective May 20, 2013 APHIS-2011-0072-0044
- ◆ [Federal Order Effective May 20, 2013](#) for the Importation of Host Material of *Anoplophora chinensis* (citrus longhorned beetle) and *Anoplophora glabripennis* (Asian longhorned beetle)

The *Federal Register* NAPPRA Notice restricts the entry of host genera from countries **without** a significant import history of those plants with the U.S. and are applied first.

The Federal Order covers the import of host genera from countries that have a significant import history of those plants with the U.S. and are **exempt** from the NAPPRA restrictions (are **not** listed as NAPPRA).

All other plants for planting import prohibitions and restrictions for the host genera in the *Plants for Planting Manual* apply. Certain hosts are covered by more restrictive regulations than those for ALB/CLB. See the specific plant genera in the [Lists of Plants for Planting](#) for applicable restrictions.

Countries Where ALB and/or CLB Are Present

Anoplophora chinensis (CLB) and/or *Anoplophora glabripennis* (ALB) are present in the following countries: Afghanistan, China, European Union (Austria, Belgium, Bulgaria, Croatia, Cypress, Czechia (Czech Republic), Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom (England, Northern Ireland, Scotland, Wales), Indonesia, Japan, Korea, Democratic People's Republic of (North Korea); Korea, Republic of (South Korea); Madagascar, Malaysia, Myanmar, Philippines, Switzerland, Taiwan, and Vietnam.

Host Genera of ALB and/or CLB

First see [Table 3-3](#) to regulate host genera of ALB and/or CLB host genera. After regulating for ALB/CLB, then see the specific taxa in Chapter 6, [Lists of Plants for Planting](#) to determine if other restrictions or prohibitions apply.

Table 3-3 Host Plants (except seeds) of Anoplophora chinensis (CLB) and/or Anoplophora glabripennis (ALB)

If the ALB or CLB host plant is:	And is from:	Then:
Acacia spp.	Canada	SEE Table 3-4
	All countries except Canada	Not authorized/NAPPRA (prohibit entry)
Acer spp.	Canada	SEE Table 3-4
	Netherlands	SEE Table 3-7
	New Zealand	SEE Table 3-8
	Other than listed above	Not authorized/NAPPRA (prohibit entry)
Aesculus spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized/NAPPRA (prohibit entry)
Albizia spp.	Canada	SEE Table 3-4
	Israel	SEE Table 3-8
	Other than listed above	Not authorized/NAPPRA (prohibit entry)
Alnus spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized/NAPPRA (prohibit entry)
Aralia spp.	Canada	SEE Table 3-4
	Costa Rica, Guatemala	SEE Table 3-8
	Netherlands	SEE Table 3-7
	Other than listed above	Not authorized/NAPPRA (prohibit entry); SEE NAPPRA
Atalantia spp.	All countries	Not authorized (prohibit entry); SEE Poncirus spp.

Specific Restrictions

Anoplophora chinensis (CLB) and Anoplophora glabripennis (ALB)

Table 3-3 Host Plants (except seeds) of Anoplophora chinensis (CLB) and/or Anoplophora glabripennis (ALB) (continued)

If the ALB or CLB host plant is:	And is from:	Then:
Betula spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Broussonetia spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Cajanus spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Camellia spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Carpinus spp.	Canada	SEE Table 3-4
	Netherlands	SEE Table 3-7
	Other than Canada and Netherlands	Not authorized (prohibit entry)
Carya spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Castanea spp.	All countries	Not authorized/NAPPRA (prohibit entry)
Castanopsis spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Casuarina spp. (= <i>Allocasuarina</i>)	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit)
Catalpa spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit)
Celastrus spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit)

Table 3-3 Host Plants (except seeds) of Anoplophora chinensis (CLB) and/or Anoplophora glabripennis (ALB) (continued)

If the ALB or CLB host plant is:	And is from:	Then:
Celtis spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Cercidiphyllum spp.	Canada	SEE Table 3-4
	Netherlands	SEE Table 3-7
	Other than Canada and Netherlands	Not authorized (prohibit entry)
Cercis spp.	Canada	SEE Table 3-4
	Israel	SEE Table 3-8
	Netherlands	SEE Table 3-7
	Other than Canada, Israel, Netherlands	Not authorized (prohibit entry)
Chaenomeles spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Citrus spp.	All countries	Not authorized (prohibit entry); SEE <i>Poncirus</i> spp.
Cornus spp.	Canada	SEE Table 3-4
	Netherlands	SEE Table 3-7
	Other than Canada, Netherlands	Not Authorized (prohibit entry)
Corylus spp.	Canada	SEE Table 3-4
	Netherlands	SEE Table 3-7
	Other than Canada, Netherlands	Not authorized (prohibit entry)
Cotoneaster spp.	Canada	SEE Table 3-4
	Costa Rica	SEE Table 3-8
	Netherlands	SEE Table 3-7
	Other than Canada, Costa Rica, Netherlands	Not authorized (prohibit entry)

Specific Restrictions

Anoplophora chinensis (CLB) and Anoplophora glabripennis (ALB)

Table 3-3 Host Plants (except seeds) of Anoplophora chinensis (CLB) and/or Anoplophora glabripennis (ALB) (continued)

If the ALB or CLB host plant is:	And is from:	Then:
Crataegus spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Cryptomeria spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Cunninghamia spp.	All countries	Not authorized (prohibit entry)
Cydonia spp. (= <i>Pseudocydonia</i>)	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Elaeagnus spp.,	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Eriobotrya spp.	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Fagus spp.	Canada	SEE Table 3-4
	Netherlands	SEE Table 3-7
	Other than countries listed above	Not authorized (prohibit entry)
Ficus spp.	Canada	SEE Table 3-4
	China	SEE Table 3-7
	Costa Rica, Dominican Republic, Guatemala, Mexico	SEE Table 3-8
	Netherlands, Taiwan	SEE Table 3-7
	Thailand	SEE Table 3-8
	Other than countries listed above	Not authorized (prohibit entry)
Fortunella spp.	All countries	Not authorized (prohibit entry) SEE Poncirus spp.

Table 3-3 Host Plants (except seeds) of Anoplophora chinensis (CLB) and/or Anoplophora glabripennis (ALB) (continued)

If the ALB or CLB host plant is:	And is from:	Then:
Fraxinus spp.	Canada areas not regulated for emerald ash borer	SEE Table 3-4
	All countries including areas in Canada that are regulated for emerald ash borer	Not authorized (prohibit entry) SEE Emerald Ash Borer (<i>Agrilus planipennis</i>)
Grevillea spp. (=Stylurus)	Canada	SEE Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Hedera spp.	Canada	SEE Table 3-4
	Colombia, Costa Rica, Guatemala, Israel, Kenya, Mexico	SEE Table 3-8
	Netherlands	SEE Table 3-7
	Other than countries listed above	Not authorized (prohibit entry)
Hibiscus spp.	Canada	SEE Table 3-4
	Denmark	SEE Table 3-7
	France	SEE Table 3-7
	Other than countries listed above	Not authorized (prohibit entry)
Ilex spp.	Canada	SEE Table 3-4
	Netherlands	SEE Table 3-7
	Other than countries listed above	Not authorized (prohibit entry)
Juglans spp.	Canada	SEE Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Koelreuteria spp.	All countries	Not authorized (prohibit entry)
Lagerstroemia spp.	Canada	SEE Table 3-4
	Israel	SEE Table 3-8
	Other than listed above	Not authorized (prohibit entry)

Specific Restrictions

Anoplophora chinensis (CLB) and Anoplophora glabripennis (ALB)

Table 3-3 Host Plants (except seeds) of Anoplophora chinensis (CLB) and/or Anoplophora glabripennis (ALB) (continued)

If the ALB or CLB host plant is:	And is from:	Then:
Lindera spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Liquidambar spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Litchi spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Maackia spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Mallotus spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Malus spp.	Belgium	GO to Table 3-7
	Canada	GO to Table 3-4
	France, Germany, Netherlands	GO to Table 3-7
	Other than listed above	Not authorized (prohibit entry)
Melia spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Morus spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Olea spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Ostrya spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)

Table 3-3 Host Plants (except seeds) of Anoplophora chinensis (CLB) and/or Anoplophora glabripennis (ALB) (continued)

If the ALB or CLB host plant is:	And is from:	Then:
Parrotia spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Persea spp. (=Machilus)	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Photinia spp. (=Stranvaesia)	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Pinus spp.	Canada	GO to Table 3-4
	Japan; Korea, Democratic People's Republic of Korea (North Korea); Korea, Republic of Korea (South Korea)	GO to Table 3-7
	Other than countries listed above	Not authorized (prohibit entry)
Platanus spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Polygonum spp. (=Reynoutria, =Fallopia)	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Poncirus spp.	All countries	Not authorized (prohibit entry) SEE Poncirus spp.
Populus spp.	Canada	GO to Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Prunus spp.	Canada	GO to Table 3-4
	Netherlands	GO to Table 3-7
	Other than listed above	Not authorized (prohibit entry)
Psidium spp.	Canada	GO to Table 3-4
	Other than Canada	Not authorized (prohibit entry)

Specific Restrictions

Anoplophora chinensis (CLB) and Anoplophora glabripennis (ALB)

Table 3-3 Host Plants (except seeds) of Anoplophora chinensis (CLB) and/or Anoplophora glabripennis (ALB) (continued)

If the ALB or CLB host plant is:	And is from:	Then:
Pterocarya spp.	All countries	Not authorized (prohibit entry) NAPPRA
Pyracantha spp.	Canada	GO to Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Pyrus spp.	Canada	GO to Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Quercus spp.	Canada	GO to Table 3-4
	France	GO to Table 3-7
	Other than listed above	Not authorized (prohibit entry)
Rhododendron spp.	Canada	GO to Table 3-4
	Japan	GO to Table 3-7
	Other than listed above	Not authorized (prohibit entry)
Rhus spp. (=Toxicodendron)	Canada	GO to Table 3-4
	Other than Canada	Not authorized (prohibit entry)
Robinia spp.	Canada	Go to Table 3-4
	Israel	GO to Table 3-8
	Netherlands	GO to Table 3-7
	Other than listed above	Not authorized (prohibit entry)
Rosa spp.	Canada	GO to Table 3-4
	Denmark, France, Germany, Netherlands, United Kingdom (England, Northern Ireland, Scotland, Wales)	GO to Table 3-7
	Other than listed above	Not authorized (prohibit entry)

Table 3-3 Host Plants (except seeds) of Anoplophora chinensis (CLB) and/or Anoplophora glabripennis (ALB) (continued)

If the ALB or CLB host plant is:	And is from:	Then:
Rubus spp.	Canada	GO to Table 3-4
	United Kingdom (England, Northern Ireland, Scotland, Wales)	GO to Table 3-7
	Other than listed above	Not authorized; (prohibit entry)
Sageretia spp.	Canada	GO to Table 3-4
	China (country where ALB/CLB is present)	GO to Table 3-7
	Other than listed above	Not authorized; (prohibit entry)
Salix spp.	Canada	GO to Table 3-4
	Other than listed above	NOT authorized; (prohibit entry)
Sapium spp. (=Triadica)	Canada	GO to Table 3-4
	Other than listed above	Not authorized; (prohibit entry)
Sophora spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Sorbus spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Styrax spp.	Canada	GO to Table 3-4
	Netherlands (country where ALB/CLB is present)	GO to Table 3-7
	Other than countries listed above	Not authorized (prohibit entry)
Tectona spp.	All countries	Not authorized (prohibit entry) NAPPRA
Tilia spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Toona spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)

Specific Restrictions

Anoplophora chinensis (CLB) and Anoplophora glabripennis (ALB)

Table 3-3 Host Plants (except seeds) of Anoplophora chinensis (CLB) and/or Anoplophora glabripennis (ALB) (continued)

If the ALB or CLB host plant is:	And is from:	Then:
Toxicodendron spp.	Canada	GO to Table 3-4
	All countries other than Canada	Not authorized (prohibit entry)
Ulmus spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Vernicia spp. (=Aleurites)	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Viburnum spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)
Zanthoxylum spp.	All countries	Not authorized (prohibit entry)
Ziziphus spp.	Canada	GO to Table 3-4
	Other than listed above	Not authorized (prohibit entry)

Table 3-4 Host Plants (except seeds) of Anoplophora chinensis (CLB) or Anoplophora glabripennis (ALB) from Canada

If the exporting country is Canada and:	And the host plant is:	Then:
Plant material was grown only in Canada	<ul style="list-style-type: none"> ◆ <i>Atalantia</i> spp., ◆ <i>Castanea</i> spp ◆ <i>Citrus</i> spp. ◆ <i>Cunninghamia</i> spp. ◆ <i>Fortunella</i> spp. 	PROHIBIT ENTRY

		Other than listed above	Is not authorized; PROHIBIT ENTRY
Thailand	<i>Ficus</i> spp.	GO to Table 3-6	
	Other than listed above	Is not authorized; PROHIBIT ENTRY	
Other than listed above		Is not authorized; PROHIBIT ENTRY	

Table 3-6 Host Plants (except seeds) of Anoplophora chinensis (CLB) and/or Anoplophora glabripennis (ALB) Imported into Canada from a Third Country

If imported into Canada from a:	And:	And:	Then:
<div style="background-color: #0070C0; color: white; padding: 5px; font-weight: bold; margin-bottom: 5px;">NOTICE</div> Use this table only if you were directed either from Table 3-5 or from the specific plant taxon in Chapter 6, Lists of Plants for Planting .			
Country where ALB and CLB are not present, but the country is listed in Table 3-5	Plants meet the definition of from ¹ Canada	Is accompanied by a phytosanitary certificate (does not require additional declaration)	INSPECT and RELEASE
	Plants do not meet the definition of from Canada	—————→	SEE Table 3-3 ; the country of origin is not Canada
	Does not meet the entry requirements of from Canada	Is accompanied by both an import permit and original phytosanitary certificate from the country of origin with an additional declaration stating, "The plants for planting in this shipment including all plant parts (e.g. rootstock, scion, etc.) were grown solely in <i>[name of exporting country]</i> and <i>Anoplophora chinensis</i> and/or <i>A. glabripennis</i> are not known to occur in <i>[name of country]</i> ." OR Is accompanied by both an import permit and original phytosanitary certificate from the exporting country with the appropriate additional declaration required in Canadian Directive D-11-01	INSPECT and RELEASE
		Is other than as described in the cell above	Is not authorized; PROHIBIT ENTRY
Country where ALB and CLB are not present and the country is not listed in Table 3-4	—————→	—————→	Is not authorized; PROHIBIT ENTRY

1 Plants for planting are considered to be "from" any country or locality in which they are grown. Provided, that plants for planting imported into the United States from Canada from another country or locality shall be considered as being **solely** from Canada if they meet the following conditions:

- (1) They were imported into the United States directly from Canada after having been grown for at least 1 year in Canada;
- (2) They have **never** been grown in a country from which their importation would not be authorized pending pest risk analysis under 319.37-4;
- (3) They have **never** been grown in a country or locality, other than Canada, from which it would be subject to certain restrictions on the importation of specific types of plants for planting under §319.37-20, which are listed in the Plants for Planting Manual; provided, that plants for planting that would be subject to postentry quarantine if imported into the United States may be imported from Canada after growth in Canada in postentry quarantine under conditions equivalent to those specified in the *Plants for Planting Manual*; and
- (4) They were **not** imported into Canada in growing media.

Specific Restrictions

Anoplophora chinensis (CLB) and Anoplophora glabripennis (ALB)

Table 3-7 Host Plants (except seeds) of *Anoplophora chinensis* (CLB) or *Anoplophora glabripennis* (ALB) from All Countries *Other than Canada* Where ALB and/or CLB Is Present

If the country of origin is:	And:	And:	And:	Then:
<p>NOTICE</p> <p>Use this table only if you were directed from Table 3-3 or from the individual plant taxa in Chapter 6, Lists of Plants for Planting.</p>				
Country where ALB and/or CLB is present and the country is listed with the specific host in Table 3-3	All plant stems are 10 mm (0.4 inch) diameter or less	Root collar is 10 mm (0.4 inch) diameter or less		Is not regulated for ALB and CLB; INSPECT
	Stem or root collar is greater than 10 mm (0.4 inches) diameter	Plants are artificially dwarfed	Is accompanied a phytosanitary certificate from the country of origin with an additional declaration stating: “The plants for planting in this shipment, including all plant parts (e.g., rootstock, scion, etc.) were grown solely in [name of exporting country] under the conditions of Federal Order DA-2013-18, dated May 9, 2013 and the place of production and the plants are and have been found free of signs and presence of <i>A. chinensis</i> and/ or <i>A. glabripennis</i> .”	INSPECT and may RELEASE if all other conditions for entry are met
		Plants for planting are other than artificially dwarfed	Must be accompanied by a phytosanitary certificate from the country of origin with an additional declaration stating: “The plants for planting in this shipment, including all plant parts (e.g., rootstock, scion, etc.) were grown solely in [Name of Pest Free Area (PFA)], [Pest Free Place of Production (PFPP)], or [Pest Free Production Site (PFPS)] ¹ an APHIS approved [PFA, PFPP, PFPS] in the [exporting country] and the place of production and the plants are and have been found free of signs and presence of <i>A. chinensis</i> and/or <i>A. glabripennis</i> through twice-yearly surveys conducted during the activity of these beetles.”	INSPECT and RELEASE if all other conditions for entry
	Lacks the additional declaration or phytosanitary certificate	Is not authorized; PROHIBIT ENTRY		
Is other than listed above				Is not authorized; PROHIBIT ENTRY

1 Currently there are **no** approved PFA, PFPP, or PFPS from any countries.

Table 3-8 Host Plants (except seeds) of ALB and CLB from Countries *Other than* Canada Where ALB and CLB Are *Not* Present

If the country of origin is:	And:	And:	And:	Then:
<div style="background-color: #0056b3; color: white; padding: 5px; margin-bottom: 10px;">NOTICE</div> <div style="border: 1px solid black; padding: 5px;">Use this table only if you were directed from either Table 3-3 or the individual plant taxa in Chapter 6, Lists of Plants for Planting</div>				
Country where ALB/CLB is not present and is listed with the specific host taxa in Table 3-3	All plant stems are 10 mm (0.4 inch) diameter or less	Root collar is 10 mm (0.4 inch) diameter or less		Plants are not regulated for <i>Anoplophora chinensis</i> (CLB) or <i>Anoplophora glabripennis</i> (ALB)
	Stem or root collar is greater than 10 mm (0.4 inches) diameter	Plants are artificially dwarfed	Meets Artificially Dwarfed Plants That Are Hosts of ALB/CLB requirements and is accompanied by a phytosanitary certificate from the country of origin, with an additional declaration stating: "The plants for planting in this shipment including all plant parts (e.g. rootstock, scion, etc.) were solely grown in <i>[name of exporting country]</i> and under the conditions of Federal Order #DA-2013-18 dated May 9, 2013, and the place of production and the plants are and have been found free of signs and presence of <i>A. chinensis</i> and/or <i>A. glabripennis</i> ."	INSPECT and RELEASE
				Lacks the requirements in the cell above
		Plants are other than artificially dwarfed plants for planting	Must be accompanied by an import permit and a phytosanitary certificate from the country of origin with an additional declaration that, "The plants for planting in this shipment, including all plant parts (e.g. root stock, scion, etc.) were solely grown in the <i>[name of exporting country]</i> and <i>A. chinensis</i> and/or <i>A. glabripennis</i> are not known to occur in the <i>[name of exporting country]</i> ."	INSPECT and RELEASE
				Lacks the requirements in the cell above

Specific Restrictions

Emerald Ash Borer (*Agrilus planipennis*)

Emerald Ash Borer (*Agrilus planipennis*)

Emerald ash borer is a destructive, wood-boring pest of *Fraxinus* spp. (ash trees). Plants for planting (**except** seeds) of *Fraxinus* spp. are prohibited from all countries **except** for any county or municipal regional county in Canada that is **not** regulated for emerald ash borer.

See [Fraxinus spp. from Canada](#) to regulate.

Fusarium oxysporum* f. sp. *cubense

Fusarium oxysporum f. sp. *cubense* Tropical race 4 (Foc TR4) is a fungal quarantine pathogen that causes vascular wilting and death in *Musa* spp. (bananas and plantains) and *Ensete ventricosum* (Abyssinian banana).

Musa spp. and *Ensete ventricosum* plants for planting (**except** seeds, cut flowers, fruits, leaves, and plants grown **only** in tissue culture or *in vitro*), are prohibited from certain countries to prevent the introduction and establishment of *Fusarium oxysporum* f. sp. *cubense* Tropical race 4 (Foc TR4) into the United States and its territories and are regulated by [Federal Order Effective May 21, 2021](#).

Musa spp. and *Ensete ventricosum* plants for planting (**except** seeds, cut flowers, fruits, leaves, and plants grown **only** in tissue culture or *in vitro*), are prohibited entry from the following countries where Foc TR4 is known to occur: Australia, China, Colombia, India, Indonesia, Israel, Jordan, Laos, Lebanon, Malaysia, Mayotte, Mozambique, Myanmar, Oman, Pakistan, Peru, Philippines, Taiwan, Thailand, Turkey, and Viet nam.

Khapra Beetle

Commercial shipments of *Carthamus tinctorius* (safflower), *Cicer* spp. (chickpeas), and *Glycine max* (soybeans) seeds are regulated to prevent the entry of *Trogoderma granarium* (Khapra beetle) from Afghanistan, Algeria, Bangladesh, Burkina Faso (Upper Volta), Cyprus, Egypt, India, Iran, Iraq, Israel, Kuwait, Libya, Mali, Mauritania, Morocco, Myanmar (Burma), Niger, Nigeria, Oman, Pakistan, Palestinian Authority (West Bank), Qatar, Republic of Sudan, Saudi Arabia, Senegal, South Sudan, Sri Lanka, Syria, Tunisia, Turkey, United Arab Emirates.

Commercial shipments of *Carthamus tinctorius* (safflower), *Cicer* spp. (chickpeas), *Glycine max* (soybeans) seeds from countries where Khapra beetle is found **must** be accompanied by a phytosanitary certificate or phytosanitary certificate of re-export (re-export certificate) with an additional declaration that states, “The shipment was inspected and found free of Khapra beetle (*Trogoderma granarium*).”

Commercial shipments of *Carthamus tinctorius* (safflower), *Cicer* spp. (chickpeas), and *Glycine max* (soybeans) seeds that originate in a country that has Khapra beetle and then make entry into any other country that then re-exports the shipment to the United states **must** be as follows:

- ◆ Be accompanied by a phytosanitary certificate or re-export certificate with an additional declaration that states, “The shipment was inspected and found free of Khapra beetle (*Trogoderma granarium*).”
- ◆ Have means of conveyance inspected and found free of Khapra beetle.

Phytophthora kernoviae

The import of host genera plants for planting (**except** seeds) of *Phytophthora kernoviae* are regulated to prevent the entry and establishment of the disease by the following:

- ◆ [Federal Register Notice, Plants for Planting Whose Importation Is Not Authorized Pending Pest Risk Analysis](#); Notice of Addition of Taxa of Plants for Planting to List of Taxa, Round 2, [Plants for Planting Quarantine Pest Evaluation Data Sheets](#); [Hosts of Quarantine Pests – Final](#) effective June 19, 2017, APHIS-2012-0076-0033

See [Table 3-9](#) for the list of host plants of *Phytophthora kernoviae*. See the specific plant taxon in Chapter 6, [Lists of Plants for Planting](#) to determine if additional restrictions or regulations apply.

Table 3-9 Host Plants (except seeds) of *Phytophthora kernoviae*

- 1 Plants for planting are considered to be “from” any country or locality in which they are grown. Provided, that plants for planting imported into the United States from Canada from another country or locality shall be considered as being **solely** from Canada if they meet the following conditions:
- (1) They were imported into the United States directly from Canada after having been grown for at least 1 year in Canada;
 - (2) They have **never** been grown in a country from which their importation would not be authorized pending pest risk analysis under 319.37-4;
 - (3) They have **never** been grown in a country or locality, other than Canada, from which it would be subject to certain restrictions on the importation of specific types of plants for planting under §319.37-20, which are listed in the Plants for Planting Manual; provided, that plants for planting that would be subject to postentry quarantine if imported into the United States may be imported from Canada after growth in Canada in postentry quarantine under conditions equivalent to those specified in the *Plants for Planting Manual*; and
 - (4) They were **not** imported into Canada in growing media.

Phytophthora ramorum (sudden oak death)

The import of host plants for planting (**except** seeds) of *Phytophthora ramorum* listed in [Table 3-10](#) are regulated to prevent the entry of *Phytophthora ramorum* (sudden oak death).

Host plants for planting (**except** seeds) from a country where *Phytophthora ramorum* is present (European Union (EU) member countries Austria, Belgium, Bulgaria, Croatia, Cypress, Czechia (Czech Republic), Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom (England, Northern Ireland, Scotland, Wales); Norway; and Switzerland) may enter the United States **only** if sent from an approved place of production with the approved registry number listed in the additional declaration field of the phytosanitary certificate accompanying the shipment.

See the [List of Approved Facilities for Hosts of Phytophthora ramorum](#). All other plants for planting import prohibitions and restrictions in 7 CFR 319 and Federal Orders apply. Some may be more restrictive, some equally restrictive, or some less restrictive.

EXAMPLE [Berberis aquifolium](#) is regulated for *Phytophthora ramorum*, but is [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries. Since NAPPRA is more restrictive, the *Phytophthora ramorum* restriction/requirements are **not** listed in Chapter 6.

See the specific plant genera or taxa in [Lists of Plants for Planting](#) to determine if the host plant meets all import restrictions.

Continue to [Table 3-10](#) on page 3-52; [Table 3-11](#) on page 3-54; [Table 3-12](#) on page 3-55.

- 1 Plants for planting are considered to be “from” any country or locality in which they were grown, provided, that plants for planting imported into Canada from another country or locality shall be considered as being **solely** from Canada if they meet the following conditions:
- (1) They are imported into the United States directly from Canada after having been grown for at least 1 year in Canada;
 - (2) They have **never** been grown in a country from which their importation would **not** be authorized pending pest risk analysis under § 319.37-4;
 - (3) They have **never** been grown in a country **other than** Canada, from which it would be subject to certain restrictions on the importation of specific types of plants for planting under § 319.37-20, which are listed in the *Plants for Planting Manual*; provided, that plants for planting that would be subject to postentry quarantine if imported into the United States may be imported from Canada after growth in another country if they were grown in Canada in postentry quarantine under conditions equivalent to those specified in the *Plants for Planting Manual*; and
 - (4) They were **not** imported into Canada in growing media.

Table 3-12 Host Plants (except seeds) of Phytophthora ramorum from *Other than* Canada

If country of origin is:	And is:	And the shipment:	Then:
Country where <i>Phytophthora ramorum</i> is present	<ul style="list-style-type: none"> ◆ European Union (Austria, Belgium, Bulgaria, Cyprus, Czechia (Czech Republic), Denmark, England, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Northern Ireland, Poland, Portugal, Romania, Scotland, Slovakia Slovenia, Spain, Sweden, Wales) ◆ Norway ◆ Switzerland 	Is accompanied by both an import permit and a phytosanitary certificate with an additional declaration stating: “All life stages of the plants for planting in this shipment meet the requirements of USDA Import Permit [permit number] and were solely grown in [name of country] within the approved place of production identified as [name of NPPO approved place of production]. The plants are determined to be free of symptoms of <i>Phytophthora ramorum</i> through an annual monitoring, sampling, testing, and validation program” and the NPPO place of production is on the Approved Hosts of Phytophthora ramorum Facilities list	INSPECT and RELEASE
		Lacks the requirements above	Is not authorized; PROHIBIT ENTRY
	Other than above	—————→	→
Country where <i>Phytophthora ramorum</i> is not present	Other than Canada, European Union, Norway, Switzerland	Must be accompanied by both an import permit and a phytosanitary certificate with an additional declaration stating, “All life stages of the plants for planting in this shipment meet the requirements of USDA Import Permit [permit number] and were solely grown in [name of country]. <i>Phytophthora ramorum</i> is not known to occur in [name of country].”	INSPECT and RELEASE when meeting all other requirements for entry
		Lacks the requirements above	Is not authorized; PROHIBIT ENTRY

Potato Cyst Nematodes (PCN)

Plants for planting (**except** seeds and unrooted cuttings) from a country listed below as infested with potato cyst nematodes **must** be accompanied by a phytosanitary certificate containing either **one** of the following additional declarations:

The plant was grown on land or in substrate which has been microscopically inspected by the national plant protection organization of the country in which it was grown within 12 months preceding issuance of the certificate and found free from potato cyst nematodes *Globodera rostochiensis* and *Globodera pallida*.

or

The plant has been grown within a secure environment in a production area that is free of potato cyst nematodes, in a soilless growing medium or *in-vitro* and has **never** been grown in soil **nor** come in contact with soil.

The countries infested with potato cyst nematodes are: Albania, Algeria, Argentina, Armenia, Australia, Austria, Azerbaijan, Azores, Belarus, Belgium, Bolivia, Bulgaria, Canada (all [areas regulated by the national plant protection organization of Canada for potato cyst nematodes](#)), Canary Islands, Channel Islands, Chile, Colombia, Costa Rica, Crete, Croatia, Cyprus, Czechia (Czech Republic), Denmark, Ecuador, England, Egypt, Estonia, Faeroe Islands, Falkland Islands, Finland, France, Georgia, Germany, Great Britain, Greece, Guernsey, Hungary, Iceland, India, Indonesia, Ireland, Italy, Japan, Jersey, Jordan, Kazakhstan, Kyrgyzstan, Latvia, Lebanon, Libya, Liechtenstein, Lithuania, Luxembourg, Madeira, Mallorca, Malta, Mexico, Republic of Moldova, Morocco, Netherlands, New Zealand, Northern Ireland, Norway, Pakistan, Panama, Peru, Philippines, Poland, Portugal, Romania, Russian Federation, Scotland, Serbia and Montenegro, Sierra Leone, Slovakia, Slovenia, South Africa, Spain, Sri Lanka, Sweden, Switzerland, Tajikistan, Tunisia, Turkey, Turkmenistan, Ukraine, Uzbekistan, Venezuela, Wales.

Specific Restrictions

Ralstonia solanacearum Race 3 Biovar 2 Program

***Ralstonia solanacearum* Race 3 Biovar 2 Program**

See [Pelargonium Ralstonia solanacearum Race 3 Biovar 2 Program](#) on page 3-144 and [Solanum spp. Ralstonia solanacearum Race 3 Biovar 2 Program](#) on page 3-179.

Plant Family Specific Restrictions

Certain plants for planting have specific restrictions that apply to all species of plants within the family.

Plants restricted by family are as follows:

- ◆ [Bromeliaceae Family](#) (bromeliads)
- ◆ [Cactaceae Family](#) (cactus) (CITES)
- ◆ [Cycadaceae Family](#) (cycads) (CITES)
- ◆ [Didiereaceae Family](#) (alluaudias) (CITES)
- ◆ [Fabaceae Family](#) (legumes) herbaceous species **only**
- ◆
- ◆ [Orchidaceae Family](#) (orchids) (CITES)
- ◆ [Poaceae Family](#) (grasses)
- ◆ [Rutaceae Family](#) (citrus)
- ◆ [Zamiaceae Family](#) (cycads) (CITES)

Each family listed above may have additional restrictions that apply **only** to certain taxa within the family. Always check the [Lists of Plants for Planting](#) to see if plants are regulated by genus, species, or family.

Bromeliaceae Family

The Bromeliaceae family (bromeliads) plants for planting (**except** seeds) are regulated for Hawaii and the Netherlands. See [Bromeliaceae Destined to or Imported into Hawaii](#) and [Bromeliaceae from the Netherlands](#).

Some Bromeliaceae are regulated as CITES.

See the individual plant taxon of Bromeliaceae in the [Lists of Plants for Planting](#) for any additional restrictions.

Bromeliaceae Destined to or Imported into Hawaii

The Bromeliaceae (bromeliads) family plants for planting (**except** seeds) destined to or imported into Hawaii **must** have a Postentry Quarantine Permit and **must** be grown under postentry quarantine. See [Postentry Quarantine](#).

Bromeliaceae from the Netherlands

Bromeliaceae (bromeliads) plants from the Netherlands may be imported with residual paper adhering to the roots if at least 90 percent of the roots are visible. If less than 90 percent of the roots are visible, then **prohibit** entry.

Cactaceae Family

Cactaceae (cactus) family plants for planting are regulated by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and **must** have a CITES permit or certificate issued by the country of origin and a USDA-issued Protected Plant Permit.

Most Cactaceae are regulated as CITES Appendix II and apply to all propagules **except** seeds.

Some Cactaceae plant species are CITES Appendix I and **all** propagules are regulated.

The **exceptions** are *Pereskia* spp., *Pereskopsis* spp., and *Quiabentia* spp., which are **not** regulated by CITES.

See [Convention on International Trade in Endangered Species of Wild Fauna and Flora \(CITES\)](#) and [Endangered Species Act \(ESA\)](#) and the [CITES Annotations to the Appendices \(Plants Only\)](#). See the individual plant taxa in the [Lists of Plants for Planting](#) for any additional restrictions.

Cycadaceae Family

Cycadaceae family plants for planting are regulated by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and **must** have a CITES permit or certificate and a USDA-issued Protected Plant Permit.

Some Cycadaceae family are regulated as CITES Appendix II. One species is Appendix I.

See [CITES Annotations to the Appendices \(Plants Only\)](#). See the individual plant taxa in the [Lists of Plants for Planting](#) for any additional restrictions.

Didiereaceae Family

Some Didiereaceae family plants for planting (**except** seeds) are regulated by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) as CITES Appendix II. **Only** the four genera *Alluaudia*, *Alluaudiopsis*, *Decaryia* and *Didierea* are included in the Appendices.

NOTICE

Due to taxonomic changes after the original CITES listing, **no** other genera of the Didiereaceae family are included in the Appendices. Only *Alluaudia*, *Alluaudiopsis*, *Decaryia* and *Didierea* are regulated by CITES.

See the individual taxon in the [Lists of Plants for Planting](#) and [CITES Plants](#). See [Convention on International Trade in Endangered Species of Wild Fauna and Flora \(CITES\)](#) and [Endangered Species Act \(ESA\)](#), [CITES Appendices](#), and the [Species+ database](#) for more CITES information.

Fabaceae Family

Herbaceous species of Fabaceae family plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries **except** Canada because of their association with a diversity of diseases.

EXAMPLE *Cicer arietinum*...Herbaceous [Fabaceae Family](#)

This restriction **does not** apply to woody species of Fabaceae, but always check the genus and species in [Lists of Plants for Planting](#) for other requirements or restrictions that may apply.

If a genus of Fabaceae is identified in the [Lists of Plants for Planting](#) as herbaceous species **only**, then some of its species are herbaceous and some of its species are woody. The Fabaceae prohibition applies **only** to the species that are herbaceous species.

EXAMPLE *Chesneya* spp...herbaceous species **only**; **SEE** [Fabaceae Family](#)

The herbaceous species of Fabaceae identified in this manual is **not** fully comprehensive. There are many herbaceous species of Fabaceae and many more are being discovered. If a taxon of Fabaceae is **not** included in the [Lists of Plants for Planting](#), then refer to your local plant inspection station to determine if the taxon is herbaceous. Other restrictions may apply.

NOTICE

A phytosanitary certificate **must** identify the species name when regulations place a restriction on any species within the genus; this includes species of the family Fabaceae.

Myrtaceae Family

Myrtaceae family plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries when destined to Hawaii. [Federal Notice Effective July 2, 2021](#)

When **not** destined to Hawaii, then see the individual plant taxon in Chapter 6, [Lists of Plants for Planting](#), to determine if other requirements or specific restrictions apply.

Orchidaceae Family

Orchidaceae family plants for planting are regulated by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and **must** have a CITES permit or certificate.

Most Orchidaceae are CITES Appendix II (all propagules **except** seeds) unless noted otherwise. See [CITES Annotations to the Appendices \(Plants Only\)](#)

NOTICE

Always check the [Lists of Plants for Planting](#) to see if a plant is regulated by family or genus or species and if other special restrictions apply.

Poaceae Family

Poaceae family plants for planting are regulated as [Bambuseae Tribe of Poaceae Family](#) or [Poaceae Family Except Bambuseae Tribe](#).

Bambuseae Tribe of Poaceae Family

All plants for planting propagules in the Bambuseae tribe of the Poaceae family are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries. Bambuseae tribe plants for planting are regulated for a variety of diseases, including *Ustilago shiraiana* (bamboo smut).

Poaceae Family Except Bambuseae Tribe

Poaceae family **other than** Bambuseae tribe plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries **except** Canada. Poaceae family (**except** Bambuseae) vegetative parts (includes leaves, roots, leaf buds, and stems) are regulated for a variety of plant diseases.

Rutaceae Family

All plants for planting (**except** seeds) species of the Rutaceae family for import into the United States from all countries are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** to prevent the introduction of citrus canker disease (*Xanthomonas axonopodis* pv. *citri*) and other citrus diseases.

Seeds of the family Rutaceae are restricted to prevent the spread of citrus greening (CG) and citrus variegated chlorosis (CVC). The restrictions are based on the country of origin and some restrictions **only** apply to certain genera in the Rutaceae family.

Rutaceae Imported into Guam

Plants for planting of all species and varieties of the Rutaceae family may be imported into Guam, **except** seeds **must** meet the requirements for **Rutaceae Family Seeds** below.

Rutaceae Family Seeds

Seeds of all species in the family Rutaceae may be either **Not Authorized Pending Pest Risk Analysis (NAPPRA)** or require treatment as a condition of entry depending on the country of origin. Some additional restrictions may apply **only** to certain genera within the Rutaceae family.

Rutaceae Seeds That Are NAPPRA

Seeds of *Aeglopsis* spp., *Atalantia* spp., *Balsamocitrus* spp., *Bergera* spp., *Calodendrum* spp., *Citrofortunella* spp., ×*Citroncirus* spp., *Clausena* spp., *Fortunella* spp., *Limonia* spp., *Microcitrus* spp., *Murraya* spp., *Severinia* spp., *Swinglea* spp., *Toddalia* spp., *Triphasia* spp., and *Vepris* spp., including all hybrids of these taxa, are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from the following countries: Argentina, Bangladesh, Belize, Bhutan, Brazil, Burundi, Cambodia, Cameroon, Central African Republic, China, Comoros, Cuba, Dominican Republic, Eritrea, Eswatini (Swaziland), Ethiopia, India, Indonesia, Jamaica, Japan, Kenya, Lao People's Democratic Republic (Laos), Madagascar, Malawi, Malaysia, Mauritius, Mexico, Myanmar, Nepal, Pakistan, Papua New Guinea, Philippines, Réunion, Rwanda, Saint Helena, Saudi Arabia, Somalia, South Africa, Sri Lanka, Taiwan, Tanzania, Thailand, Timor-Leste, Vietnam, Yemen, and Zimbabwe because of citrus greening (CG) and citrus variegated chlorosis (CVC).

Rutaceae Seeds Requiring Treatment

Seeds of all species in the family Rutaceae from Afghanistan, Andaman Islands, Caroline Islands, Congo (Democratic Republic of the), Cote d'Ivoire (Ivory Coast), Fiji Islands, Home Island in Cocos (Keeling) Islands, Hong Kong; Korea, Democratic People's Republic of (North Korea); Korea, Republic of (South Korea); Mozambique, Oman, Rodrigues Island, Seychelles, Thursday Island, and United Arab Emirates require treatment T203-p for citrus canker (*Xanthomonas axonopodis* pv. *citri*) as a condition of entry.

Rutaceae Seeds Requiring an Additional Declaration

Seeds of *Aeglopsis* spp., *Atalantia* spp., *Balsamocitrus* spp. *Berberis* spp., *Calodendrum* spp., *Citrofortunella* spp., ×*Citroncirus* spp., *Clausena* spp., *Fortunella* spp., *Limonia* spp., *Microcitrus* spp., *Murraya* spp., *Severinia* spp., *Swinglea* spp., *Toddalia* spp., *Triphasia* spp., and *Vepris* spp. including all hybrids of these taxa, from all other countries **except** Costa Rica and Paraguay and those **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** (Argentina, Bangladesh, Belize, Bhutan, Brazil, Burundi, Cambodia, Cameroon, Central African Republic, China, Comoros, Cuba, Dominican Republic, Eritrea, Eswatini (Swaziland), Ethiopia, India, Indonesia, Jamaica, Japan, Kenya, Lao People's Democratic Republic (Laos), Madagascar, Malawi, Malaysia, Mauritius, Mexico, Myanmar, Nepal, Pakistan, Papua New Guinea, Philippines, Réunion, Rwanda, Saint Helena, Saudi Arabia, Somalia, South Africa, Sri Lanka, Taiwan, Tanzania, Thailand, Timor-Leste, Vietnam, Yemen, and Zimbabwe) require an additional declaration on the phytosanitary certificate that states that **neither** citrus greening **nor** citrus variegated chlorosis are known to occur in the country where the seed was produced.

Rutaceae Seeds from Costa Rica and Paraguay Additional Declaration

Seeds of *Aeglopsis* spp., *Atalantia* spp., *Balsamocitrus* spp. *Berberis* spp., *Calodendrum* spp., *Citrofortunella* spp., ×*Citroncirus* spp., *Clausena* spp., *Fortunella* spp., *Limonia* spp., *Microcitrus* spp., *Murraya* spp., *Severinia* spp., *Swinglea* spp., *Toddalia* spp., *Triphasia* spp., and *Vepris* spp. including all hybrids of these taxa **must** be accompanied by phytosanitary certificate with an additional declaration that states that citrus greening is **not** known to occur in the country where the seed was produced. **Federal Order Effective May 19, 2016.**

Specific Restrictions

Plant Family Specific Restrictions

Zamiaceae Family

Zamiaceae family (cycads) plants for planting are regulated by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and **must** have a CITES permit or certificate.

Specific Plant Restrictions

Some plants for planting have specific restrictions that are too long to include in Chapter 6, [Lists of Plants for Planting](#). These plant restrictions are cross-referenced from the specific plant taxa in the list to applicable specific restrictions that follow.

[Specific Restrictions](#) are in addition to the [General Restrictions](#) unless exception (if any) conditions are met.

Acca sellowiana

Imported *Acca sellowiana* (feijoa, pineapple guava) plants for planting (**except** seeds) are regulated from all countries **except** Canada. *Acca sellowiana* is restricted to prevent the entry of *Monilinia fructigena*, a plant pathogen that causes a fruit rot that affects apples, cherries, peaches, plums.

Continue to specific requirements for [Acca sellowiana from New Zealand](#) below.

Acca sellowiana from New Zealand

Acca sellowiana plants (**except** seeds) from New Zealand **must** at the time of arriving at the first port of arrival, be accompanied by a phytosanitary certificate with an additional declaration that states New Zealand is free of *Monilinia fructigena*.

Acca sellowiana plants (**except** seeds) from New Zealand that **lack** the phytosanitary certificate with the required additional declaration for exemption **must** enter [Postentry Quarantine](#).

Postentry Quarantine

When meeting all other conditions for entry, *Acca sellowiana* plants for planting (**except** seeds) from all countries **except** Canada and New Zealand **must** enter postentry quarantine.

If from New Zealand and **lacks** the phytosanitary certificate with the required additional declaration, then *Acca sellowiana* **must** enter [Postentry Quarantine](#). See [Postentry Quarantine](#) on page 5-1 for more information.

Acer spp.

Imported *Acer* spp. (maple) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from all countries **except** Canada, the Netherlands, and New Zealand.

Continue to specific requirements for [Acer spp. from Canada](#), [Acer spp. from the Netherlands](#), and [Acer spp. from New Zealand](#).

Acer spp. from Canada

When from Canada¹, *Acer* spp. plants (**except** seeds) **must** meet the following requirements:

1. [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#) requirements. See [Table 3-4](#) to determine if *Acer* spp from Canada meets the conditions for entry. [Federal Order Effective May 20, 2013](#).
2. *Acer circinatum*, *Acer davidii*, *Acer laevigatum*, *Acer macrophyllum*, and *Acer pseudoplatanus* plants for planting (**except** seeds) **must** meet the following requirements:
 - A. [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#) requirements; see [Table 3-4](#) to determine if meets conditions.
 - B. [Phytophthora ramorum \(sudden oak death\)](#) requirements. See [Table 3-11](#) to determine if meets conditions. [Federal Order Effective May 21, 2012](#)

When meets the definition of [from](#)¹ Canada, then *Acer* spp. plants **do not** require postentry quarantine.

1 Plants for planting are considered to be “from” any country or locality in which they were grown. provided, that plants for planting imported into Canada from another country or locality shall be considered as being **solely** from Canada if they meet the following conditions:
(1) They are imported into the United States directly from Canada after having been grown for at least 1 year in Canada;
(2) They have **never** been grown in a country from which their importation would **not** be authorized pending pest risk analysis under § 319.37-4;
(3) They have **never** been grown in a country **other than** Canada, from which it would be subject to certain restrictions on the importation of specific types of plants for planting under § 319.37-20, which are listed in the *Plants for Planting Manual*; provided, that plants for planting that would be subject to postentry quarantine if imported into the United States may be imported from Canada after growth in another country if they were grown in Canada in postentry quarantine under conditions equivalent to those specified in the *Plants for Planting Manual*; and
(4) They were **not** imported into Canada in growing media.

Acer spp. from the Netherlands

Plants for planting (**except** seeds) of *Acer* spp. (**except** nonvariegated varieties of *Acer palmatum* and *Acer japonicum*) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from the Netherlands.

Only nonvariegated varieties of *Acer palmatum* and *Acer japonicum* may be imported from the Netherlands and **must** meet the following conditions:

1. **Must** at the time of arriving at the port of first arrival in the United States, be accompanied by a phytosanitary certificate with an additional declaration that the plants are of a nonvariegated variety of *Acer palmatum* or *Acer japonicum*.
2. Are subject to the *Anoplophora glabripennis* (ALB) and *Anoplophora chinensis* (CLB) Federal Import Order. See [Table 3-7, Host Plants \(except seeds\) of Anoplophora chinensis \(CLB\) or Anoplophora glabripennis \(ALB\) from All Countries Other than Canada Where ALB and/or CLB Is Present.](#)

When meeting **all** other conditions for entry, nonvariegated varieties of *Acer japonicum* and *Acer palmatum* **must** enter under [Postentry Quarantine Program](#).

Acer spp. from New Zealand

Acer spp. plants (**except** seeds) from New Zealand **must** meet the following conditions:

1. *Anoplophora glabripennis* (ALB) and *Anoplophora chinensis* (CLB) Federal Import Order for entry. See [Table 3-8, Host Plants \(except seeds\) of ALB and CLB from Countries Other than Canada Where ALB and CLB Are Not Present.](#)
2. *Acer circinatum*, *Acer davidii*, *Acer laevigatum*, *Acer macrophyllum*, *Acer pseudoplatanus* **must** meet the conditions of the *Phytophthora ramorum* Federal Order Effective May 21, 2012 for entry. See [Table 3-12, Host Plants \(except seeds\) of Phytophthora ramorum from Other than Canada.](#)

When meeting all other conditions for entry, *Acer* spp. from New Zealand **must** enter [Postentry Quarantine](#)

Postentry Quarantine

When meeting all other conditions for entry, *Acer* spp. **must** enter postentry quarantine. When meeting all other conditions for entry, nonvariegated varieties of *Acer japonicum* and *Acer palmatum* from the Netherlands **must** enter under postentry quarantine.

See [Postentry Quarantine Program](#) on page 5-1 for more information.

Berberis spp.

Imported *Berberis* spp. (barberry) (includes *Mahoberberis* and *Mahonia* spp.) plants for planting including seeds are restricted to prevent the spread of *Puccinia graminis* (Black stem rust).

Berberis spp. seeds are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries.

Berberis aquifolium

Berberis aquifolium (**not** rust resistant) is regulated for the following:

1. [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#).
2. *Puccinia graminis* (black stem rust).
3. *Phytophthora ramorum* (sudden oak death).

Berberis species and horticultural varieties are designated as either:

- ◆ [Berberis Black Stem Rust Resistant Species and Varieties](#)
- ◆ [Berberis That Are Not Resistant to Black Stem Rust](#)

Berberis That Are Not Resistant to Black Stem Rust

Berberis species or horticultural varieties of plants for planting that are **not** resistant to black stem rust are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries.

Berberis Black Stem Rust Resistant Species and Varieties

Designated black stem rust resistant species and varieties of *Berberis* are listed in [Table 3-16](#) and regulated by 7 CFR 301.38.

NOTICE

7 CFR 301.38 regulates black stem rust resistant species.

Black Stem Rust Eradication States

Berberis species or horticultural varieties of plants for planting that are designated as resistant to black stem rust are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) when destined to the following eradication States (protected areas):

- ◆ Illinois
- ◆ Indiana
- ◆ Iowa
- ◆ Kansas
- ◆ Michigan
- ◆ Minnesota
- ◆ Missouri
- ◆ Montana
- ◆ Nebraska
- ◆ North Dakota
- ◆ Ohio
- ◆ Pennsylvania
- ◆ South Dakota
- ◆ Washington (State) counties: Adams, Asotin, Benton, Chelan, Colombia, Douglas, Ferry, Franklin, Garfield, Grant, Kittitas, Klickitat, Lincoln, Okanogan, Pend Oreille, Spokane, Stevens, Walla Walla, Whitman, Yakima
- ◆ West Virginia
- ◆ Wisconsin
- ◆ Wyoming

Postentry Quarantine

Berberis species or horticultural varieties of plants for planting that are designated as resistant to black stem rust (see [Table 3-16](#))² and are destined to States **other than** an eradication State or county listed above **must** enter under postentry quarantine.

See [Postentry Quarantine](#) on page 5-1 and the specific plant taxon in the [Lists of Plants for Planting](#) for other restrictions.

Continue to [Table 3-15](#) to regulate *Berberis* spp. plants for planting.

² *Berberis* and *Mahonia* species or horticultural varieties that are designated as resistant to black stem rust are listed in [Table 3-16](#) and [7 CFR 301.38-2](#).

Table 3-15 Regulating *Berberis* spp. Plants for Planting

If <i>Berberis</i> :	And:	And:	And destined to:	And to:	Then:
Plants for planting except seeds	Is a black stem rust resistant variety (see Table 3-16 or 7 CFR 301.38)	Is destined to an eradication State	Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, North Dakota, Ohio, Pennsylvania, South Dakota, West Virginia, Wisconsin, or Wyoming	→	Not Authorized Pending Pest Risk Analysis (NAPRA) ; PROHIBIT ENTRY
			Washington State	Counties of Adams, Asotin, Benton, Chelan, Colombia, Douglas, Ferry, Franklin, Garfield, Grant, Kittitas, Klickitat, Lincoln, Okanogan, Pend Oreille, Spokane, Stevens, Walla Walla, Whitman, or Yakima	Not Authorized Pending Pest Risk Analysis (NAPRA) ; PROHIBIT ENTRY
				Counties other than listed above	Must ENTER Postentry Quarantine when meeting all other conditions for entry; SEE specific taxon in Lists of Plants for Planting
		Is destined to a non-eradication State	Other than listed in cells above	→	Must ENTER Postentry Quarantine when meeting all other conditions for entry; SEE taxon in Lists of Plants for Planting
	Is not a black stem rust resistant variety			→	Not Authorized Pending Pest Risk Analysis (NAPRA) ; PROHIBIT ENTRY
Seeds				→	Not Authorized Pending Pest Risk Analysis (NAPRA) ; PROHIBIT ENTRY

Buxus spp.

Buxus spp. (boxwood) plants for planting (**except** seeds) from all countries are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) **except** Canada.

Buxus spp. from Canada

Buxus spp. plants for planting (**except** seeds) imported from Canada are prohibited to prevent the entry of *Cydalima perspectalis* (box tree moth) into the United States and territories, per [Federal Order Effective May 26, 2021](#).

Capsicum spp.

Capsicum spp. (pepper) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from all countries **except** Canada.

Capsicum spp. (pepper) plants for planting from Canada are regulated to prevent the introduction of Tomato brown rugose fruit virus (ToBRFV), into the United States per [Federal Order Effective November 22, 2019](#).

Capsicum spp. seeds are regulated from all countries to prevent the introduction of Tomato brown rugose fruit virus (ToBRFV), into the United States per [Federal Order Effective November 22, 2019](#) and to prevent the entry of any quarantine-significant pospiviroids in tomato seeds imported into the United States per [Federal Order Effective September 8, 2019](#).

Continue to [Capsicum spp. from Canada](#), [Capsicum spp. Seeds](#), and [Capsicum spp. Seeds from Canada](#).

Capsicum spp. from Canada

When from Canada, *Capsicum* spp. plants for planting **must** be accompanied by a phytosanitary certificate or a re-export phytosanitary certificate with an additional declaration (AD) or a combination of the declarations certifying the following requirements prior to importation into the United States and territories (**one** of the following):

The *Capsicum* spp. plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Capsicum* spp. plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

OR

The *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

Per [Federal Order Effective November 22, 2019](#).

Continue to [Capsicum spp. Seeds](#) and [Capsicum spp. Seeds from Canada](#).

Capsicum spp. Seeds

Capsicum spp. (pepper) seeds are regulated to prevent introduction of the following into the United States:

1. Tomato brown rugose fruit virus (ToBRFV).
2. Six pospiviroids: Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid.

All shipments of *Capsicum* spp. seeds from all countries **must** be accompanied by a phytosanitary certificate or a re-export phytosanitary certificate with the following:

1. An additional declaration or a combination of the declarations addressing Tomato brown rugose fruit virus (ToBRFV):

The *Capsicum* spp. plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Capsicum* spp. plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

OR

The *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

Per [Federal Order Effective November 22, 2019](#).

AND

2. An additional declaration or a combination of the declarations addressing each of the six pospiviroids:

The *Capsicum* spp. (pepper) seeds in the shipment have been tested and found free of the following pospiviroids: Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid.

OR

The *Capsicum* (pepper) seeds in the shipment were produced in [country] where Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid are **not** known to occur.

OR

The *Capsicum* spp. (pepper) seeds and *Solanum lycopersicum* (tomato) seeds in the shipment have been tested and found free of the following pospiviroids: Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid.

OR

The *Capsicum* (pepper) seeds and *Solanum lycopersicum* (tomato) seeds in the shipment were produced in [country] where Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid are **not** known to occur.

The requirement for a phytosanitary certificate with the above additional declarations applies to all *Capsicum* spp. seeds from all countries entering the United States, including [Obscured Seeds](#).

[Federal Order Effective November 22, 2019](#) and [Federal Order Effective September 8, 2019](#).

NOTICE

A [Small Lots of Seed Permit](#) **cannot** be issued for *Capsicum* spp. seeds or *Solanum lycopersicum* due to specific requirements for entry.

If from Canada, continue to [Capsicum spp. Seeds from Canada](#)

Capsicum spp. Seeds from Canada

All shipments of *Capsicum* spp. seeds from Canada **must** be accompanied by a phytosanitary certificate or a re-export phytosanitary certificate with the following additional declarations:

1. An additional declaration or a combination of the declarations addressing Tomato brown rugose fruit virus (ToBRFV) (**one** of the following):

The *Capsicum* spp. plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Capsicum* spp. plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

OR

The *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

Per [Federal Order Effective November 22, 2019](#).

AND

2. An additional declaration or a combination of the declarations addressing each of the six pospiviroids (**one** of the following):

The *Capsicum* spp. (pepper) seeds in the shipment have been tested and found free of the following pospiviroids: Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid.

OR

The *Capsicum* (pepper) seeds in the shipment were produced in [country] where Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber

viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid are **not** known to occur.

OR

The *Capsicum* spp. (pepper) seeds and *Solanum lycopersicum* (tomato) seeds in the shipment have been tested and found free of the following pospiviroids: Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid.

OR

The *Capsicum* (pepper) seeds and *Solanum lycopersicum* (tomato) seeds in the shipment were produced in [country] where Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid are **not** known to occur.

The requirement for a phytosanitary certificate with the above additional declarations applies to all *Capsicum* spp. seeds from all countries entering the United States.

[Federal Order Effective November 22, 2019](#) and [Federal Order Effective September 8, 2019](#).

NOTICE

A [Small Lots of Seed Permit](#) **cannot** be issued for *Capsicum* spp. seeds or *Solanum lycopersicum* due to specific requirements for entry.

Specific Restrictions

Chaenomeles spp.

Chaenomeles spp.

Imported *Chaenomeles* spp. (flowering quince) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from all countries **except** Canada.

Chaenomeles spp. are regulated for the following:

- ◆ *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB)
- ◆ Diversity of diseases, including but **not** limited following:
 - ❖ *Guignardia piricola* (leaf, branch, and fruit disease)
 - ❖ *Gymnosporangium asiaticum* (rust)
 - ❖ *Monilinia fructigena* (brown rot of fruit)
 - ❖ Pear blister canker apscaviroid
 - ❖ Quince sooty ringspot agent
 - ❖ Quince yellow blotch agent (pear yellow blotch agent, apple rubbery wood phytoplasma)
 - ❖ Quince stunt agent

Continue to specific requirements for [Chaenomeles spp. from Canada](#) and [Chaenomeles spp. With a Plant Part from a Different Taxon](#).

Chaenomeles spp. from Canada

When from Canada, *Chaenomeles* spp. (flowering quince) plants for planting (**except** seeds) **must** meet **all** of the following:

1. *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) requirements; see [Table 3-4, Host Plants \(except seeds\) of *Anoplophora chinensis* \(CLB\) or *Anoplophora glabripennis* \(ALB\) from Canada.](#)
2. Be accompanied at the time of arriving at the first port of entry, by a phytosanitary certificate with the following:
 - A. Additional declaration that the plants were grown in a nursery in Canada, and the plants were found by the national plant protection organization of Canada to be free of the following injurious plant pathogens listed below:
 - ⇒ *Guignardia piricola* (leaf, branch, and fruit disease)
 - ⇒ *Gymnosporangium asiaticum* (rust)
 - ⇒ *Monilinia fructigena* (brown rot of fruit)
 - ⇒ Pear blister canker apscaviroid
 - ⇒ Quince sooty ringspot agent
 - ⇒ Quince yellow blotch agent (pear yellow blotch agent, apple rubbery wood phytoplasma)
 - ⇒ Quince stunt agent

The determination by the national plant protection organization that the plants are free of these pathogens will be based on visual examination and [indexing](#) of the parent stock of the plants and inspection of the nursery where the restricted plants are grown, to determine that the nursery is free of the specified pathogens.

OR

- B. If any of the pathogens (injurious plant pests) listed above **do not** occur in Canada, then an additional declaration that the pathogen(s) [*list pathogen(s)*] **does not** or **do not** occur in Canada, may be used in lieu of visual examination and [indexing](#) of the parent stock.

Indexing procedures authorized by APHIS for *Chaenomeles* are graft transmission of the pest to an indicator plant and nucleic acid probes.

If *Chaenomeles* spp. plants for planting (**except** seeds) **lack** any of the above requirements, then prohibit entry.

See [Plants for Planting from Canada That Require a Permit](#) on page 4-7 for more information.

Chaenomeles spp. With a Plant Part from a Different Taxon

If *Chaenomeles* spp. (flowering quince) plants for planting (**except** seeds) contain **more than** one plant part (e.g., grafted or budded) and the interstem, rootstock, scion or any other part of the finished plant belongs to a different regulated taxon, then the plants **must** include **all** of the following:

- ◆ Be accompanied by a phytosanitary certificate with an additional declaration (A.D.) that includes:
 - ❖ List of all plant parts of regulated taxa that have been incorporated into the finished plant
 - ❖ Scientific names of the regulated plant taxa that have been incorporated into the finished plant
- ◆ Plants **must** meet the entry requirements for each taxa listed

EXAMPLE An imported plant uses *Chaenomeles* spp. as its rootstock and *Cydonia* spp. as the scion. The phytosanitary certificate **must** list both *Chaenomeles* and *Cydonia*, and **must** include the required additional declarations for both *Chaenomeles* spp. and *Cydonia* spp.

Chrysanthemum spp.

Imported *Chrysanthemum* spp. (chrysanthemum) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from Afghanistan, Albania, Andorra, Argentina, Armenia, Australia, Austria, Azerbaijan, **Azores**, Bahrain, Bangladesh, Belarus, Belgium, Bhutan, Bolivia, Bosnia and Herzegovina, Brazil, **British Isles**, Brunei Darussalam, Bulgaria, Burma (Myanmar), Cambodia, **Channel Islands**, Chile, China, Colombia, Croatia, Czechia (Czech Republic), Denmark, Ecuador, England, Estonia, Falkland Islands, Finland, France, French Guiana, Georgia, Germany, Greece, Guyana, Hebrides, Hong Kong, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Isle of Man, Isle of Wight, Isles of Scilly, Israel, Italy, Japan, Jordan, Kazakhstan; Korea, Democratic People's Republic of (North Korea); Korea, Republic of (South Korea); Kosovo, Kuwait, Kyrgyzstan, Lao People's Democratic Republic (Laos), Latvia, Lebanon, Liechtenstein, Lithuania, Lundy Island, Luxembourg, Macedonia, Malaysia, Maldives, Malta, Marshall Islands, Melanesia, Mexico, Micronesia, Moldova, Monaco, Mongolia, Montenegro, Nauru, Nepal, Netherlands, New Caledonia, New Guinea, New Zealand, Nicobar Islands, Northern Ireland, Northern Mariana Islands, Norway, **Oceania**, Oman, Orkney Islands, Pakistan, Palau, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Polynesia, Portugal, Qatar, Romania, Russia, San Marino, Saudi Arabia, Scotland, Serbia, Shetland Islands, Singapore, Slovakia, Slovenia, Solomon Islands, South Africa, Spain, Sri Lanka, Suriname, Sweden, Switzerland, Syria, Taiwan, Tajikistan, Thailand, Timor-Leste, Tunisia, Turkey, Turkmenistan, Tuvalu, Ukraine, United Arab Emirates, **United Kingdom**, Uruguay, Uzbekistan, Vanuatu, Vatican City, Venezuela, Vietnam, Wales, Yemen (**Asia**, Australia, **Europe**, Mexico, New Zealand, **Oceania**, Republic of South Africa, **South America**, Tunisia).

Chrysanthemum spp. (**except** seeds) are regulated for Chrysanthemum white rust caused by the fungus *Puccinia horiana*.

Chrysanthemum spp. (**except** seeds) from all other countries **except** those listed as NAPPRA above, **must** at the time of arriving at the port of first arrival in the United States be accompanied by a phytosanitary certificate that **must** contain an additional declaration stating:

“The plants were grown in a greenhouse nursery and found by the national plant protection organization of the country in which the plants were grown to be free of white rust of chrysanthemum (caused by the rust fungus *Puccinia horiana*) based on visual examination of parent stock, the plants for importation, and the greenhouse nursery in which the plants for importation and the parent stock were grown, once a month for 4 consecutive months immediately prior to importation.”

If the phytosanitary certificate **does not** have the additional declaration, then prohibit entry.

The exception is for *Chrysanthemum* spp. from Canada entering under and meeting [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP Revised 2016\)](#) or [U.S./Canada Greenhouse-Grown Plant Certification Program \(Legacy GCP\)](#) conditions for entry, then the additional declaration is **not** required.

Postentry Quarantine

When meeting all other conditions for entry and accompanied by the required phytosanitary certificate with the required additional declaration, *Chrysanthemum* spp. plants for planting (**except** seeds) from all other countries **except** Canada and those listed as [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) above **must** enter postentry quarantine.

See [Postentry Quarantine Program](#) on page 5-1 for more information on *Chrysanthemum* spp. Postentry Requirements.

Cocos spp.

Imported *Cocos* spp. (coconut) plants for planting are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries.

Cocos nucifera

Cocos nucifera (coconut) plants for planting (**except** seeds) are **not** authorized (prohibited) from all countries to prevent the entry of a diversity of diseases and pests, including but **not** limited to cadang-cadang disease, lethal yellowing disease, and red palm weevil.

Continue to specific requirements for [Cocos nucifera Seeds from Costa Rica](#) and [Cocos nucifera Seeds from Jamaica](#).

Cocos nucifera Seeds

Cocos nucifera seeds for planting are prohibited from all countries **except** Costa Rica and Jamaica.

Cocos nucifera Seeds from Costa Rica

Cocos nucifera seeds from Costa Rica **must** be accompanied by a phytosanitary certificate with an additional declaration stating:

“The seeds were found by the plant protection service of the country where grown (Costa Rica) to be of Malayan dwarf variety or Maypan variety (=F₁ hybrid, Malayan Dwarf × Panama Tall), which are resistant to lethal yellowing disease, based on visual examination of the parent stock.”

If *Cocos nucifera* seeds from Costa Rica **lack** the additional declaration or are **other than** Malayan dwarf or Maypan varieties, then prohibit entry.

Cocos nucifera Seeds from Jamaica

Cocos nucifera seeds from Jamaica **must** be accompanied by a phytosanitary certificate with an additional declaration stating:

“The seeds were found by the plant protection service of the country where grown (Jamaica) to be of Malayan dwarf variety or Maypan variety (=F₁ hybrid, Malayan Dwarf × Panama Tall), which are resistant to lethal yellowing disease, based on visual examination of the parent stock.”

If *Cocos nucifera* seeds from Jamaica **lack** the additional declaration or are **other than** Malayan dwarf or Maypan varieties, then prohibit entry.

See the [Seeds Not for Planting Manual](#) to regulate coconut seed **without** husk or **without** milk in accordance with 7 CFR 319.56-11.

***Crocoshmia* spp.**

Imported *Crocoshmia* spp. (montebretia) plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPPRA\)](#) from Africa (Algeria, Angola, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic Republic of the), Congo (Republic of), Cote d'Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Eswatini (Swaziland), Ethiopia, Gabon, Gambia (The), Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sudan, Tanzania, Togo, Tunisia, Uganda, Togo, Zambia, Zimbabwe); Argentina; and Uruguay.

Continue to specific requirements for [Crocoshmia spp. from Brazil, France, Italy, Malta, Mauritius, Portugal](#); [Crocoshmia spp. from Luxembourg](#); [Crocoshmia spp. from Spain](#); and [Postentry Quarantine](#).

***Crocoshmia* spp. from Brazil, France, Italy, Malta, Mauritius, Portugal**

Crocoshmia spp. plants for planting (**except** bulbs in commercial shipments and seeds) are **not** authorized (prohibited) from Brazil, France, Italy, Malta, Mauritius, and Portugal.

***Crocoshmia* spp. from Luxembourg**

Crocoshmia spp. plants for planting (**except** seeds and bulbs) are admissible from Luxembourg when accompanied by a phytosanitary certificate with the following additional declaration, stating that, "The plants were grown in a disease free environment in a greenhouse. The plants were subjected to 12 hours of continuous misting per day with water at 15-20 degrees Celsius on 2 consecutive days. The plants were inspected by a plant quarantine official of the country where grown 20 days after the completion of the misting and were found free of gladiolus rust."

If *Crocoshmia* spp. plants for planting (**except** bulbs and seeds) from Luxembourg **lack** the additional declarations above, then the plants **must** enter [Postentry Quarantine Program](#).

***Crocoshmia* spp. from Spain**

Crocoshmia spp. plants for planting (**except** seeds and bulbs) are admissible from Spain if accompanied by a phytosanitary certificate with the following additional declaration, stating that:

“The plants were grown in a disease free environment in a greenhouse. The plants were subjected to 12 hours of continuous misting per day with water at 15-20 degrees Celsius on 2 consecutive days. The plants were inspected by a plant quarantine official of the country where grown 20 days after the completion of the misting and were found free of gladiolus rust.”

If *Crocoshmia* spp. plants for planting (**except** seeds and bulbs) from Spain **lack** the additional declarations above, then they **must** enter [Postentry Quarantine](#).

Postentry Quarantine

When meeting all other conditions for entry, *Crocoshmia* spp. plants for planting (**except** bulbs and seeds) **must** enter postentry quarantine from all countries **except** Brazil, France, Italy, Malta, Mauritius, and Portugal and those prohibited from: Africa (Algeria, Angola, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic Republic of the), Congo (Republic of), Cote d’Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Eswatini (Swaziland), Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sudan, Tanzania, Togo, Tunisia, Uganda, Togo, Zambia, Zimbabwe); Argentina; and Uruguay.

Crocoshmia spp. from Luxembourg are **exempt** from postentry quarantine if the plants meet the additional declaration requirements listed under [Crocoshmia spp. from Luxembourg](#). If from Luxembourg and **lacks** the required additional declaration, then *Crocoshmia* **must** enter [Postentry Quarantine](#).

Crocoshmia spp. from Spain are **exempt** from postentry quarantine if they meet the additional declaration requirements listed under [Crocoshmia spp. from Spain](#). If from Spain and **lacks** the required additional declaration, then *Crocoshmia* **must** enter [Postentry Quarantine](#).

See [Postentry Quarantine Program](#) on page 5-1 for more information.

Cycadaceae Family

Imported Cycadaceae family plants for planting are regulated by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and must have a CITES permit or certificate issued by the country of origin and when engaged in the business of importing, exporting, or re-exporting CITES plants, an APHIS-issued *Protected Plant Permit* unless noted otherwise.

Most Cycadaceae family plants for planting are regulated as CITES Appendix II, #4 applies to all propagules **except** seeds.

Cycas beddomei is regulated as CITES Appendix I; applies to all propagules.

See individual plant taxa in Chapter 6, [Lists of Plants for Planting](#) and Chapter 9, [Protected Plants](#).

Cydonia spp.

Imported *Cydonia* spp. (quince) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from all countries **except** Canada.

Cydonia spp. are regulated for the following:

- ◆ **Anoplophora chinensis (CLB) and Anoplophora glabripennis (ALB)**
- ◆ Diversity of diseases including but **not** limited to the following:
 - ❖ *Guignardia piricola* (leaf, branch, and fruit disease)
 - ❖ *Gymnosporangium asiaticum* (rust)
 - ❖ *Monilinia fructigena* (brown rot of fruit)
 - ❖ Pear blister canker apscaviroid
 - ❖ Quince sooty ringspot agent
 - ❖ Quince yellow blotch agent (pear yellow blotch agent, apple rubbery wood phytoplasma)
 - ❖ Quince stunt agent

Continue to specific requirements for *Cydonia* spp. from Canada and *Cydonia* spp. With a Plant Part from a Different Taxon.

Cydonia spp. from Canada

When from Canada, *Cydonia* spp. (quince) plants for planting (**except** seeds) **must** be as follows:

1. Meet **Anoplophora chinensis (CLB) and Anoplophora glabripennis (ALB)** requirements. (See Table 3-4, Host Plants (except seeds) of **Anoplophora chinensis (CLB) or Anoplophora glabripennis (ALB)** from Canada to determine if meets conditions.)
2. Be accompanied (at the time of arriving at the first port of arrival), by a phytosanitary certificate with the following:
 - A. Additional declaration that the plants were grown in a nursery in Canada, and the plants were found by the national plant protection organization of Canada to be free of the following injurious plant pathogens listed below:
 - ⇒ *Guignardia piricola* (leaf, branch, and fruit disease)
 - ⇒ *Gymnosporangium asiaticum* (rust)
 - ⇒ *Monilinia fructigena* (brown rot of fruit)

Specific Restrictions

Cydonia spp.

- ⇒ Pear blister canker apscaviroid
- ⇒ Quince sooty ringspot agent
- ⇒ Quince yellow blotch agent (pear yellow blotch agent, apple rubbery wood phytoplasma)
- ⇒ Quince stunt agent

The determination by the national plant protection organization that the plants are free of these pathogens will be based on visual examination and [indexing](#) of the parent stock of the plants and inspection of the nursery where the restricted plants are grown, to determine that the nursery is free of the specified pathogens. (Indexing procedures authorized by APHIS are graft transmission of the pest to an indicator plant and nucleic acid probes.)

OR

- B. If any of the pathogens (injurious plant pests) listed above **do not** occur in Canada, then an additional declaration that the pathogen(s) [*List pathogen(s)*] **does not** or **do not** occur in Canada may be used in lieu of visual examination and [indexing](#) of the parent stock.

Indexing procedures authorized by APHIS for *Cydonia* spp. are graft transmission of the pest to an indicator plant and nucleic acid probes.

See [Plants for Planting from Canada That Require a Permit](#) on page 4-7 for more information.

Cydonia spp. With a Plant Part from a Different Taxon

If the *Cydonia* spp. (quince) plants for planting contain **more than** one plant part (e.g., grafted or budded) and the interstem, rootstock, scion or any other part of the finished plant belongs to a different regulated taxon, then the additional declaration (A.D.) **must** include **all** of the following:

- ◆ All plant parts of regulated taxa that have been incorporated into the finished plant;
- ◆ Scientific names of the regulated plant taxa that have been incorporated into the finished plant; and
- ◆ Quarantine pests and related restrictions associated with each taxon.

EXAMPLE An imported plant uses *Pyrus* spp. as its rootstock and *Cydonia* spp. as the scion. The phytosanitary certificate **must** list both *Pyrus* and *Cydonia* and **must** include the required additional declarations for both *Pyrus* spp. and *Cydonia* spp.

Dianthus spp.

Imported *Dianthus* spp. (carnation, Sweet William) plants for planting (**except** seeds) **must** meet the requirements under [General Restrictions](#) from all countries, and then **must** enter postentry quarantine from all countries **except** Canada.

The exception to the postentry requirement for *Dianthus* plants for planting from Great Britain and the Netherlands is when meeting the specific requirements listed [Dianthus spp. from Great Britain](#) and [Dianthus spp. from the Netherlands](#). The exception to the postentry requirement for *Dianthus* cuttings from Kenya is when meeting the specific requirements listed under [Dianthus spp. Cuttings from Kenya](#).

Dianthus spp. from Great Britain

Dianthus spp. plants for planting (**except** seeds) from Great Britain (England, Scotland, and Wales) **must** at the time of arriving at the first port of entry in the United States, be accompanied by a phytosanitary certificate with an additional declaration stating:

The plants were grown in a greenhouse nursery in Great Britain and found by the national plant protection organization (NPPO) of Great Britain to be free from *Phialophora cinerescens*, carnation etched ring virus, carnation “streak” virus, and carnation “fleck” virus.

The determination by the NPPO that the plants are free of these pathogens will be based on visual examination of the parent stock of the plants for importation, and the greenhouse nursery where the parent stock and the plants for importation were grown, once a month for 4 consecutive months immediately prior to importation, and based on [indexing](#) of the parent stock.

If *Dianthus* spp. from Great Britain (England, Scotland, Wales) **lack** a phytosanitary certificate with the additional declaration, then the plants **must** enter [Postentry Quarantine](#).

The indexing procedures for *Dianthus* are electron microscopy, mechanical transmission of the pest to an indicator plant, or serology. See [Plant Indexing](#).

***Dianthus* spp. from the Netherlands**

Dianthus spp. plants for planting (**except** seeds) from the Netherlands **must** at the time of arrival at the first port of entry in the United States be as follows:

Be accompanied by a phytosanitary certificate with an additional declaration (for **exemption** from postentry quarantine), stating, “The plants were grown in a greenhouse nursery in the Netherlands and found by the national plant protection organization (NPPO) of the Netherlands to be free from *Phialophora cinerescens*, carnation etched ring virus, carnation “streak” virus, and carnation “fleck” virus.”

The determination by the NPPO that the plants are free of these pathogens will be based on visual examination of the parent stock of the plants for importation, and the greenhouse nursery where the parent stock and the plants for importation and were grown, once a month for 4 consecutive months immediately prior to importation, and based on [indexing](#) of the parent stock.

If *Dianthus* spp. from the Netherlands **lacks** the phytosanitary certificate with the additional declaration, then **must** enter [Postentry Quarantine](#).

The indexing procedures for *Dianthus* are electron microscopy, mechanical transmission of the pest to an indicator plant, or serology. See [Plant Indexing](#).

Dianthus spp. Cuttings from Kenya

Dianthus spp. cuttings from Kenya **without** postentry quarantine **must** at the time of arriving at the first port of entry in the United States, be as follows:

- ◆ Cuttings are accompanied by a phytosanitary certificate with an additional declaration stating:

The plants were produced in a production site registered with the NPPO of Kenya, and that the plants were grown under conditions specified by APHIS to prevent infestation with *Phialophora cinerescens*, *Carnation etched ring virus*, *Carnation necrotic fleck virus*, *Agrotis segetum*, *Epichoristodes acerbella*, *Helicoverpa armigera*, *Spodoptera littoralis*, and *Aspidiotus nerii*.

- ◆ Parental stock from which the plants intended for importation derive are inspected and found free of the fungus *Phialophora cinerescens*, and indexed and found free of *Carnation etched ring virus* and *Carnation necrotic fleck virus*;
- ◆ At least once monthly for the 4 months prior to the cuttings' export to the United States, the production site is visually inspected for *Spodoptera littoralis* (cotton leaf worm), *Helicoverpa armigera* (Old World bollworm), *Agrotis segetum* (turnip moth), *Epichoristodes acerbella* (carnation tortrix), *Aspidiotus nerii* (a scale), and *Chrysodeixis chalcites* (a moth), as well as *Phialophora cinerescens*, *Carnation etched ring virus*, and *Carnation necrotic fleck virus*;
- ◆ Cuttings are grown in a greenhouse that is registered with the NPPO of Kenya and that operates under an agreement with the NPPO;
- ◆ NPPO maintains a list of registered growers and provides them to APHIS at least annually;
- ◆ Plants destined for export to the United States are produced in a production site devoted solely to production of such plants;
- ◆ Production site incorporates safeguards to prevent the entry of arthropod pests including, but not necessarily limited to, insect proof screening over openings and self-closing double or airlock-type doors;
- ◆ Blacklight traps are maintained for at least 1 year following construction of the production site, registration of the site, replacement of the covering of the production site, or discovery and repair to any rips or tears in the covering of the production site.
- ◆ Any rips or tears are repaired immediately. In the event of detection of quarantine pests in a production site, the site will not be allowed to export until appropriate control measures approved by the NPPO are taken and their effectiveness verified by APHIS;

Specific Restrictions

Dianthus spp.

- ◆ Production site maintains records regarding production, indexing, inspection, and pest management, and inspectors from the NPPO and APHIS have access to both the production site and these records; and
- ◆ Cuttings are limited to commercial consignments **only**.

Dianthus cuttings from Kenya that **lack** a phytosanitary certificate with the additional declaration, then the plants **must** enter [Postentry Quarantine](#).

There are currently **no** approved facilities for *Dianthus* spp. cuttings from Kenya.

The indexing procedures for *Dianthus* are electron microscopy, mechanical transmission of the pest to an indicator plant, or serology. See [Plant Indexing](#).

Postentry Quarantine

Dianthus spp. (carnation, Sweet William) plants for planting (**except** seeds) **must** enter [Postentry Quarantine Program](#) from all countries **except** Canada.

The exception is *Dianthus* spp. plants from Great Britain (England, Scotland, Wales), the Netherlands, and *Dianthus* spp. cuttings from Kenya that **lack** the required phytosanitary certificate and additional declaration **must** enter Postentry Quarantine.

See [Postentry Quarantine Program](#) on page 5-1 for more information about *Dianthus* spp. Postentry Requirements.

Dracaena spp.

Imported *Dracaena* spp. plants for planting (**except** seeds) are prohibited from Costa Rica into the United States unless meeting the requirements listed under [Dracaena spp. from Costa Rica Program](#). See [Dracaena spp. Cane Cuttings](#) below for restrictions or exceptions.

Dracaena spp. from all other countries **must** meet the requirements under [General Restrictions](#).

Dracaena spp. Cane Cuttings

Dracaena spp. cane cuttings with leaves, roots, or shoots are regulated as entire plants. See [Table 3-17](#) when from Costa Rica; from all other countries see [Table 2-1](#).

See [Table 2-2](#) to regulate *Dracaena* spp. cane cuttings from **all** countries including Costa Rica. *Dracaena* cane cuttings with **no** leaves, **no** roots, **no** shoots that are 1,830 mm (approximately 6 feet or less) in length and 102 mm (approximately 4 inches or less) in diameter from all countries including Costa Rica are admissible into all U.S. States and territories and are **not** required to be from an approved facility.

Dracaena spp. from Costa Rica are regulated to prevent the plant pests *Ancistrocercus circumdatus*, *Caldwelliola reservata*, *Chaetanaphothrips signipennis*, *Coccus viridis*, *Diplosolenodes occidentalis*, *Erioloides consobrinus*, *Neoconocephalus affinis*, *Oncometopia clarior*, *Ovachlamys fulgens*, *Palliferra costaricensis*, *Planococcus minor*, *Pseudococcus landoi*, *Sarasinula plebeia*, *Succinea costaricana*, and *Xylosandrus morigerus* from entering the United States.

Continue to specific requirements for [Dracaena spp. from Costa Rica Program](#), [Dracaena spp. Size and Age Restrictions for Entire Plants from Costa Rica](#), and [Dracaena spp. Cane Cuttings](#), and the individual plant taxon in the [Lists of Plants for Planting](#).

Dracaena spp. from Costa Rica Program

Dracaena spp. plants from Costa Rica may **only** be imported into the continental United States when meeting the following requirements:

- ◆ *Dracaena* spp. plants from Costa Rica imported into the continental United States may **not** exceed 1,371.6 mm (approximately 54 inches) in length from the soil line (or top of the rooting zone for plants produced by air layering) to the farthest terminal growing point;
- ◆ National plant protection organization (NPPO) of Costa Rica **must** provide a bilateral workplan to APHIS that details the activities that the NPPO of Costa Rica will, subject to APHIS' approval of the workplan, carry out to meet the requirements of the [Dracaena spp. from Costa Rica Program](#);
- ◆ Each consignment of *Dracaena* spp. from Costa Rica **must** be accompanied by a phytosanitary certificate with additional declaration stating:

Plants in the consignment have been produced, packed, stored, and exported in accordance with the requirements of the [Dracaena spp. from Costa Rica Program](#) and the bilateral workplan. The consignment has been inspected and found free of quarantine pests.
- ◆ Persons in Costa Rica who produce, pack, or ship *Dracaena* spp. plants for export to the United States **must**:
 - ❖ Be registered and approved by the NPPO of Costa Rica; and
 - ❖ Enter into an agreement with the NPPO of Costa Rica whereby the persons agree to participate in and follow the export program for *Dracaena* spp. plants established by the NPPO of Costa Rica.
- ◆ Production, packing, and export facilities **must** be approved and registered by the NPPO of Costa Rica. Registered packing and export facilities may **only** accept plants from registered production facilities where plants are grown in compliance with the requirements of this [Dracaena spp. from Costa Rica Program](#) and the bilateral workplan.
- ◆ NPPO of Costa Rica will provide APHIS with access to the list of registered facilities at least annually and when changes occur; (see list of [Approved Dracaena Facilities](#))
- ◆ Participants and personnel at approved production, packing, and export facilities **must** be trained in the requirements of the [Dracaena spp. from Costa Rica Program](#) and the bilateral workplan and in recognizing the quarantine listed
 - ❖ Training records **must** be maintained and made available to the NPPO of Costa Rica and APHIS on request

- ◆ Participants **must** establish a pest management program for all approved production, packing, and export facilities, as follows:
 - ❖ Pest management programs **must** include field or facility scouting, monitoring, and control of target pests, and **must** be monitored and approved by the NPPO of Costa Rica;
 - ❖ APHIS may visit sites to inspect and monitor the pest management program;
 - ❖ Each approved facility **must** have a trained, dedicated person to supervise the pest management program; and
 - ❖ Records of pest management activities **must** be maintained and made available to the NPPO of Costa Rica and APHIS upon request;
- ◆ Sanitation measures **must** be maintained at approved production, packing, and export facilities
 - ❖ Fallen or discarded plant material and debris, or plants with pests **must** be removed and **must not** be included in field containers brought from production to packing facilities for export;
 - ❖ Packing facilities **must** be free of sand, soil, earth, and plant pests, and phytosanitary practices adequate to exclude pests **must** be employed; and
 - ❖ Equipment, materials, and tools **must** be sanitized to avoid spreading pests or to prevent recontamination.
- ◆ Inspections undertaken in the export program for *Dracaena* spp. plants established by the NPPO of Costa Rica will include, but may **not** be limited to, the following:
 - ❖ Approved production, packing, and export facilities **must** be inspected by dedicated trained personnel at the approved facilities at least once weekly, and by the NPPO of Costa Rica at least once monthly;
 - ❖ Packing materials and shipping containers for the plants **must** be approved by APHIS and inspected by the NPPO of Costa Rica to ensure that they **do not** introduce pests of concern to the plants;
 - ❖ Inspection dates and results **must** be recorded and made available to APHIS upon request;
- ◆ Participants **must** establish a traceability system approved and audited by the NPPO of Costa Rica and APHIS
 - ❖ Identity and origin of the *Dracaena* spp. plants **must** be maintained from the production unit through the packing and export facilities and to the port of entry in the United States.

Recordkeeping

Participants **must** maintain records of program activities, including corrective measures, for a minimum of 3 years. Records **must** be made available to the NPPO of Costa Rica and APHIS on request.

Ineligibility for Participation

Persons who produce, pack, or ship *Dracaena* spp. plants will be ineligible for participation in the export program for *Dracaena* spp. plants and their production sites or packing or export facilities will lose approved status if:

- ◆ Live pests are found in a production site;
- ◆ Live pests are found in a shipment of plants; or
- ◆ Persons who produce, pack, or ship *Dracaena* spp. plants and violate the requirements set out in this section or required under the export program established by the NPPO of Costa Rica.

Reinstatement

A person who produces, packs, or ships *Dracaena* spp. plants may be reinstated, and that person's production sites or packing or export facilities may regain approved status by requesting reapproval and submitting a detailed report describing the corrective actions taken by the person. Reapproval will **only** be granted upon concurrence from the NPPO of Costa Rica and APHIS.

Trust fund

The Government of Costa Rica **must** enter into a trust fund agreement with APHIS before each growing season. The Government of Costa Rica or its designated representative is required to pay in advance all estimated costs that APHIS expects to incur through its involvement in overseeing the execution of [Dracaena spp. from Costa Rica Program](#). These costs will include administrative expenses incurred in conducting the services enumerated in this section and all salaries (including overtime and the Federal share of employee benefits), travel expenses (including per diem expenses), and other incidental expenses incurred by the inspectors in performing these services.

The Government of Costa Rica or its designated representative is required to deposit a certified or cashier's check with APHIS for the amount of the costs estimated by APHIS. If the deposit is **not** sufficient to meet all costs incurred by APHIS, then the agreement further requires the Government of Costa Rica or its designated representative to deposit with APHIS a certified or cashier's check for the amount of the remaining costs, as determined by APHIS, before the services will be completed. After a final audit at the conclusion of each shipping season, any overpayment of funds would be returned to the Government of Costa Rica or its designated representative or held on account until needed.

Dracaena spp. Size and Age Restrictions for Entire Plants from Costa Rica

Table 3-17 Size and Age Restrictions for *Dracaena* spp. Entire (Whole) Plants Imported as Plants for Planting from Costa Rica

If the entire <i>Dracaena</i> spp. plants are from:	And are from:	And:	And:	Then:
Costa Rica	Approved facility authorized to export <i>Dracaena</i> spp. from Costa Rica to U.S.	Plants were produced by air layers	Exceeds 1,371.6 mm (approximately 54 inches) in length from the top of the rooting zone to the farthest terminal growing point	PROHIBIT ENTRY
			Is 1,371.6 mm (approximately 54 inches) or less in length from the top of the rooting zone to the farthest terminal growing point	REGULATE as within size limitations
		Plants were produced by other than air layering	Exceeds 1,371.6 mm (approximately 54 inches) in length from the top of the soil line to the farthest terminal growing point	REFUSE ENTRY
			Is 1,371.6 mm (approximately 54 inches) or less in length from the top of the soil line to the farthest terminal growing point	REGULATE as within size limitations
	Other than an approved facility	—————→	—————→	PROHIBIT ENTRY
Other than Costa Rica	—————→	—————→	—————→	SEE Table 2-1

Specific Restrictions

Euonymus spp.

***Euonymus* spp.**

Euonymus spp. plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries **except** Canada.

***Euonymus* spp. from Canada**

Euonymus spp. (**except** seeds) imported from Canada are prohibited to prevent the entry of *Cydalima perspectalis* (box tree moth) into the United States and territories, per [Federal Order Effective May 26, 2021](#).

Fagus spp.

Imported *Fagus* spp. (beech) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from all countries **except** Canada and the Netherlands.

Fagus spp. from Canada

Fagus spp. plants for planting (**except** seeds) from Canada are regulated to prevent the entry of *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB). See Table 3-4, Host Plants (except seeds) of *Anoplophora chinensis* (CLB) or *Anoplophora glabripennis* (ALB) from Canada

Fagus spp. from the Netherlands

Fagus spp. plants (**except** seeds) from the Netherlands are regulated for the following:

1. *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) (see Table 3-7).

Fagus sylvatica from the Netherlands

Fagus sylvatica (beech) from the Netherlands is regulated for the following:

1. *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) (see Table 3-7).
2. *Phytophthora ramorum* (sudden oak death) (see Table 3-12).

Fragaria spp.

Imported *Fragaria* spp. (strawberry) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from all countries **except** Canada and Israel.

Continue to specific requirements for *Fragaria* spp. from Canada and *Fragaria* spp. from Israel below.

Fragaria spp. from Canada

Plants imported outside the [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP\)](#) and the [Canadian Nursery Certification Program \(CNCP\)](#) from Canada **must** be accompanied by a phytosanitary certificate with an additional declaration certifying that the plants in the shipment fulfill the following requirements prior to importation into the United States and territories:

The plants have been produced and certified by the National Plant Protection Organization (NPPO) of Canada as a pest-free place of production or a pest free production site for the strawberry blossom weevil (*Anthonomus rubi*) following the requirements of the International Standards for Phytosanitary Measures-10. The shipment has been inspected and found to be free of the strawberry blossom weevil (*Anthonomus rubi*).

Fragaria spp. plants for planting shipments imported from Canada, that arrive into the United States without the required phytosanitary certificate and additional declaration will be refused entry. [Federal Order Effective September 14, 2021](#)

For *Fragaria* spp. plants imported under the [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP\)](#), see [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP Revised 2016\)](#) on page 4-10 or [U.S./Canada Greenhouse-Grown Plant Certification Program \(Legacy GCP\)](#) on page 4-16.

For *Fragaria* spp. plants imported under the [Canadian Nursery Certification Program \(CNCP\)](#), see [United States-Canada Nursery Certification Program \(NCP\)](#) on page 4-20.

***Fragaria* spp. from Israel**

Fragaria spp. plants for planting (except seeds) from Israel **must** be accompanied by a phytosanitary certificate with an additional declaration stating:

“The parent stock was found free of red stele disease pathogen as well as any other damaging strawberry pathogens, based on visual inspection and [indexing](#).”

Indexing procedures authorized by APHIS for *Fragaria* spp. are mechanical transmission of the pest to an indicator plant for *Fragaria* and nucleic acid probes.

If *Fragaria* spp. from Israel **lacks** the phytosanitary certificate with the required additional declaration, then prohibit entry.

Fragaria spp. from Israel **must** also meet the requirements of the [Spodoptera Exclusion Program](#).

Specific Restrictions

Fraxinus spp.

Fraxinus spp.

Imported *Fraxinus* spp. (ash) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from all countries **except** for emerald ash borer (EAB) free areas in Canada.

See specific requirements for [Fraxinus spp. from Canada](#).

Gladiolus spp.

Imported *Gladiolus* spp. (gladiolus) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from Africa (Algeria, Angola, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic Republic of the), Congo (Republic of), Cote d'Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Eswatini (Swaziland), Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sudan, Tanzania, Togo, Tunisia, Uganda, Togo, Zambia, Zimbabwe); Argentina; and Uruguay.

Gladiolus spp. plants for planting (**except** bulbs in commercial shipments and seeds) are **not** authorized (are prohibited) from Brazil, France, Italy, Malta, Mauritius, and Portugal.

Continue to specific requirements for importation of [Gladiolus spp. from Luxembourg](#), [Gladiolus spp. from Mexico](#), and [Gladiolus spp. from Spain](#).

Gladiolus spp. from Luxembourg

Gladiolus spp. plants for planting (**except** bulbs and seeds) from Luxembourg **must** be accompanied by a phytosanitary certificate with the following additional declaration, stating that:

“The plants were grown in a disease free environment in a greenhouse. The plants were subjected to 12 hours of continuous misting per day with water at 15-20 degrees Celsius on 2 consecutive days. The plants were inspected by a plant quarantine official of the country where grown 20 days after the completion of the misting and were found free of gladiolus rust.”

If *Gladiolus* spp. (**except** bulbs and seeds) from Luxembourg **lack** the additional declaration above, then they **must** enter [Postentry Quarantine](#).

Gladiolus spp. from Mexico

Gladiolus spp. plants for planting including bulbs (**except** seeds) from Mexico **must** be accompanied by a phytosanitary certificate from Sanidad Vegetal with the following additional declaration:

“The *Gladiolus* spp. in this shipment have been inspected and found free of *Uromyces transversalis*.”

Specific Restrictions

Gladiolus spp.

If *Gladiolus* spp. from Mexico (**except** seeds) **lack** the additional declaration, then prohibit entry.

Gladiolus from Mexico **must** enter [Postentry Quarantine](#).

***Gladiolus* spp. from Spain**

Gladiolus spp. plants for planting (**except** bulbs and seeds) are admissible from Spain when accompanied by a phytosanitary certificate with all of the following additional declarations stating that:

“The plants were grown in a disease free environment in a greenhouse. The plants were subjected to 12 hours of continuous misting per day with water at 15-20 degrees Celsius on 2 consecutive days. The plants were inspected by a plant quarantine official of the country where grown 20 days after the completion of the misting and were found free of *gladiolus* rust.”

If *Gladiolus* spp. (**except** bulbs and seeds) from Spain **lack** the additional declarations above, then they **must** enter [Postentry Quarantine](#).

Postentry Quarantine

Gladiolus spp. (**except** bulbs and seeds) **must** enter under postentry quarantine from all countries **except** Africa (Algeria, Angola, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic Republic of the), Congo (Republic of), Cote d'Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Eswatini (Swaziland), Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Liberia, Lesotho, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sudan, Tanzania, Togo, Tunisia, Uganda, Zambia, Zimbabwe). Argentina, Brazil, France, Italy, Malta, Mauritius, Portugal and Uruguay.

Gladiolus spp. from Luxembourg and Spain are **exempt** from postentry quarantine if they meet the additional declaration requirements above. If from Luxembourg and Spain and **lack** the phytosanitary certificate and additional declaration, then they **must** enter [Postentry Quarantine Program](#).

Gladiolus spp. from Mexico (**except** seeds) **must** enter postentry quarantine when meeting the additional declaration requirements above.

See [Postentry Quarantine Program](#) on page 5-1 for more information.

Gossypium spp.

Gossypium spp. (cotton) plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries.

Gossypium spp. seeds from all countries **must** be accompanied at the time of arriving at the first port of arrival by an import permit for cotton seed for planting. Seeds **must** be smooth and **not** fuzzy. If lint adheres, then require treatment T203-f1, T203-f2, T203-f3, or T203-f4.

Gossypium seeds for planting accompanied by an import permit **do not** need to be forwarded to a plant inspection station and may be inspected by CBP. See [Exceptions to Movement from CBP Port of Entry to Plant Inspection Station Requirement](#).

Gossypium seeds are Federal Seed Act Agriculture seeds. See [Federal Seed Act Seeds](#) to determine if meets Federal Seed Act conditions for entry.

Guizotia abyssinica Seeds

Imported *Guizotia abyssinica* (niger, ramtil) seeds for planting from all countries require a devitalization treatment to prevent the entry of *Cuscuta* spp. and other noxious weeds into the United States. (See [7 CFR 360.200 Designation of Noxious Weeds](#).) All plant parts **other than** seed are enterable when meeting requirements under [General Restrictions](#).

Guizotia abyssinica seeds that are treated prior to shipment to the United States **must** be treated at a facility that is approved by APHIS and that operates in compliance with a written agreement between the treatment facility owner and the national plant protection organization (NPPO) of the exporting country. The treatment facility owner agrees to comply with the provisions of the written agreement and allows inspectors and representatives of the plant protection service of the exporting country access to the treatment facility as necessary to monitor compliance with the regulations.

When treated at an APHIS approved treatment facility outside the U.S., then the shipment **must** be accompanied by an additional declaration that states, “The consignment of *Guizotia abyssinica* has been treated in accordance with 7 CFR part 305.”

Seeds that are treated within the United States **must** be treated at the time of importation into the United States as a condition of entry.

See [Plants for Planting that Require Treatment for Entry](#), [Plants for Planting from Israel](#) and the plant taxon in the [Lists of Plants for Planting](#).

Hibiscus spp.

Hibiscus spp. (kenaf) plants for planting are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from all countries **except** Canada, Denmark, and France.

Continue to specific import requirements for [Hibiscus spp. from Canada](#), [Hibiscus spp. from Denmark](#), [Hibiscus spp. from France](#), [Hibiscus spp. Seeds](#), and the individual plant taxon in [Lists of Plants for Planting](#).

Hibiscus spp. from Canada

Hibiscus spp. plants (**except** seeds) from Canada are regulated for [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#). See [Table 3-4](#).

Hibiscus spp. from Denmark

Hibiscus spp. plants (**except** seeds) from Denmark are regulated for [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#). See [Table 3-7](#). When meeting all other requirements for entry, then *Hibiscus* spp. plants (**except** seeds) **must** enter postentry quarantine.

Hibiscus spp. from France

Hibiscus spp. plants (**except** seeds) from France are regulated for [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#). See [Table 3-7](#). When meeting all other requirements for entry, then *Hibiscus* spp. plants (**except** seeds) **must** enter postentry quarantine.

Hibiscus spp. Seeds

All *Hibiscus* spp. (kenaf) seeds are regulated for pink bollworm. All *Hibiscus* spp. seeds (**except** *Hibiscus cannabinus* from Mexico), require treatment T203-g-1 or T203-g-3.

If *Hibiscus cannabinus* seeds are from Mexico, then continue to [Hibiscus cannabinus Seeds from Mexico](#).

Hibiscus cannabinus Seeds from Mexico

Hibiscus cannabinus seeds from Mexico imported into pink bollworm infested areas or suppressive areas of Arizona (entire State), California (Fresno County, Imperial County, Inyo County, Kern County, Kings County, Los Angeles County, Madera County, Merced County, Orange County, Riverside County, San Bernardino County, San Diego County, Tulane County), New Mexico (entire State), and Texas (entire State) **do not** require treatment.

Specific Restrictions

Hibiscus spp.

Hibiscus cannabinus seeds from Mexico destined to **other than** pink bollworm infested areas or suppressive areas listed above require treatment T203-g-1 or T203-g-3.

Hibiscus cannabinus seeds from **other than** Mexico require treatment T203-g-1 or T203-g-3.

Howea spp.

Imported *Howea* spp. (sentry palm) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from all countries **except** Australia and New Zealand.

Continue to specific restrictions for [Howea spp. from Australia](#) and [Howea spp. from New Zealand](#).

Howea spp. from Australia

Howea spp. plants for planting (**except** seeds) from Australia **must** be accompanied by a phytosanitary certificate from the country of origin with the following additional declaration stating:

The plants are free of the lethal yellow pathogen and the cadang-cadang pathogen as well as any other damaging palm pathogens, based on visual inspection.

If *Howea* spp. (**except** seeds) from Australia **lacks** the phytosanitary certificate with the required additional declaration above, then prohibit entry.

Howea spp. from New Zealand

Howea spp. plants for planting (**except** seeds) from New Zealand **must** be accompanied by a phytosanitary certificate from the country of origin with the following additional declaration stating:

The plants are free of the lethal yellowing pathogen and the cadang-cadang pathogen as well as any other damaging palm pathogens, based on visual inspection.

If *Howea* spp. (**except** seeds) from New Zealand **lacks** the phytosanitary certificate with the required additional declaration above, then prohibit entry.

Hydrangea spp.

Hydrangea spp. plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from Japan.

See specific requirements for [Hydrangea spp. Re-exported from Canada](#).

Hydrangea spp. Re-exported from Canada

Hydrangea spp. plants for planting (**except** seeds) may be re-exported from Canada if the plants are as follows:

- ◆ Originated in a country **other than** Japan and were grown in Canada under [Postentry Quarantine Program](#);
- ◆ Accompanied by a copy of the phytosanitary certificate from the country of origin; and
- ◆ Accompanied by a Canadian re-export phytosanitary certificate with an additional declaration stating:

“The *Hydrangea* spp. plants in this shipment have been grown in Canada under the postentry quarantine conditions equivalent to those of APHIS.”

PIM Letter OC 20110418CACA *Hydrangea* effective April 25, 2011

If **not** meeting all of the above requirements, then *Hydrangea* spp. plants (**except** seeds) re-exported to the U.S. from Canada with a country of origin **other than** Japan **must** enter [Postentry Quarantine](#).

Plants originating in Canada and exported into the U.S. are **not** subject to postentry quarantine.

Postentry Quarantine

When meeting all conditions for entry, *Hydrangea* spp. plants for planting (**except** seeds) that meet all other import requirements **must** enter [Postentry Quarantine Program](#) from all countries **except** Canada and Japan.

If **not** meeting all of the above requirements, then [Hydrangea spp. Re-exported from Canada](#) (**except** seeds) with a country of origin **other than** Japan **must** enter [Postentry Quarantine](#).

See [Postentry Quarantine Program](#) for *Hydrangea* spp. [Postentry Quarantine Requirements](#) on page 5-23.

***Ilex* spp.**

Ilex spp. (holly) plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries **except** Canada and Netherlands.

***Ilex* spp. from Canada**

Ilex spp. plants for planting (**except** seeds) imported from Canada are prohibited to prevent the entry of *Cydalima perspectalis* (box tree moth) into the United States and territories per [Federal Order Effective May 26, 2021](#).

***Ilex* spp. from Netherlands**

See Chapter 6, [Lists of Plants for Planting](#), and [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#) to determine the species of *Ilex* plants for planting (except seeds) from the Netherlands that are regulated.

Leucanthemella serotina

Imported *Leucanthemella serotina* (autumn oxeye, giant daisy, moon daisy) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from Afghanistan, Albania, Andorra, Argentina, Armenia, Australia, Austria, Azerbaijan, **Azores**, Bahrain, Bangladesh, Belarus, Belgium, Bhutan, Bolivia, Bosnia and Herzegovina, Brazil, **British Isles**, Brunei Darussalam, Bulgaria, Burma (Myanmar), Cambodia, **Channel Islands**, Chile, China, Colombia, Croatia, Czechia (Czech Republic), Denmark, Ecuador, England, Estonia, Falkland Islands, Finland, France, French Guiana, Georgia, Germany, Greece, Guyana, Hebrides, Hong Kong, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Isle of Man, Isle of Wight, Isles of Scilly, Israel, Italy, Japan, Jordan, Kazakhstan, Korea, Democratic People’s Republic of (North Korea); Korea, Republic of (South Korea), Kosovo, Kuwait, Kyrgyzstan, Lao People’s Democratic Republic (Laos), Latvia, Lebanon, Liechtenstein, Lithuania, Lundy Island, Luxembourg, Macedonia, Malaysia, Maldives, Malta, Marshall Islands, Melanesia, Mexico, Micronesia, Moldova, Monaco, Mongolia, Montenegro, Nauru, Nepal, Netherlands, New Caledonia, New Guinea, New Zealand, Nicobar Islands, Northern Ireland, Northern Mariana Islands, Norway, **Oceania**, Oman, Orkney Islands, Pakistan, Palau, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Polynesia, Portugal, Qatar, Romania, Russia, San Marino, Saudi Arabia, Scotland, Serbia, Shetland Islands, Singapore, Slovakia, Slovenia, Solomon Islands, South Africa, Spain, Sri Lanka, Suriname, Sweden, Switzerland, Syria, Taiwan, Tajikistan, Thailand, Timor-Leste, Tunisia, Turkey, Turkmenistan, Tuvalu, Ukraine, United Arab Emirates, **United Kingdom**, Uruguay, Uzbekistan, Vanuatu, Vatican City, Venezuela, Vietnam, Wales, Yemen (**Asia**, Australia, **Europe**, Mexico, New Zealand, **Oceania**, Republic of South Africa, **South America**, Tunisia).

Leucanthemella serotina is regulated for Chrysanthemum white rust caused by the fungus *Puccinia horiana*.

Leucanthemella serotina from all other countries **except** those listed as NAPPPRA above, **must** at the time of arriving at the port of first arrival in the United States be accompanied by a phytosanitary certificate that **must** contain an additional declaration stating:

“The plants were grown in a greenhouse nursery and found by the national plant protection organization of the country in which the plants were grown to be free of white rust of chrysanthemum (caused by the rust fungus *Puccinia horiana*) based on visual examination of parent stock, the plants for importation, and the greenhouse nursery in which the plants for

importation and the parent stock were grown, once a month for 4 consecutive months immediately prior to importation.”

If the phytosanitary certificate **does not** have the additional declaration, then prohibit entry.

The exception is for *Leucanthemella serotina* from Canada entering under and meeting [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP Revised 2016\)](#) or [U.S./Canada Greenhouse-Grown Plant Certification Program \(Legacy GCP\)](#) conditions for entry, then the additional declaration is **not** required.

Postentry Quarantine

When meeting all other requirements for entry and accompanied by the required phytosanitary certificate with the required additional declaration, *Leucanthemella serotina* plants for planting (**except** seeds) from all other countries **except** those [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) above **must** enter postentry quarantine.

See [Postentry Quarantine Program](#) on page 5-1 for *Leucanthemella serotina* [Postentry Quarantine Requirements](#).

Malus spp.

Imported *Malus* spp. (apple, crabapple) plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPPRA\)](#) from all countries **except** Belgium, Canada, France, Germany, and the Netherlands.

Malus spp. is regulated for the following:

- ◆ [Anoplophora chinensis \(CLB\) and Anoplophora glabripennis \(ALB\)](#)
- ◆ Injurious plant pathogens as follows:
 - ❖ Apple chat fruit agent (apple small fruit)
 - ❖ Apple dimple fruit apscaviroid
 - ❖ Apple green crinkle agent
 - ❖ Apple fruit crinkle apscaviroid
 - ❖ Apple proliferation phytoplasma
 - ❖ Apple ringspot agent (apple Henderson spot agent, apple thumb mark, thumb mark)
 - ❖ Apple scar skin apscaviroid
 - ❖ *Diaporthe mali* (leaf, branch, and fruit fungus)
 - ❖ *Guignardia piricola* (leaf, branch, and fruit disease)
 - ❖ *Monilinia fructigena* (brown rot of fruit)
 - ❖ *Monilinia polystroma*
 - ❖ *Valsa mali* (branch canker fungus)

Continue to specific requirements for [Malus spp. from Belgium](#), [Malus spp. from Canada](#), [Malus spp. from France](#), [Malus spp. from Germany](#), [Malus spp. from Netherlands](#), [Malus spp. With a Plant Part from a Different Taxon](#), and the plant taxon in [Lists of Plants for Planting](#).

Malus spp. from Belgium

Malus spp. plants for planting (**except** seeds) from Belgium **must** meet all of the following requirements:

1. Meet *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) (see Table 3-4) requirements.
2. Be accompanied by a phytosanitary certificate that contains **either** of the following:
 - ❖ Additional declaration that the plants were grown in a nursery in Belgium and the plants were found by the national plant protection organization of Belgium to be free of the following injurious plant pathogens
 - ⇒ Apple chat fruit agent (apple small fruit)
 - ⇒ Apple dimple fruit apscaviroid
 - ⇒ Apple green crinkle agent
 - ⇒ Apple fruit crinkle apscaviroid
 - ⇒ Apple proliferation phytoplasma
 - ⇒ Apple ringspot agent (apple Henderson spot agent, apple thumb mark, thumb mark)
 - ⇒ Apple scar skin apscaviroid
 - ⇒ *Diaporthe mali* (leaf, branch, and fruit fungus)
 - ⇒ *Guignardia piricola* (leaf, branch, and fruit disease)
 - ⇒ *Monilinia fructigena* (brown rot of fruit)
 - ⇒ *Monilinia polystroma*
 - ⇒ *Valsa mali* (branch canker fungus)

The determination by the national plant protection organization that the plants are free of these pathogens will be based on visual examination and **indexing** of the parent stock of the plants and inspection of the nursery where the restricted plants are grown to determine that the nursery is free of the specified pathogens.

OR

- ❖ If any of the pathogens (injurious plant pests) listed above **do not** occur in the country in which the plants were grown, then an additional declaration that the pathogens [*list pathogens*] **do not** occur in Belgium may be used in lieu of visual examination and **indexing** of the parent stock.

Specific Restrictions

Malus spp.

The [indexing](#) procedures authorized by APHIS for *Malus* spp. are graft transmission of the pest to an indicator plant, mechanical transmission of the pest to an indicator plant, serology, and nucleic acid probes.

3. If the plant contains more than one plant part from a different taxon, then see [Malus spp. With a Plant Part from a Different Taxon](#).
4. When meeting all conditions for entry, *Malus* spp. (**except** seeds) from Belgium **must** enter postentry quarantine.

When imported from Belgium, *Malus* spp. is subject to seasonal sampling. See [Seasonal Sampling of Malus and Prunus](#).

Malus spp. from Canada

When from Canada, *Malus* spp. (apple, crabapple) plants for planting (**except** seeds) **must** meet the following:

1. [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#) (see [Table 3-4](#)) requirements.
2. Be accompanied by a phytosanitary certificate that contains **either** of the following:
 - ❖ Additional declaration that the plants were grown in a nursery in Canada and the plants were found by the national plant protection organization of Canada to be free of the following injurious plant pathogens
 - ⇒ Apple chat fruit agent (apple small fruit)
 - ⇒ Apple dimple fruit apscaviroid
 - ⇒ Apple green crinkle agent
 - ⇒ Apple fruit crinkle apscaviroid
 - ⇒ Apple proliferation phytoplasma
 - ⇒ Apple ringspot agent (apple Henderson spot agent, apple thumb mark, thumb mark)
 - ⇒ Apple scar skin apscaviroid
 - ⇒ *Diaporthe mali* (leaf, branch, and fruit fungus)
 - ⇒ *Guignardia piricola* (leaf, branch, and fruit disease)
 - ⇒ *Monilinia fructigena* (brown rot of fruit)
 - ⇒ *Monilinia polystroma*
 - ⇒ *Valsa mali* (branch canker fungus)

The determination by the national plant protection organization that the plants are free of these pathogens will be based on visual examination and [indexing](#) of the parent stock of the plants and inspection of the nursery where the restricted plants are grown to determine that the nursery is free of the specified pathogens.

OR

- ❖ If any of the pathogens (injurious plant pests) listed above **do not** occur in Canada, then an additional declaration that the pathogens [*list pathogens*] **do not** occur in [*country in which the plants were grown*] may be used in lieu of visual examination and [indexing](#) of the parent stock.

Specific Restrictions

Malus spp.

The [indexing](#) procedures authorized by APHIS for *Malus* spp. are graft transmission of the pest to an indicator plant, mechanical transmission of the pest to an indicator plant, serology, and nucleic acid probes.

3. If the plant contains more than one plant part from a different taxon, then see [Malus spp. With a Plant Part from a Different Taxon](#).

See [Plants for Planting from Canada That Require a Permit](#) on page 4-7 for more information.

Malus spp. from France

Malus spp. plants for planting (**except** seeds) from France **must** meet all of the following requirements:

1. Meet *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) (see Table 3-4) requirements.
2. Be accompanied by a phytosanitary certificate that contains **either** of the following:
 - ❖ Additional declaration that the plants were grown in a nursery in France and the plants were found by the national plant protection organization of France to be free of the following injurious plant pathogens
 - ⇒ Apple chat fruit agent (apple small fruit)
 - ⇒ Apple dimple fruit apscaviroid
 - ⇒ Apple green crinkle agent
 - ⇒ Apple fruit crinkle apscaviroid
 - ⇒ Apple proliferation phytoplasma
 - ⇒ Apple ringspot agent (apple Henderson spot agent, apple thumb mark, thumb mark)
 - ⇒ Apple scar skin apscaviroid
 - ⇒ *Diaporthe mali* (leaf, branch, and fruit fungus)
 - ⇒ *Guignardia piricola* (leaf, branch, and fruit disease)
 - ⇒ *Monilinia fructigena* (brown rot of fruit)
 - ⇒ *Monilinia polystroma*
 - ⇒ *Valsa mali* (branch canker fungus)

The determination by the national plant protection organization that the plants are free of these pathogens will be based on visual examination and **indexing** of the parent stock of the plants and inspection of the nursery where the restricted plants are grown to determine that the nursery is free of the specified pathogens.

OR

- ❖ If any of the pathogens (injurious plant pests) listed above **do not** occur in the country in which the plants were grown, then an additional declaration that the pathogens [*list pathogens*] **do not** occur in France may be used in lieu of visual examination and **indexing** of the parent stock.

Specific Restrictions

Malus spp.

The [indexing](#) procedures authorized by APHIS for *Malus* spp. are graft transmission of the pest to an indicator plant, mechanical transmission of the pest to an indicator plant, serology, and nucleic acid probes.

3. If the plant contains more than one plant part from a different taxon, then see [Malus spp. With a Plant Part from a Different Taxon](#).
4. When meeting all conditions for entry, *Malus* spp. (**except** seeds) from France **must** enter postentry quarantine.

When imported from France, *Malus* spp. is subject to seasonal sampling. See [Seasonal Sampling of Malus and Prunus](#).

Malus spp. from Germany

Malus spp. plants for planting (**except** seeds) from Germany **must** meet all of the following requirements:

1. Meet *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) (see Table 3-4) requirements.
2. Be accompanied by a phytosanitary certificate that contains **either** of the following:
 - ❖ Additional declaration that the plants were grown in a nursery in Germany and the plants were found by the national plant protection organization of Germany to be free of the following injurious plant pathogens
 - ⇒ Apple chat fruit agent (apple small fruit)
 - ⇒ Apple dimple fruit apscaviroid
 - ⇒ Apple green crinkle agent
 - ⇒ Apple fruit crinkle apscaviroid
 - ⇒ Apple proliferation phytoplasma
 - ⇒ Apple ringspot agent (apple Henderson spot agent, apple thumb mark, thumb mark)
 - ⇒ Apple scar skin apscaviroid
 - ⇒ *Diaporthe mali* (leaf, branch, and fruit fungus)
 - ⇒ *Guignardia piricola* (leaf, branch, and fruit disease)
 - ⇒ *Monilinia fructigena* (brown rot of fruit)
 - ⇒ *Monilinia polystroma*
 - ⇒ *Valsa mali* (branch canker fungus)

The determination by the national plant protection organization that the plants are free of these pathogens will be based on visual examination and **indexing** of the parent stock of the plants and inspection of the nursery where the restricted plants are grown to determine that the nursery is free of the specified pathogens.

OR

- ❖ If any of the pathogens (injurious plant pests) listed above **do not** occur in the country in which the plants were grown, then an additional declaration that the pathogens [*list pathogens*] **do not** occur in Germany may be used in lieu of visual examination and **indexing** of the parent stock.

Specific Restrictions

Malus spp.

The [indexing](#) procedures authorized by APHIS for *Malus* spp. are graft transmission of the pest to an indicator plant, mechanical transmission of the pest to an indicator plant, serology, and nucleic acid probes.

3. If the plant contains more than one plant part from a different taxon, then see [Malus spp. With a Plant Part from a Different Taxon](#).
4. When meeting all conditions for entry, *Malus* spp. (**except** seeds) from Germany **must** enter postentry quarantine.

When imported from Germany, *Malus* spp. is subject to seasonal sampling. See [Seasonal Sampling of Malus and Prunus](#).

Malus spp. from Netherlands

Malus spp. plants for planting (**except** seeds) from the Netherlands **must** meet all of the following requirements:

1. Meet *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) (see Table 3-4) requirements.
2. Be accompanied by a phytosanitary certificate that contains **either** of the following:
 - ❖ Additional declaration that the plants were grown in a nursery in the Netherlands and the plants were found by the national plant protection organization of the Netherlands to be free of the following injurious plant pathogens
 - ⇒ Apple chat fruit agent (apple small fruit)
 - ⇒ Apple dimple fruit apscaviroid
 - ⇒ Apple green crinkle agent
 - ⇒ Apple fruit crinkle apscaviroid
 - ⇒ Apple proliferation phytoplasma
 - ⇒ Apple ringspot agent (apple Henderson spot agent, apple thumb mark, thumb mark)
 - ⇒ Apple scar skin apscaviroid
 - ⇒ *Diaporthe mali* (leaf, branch, and fruit fungus)
 - ⇒ *Guignardia piricola* (leaf, branch, and fruit disease)
 - ⇒ *Monilinia fructigena* (brown rot of fruit)
 - ⇒ *Monilinia polystroma*
 - ⇒ *Valsa mali* (branch canker fungus)

The determination by the national plant protection organization that the plants are free of these pathogens will be based on visual examination and **indexing** of the parent stock of the plants and inspection of the nursery where the restricted plants are grown to determine that the nursery is free of the specified pathogens.

OR

- ❖ If any of the pathogens (injurious plant pests) listed above **do not** occur in the country in which the plants were grown, then an additional declaration that the pathogens [*list pathogens*] **do not** occur in the Netherlands may be used in lieu of visual examination and **indexing** of the parent stock.

Specific Restrictions

Malus spp.

The [indexing](#) procedures authorized by APHIS for *Malus* spp. are graft transmission of the pest to an indicator plant, mechanical transmission of the pest to an indicator plant, serology, and nucleic acid probes.

3. If the plant contains more than one plant part from a different taxon, then see [Malus spp. With a Plant Part from a Different Taxon](#).
4. When meeting all conditions for entry, *Malus* spp. (**except** seeds) from the Netherlands **must** enter postentry quarantine.

When imported from the Netherlands, *Malus* spp. is subject to seasonal sampling. See [Seasonal Sampling of Malus and Prunus](#).

Malus spp. With a Plant Part from a Different Taxon

If *Malus* spp. (apple, crabapple) plants for planting (**except** seeds) contain **more than** one plant part (e.g., grafted or budded) and the interstem, rootstock, scion or any other part of the finished plant belongs to a different regulated taxon, then the plants **must** be as follows:

- ◆ Be accompanied by a phytosanitary certificate with an additional declaration (A.D.) that includes:
 - ❖ List of all plant parts of regulated taxa that have been incorporated into the finished plant;
 - ❖ Scientific names of the regulated plant taxa that have been incorporated into the finished plant;
- ◆ Plants **must** meet the entry requirements for each taxa listed.

EXAMPLE An imported plant uses *Pyrus* spp. as its rootstock and *Malus* spp. as the scion. The phytosanitary certificate **must** list both *Pyrus* and *Malus* and **must** include the required additional declarations for both *Pyrus* spp. and *Malus* spp.

Postentry Quarantine

When meeting all conditions for entry, *Malus* spp. (**except** seeds) from Belgium, France, Germany, and the Netherlands **must** enter postentry quarantine. See [Postentry Quarantine Program](#) on page 5-1 for more information.

Mangifera spp.

Imported *Mangifera* spp. (mango) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from all countries.

Mangifera spp. Seeds

Mangifera spp. seeds are prohibited from all countries **except** Anguilla, Antigua and Barbuda, Argentina, Aruba, Belize, Bolivia, Bonaire, Brazil, Canada, Cayman Islands, Chile, Colombia, Costa Rica, Cuba, Curacao, Dominican Republic, Ecuador, El Salvador, Falkland Islands, Guatemala, Guimaras Island, Guyana, Haiti, Honduras, Jamaica, Mexico, Montserrat, Nicaragua, Panama, Paraguay, Peru, Puerto Rico, Saba, St. Barthelemy, St. Eustatius, St. Kitts and Nevis, St. Martin, St. Maarten, Suriname, Uruguay, Venezuela.

Mangifera spp. seeds are regulated to prevent the introduction and establishment of *Sternochetus mangiferae* (mango seed weevil) in the United States.

Continue to specific requirements for [Mangifera indica Seeds](#) below.

Mangifera indica Seeds

Mangifera indica seeds are prohibited from all countries **except** Anguilla, Argentina, Aruba, Belize, Bolivia, Bonaire, Brazil, Canada, Cayman Islands, Chile, Colombia, Costa Rica, Cuba, Curacao, Dominican Republic, Ecuador, El Salvador, Falkland Islands, Guatemala, Guimaras Island, Guyana, Haiti, Honduras, Jamaica, Mexico, Montserrat, Nicaragua, Panama, Paraguay, Peru, Puerto Rico, Saba, St. Barthelemy, St. Eustatius, Suriname, Uruguay, Venezuela. [Federal Order Effective December 23, 2015](#).

Continue to [Table 3-18, Mangifera spp. Plants for Planting](#).

Table 3-18 *Mangifera* spp. Plants for Planting

If:	And is:	And from:	And imported into:	Then:
<i>Mangifera</i> spp. plants for planting (except seeds)	→	All countries	→	Not Authorized Pending Pest Risk Analysis (NAPRA) Federal Notice Effective May 20, 2013
<i>Mangifera</i> spp. seeds	<i>Mangifera indica</i>	All countries except Anguilla, Argentina, Aruba, Belize, Bolivia, Bonaire, Brazil, Canada, Cayman Islands, Chile, Colombia, Costa Rica, Cuba, Curacao, Dominican Republic, Ecuador, El Salvador, Falkland Islands, Guatemala, Guimaras Island, Guyana, Haiti, Honduras, Jamaica, Mexico, Montserrat, Nicaragua, Panama, Paraguay, Peru, Puerto Rico, Saba, St. Barthelemy, St. Eustatius, Suriname, Uruguay, Venezuela	Guam, Hawaii, Northern Mariana Islands Other than Guam, Hawaii, Northern Mariana Islands	INSPECT and RELEASE if meets all other conditions for entry PROHIBIT ENTRY Federal Order Effective December 23, 2015
	Other than <i>Mangifera indica</i>	All countries except Anguilla, Antigua and Barbuda, Argentina, Aruba, Belize, Bolivia, Bonaire, Brazil, Canada, Cayman Islands, Chile, Colombia, Costa Rica, Cuba, Curacao, Dominican Republic, Ecuador, El Salvador, Falkland Islands, Guatemala, Guimaras Island, Guyana, Haiti, Honduras, Jamaica, Mexico, Montserrat, Nicaragua, Panama, Paraguay, Peru, Puerto Rico, Saba, St. Barthelemy, St. Eustatius, St. Kitts and Nevis, St. Martin, St. Maarten, Suriname, Uruguay, Venezuela	→	PROHIBIT ENTRY

Nipponanthemum nipponicum

Imported *Nipponanthemum nipponicum* (Nippon daisy) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from Afghanistan, Albania, Andorra, Argentina, Armenia, Australia, Austria, Azerbaijan, **Azores**, Bahrain, Bangladesh, Belarus, Belgium, Bhutan, Bolivia, Bosnia and Herzegovina, Brazil, **British Isles**, Brunei Darussalam, Bulgaria, Burma (Myanmar), Cambodia, **Channel Islands**, Chile, China, Colombia, Croatia, Czechia (Czech Republic), Denmark, Ecuador, England, Estonia, Falkland Islands, Finland, France, French Guiana, Georgia, Germany, Greece, Guyana, Hebrides, Hong Kong, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Isle of Man, Isle of Wight, Isles of Scilly, Israel, Italy, Japan, Jordan, Kazakhstan, Korea, Democratic People’s Republic of (North Korea); Korea, Republic of (South Korea), Kosovo, Kuwait, Kyrgyzstan, Lao People’s Democratic Republic (Laos), Latvia, Lebanon, Liechtenstein, Lithuania, Lundy Island, Luxembourg, Macedonia, Malaysia, Maldives, Malta, Marshall Islands, Melanesia, Mexico, Micronesia, Moldova, Monaco, Mongolia, Montenegro, Nauru, Nepal, Netherlands, New Caledonia, New Guinea, New Zealand, Nicobar Islands, Northern Ireland, Northern Mariana Islands, Norway, **Oceania**, Oman, Orkney Islands, Pakistan, Palau, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Polynesia, Portugal, Qatar, Romania, Russia, San Marino, Saudi Arabia, Scotland, Serbia, Shetland Islands, Singapore, Slovakia, Slovenia, Solomon Islands, South Africa, Spain, Sri Lanka, Suriname, Sweden, Switzerland, Syria, Taiwan, Tajikistan, Thailand, Timor-Leste, Tunisia, Turkey, Turkmenistan, Tuvalu, Ukraine, United Arab Emirates, **United Kingdom**, Uruguay, Uzbekistan, Vanuatu, Vatican City, Venezuela, Vietnam, Wales, Yemen (**Asia**, Australia, **Europe**, Mexico, New Zealand, **Oceania**, Republic of South Africa, **South America**, Tunisia).

Nipponanthemum nipponicum is regulated for Chrysanthemum white rust caused by the fungus *Puccinia horiana*.

Nipponanthemum nipponicum (**except** seeds) from all other countries **except** those listed as NAPPRA above, **must** at the time of arriving at the port of first arrival in the United States be accompanied by a phytosanitary certificate that **must** contain an additional declaration stating:

“The plants were grown in a greenhouse nursery and found by the national plant protection organization of the country in which the plants were grown to be free of white rust of chrysanthemum (caused by the rust fungus *Puccinia horiana*) based on visual examination of parent stock, the plants for importation, and the greenhouse nursery in which the plants for importation and the parent stock were grown, once a month for 4 consecutive months immediately prior to importation.”

If the phytosanitary certificate **does not** have the additional declaration, then prohibit entry.

The exception is for *Nipponanthemum nipponicum* from Canada entering under and meeting [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP Revised 2016\)](#) or [U.S./Canada Greenhouse-Grown Plant Certification Program \(Legacy GCP\)](#) conditions for entry, then the additional declaration is **not** required.

Postentry Quarantine

When meeting all other conditions for entry and accompanied by the required phytosanitary certificate with the required additional declaration, *Nipponanthemum nipponicum* plants for planting (**except** seeds) from all other countries **except** Canada and those listed as [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) **must** enter postentry quarantine.

See [Postentry Quarantine Program](#) on page 5-1 for *Nipponanthemum nipponicum* Postentry Requirements.

Pelargonium spp.

Imported *Pelargonium* spp. (geranium) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from all countries **except** Canada, Canary Islands, Israel and any country or area and facility on the APHIS **Approved Pelargonium Cuttings Facilities** list that meets the conditions for **Pelargonium spp. from a Country or Area Where *Ralstonia solanacearum* R3B2 Is Known to Occur**.

Pelargonium spp. (geranium) plants (**except** seeds) from all countries are regulated to prevent the introduction of *Ralstonia solanacearum* race 3 biovar 2, a bacterial pathogen that causes wilt disease (bacterial wilt, brown rot of potato, and southern wilt), into the United States.

Pelargonium spp. plants from the Canary Islands are regulated to prevent the introduction of *Chrysodeixis chalcites*, *Helicoverpa armigera*, *Syngrapha circumflexa* (syn. *Cornutiplusia circumflexa*), and *Ralstonia solanacearum* race 3 biovar 2 into the United States.

NOTICE

Pelargonium spp. are **not** *Geranium* spp. A common name for both species is geranium. **Only** *Pelargonium* spp. is regulated as a host of *Ralstonia solanacearum* race 3 biovar 2.

Pelargonium spp. from Canada

Pelargonium spp. plants (**except** seeds) from Canada **must** meet **one** of the following requirements:

- ◆ Be imported under the **United States–Canada Greenhouse-Grown Plant Certification Program (GCP Revised 2016)** or **U.S./Canada Greenhouse-Grown Plant Certification Program (Legacy GCP)**
or
- ◆ Meet the requirements of **Pelargonium spp. from a Country Where *Ralstonia solanacearum* Race 3 Biovar 2 Is Not Known to Occur**

Pelargonium spp. from Canary Islands

Pelargonium spp. plants (**except** seeds) from the Canary Islands **must** meet **both** of the following requirements:

- ◆ **Pelargonium spp. from Canary Islands Program**
- ◆ **Pelargonium spp. *Ralstonia solanacearum* Race 3 Biovar 2 Program**

Pelargonium spp. from Israel

Pelargonium spp. plants (**except** seeds) from Israel **must** meet the requirements of [Pelargonium spp. from a Country Where Ralstonia solanacearum Race 3 Biovar 2 Is Not Known to Occur](#).

Pelargonium spp. from All Countries Other than Canada, Canary Islands, and Israel

Pelargonium spp. plants (**except** seeds) from all countries **other than** Canada **must** meet the requirements for *Ralstonia solanacearum* race 3 biovar 2 (R3B2):

- ◆ [Pelargonium spp. from a Country or Area Where Ralstonia solanacearum R3B2 Is Known to Occur](#)
 - ❖ [Pelargonium spp. from an Established Pest Free Area](#) (there are **no** established pest free areas for *Pelargonium* spp. at this time)
or
 - ❖ [Pelargonium spp. Ralstonia solanacearum Race 3 Biovar 2 Program](#)

Pelargonium spp. from Canary Islands Program

Pelargonium spp. from the Canary Islands **must** meet **all** the requirements of the *Pelargonium* from Canary Islands Program listed below:

- ◆ **Must** be accompanied by a phytosanitary certificate with the following additional declarations stating:
 - ❖ Plants were produced in a Spanish (Canary Island) [Approved Pelargonium Facilities](#) production site;
 - ❖ Production site is operated by a grower participating in the export program for *Pelargonium* spp. plants established by the national plant protection organization (NPPO) of Spain; and
 - ❖ Plants were grown under conditions specified by APHIS as described under the [Pelargonium spp. from Canary Islands Program](#) to prevent infestation with *Helicoverpa armigera*, *Chrysodeixis chalcites*, and *Syngrapha circumflexa* (syn. *Cornutiplusia circumflexa*).
- ◆ Persons in the Canary Islands who produce *Pelargonium* spp. plants for export to the United States **must**:
 - ❖ Be registered and approved by the NPPO of Spain
 - ❖ Enter into an agreement with the NPPO of Spain whereby the producer agrees to participate in and follow the export program for *Pelargonium* spp. plants established by the national plant protection organization of Spain

- ◆ Growers in the Canary Islands who produce *Pelargonium* spp. plants for export to the United States **must** meet the following requirements for inclusion in the export program for *Pelargonium* spp. plants for planting established by the NPPO of Spain:
 - ❖ *Pelargonium* spp. plants destined for export to the United States **must** be produced in a production site devoted **solely** to production of such plants;
 - ❖ Production sites in which such plants are produced **must** be registered with the NPPO of Spain;
 - ❖ Such production sites **must** employ safeguards agreed on by APHIS and the NPPO of Spain, including, but **not** limited to, prescribed mesh screen size (if the production site is a greenhouse) and automatically closing doors to ensure the exclusion of *Helicoverpa armigera*;
 - ❖ Each production site in which plants destined for export to the United States are grown **must** have at least one blacklight trap for one (1) year following any of these events:
 - ⇒ Construction of the production site;
 - ⇒ Entry of the production site into the approved plants export program;
 - ⇒ Replacement of the covering of the production site; or
 - ⇒ Detection and repair of a break or tear in the plastic or screening in the production site.
- ◆ Inspections undertaken in the export program for *Pelargonium* spp. plants established by the NPPO of Spain will include, but may **not** be limited to the following:
 - ❖ NPPO of Spain will inspect the plants and the production site during the growing season and during packing;
 - ❖ Packing materials and shipping containers for the plants **must** be inspected and approved by APHIS to ensure that they **do not** introduce pests of concern to the plants;
 - ❖ Either APHIS or the NPPO of Spain will inspect the production site of the plants to ensure that they meet standards of sanitation agreed upon by APHIS and the NPPO of Spain;
 - ❖ Inspectors from both APHIS and the NPPO of Spain will have access to the production site as necessary to ensure that growers are employing the proper safeguards against infestation of *Helicoverpa armigera*, *Chrysodeixis chalcites*, and *Syngrapha circumflexa* and that those safeguards are correctly implemented;
 - ❖ NPPO of Spain will provide APHIS with access to the list of registered and approved growers at least annually

- ◆ Growers will be ineligible for participation in the export program for *Pelargonium* spp. plants established by the NPPO of Spain and their production sites will lose approved status if any of the following occur:
 - ❖ Live *Syngrapha circumflexa* (syn. *Cornutiplusia circumflexa*) or any other moth of the family Noctuidae are found in a production site;
 - ❖ Live *Syngrapha circumflexa* (syn. *Cornutiplusia circumflexa*), or any other moth of the family Noctuidae are found in a shipment of plants;
 - ❖ Growers violate the requirements set out in this [Pelargonium spp. from Canary Islands Program](#) and by the export program established by the NPPO of Spain.
- ◆ Reinstatement
 - ❖ Grower may be reinstated and the grower's production sites may regain approved status by requesting re-approval and submitting a detailed report describing the corrective actions taken by the grower
 - ❖ Re-approval will **only** be granted upon concurrence from the NPPO and APHIS
- ◆ Termination
 - ❖ APHIS may terminate the entire program if there are repeated violations of procedural or biological requirements
- ◆ Trust Fund

The Government of Spain **must** enter into a trust fund agreement with APHIS before each growing season as follows:

- ❖ Government of Spain or its designated representative is required to pay in advance all estimated costs that APHIS expects to incur through its involvement in overseeing the execution of the [Pelargonium spp. from Canary Islands Program](#);
- ❖ Costs will include administrative expenses incurred in conducting the services enumerated in the [Pelargonium spp. from Canary Islands Program](#) and all salaries (including overtime and the Federal share of employee benefits), travel expenses (including per diem expenses), and other incidental expenses incurred by the inspectors in performing these services;
- ❖ Government of Spain or its designated representative is required to deposit a certified or cashier's check with APHIS for the amount of the costs estimated by APHIS;
- ❖ If the deposit is **not** sufficient to meet all costs incurred by APHIS, then the agreement further requires the Government of Spain or its designated representative to deposit with APHIS a certified or

cashier's check for the amount of the remaining costs as determined by APHIS, before the services will be completed; and

- ❖ After a final audit at the conclusion of each shipping season, any overpayment of funds would be returned to the Government of Spain or its designated representative or held on account until needed.

Pelargonium spp. plants (**except** seeds) from the Canary Islands are regulated for *Ralstonia solanacearum* race 3 biovar 2. Continue to [Pelargonium spp. from a Country or Area Where Ralstonia solanacearum R3B2 Is Known to Occur](#).

***Pelargonium Ralstonia solanacearum* Race 3 Biovar 2 Program**

Pelargonium spp. plants (**except** seeds) **must** meet the requirements under the **one** of the following:

- ◆ [Pelargonium spp. from a Country Where Ralstonia solanacearum Race 3 Biovar 2 Is Not Known to Occur](#)
or
- ◆ [Pelargonium spp. from a Country or Area Where Ralstonia solanacearum R3B2 Is Known to Occur](#)

***Pelargonium* spp. from a Country Where Ralstonia solanacearum Race 3 Biovar 2 Is Not Known to Occur**

Ralstonia solanacearum race 3 biovar 2 (R3B2) is **not** known to occur in Canada and Israel.

Pelargonium spp. from Canada and Israel and **must** be accompanied by a phytosanitary certificate with an additional declaration that states, “*Ralstonia solanacearum* race 3 biovar 2 is **not** known to occur in [country or area of origin].”

If **not** accompanied by a phytosanitary certificate with the additional declaration and **not** imported under the [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP Revised 2016\)](#) or [U.S./Canada Greenhouse-Grown Plant Certification Program \(Legacy GCP\)](#), then prohibit entry.

Pelargonium spp. from a Country or Area Where *Ralstonia solanacearum* R3B2 Is Known to Occur

Pelargonium spp. plants for planting (**except** seeds) for import into the U.S. from a country where *Ralstonia solanacearum* race 3 biovar 2 (R3B2) is known to occur (all countries **except** Canada and Israel) **must** be from **one** of the following:

- ◆ Pelargonium spp. from an Established Pest Free Area
or
- ◆ Pelargonium spp. *Ralstonia solanacearum* Race 3 Biovar 2 Program

Pelargonium spp. from an Established Pest Free Area

Pelargonium spp. plants (**except** seeds) from an established *Ralstonia solanacearum* R3B2 pest free area **must** be as follows:

- ◆ Be exported from an established pest free area and **must** be in accordance with International Standards for Phytosanitary Measures (ISPM), Publication No. 4, “Requirements for the Establishment of Pest Free Areas”

NOTICE

At this time, there are **no** established pest free areas for *Ralstonia solanacearum* race 3 biovar 2.

and

- ◆ Be accompanied by a phytosanitary certificate issued by the national plant protection organization (NPPO) of the country in which the plants are produced with an additional declaration that states, “These plants are from an area that is free of *Ralstonia solanacearum* race 3 biovar 2.

Pelargonium spp. *Ralstonia solanacearum* Race 3 Biovar 2 Program

The national plant protection organization (NPPO) of the country in which the *Pelargonium* spp. plants are produced **must** enter into a bilateral work plan established with APHIS to export *Pelargonium* spp. plants (**except** seeds) from a country or area where *Ralstonia solanacearum* race 3 biovar 2 is known to occur and is **not** from an established pest free area.

The plants produced under the bilateral work plan **must** meet the following requirements:

- ◆ Be accompanied by a phytosanitary certificate that contains an additional declaration that states, “These plants have been produced in accordance

- with the requirements for the [Pelargonium spp. Ralstonia solanacearum Race 3 Biovar 2 Program](#) in the *Plants for Planting Manual*”;
- ◆ Be from an APHIS approved *Pelargonium* spp. facility authorized to export *Pelargonium* spp. to the United States (see [Approved Pelargonium spp. Facilities](#));
 - ◆ Production site (approved facilities) where the *Pelargonium* spp. plants (**except** seeds) intended for export to the United States are produced **must** be registered with and certified by both APHIS and the NPPO
 - ❖ Production sites **must** be initially approved and thereafter visited at least once a year by APHIS and the NPPO to verify compliance with **all** these requirements as part of the certification process;
 - ❖ Production site **must** conduct ongoing testing for *Ralstonia solanacearum* race 3 biovar 2;
 - ❖ **Only** *Pelargonium* spp. plants (**except** seeds) from a group of plants that has been tested according to an APHIS-approved testing protocol with negative results for the presence of *Ralstonia solanacearum* race 3 biovar 2 may be used in production and export;
 - ⇒ Records of the testing **must** be kept for two growing seasons and made available to representatives of APHIS and of the NPPO; and
 - ⇒ All testing procedures **must** be approved by APHIS;
 - ❖ Each greenhouse on the production site **must** be constructed in a manner that ensures that runoff water from areas surrounding the greenhouses **cannot** enter the greenhouses;
 - ❖ Greenhouses **must** be surrounded by a 1-meter buffer that is sloped so that water drains away from the greenhouses;
 - ❖ Dicotyledonous weeds **must** be controlled **both** within each greenhouse on the production site and around the production site;
 - ❖ Greenhouses on the production site and the 1-meter buffer surrounding the greenhouses **must** be free of dicotyledonous weeds;
 - ❖ All equipment that comes in contact with *Pelargonium* spp. plants within the production site **must** be adequately sanitized so that *Ralstonia solanacearum* race 3 biovar 2 **cannot** be transmitted between plants or enter from outside the production site via the equipment;
 - ❖ Production site personnel **must** adequately sanitize their clothing and shoes and wash their hands before entering the production site to prevent the entry of *Ralstonia solanacearum* race 3 biovar 2 into the production site;

- ❖ Growing media for *Pelargonium* spp. plants (**except** seeds) **must** be free of *Ralstonia solanacearum* race 3 biovar 2;
- ❖ Growing media and containers for *Pelargonium* spp. plants **must not** come in contact with growing media that could transmit *Ralstonia solanacearum* race 3 biovar 2 and the plants **must** be grown in APHIS-approved growing media (see [Approved Growing Media](#));
- ❖ Growing media at the production site **must not** come in direct contact with any water source, such as an emitter or a hose end;
- ❖ Production site personnel **must** be educated regarding the various pathways through which *Ralstonia solanacearum* race 3 biovar 2 can be introduced into a production site and **must** be trained to recognize symptoms of *Ralstonia solanacearum* race 3 biovar 2 infection in *Pelargonium* spp. plants in the production site;
- ❖ Production site **must** either derive the water from an APHIS-approved source or treat the water with an APHIS-approved treatment before use;
- ❖ Water used in maintenance of the plants at the production site **must** be free of *Ralstonia solanacearum* race 3 biovar 2;
 - ⇒ If a drip irrigation system is used, then backflow devices **must** be installed to prevent any *Ralstonia solanacearum* race 3 biovar 2 that may be present from spreading to the rest of the production site through the irrigation system;
 - ⇒ Ebb and flow irrigation **must not** be used;
- ❖ Plants of *Pelargonium* spp. produced for export within an approved production site **must** be handled and packed in a manner adequate to prevent the introduction of *Ralstonia solanacearum* race 3 biovar 2;
- ❖ Plants **must** be labeled with information indicating the production site from which the plants originated;
- ❖ If *Ralstonia solanacearum* race 3 biovar 2 is found in the production site or in consignments from the production site, then the production site will be **ineligible** to export *Pelargonium* spp. plants to the United States;
- ◆ Reinstatement
 - ❖ Production site may be reinstated if a reinspection reveals that the production site is free of *Ralstonia solanacearum* race 3 biovar 2 and all problems in the production site have been addressed and corrected to the satisfaction of APHIS;
- ◆ Trust fund agreement

Specific Restrictions

Pelargonium spp.

- ❖ Government of the country in which the plants are produced **must** enter into a trust fund agreement with APHIS before each growing season;
- ❖ Government of the country in which the plants are produced or its designated representative is required to pay in advance all estimated costs that APHIS expects to incur through its involvement in overseeing the execution of this program;
 - ⇒ These costs will include administrative expenses incurred in conducting the services enumerated in this program and all salaries (including overtime and the Federal share of employee benefits), travel expenses (including per diem expenses), and other incidental expenses incurred by the inspectors in performing these services;
- ❖ Government of the country in which the plants are produced or its designated representative is required to deposit a certified or cashier's check with APHIS for the amount of the costs estimated by APHIS;
- ❖ If the deposit is **not** sufficient to meet all costs incurred by APHIS, then the agreement further requires the government of the country in which the plants are produced or its designated representative to deposit with APHIS a certified or cashier's check for the amount of the remaining costs, as determined by APHIS, before the services will be completed; and
- ❖ After a final audit at the conclusion of each shipping season, any overpayment of funds would be returned to the government of the country in which the plants are produced or its designated representative or held on account until needed.

See the list of [Approved Pelargonium Cuttings Facilities](#).

Pinus spp.

Imported *Pinus* spp. (pine) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from all countries **except** Canada; Korea, Republic of (South Korea); and **other than** 2- and 3-leaved *Pinus* from Japan.

Pinus spp. plants for planting (**except** seeds) are regulated for the following:

- ◆ *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB)
- ◆ *Cronartium flaccidum* rust causing serious stunting of pines

Continue to specific restrictions for *Pinus* spp. from Canada, *Pinus* spp. from Japan, *Pinus* spp. from Korea, Republic of (South Korea), and Postentry Quarantine.

Pinus spp. from Canada

Plants for planting (**except** seeds) of *Pinus* spp. from Canada may be imported into the United States **only** if meeting all other applicable requirements. *Pinus* spp. plants (**except** seeds) from Canada **must** be accompanied by an import permit issued by the APHIS PPQ.

Pinus spp. from Canada are regulated for the following:

- ◆ *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) from Canada that originated in a third country (see *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB))
 - ❖ *Pinus* spp. plants that were exported from Canada and **never** grown in a third country are **not** regulated for *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB)
- ◆ *Globodera rostochiensis* and *Globodera pallida* (potato cyst nematodes) (see *Potato Cyst Nematode (PCN) Host Material from Canada*)
- ◆ *Lymantria dispar* (gypsy moth) (see *Gypsy Moth Host Material from Canada*)

Pinus spp. from Japan

Pinus spp. two-leaved and three-leaved plants for planting (**except** seeds) from Japan are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#).

Pinus spp. **other than** two-leaved and three-leaved plants for planting from Japan **must** meet the requirements of [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#).

See [Table 3-7, Host Plants \(except seeds\) of Anoplophora chinensis \(CLB\) or Anoplophora glabripennis \(ALB\) from All Countries Other than Canada Where ALB and/or CLB Is Present](#) to determine if *Pinus* spp. **other than** two-leaved and three-leaved plants from Japan meet the conditions for entry.

Pinus spp. from Korea, Republic of (South Korea)

Pinus spp. (**except** seeds) from Korea, Republic of (South Korea) **must** meet the requirements of [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#).

See [Table 3-7, Host Plants \(except seeds\) of Anoplophora chinensis \(CLB\) or Anoplophora glabripennis \(ALB\) from All Countries Other than Canada Where ALB and/or CLB Is Present](#) to determine if *Pinus* spp. from Korea, Republic of (South Korea) meet the conditions for entry.

Two-leaved and three-leaved *Pinus* spp. plants (**except** seeds) from Korea, Republic of (South Korea) **must** enter [Postentry Quarantine](#).

Postentry Quarantine

When meeting all other conditions for entry, *Pinus* spp. **must** enter Postentry Quarantine from all countries **except** Canada and Korea, Republic of (South Korea). See [Postentry Quarantine Program](#) on page 5-1.

Poncirus spp.

All *Poncirus* spp. plants for planting (**except** seeds) for import into the United States from all countries are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) under [Rutaceae Family](#) to prevent the introduction of citrus canker disease (*Xanthomonas axonopodis* pv. *citri*) and other citrus diseases.

Poncirus spp. Seeds

Seeds of *Poncirus* spp. and all hybrids of *Poncirus* from Argentina, Bangladesh, Belize, Bhutan, Brazil, Burundi, Cambodia, Cameroon, Central African Republic, China, Comoros, Cuba, Dominican Republic, Ethiopia, Eritrea, Eswatini (Swaziland), India, Indonesia, Jamaica, Japan, Kenya, Lao People's Democratic Republic (Laos), Madagascar, Malawi, Malaysia, Mauritius, Mexico, Myanmar, Nepal, Pakistan, Papua New Guinea, Philippines, Réunion, Rwanda, Saint Helena, Saudi Arabia, Somalia, South Africa, Sri Lanka, Taiwan, Tanzania, Thailand, Timor-Leste, Vietnam, Yemen, and Zimbabwe are **not** authorized (prohibited) importation into the United States (U.S.) because of citrus variegated chlorosis (CVC).

Poncirus spp. seeds including all hybrids of this taxa from all countries **except** those listed above may be imported into the U.S. **only** if accompanied by the required phytosanitary certificate with an additional declaration that citrus variegated chlorosis (CVC) is **not** known to occur in the country where the seed was produced.

Continue to [Table 3-19, Poncirus spp. Seeds of Rutaceae Family](#).

Specific Restrictions

Poncirus spp.

Table 3-19 *Poncirus* spp. Seeds of Rutaceae Family

If the seeds are:	And the country of origin is:	And:	Then:
<ul style="list-style-type: none"> ◆ <i>Poncirus</i> spp. ◆ Hybrids of <i>Poncirus</i> spp. 	Argentina, Bangladesh, Belize, Bhutan, Brazil, Burundi, Cambodia, Cameroon, Central African Republic, China, Comoros, Cuba, Dominican Republic, Ethiopia, Eritrea, Eswatini (Swaziland), India, Indonesia, Jamaica, Japan, Kenya, Lao People’s Democratic Republic (Laos), Madagascar, Malawi, Malaysia, Mauritius, Mexico, Myanmar, Nepal, Pakistan, Papua New Guinea, Philippines, Réunion, Rwanda, Saint Helena, Saudi Arabia, Somalia, South Africa, Sri Lanka, Taiwan, Tanzania, Thailand, Timor-Leste, Vietnam, Yemen, Zimbabwe		Not Authorized Pending Pest Risk Analysis (NAPPRA); PROHIBIT ENTRY
	Afghanistan, Andaman Islands, Cambodia, Caroline Islands, Congo (Democratic Republic of the), Cote d'Ivoire, Fiji Islands, Home Island in Cocos (Keeling Islands), Hong Kong, Korea, Democratic People’s Republic of (North Korea); Korea, Republic of (South Korea); Mozambique, Oman, Rodrigues Island, Seychelles, Thursday Island, United Arab Emirates	Is accompanied by a phytosanitary certificate with an additional declaration that citrus variegated chlorosis (CVC) is not known to occur in the country where the seed was produced	1. REQUIRE treatment T203-p for citrus canker 2. INSPECT and RELEASE
	Other than listed in the cells above	Lacks the requirements above	Not Authorized Pending Pest Risk Analysis (NAPPRA); PROHIBIT ENTRY
		Is accompanied by a phytosanitary certificate with an additional declaration that citrus variegated chlorosis (CVC) is not known to occur in the country where the seed was produced	INSPECT and RELEASE
Other than listed in the cells above	Lacks the requirements above	Not Authorized Pending Pest Risk Analysis (NAPPRA); PROHIBIT ENTRY	

Prunus spp.

Imported *Prunus* spp. (almond, apricot, cherry, cherry laurel, English laurel, nectarine, peach, plum, prune) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from all countries **except** Canada and the Netherlands.

Prunus spp. plants for planting (**except** seeds) are regulated for the following:

- ◆ *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB)
- ◆ *Phytophthora ramorum* (sudden oak death)
- ◆ Plum Pox (=Sharka) Potyvirus
- ◆ Other injurious plant pathogens:
 - ❖ Apricot pseudo-chlorotic leaf spot trichovirus
 - ❖ Arabis mosaic nepovirus and its strains
 - ❖ Cherry leaf roll nepovirus (Elm mosaic virus, golden elderberry virus)
 - ❖ European cherry rusty mottle virus
 - ❖ European stone fruit yellows phytoplasma (apricot chlorotic leaf roll agent)
 - ❖ *Monilinia fructigena* (brown rot of fruit)
 - ❖ *Monilinia polystroma*
 - ❖ Plum bark split trichovirus
 - ❖ Raspberry ringspot nepovirus (European cherry rasp leaf) and its strains
 - ❖ Tomato blackring nepovirus (Myrobalan latent ringspot, peach shoot stunting) and its strains
 - ❖ Strawberry latent ringspot sadwavirus (Peach willow leaf rosette, Court noue) and its strains
 - ❖ *Valsa mali* (Branch canker fungus)

Some *Prunus* spp. are regulated as protected plants:

- ◆ CITES (*Prunus africana*)
- ◆ Endangered Species Act (ESA) (*Prunus geniculata*)

Prunus from the Netherlands

When meeting all import requirements above, all *Prunus* spp. plants (**except** seeds) from the Netherlands are subject to postentry quarantine and are subject to sampling requirements. See [Seasonal Sampling of Malus and Prunus](#) on page 3-16.

Plum Pox (=Sharka) Potyvirus

Prunus spp. plants including seeds are regulated for plum pox (Sharka) potyvirus.

Prunus spp. Not Susceptible to Plum Pox (Sharka) Potyvirus

Prunus spp. plants including seeds that are **not** susceptible to plum pox (Sharka) potyvirus:

- ◆ *Prunus avium*
- ◆ *Prunus cerasus*
- ◆ *Prunus effusa*
- ◆ *Prunus laurocerasus*
- ◆ *Prunus mahaleb*
- ◆ *Prunus padus*
- ◆ *Prunus sargentii*
- ◆ *Prunus serotina*
- ◆ *Prunus serrula*
- ◆ *Prunus serrulata*
- ◆ *Prunus subhirtella*
- ◆ *Prunus yedoensis*
- ◆ *Prunus virginiana*

Continue to specific restrictions for [Prunus spp. from Canada Not Susceptible to Plum Pox Potyvirus](#) and [Prunus spp. from Netherlands Not Susceptible to Plum Pox Potyvirus](#).

Prunus spp. from Canada Not Susceptible to Plum Pox Potyvirus

Plants for planting (**except** seeds) of *Prunus* spp. (almond, apricot, cherry, cherry laurel, English laurel, nectarine, peach, plum, prune) from Canada that are **not** susceptible to plum pox (=Sharka) potyvirus³ at the time of arriving at the first port of entry in the United States, **must** meet the following:

1. *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) (see Table 3-4).
2. **Must** be accompanied by a phytosanitary certificate that contains either of the following:
 - ❖ Additional declaration that the plants were grown in a nursery in Canada and the plants were found by the national plant protection organization of [country in which it was grown] to be free of the following injurious plant pathogens:
 - ⇒ Apricot pseudo-chlorotic leaf spot trichovirus
 - ⇒ Arabis mosaic nepovirus and its strains
 - ⇒ Cherry leaf roll nepovirus (Elm mosaic virus, golden elderberry virus)
 - ⇒ European cherry rusty mottle virus
 - ⇒ European stone fruit yellows phytoplasma (apricot chlorotic leaf roll agent)
 - ⇒ *Monilinia fructigena* (brown rot of fruit)
 - ⇒ *Monilinia polystroma*
 - ⇒ Plum bark split trichovirus
 - ⇒ Raspberry ringspot nepovirus (European cherry rasp leaf) and its strains
 - ⇒ Tomato blackring nepovirus (Myrobalan latent ringspot, peach shoot stunting) and its strains
 - ⇒ Strawberry latent ringspot sadwavirus (Peach willow leaf rosette, Court noue) and its strains
 - ⇒ *Valsa mali* (Branch canker fungus)

The determination by the national plant protection organization that the plants are free of these pathogens will be based on visual examination and **indexing** of the parent stock of the plants and inspection of the nursery where the restricted plants are grown to determine that the

3 *Prunus avium*, *P. cerasus*, *P. effusa*, *P. laurocerasus*, *P. mahaleb*, *P. padus*, *P. sargentii*, *P. serotina*, *P. serrula*, *P. serrulata*, *P. subhirtella*, *P. yedoensis*, and *P. virginiana* are **not** susceptible to Sharka (Plum Pox) Potyvirus.

nursery is free of the specified pathogens.

or

- ❖ If any of the pathogens (injurious plant pests) listed above **do not** occur in Canada, then an additional declaration that the pathogen(s) *[list pathogen(s)]* **does not** or **do not** occur in *[country in which the plants were grown]* may be used in lieu of visual examination and [indexing](#) of the parent stock.

The [indexing](#) procedures authorized by APHIS for *Prunus* spp. are mechanical transmission of the pest to an indicator plant, graft transmission of the pest to an indicator plant, serology, and electron microscopy.

3. If *Prunus laurocerasus*, then see [Table 3-11](#).
4. If the plant contains **more than** one plant part from a different taxon (e.g., budded or grafted) and is from Canada, then see [Prunus spp. Not Susceptible to Plum Pox Potyvirus With a Plant Part from a Different Taxon and from Canada](#).

See [Plants for Planting from Canada That Require a Permit](#) on page 4-7 for more information.

Prunus spp. Not Susceptible to Plum Pox Potyvirus With a Plant Part from a Different Taxon and from Canada

If *Prunus* spp. plants for planting (**except** seeds) from Canada **not** susceptible to plum pox potyvirus (PPV) that contains **more than** one plant part (e.g., grafted or budded) and the interstem, rootstock, scion or any other part of the finished plant belongs to a different regulated taxon, then the additional declaration (A.D.) **must** be as follows:

- ◆ Be accompanied by a phytosanitary certificate with an additional declaration (A.D.) that includes:
 - ❖ List of all plant parts of regulated taxa that have been incorporated into the finished plant;
 - ❖ Scientific names of the regulated plant taxa that have been incorporated into the finished plant; and
- ◆ Plants **must** meet the entry requirements for each taxa listed

EXAMPLE An imported plant uses *Prunus cerasus* as its rootstock and *Prunus avium* as the scion. The phytosanitary certificate **must** list both *Prunus cerasus* and *Prunus avium* and **must** include the required additional declarations for both plants.

Prunus spp. from Netherlands Not Susceptible to Plum Pox Potyvirus

Plants for planting (**except** seeds) of *Prunus* spp. from the Netherlands that are **not** susceptible to plum pox potyvirus⁴ at the time of arrival at the first port of entry in the United States, **must** meet the following requirements:

1. *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) (see Table 3-7) conditions for entry.
2. Be accompanied by a phytosanitary certificate that contains **either** of the following:
 - ❖ Additional declaration that the plants were grown in a nursery in the Netherlands and the plants were found by the national plant protection organization of [country in which it was grown] to be free of the following injurious plant pathogens:
 - ⇒ Apricot pseudo-chlorotic leaf spot trichovirus
 - ⇒ Arabis mosaic nepovirus and its strains
 - ⇒ Cherry leaf roll nepovirus (Elm mosaic virus, golden elderberry virus)
 - ⇒ European cherry rusty mottle virus
 - ⇒ European stone fruit yellows phytoplasma (apricot chlorotic leaf roll agent)
 - ⇒ *Monilinia fructigena* (brown rot of fruit)
 - ⇒ *Monilinia polystroma*
 - ⇒ Plum bark split trichovirus
 - ⇒ Raspberry ringspot nepovirus (European cherry rasp leaf) and its strains
 - ⇒ Tomato blackring nepovirus (Myrobalan latent ringspot, peach shoot stunting) and its strains
 - ⇒ Strawberry latent ringspot sadwavirus (Peach willow leaf rosette, Court noue) and its strains
 - ⇒ *Valsa mali* (Branch canker fungus)

The determination by the national plant protection organization (NPPO) that the plants are free of these pathogens will be based on visual examination and **indexing** of the parent stock of the plants and inspection of the nursery where the restricted plants are grown to determine that the nursery is free of the specified pathogens.

4 *Prunus avium*, *P. cerasus*, *P. effusa*, *P. laurocerasus*, *P. mahaleb*, *P. padus*, *P. sargentii*, *P. serotina*, *P. serrula*, *P. serrulata*, *P. subhirtella*, *P. yedoensis*, and *P. virginiana* are **not** susceptible to Sharka (Plum Pox) Potyvirus.

or

- ❖ If any of the pathogens (injurious plant pests) listed above **do not** occur in the Netherlands, then an additional declaration that the pathogen(s) [*list pathogen(s)*] **does not** or **do not** occur in [*country in which the plants were grown*] may be used in lieu of visual examination and [indexing](#) of the parent stock.

Indexing procedures authorized by APHIS for *Prunus* spp. include mechanical transmission of the pest to an indicator plant, graft transmission of the pest to an indicator plant, serology, and electron microscopy.

3. If *Prunus laurocerasus*, then meet [Phytophthora ramorum \(sudden oak death\)](#) requirements; see [Table 3-11](#).
4. If the plant contains **more than** one plant part from a different taxon (e.g., budded or grafted) and is from Canada, then see [Prunus spp. Not Susceptible to Plum Pox Potyvirus With a Plant Part from a Different Taxon and from Canada](#).

Prunus spp. Not Susceptible to Plum Pox Potyvirus With a Plant Part from a Different Taxon and from the Netherlands

If *Prunus* spp. plants for planting (**except** seeds) **not** susceptible to plum pox potyvirus⁵ from the Netherlands and contain **more than** one plant part (e.g., grafted or budded) and the interstem, rootstock, scion or any other part of the finished plant belongs to a different regulated taxon, then **must** be as follows:

- ◆ Be accompanied by a phytosanitary certificate with an additional declaration (A.D.) that includes:
 - ❖ List of all plant parts of regulated taxa that have been incorporated into the finished plant; and
 - ❖ Scientific names of the regulated plant taxa that have been incorporated into the finished plant.

Plants **must** meet the entry requirements for each taxa listed.

EXAMPLE An imported plant uses *Prunus cerasus* as its rootstock and *Prunus avium* as the scion. The phytosanitary certificate **must** list both *Prunus cerasus* and *Prunus avium* and **must** include the required additional declarations for both plants.

5 *Prunus avium*, *P. cerasus*, *P. effusa*, *P. laurocerasus*, *P. mahaleb*, *P. padus*, *P. sargentii*, *P. serotina*, *P. serrula*, *P. serrulata*, *P. subhirtella*, *P. yedoensis*, and *P. virginiana* are **not** susceptible to Sharka (Plum Pox) Potyvirus

Prunus spp. from Canada Susceptible to Plum Pox (Sharka) Potyvirus

Prunus spp. plants for planting (**except** seeds) from Canada that are susceptible to plum pox (Sharka) potyvirus (*Prunus* **other than** those that are **not** susceptible⁶) **must** meet all of the following requirements:

1. *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) conditions for entry (see Table 3-4).
2. Be accompanied by a phytosanitary certificate that contains the following additional declarations:
 - ❖ Additional declaration that the plants were grown in a nursery in Canada, that the plants were found by the national plant protection organization of Canada to be free of the following injurious plant pathogens:
 - ⇒ Apricot pseudo chlorotic leaf spot trichovirus
 - ⇒ Arabis mosaic nepovirus and its strains
 - ⇒ Cherry leaf roll nepovirus (Elm mosaic virus, golden elderberry virus)
 - ⇒ European cherry rusty mottle virus
 - ⇒ European stone fruit yellows phytoplasma (apricot chlorotic leaf roll agent)
 - ⇒ *Monilinia fructigena* (brown rot of fruit)
 - ⇒ *Monilinia polystroma*
 - ⇒ Plum bark split trichovirus
 - ⇒ Plum pox (Sharka) potyvirus and its strains
 - ⇒ Raspberry ringspot nepovirus (European cherry rasp leaf) and its strains
 - ⇒ Tomato blackring nepovirus (Myrobalan latent ringspot, peach shoot stunting) and its strains
 - ⇒ Strawberry latent ringspot sadwavivirus (peach willow leaf rosette, Court noue) and its strains
 - ⇒ *Valsa mali* (Branch canker fungus); and
 - ❖ Additional declaration that the plants were grown in an area that has been surveyed and found free of plum pox (=Sharka) potyvirus according to a surveying protocol mutually agreed upon by APHIS and the national plant protection organization of Canada.

6 *Prunus* spp. that are **not** susceptible to plum pox potyvirus: *Prunus avium*, *P. cerasus*, *P. effusa*, *P. laurocerasus*, *P. mahaleb*, *P. padus*, *P. sargentii*, *P. serotina*, *P. serrula*, *P. serrulata*, *P. subhirtella*, *P. yedoensis*, and *P. virginiana*.

The determination by the national plant protection organization of Canada that the plants are free of these pathogens will be based on visual examination and [indexing](#) of the parent stock of the plant and inspection of the nursery where the restricted plants are grown to determine that the nursery is free of the specified pathogens.

or

- ❖ Additional declaration by the national plant protection organization of Canada that a pathogen **does not** occur in Canada may be used in lieu of visual examination and [indexing](#) of the parent stock for that pathogen and inspection of the nursery.

Indexing procedures authorized by APHIS for *Prunus* spp. include mechanical transmission of the pest to an indicator plant, graft transmission of the pest to an indicator plant, serology, and electron microscopy.

3. *Prunus* spp. plants for planting from Canada require an import permit.

Prunus spp. from Canada With a Plant Part from a Third Country

If any part of the *Prunus* spp. plant is from Canada, but was first imported into Canada from the Netherlands, then that plant **must** meet the entry requirements as if the plant had been directly imported into the United States from the Netherlands. See [Prunus spp. from the Netherlands Susceptible to Plum Pox \(Sharka\) Potyvirus](#) and [Prunus spp. from Netherlands Not Susceptible to Plum Pox Potyvirus](#).

EXAMPLE If a plant part from another country (Netherlands) is grafted onto a *Prunus* plant from Canada, then the entire plant **must** meet the import requirements of the other country (Netherlands).

Prunus spp. imported into Canada from a third country **other than** the Netherlands is **prohibited** entry into the U.S.

Prunus spp. from the Netherlands Susceptible to Plum Pox (Sharka) Potyvirus

Prunus spp. plant parts (**except** budwood and seeds) of Plum Pox Potyvirus (PPV) susceptible species from the Netherlands are prohibited entry.

Only budwood of *Prunus* spp. susceptible to plum pox potyvirus (PPV) from the Netherlands meeting all requirements may enter the U.S.

Budwood of *Prunus* spp. from the Netherlands that are susceptible to plum pox (Sharka) potyvirus (*Prunus* **other than** those **not** susceptible to plum pox potyvirus⁷) and grown in the Netherlands **must** be as follows:

1. Meet [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#) conditions for entry; see [Table 3-4](#).
2. Be imported into the United States **only** if accompanied by a phytosanitary certificate with the following:
 - ❖ Additional declaration that the original parent stock (nuclear stock) was grown in a nursery in the Netherlands and the plants were found by the national plant protection organization of the Netherlands to be free of the following pathogens by the appropriate national fruit tree certification program:
 - ⇒ Apricot pseudo-chlorotic leaf spot trichovirus
 - ⇒ Arabis mosaic nepovirus and its strains
 - ⇒ Cherry leaf roll nepovirus (Elm mosaic virus, golden elderberry virus)
 - ⇒ European cherry rusty mottle virus
 - ⇒ European stone fruit yellows phytoplasma (apricot chlorotic leaf roll agent)
 - ⇒ *Monilinia fructigena* (brown rot of fruit)
 - ⇒ *Monilinia polystroma*
 - ⇒ Plum bark split trichovirus
 - ⇒ Plum pox (Sharka) potyvirus and its strains
 - ⇒ Raspberry ringspot nepovirus (European cherry rasp leaf) and its strains
 - ⇒ Tomato blackring nepovirus (Myrobalan latent ringspot, peach shoot stunting) and its strains

⁷ *Prunus* that are **not** susceptible to plum pox potyvirus: *Prunus avium*, *Prunus cerasus*, *Prunus effusa*, *Prunus laurocerasus*, *Prunus mahaleb*, *Prunus padus*, *Prunus sargentii*, *Prunus serotina*, *Prunus serrula*, *Prunus serrulata*, *Prunus subhirtella*, *Prunus yedoensis*, and *Prunus virginiana*.

Specific Restrictions

Prunus spp.

⇒ Strawberry latent ringspot sadwavirus (Peach willow leaf rosette, Court noue) and its strains

⇒ *Valsa mali* (Branch canker fungus)

The **original** parent stock from which the budwood is taken **must** be produced within a secure, enclosed, APHIS-approved pest-exclusionary facility within a national plant protection organization operated or approved nuclear stock program where the parent stock is maintained in a pathogen-free state. See the list of [Approved Plum Pox Susceptible Prunus spp. Facilities](#).

The determination by the national plant protection organization that the plants are free of these pathogens will be based on visual examination and [indexing](#) of the parent stock of the plants and inspection of the nursery where the restricted plants are grown to determine that the nursery is free of the specified pathogens.

The [indexing](#) procedures authorized by APHIS for *Prunus* spp. are electron microscopy, graft transmission of the pest to an indicator plant, mechanical transmission of the pest to an indicator plant, and serology.

3. If *Prunus lusitanica*, then **must** meet [Phytophthora ramorum \(sudden oak death\)](#) requirements; see [Table 3-11](#).

Continue to [Table 3-20, Prunus spp. Plants \(except Seeds\)](#) and the list of [Approved Plum Pox Susceptible Prunus Facilities](#).

Table 3-20 *Prunus* spp. Plants (except Seeds)

If <i>Prunus</i> spp.	And country of origin is:	And:	Then:
Is not susceptible to plum pox virus ◆ <i>Prunus avium</i> ◆ <i>Prunus cerasus</i> ◆ <i>Prunus effusa</i> ◆ <i>Prunus laurocerasus</i> ◆ <i>Prunus mahaleb</i> ◆ <i>Prunus padus</i> ◆ <i>Prunus sargentii</i> ◆ <i>Prunus serotina</i> ◆ <i>Prunus serrula</i> ◆ <i>Prunus serrulata</i> ◆ <i>Prunus subhirtella</i> ◆ <i>Prunus yedoensis</i> ◆ <i>Prunus virginiana</i>	Canada	Is accompanied by a phytosanitary certificate with the additional declarations (see Prunus spp. from Canada Not Susceptible to Plum Pox Potyvirus)	INSPECT and RELEASE
		Lacks the phytosanitary certificate or additional declarations	Is not authorized; PROHIBIT ENTRY
	Netherlands	Is accompanied by a phytosanitary certificate with the additional declarations (see Prunus spp. from Netherlands Not Susceptible to Plum Pox Potyvirus)	SEE Table 3-8 to regulate for ALB/CLB
		Lacks the phytosanitary certificate or additional declarations	Is not authorized; PROHIBIT ENTRY
Is susceptible to plum pox virus (<i>Prunus</i> spp. other than listed above)	Canada	—————▶	SEE Prunus spp. from Canada Susceptible to Plum Pox (Sharka) Potyvirus
	Netherlands	Is budwood ¹	SEE Prunus spp. from the Netherlands Susceptible to Plum Pox (Sharka) Potyvirus and the list of Approved Plum Pox Susceptible Prunus spp. Facilities
		Is other than budwood	Is not authorized; PROHIBIT ENTRY
	Other than from Canada or Netherlands	—————▶	Is not authorized; PROHIBIT ENTRY

1 Budwood is short lengths of young branches with buds prepared for grafting onto the rootstock of another plant.

APHIS Approved Plum Pox Susceptible *Prunus* spp. Facilities

Prunus spp. plants for planting that are susceptible to plum pox virus and exported from APHIS approved facilities authorized to export *Prunus* spp. susceptible to plum pox **must** meet all the requirements and restrictions for *Prunus* spp.

Prunus spp. from Canada **must** be accompanied by *PPQ Form 587, Permit to Import Plants and Plant Products*.

Prunus spp. from the Netherlands **must** be exported from an APHIS approved facility and **must** be accompanied by *PPQ Form 587, Permit to Import Plants and Plant Products*.

Prunus spp. from Belgium, France, Germany, and Great Britain (England, Scotland, and Wales) **must** be from an APHIS approved facility and be accompanied by a *PPQ Form 588, Controlled Import Permit*.

See the list of APHIS [Approved Plum Pox Susceptible *Prunus* spp. Facilities](#).

Prunus spp. Seeds

Prunus spp. seeds are regulated to prevent the entry of plum pox (=Sharka) potyvirus.

Prunus spp. Seeds Susceptible to Plum Pox Potyvirus

The importation of seeds of *Prunus* spp. that are susceptible to plum pox potyvirus are [Not Authorized Pending Pest Risk Analysis \(NAPPPRA\)](#) from the countries of Argentina, Chile, Cyprus, Japan, Syria, and Turkey. This restriction applies to all *Prunus* seeds **other than** those listed in [Table 3-21, Prunus spp. Seeds Not Susceptible to Plum Pox \(Sharka\) Potyvirus](#).

Seeds of Plum Pox Susceptible *Prunus* spp. from Canada

Seeds of susceptible plum pox potyvirus *Prunus* spp. from Canada at the time of arrival at the port of first arrival **must** be accompanied by a phytosanitary certificate containing **both** of the following additional declarations:

- ◆ Seeds are from parent stock grown in a nursery in Canada, that is free of plum pox (=Sharka) potyvirus; and
- ◆ Seeds have been found by the national plant protection organization of the country in which they are produced to be free of plum pox (=Sharka) potyvirus based on the testing of parent stock by visual examination and indexing.

Seeds of Plum Pox Potyvirus Susceptible *Prunus* spp. from Europe

Seeds of plum pox potyvirus susceptible *Prunus* spp. from Europe are **prohibited** from Albania, Andorra, Armenia, Austria, Azerbaijan, Azores, Belarus, Bosnia and Herzegovina, Bulgaria, Channel Islands, Croatia, Cypress, Czechia (Czech Republic), Denmark, England, Estonia, Finland, France, Germany, Georgia, Greece, Guernsey, Hebrides, Hungary, Iceland, Ireland, Isle of Man, Isle of Wight, Isles of Scilly, Italy, Jersey, Kosovo, Latvia, Liechtenstein, Lithuania, Lundy Island, Luxembourg, Macedonia, Malta, Moldova, Monaco, Montenegro, Netherlands, Northern Ireland, Norway, Orkney and Shetlands Islands, Poland, Portugal, Romania, Russia (European portion), San Marino, Scotland, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Syria, Turkey, Ukraine, United Kingdom (England, Northern Ireland, Scotland, Wales), Vatican City, and Wales (all countries in Europe and islands in the Mediterranean Sea **except** Belgium, France, Germany, Great Britain (England, Scotland, Wales), Netherlands). See [Seeds of Plum Pox Potyvirus Susceptible Prunus spp. from Belgium, France, Germany, Great Britain, and the Netherlands](#).

Seeds of Plum Pox Potyvirus Susceptible *Prunus* spp. from Belgium, France, Germany, Great Britain, and the Netherlands

Seeds of susceptible plum pox potyvirus *Prunus* spp. from Belgium, France, Germany, Great Britain (England, Scotland, Wales), or the Netherlands at the time of arriving at the port of first arrival **must** be accompanied by a phytosanitary certificate containing **both** of the following accurate additional declarations:

- ◆ Seeds are from parent stock grown in a nursery in Belgium, France, Germany, Great Britain, or Netherlands that is free of plum pox (=Sharka) potyvirus; and
- ◆ Seeds have been found by the national plant protection organization of the country in which they are produced to be free of plum pox (=Sharka) potyvirus based on the testing of parent stock by visual examination and indexing.

Indexing procedures authorized by APHIS for *Prunus* spp. include mechanical transmission of the pest to an indicator plant, graft transmission of the pest to an indicator plant, serology, and electron microscopy.

Seeds of Plum Pox Susceptible *Prunus* spp. from All Countries Other than Argentina, Canada, Chile, Cyprus, Europe, Japan, Syria, and Turkey

Seeds of *Prunus* spp. susceptible to plum pox and from all countries **other than** Argentina, Canada, Chile, Cyprus, Europe (Albania, Andorra, Armenia, Austria, Azerbaijan, Belgium, Belarus, Bosnia and Herzegovina, Bulgaria, Croatia, Czechia (Czech Republic), Denmark, England, Estonia, Finland, France, Germany, Georgia, Greece, Hungary, Iceland, Ireland, Italy, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malta, Moldova, Monaco, Montenegro, Netherlands, Northern Ireland, Norway, Poland, Portugal, Romania, Russia (European part), San Marino, Scotland, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey (European part), Ukraine, Vatican City, Wales), Japan, Syria, and Turkey **must** at the time of arrival at the first port of arrival, be accompanied by a phytosanitary certificate containing an accurate additional declaration that plum pox (=Sharka) potyvirus **does not** occur in the country in which the seeds were produced.

Continue to [Table 3-22](#) to regulate *Prunus* spp. seeds.

Prunus spp. Seeds Not Susceptible to Plum Pox (Sharka) Potyvirus

Seeds of *Prunus* spp. that are **not** susceptible to plum pox (=Sharka) potyvirus may be imported into the United States from all countries. See [Table 3-21](#).

Table 3-21 Prunus spp. Seeds Not Susceptible to Plum Pox (Sharka) Potyvirus

Seeds of Prunus Not Susceptible to Plum Pox Potyvirus	
<i>Prunus avium</i>	<i>Prunus serotina</i>
<i>Prunus cerasus</i>	<i>Prunus serrula</i>
<i>Prunus effusa</i>	<i>Prunus serrulata</i>
<i>Prunus laurocerasus</i>	<i>Prunus subhirtella</i>
<i>Prunus mahaleb</i>	<i>Prunus yedoensis</i>
<i>Prunus padus</i>	<i>Prunus virginiana</i>
<i>Prunus sargentii</i>	

Continue to [Table 3-22, Prunus spp. Seeds Only](#).

Specific Restrictions

Prunus spp. Seeds

Table 3-22 Prunus spp. Seeds Only

If <i>Prunus</i> spp. Seeds:	And the country of origin is:	And the shipment:	Then:
Are not susceptible to plum pox virus ◆ <i>Prunus avium</i> ◆ <i>Prunus cerasus</i> ◆ <i>Prunus effusa</i> ◆ <i>Prunus laurocerasus</i> ◆ <i>Prunus mahaleb</i> ◆ <i>Prunus padus</i> ◆ <i>Prunus sargentii</i> ◆ <i>Prunus serotina</i> ◆ <i>Prunus serrula</i> ◆ <i>Prunus serrulata</i> ◆ <i>Prunus subhirtella</i> ◆ <i>Prunus yedoensis</i> ◆ <i>Prunus virginiana</i>			INSPECT and RELEASE
Are susceptible to plum pox virus (<i>Prunus</i> other than listed above)	Belgium, Canada, England, France, Germany, Netherlands, Scotland, Wales	Is accompanied by a phytosanitary certificate with both of the following additional declarations: ◆ Seeds are from parent stock grown in a nursery in [<i>list country</i>] that is free of plum pox (=Sharka) potyvirus ◆ Seeds have been found by the national plant protection organization of the country in which they were produced to be free of plum pox potyvirus based on the testing of parent stock by visual examination and indexing	INSPECT and RELEASE
		Lacks the required additional declarations above	PROHIBIT ENTRY
	Country in Europe other than listed above		PROHIBIT ENTRY
	Argentina, Chile, Cyprus, Japan, Syria, or Turkey		PROHIBIT ENTRY
	Country other than listed in cells above	Is accompanied by a phytosanitary certificate with an additional declaration that plum pox potyvirus does not occur in the country in which the seeds were produced	INSPECT and RELEASE
		Lacks the additional declaration	PROHIBIT ENTRY

Pyrus spp.

Pyrus spp. (pear) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from all countries **except** Canada.

Pyrus spp. is regulated for the following:

- ◆ *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB)
- ◆ Injurious plant pathogens as follows:
 - ❖ Apricot pseudo-chlorotic leaf spot trichovirus
 - ❖ *Guignardia piricola* (leaf, branch and fruit disease)
 - ❖ *Monilinia fructigena* (brown rot of fruit)
 - ❖ *Monilinia polystroma*
 - ❖ Pear blister canker apscaviroid
 - ❖ Pear bud drop virus
 - ❖ Quince sooty ringspot agent
 - ❖ Quince stunt agent
 - ❖ Quince yellow blotch agent (pear yellow blotch agent, apple rubbery wood phytoplasma)

Pyrus spp. from Canada

When from Canada, *Pyrus* spp. (pear) plants for planting (**except** seeds) **must** meet the following requirements:

1. *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) conditions (see Table 3-4).
2. Be accompanied by an additional declaration that the plants were grown in a nursery in Canada, and the plants were found by the national plant protection organization of Canada to be free of the following injurious plant pathogens listed below:
 - ❖ Apricot pseudo-chlorotic leaf spot trichovirus
 - ❖ *Guignardia piricola* (leaf, branch and fruit disease)
 - ❖ *Monilinia fructigena* (brown rot of fruit)
 - ❖ *Monilinia polystroma*
 - ❖ Pear blister canker apscaviroid
 - ❖ Pear bud drop virus
 - ❖ Quince sooty ringspot agent
 - ❖ Quince stunt agent

- ❖ Quince yellow blotch agent (pear yellow blotch agent, apple rubbery wood phytoplasma)

The determination by the national plant protection organization that the plants are free of these pathogens will be based on visual examination and [indexing](#) of the parent stock of the plants and inspection of the nursery where the restricted plants are grown, to determine that the nursery is free of the specified pathogens.

or

If any of the pathogens (injurious plant pests) listed above **do not** occur in Canada, then an additional declaration that the pathogen(s) [*List pathogen(s)*] **does not** or **do not** occur in Canada may be used in lieu of visual examination and indexing of the parent stock.

The [indexing](#) procedures authorized by APHIS for *Pyrus* spp. are graft transmission of the pest to an indicator plant for *Pyrus*, serology, and nucleic acid probes.

See [Plants for Planting from Canada That Require a Permit](#) on page 4-7 for more information.

***Pyrus* spp. With a Plant Part from a Different Taxon**

If *Pyrus* spp. (pear) plants for planting contain **more than** one plant part (e.g., grafted or budded) and the interstem, rootstock, scion or any other part of the finished plant belongs to a different regulated taxon, then **must** be as follows:

- ◆ Be accompanied by a phytosanitary certificate with an additional declaration (A.D.) that includes:
 - ❖ List of all plant parts of regulated taxa that have been incorporated into the finished plant;
 - ❖ Scientific names of the regulated plant taxa that have been incorporated into the finished plant; and
- ◆ Plants **must** meet the entry requirements for each taxa listed.

EXAMPLE An imported plant uses *Cydonia* spp. as its rootstock and *Pyrus* spp. as the scion. The phytosanitary certificate **must** list both *Cydonia* and *Pyrus* and **must** include the required additional declarations for both *Cydonia* spp. and *Pyrus* spp.

Quercus spp.

Imported *Quercus* spp. (oak) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from all countries **except** Canada.

Quercus spp. plants for planting (**except** seeds) are regulated for the following:

- ◆ [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#)
- ◆ Gall-forming rust
- ◆ *Stereum hiugense* (white rot)

Quercus acuta, *Quercus agrifolia*, *Quercus cerris*, *Quercus chrysolepsis*, *Quercus falcata*, *Quercus ilex*, *Quercus kelloggii*, *Quercus parvula* var. *shrevei*, *Quercus petraea*, and *Quercus rubra* plants for planting (**except** seeds) are regulated for the following:

- ◆ [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#)
- ◆ Gall-forming rust
- ◆ [Phytophthora ramorum](#) (sudden oak death)
- ◆ *Stereum hiugense* (white rot)

Continue to specific requirements for [Quercus spp. from Canada](#) and [Quercus spp. Seeds](#).

Quercus spp. from Canada

Quercus spp. plants (**except** seeds) from Canada are regulated for [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#). See [Table 3-4, Host Plants \(except seeds\) of Anoplophora chinensis \(CLB\) or Anoplophora glabripennis \(ALB\) from Canada](#) to determine if *Quercus* spp. from Canada meet the conditions for entry.

When **not** meeting the ALB/CLB Federal Order conditions for entry, *Quercus* spp. plants for planting (**except** seeds) are prohibited entry.

Specific Restrictions

Quercus spp.

Quercus spp. Seeds

Quercus spp. seeds are regulated for the following plant pests:

- ◆ *Curculio elephas*
- ◆ *Curculio nucum*
- ◆ *Cydia splendana*
- ◆ *Pammene fusciana*
- ◆ Other insect pests of chestnut and acorn

Quercus spp. seeds require treatment T203-e or T203-e-1 from all countries **except** Canada and Mexico.

Rosa spp.

Rosa spp. plants for planting (**except** seeds) imported from Canada are regulated to prevent the entry of *Anthonomus rubi* (strawberry blossom weevil), per [Federal Order Effective September 14, 2021](#). Continue to [Rosa spp. from Canada](#) below.

Rosa spp. from Canada

Rosa spp. plants imported from **other than** the [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP\)](#) and the [Canadian Nursery Certification Program \(CNCP\)](#) from Canada **must** be accompanied by a phytosanitary certificate with an additional declaration certifying that the plants in the shipment fulfill the following requirements prior to importation into the United States and territories:

The plants have been produced and certified by the National Plant Protection Organization (NPPO) of Canada as a pest-free place of production or a pest free production site for the strawberry blossom weevil (*Anthonomus rubi*) following the requirements of the International Standards for Phytosanitary Measures-10. The shipment has been inspected and found to be free of the strawberry blossom weevil (*Anthonomus rubi*).

Rosa spp. plants for planting shipments imported from Canada, that arrive into the United States without the required phytosanitary certificate and additional declaration will be refused entry. [Federal Order Effective September 14, 2021](#)

For *Rosa* spp. plants imported under the [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP\)](#), see [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP Revised 2016\)](#) on page 4-10 or [U.S./Canada Greenhouse-Grown Plant Certification Program \(Legacy GCP\)](#) on page 4-16.

For *Rosa* spp. plants imported under the [Canadian Nursery Certification Program \(CNCP\)](#), see [United States-Canada Nursery Certification Program \(NCP\)](#) on page 4-20.

Rubus spp.

Imported *Rubus* spp. (caneberry, blackberry, raspberry) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from all countries **except** Canada and the United Kingdom (England, Northern Ireland, Scotland, Wales).

Rubus spp. is regulated for the following:

- ◆ [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#)
- ◆ *Rubus* stunt agent
- ◆ *Anthonomus rubi* (strawberry blossom weevil)

Continue to [Rubus spp. from Canada](#) and [Rubus spp. from United Kingdom](#).

Rubus spp. from Canada

Rubus spp. (**except** seeds) from Canada **must** meet the following requirements:

1. [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#). See [Table 3-4, Host Plants \(except seeds\) of Anoplophora chinensis \(CLB\) or Anoplophora glabripennis \(ALB\) from Canada](#) to determine if meets conditions for entry.
2. *Rubus* stunt agent:

If accompanied by a phytosanitary certificate with an additional declaration stating that the plants were found by the national plant protection organization of Canada to be free of *Rubus* stunt phytoplasma (causal agent of *Rubus* stunt) based on visual examination and indexing of the imported plants or their parent stock, then postentry quarantine is **not** required.

Indexing procedures authorized by APHIS for *Rubus* stunt phytoplasma are:

- ❖ Graft transmission of the pest to an indicator host appropriate for *Rubus* stunt phytoplasma followed by visual monitoring of the indicator host for 12 months; OR
- ❖ Polymerase chain reaction (PCR) or quantitative PCR (Q-PCR) protocol; OR
- ❖ Another procedure approved by APHIS

If **not** accompanied by a phytosanitary certificate with the above additional declaration, then *Rubus* plants (**except** seeds) **must** enter postentry quarantine.

3. *Anthonomus rubi* (strawberry blossom weevil):

Plants imported from Canada **must** be accompanied by a phytosanitary certificate with an additional declaration certifying that the plants in the shipment fulfill the following requirements prior to importation into the United States and territories:

The plants have been produced and certified by the National Plant Protection Organization (NPPO) of Canada as a pest-free place of production or a pest free production site for the strawberry blossom weevil (*Anthonomus rubi*) following the requirements of the International Standards for Phytosanitary Measures-10. The shipment has been inspected and found to be free of the strawberry blossom weevil (*Anthonomus rubi*).

Rubus spp. plants for planting shipments imported from Canada that arrive into the United States without the required phytosanitary certificate and additional declaration will be refused entry. [Federal Order Effective September 14, 2021](#)

See [Plants for Planting from Canada That Require a Permit](#) on page 4-7 for more information and the individual plant taxon in the [Lists of Plants for Planting](#).

Rubus spp. from United Kingdom

Rubus spp. (**except** seeds) from the United Kingdom (England, Northern Ireland, Scotland, Wales) **must** meet the following:

1. [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#) restrictions per Federal Order effective May 20, 2013. If **not** meeting the Federal Order conditions, then prohibit entry.
2. **Must** be accompanied by a phytosanitary certificate with an additional declaration that the plants were found by the national plant protection organization of the country of origin to be free of *Rubus* stunt agent based on visual examination and indexing of parent stock.

If **not** accompanied by a phytosanitary certificate with the above additional declaration, then prohibit entry.

Indexing procedures authorized by APHIS for *Rubus* are graft transmission of the pest to an indicator plant for *Rubus*, mechanical transmission of the pest to an indicator plant, and serology.

3. If meets the entry requirements above, then *Rubus* plants from the United Kingdom **must** enter postentry quarantine.

See specific restrictions [Rubus spp.](#), [Rubus alceifolius](#), [Rubus moluccanus](#), [Rubus plicatus](#), [Rubus spectabilis](#) in the [Lists of Plants for Planting](#).

Postentry Quarantine

Rubus (**except** seeds) from Canada that **lack** the phytosanitary certificate with the additional declaration **must** enter postentry quarantine. *Rubus* (**except** seeds) from the United Kingdom (England, Northern Ireland, Scotland, Wales) **must** enter postentry quarantine. See [Postentry Quarantine](#) on page 5-1.

Setaria spp.

Imported *Setaria* spp. plants for planting (**except** seeds) is [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries. [Federal Notice Effective June 19, 2017](#)

Setaria spp. Seeds

Setaria spp. seeds are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries **except** Netherlands. [Federal Notice Effective June 19, 2017](#)

Solanum spp.

Imported *Solanum* spp. plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from all countries **except** Canada; and **except** *Solanum lycopersicum* from Mexico when meeting the conditions of the **Solanum lycopersicum from Mexico Program**. All other *Solanum* spp. (**except** seeds) from Mexico are **Not Authorized Pending Pest Risk Analysis (NAPPRA)**.

Solanum spp. plants (**except** seeds) are regulated to prevent the introduction of *Ralstonia solanacearum* race 3 biovar 2, a bacterial pathogen that causes wilt disease (bacterial wilt of tomato, brown rot of potato, and southern wilt of *Pelargonium*), tomato torrado virus, tomato severe leaf curl virus, *Tuta absoluta*, and other diseases into the United States.

Imported true seeds of *Solanum* spp. tuber bearing species **only**—section *Tuberarium* are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from **all** countries **except** Canada, New Zealand, and the Tenth (X) region of Chile (that area of Chile between 39° and 44° South latitude). *Solanum* spp. true seed⁸ of tuber bearing species (potatoes) are regulated to prevent the introduction of Andean potato latent virus, arracacha virus B, potato virus T, tobacco ring spot virus (Andean potato calico strain), potato yellowing virus, and other diseases.

Solanum lycopersicum plants for planting from Canada are regulated to prevent the introduction of Tomato brown rugose fruit virus (ToBRFV), into the United States per **Federal Order Effective November 22, 2019**.

Solanum lycopersicum (tomato) seeds are regulated from all countries to prevent the introduction of Tomato brown rugose fruit virus (ToBRFV), into the United States per **Federal Order Effective November 22, 2019**, and to prevent the introduction of quarantine-significant pospiviroids: Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid per **Federal Order Effective September 8, 2019**.

Continue to specific requirements for plants for planting (**except** seeds) of **Solanum spp. from a Country or Area Where Ralstonia solanacearum R3B2 Is Known to Occur, Solanum spp. Ralstonia solanacearum Race 3 Biovar 2 Program, Solanum lycopersicum from Canada, Solanum lycopersicum from Mexico Program, Solanum tuberosum from Canada, and Solanum tuberosum from Prince Edward Island, Canada.**

⁸ *Solanum* spp. true seed is seed produced by flowers of *Solanum* capable of germinating and producing new *Solanum* plants.

Continue to specific requirements for [Solanum lycopersicum Seeds](#), [Solanum spp. Seeds \(True Seed\) of Tuber Bearing Species](#), and [Solanum tuberosum True Seed from Chile](#).

Solanum spp. from a Country or Area Where *Ralstonia solanacearum* R3B2 Is Known to Occur

Solanum spp. plants for planting (**except** seeds) from a country where *Ralstonia solanacearum* race 3 biovar 2 (R3B2) is known to occur **must** meet the requirements of the [Solanum spp. Ralstonia solanacearum Race 3 Biovar 2 Program](#).

Solanum spp. Ralstonia solanacearum Race 3 Biovar 2 Program

The national plant protection organization (NPPO) of the country in which the *Solanum* spp. plants are produced **must** enter into a bilateral workplan established with APHIS to export *Solanum* spp. plants (**except** seeds) from a country or area where *Ralstonia solanacearum* race 3 biovar 2 is known to occur.

The plants produced under the bilateral workplan **must** meet the following requirements:

- ◆ Be accompanied by a phytosanitary certificate that contains an additional declaration that states, “These plants have been produced in accordance with the requirements for the [Solanum spp. Ralstonia solanacearum Race 3 Biovar 2 Program](#) in the *Plants for Planting Manual*.”
- ◆ Be from an APHIS approved *Solanum* spp. facility authorized to export *Solanum* spp. to the United States (currently there are **no** approved *Solanum* spp. facilities);
- ◆ Production site (approved facilities) where the *Solanum* spp. plants (**except** seeds) intended for export to the United States are produced **must** be registered with and certified by both APHIS and the NPPO;
 - ❖ Production sites **must** be initially approved and thereafter visited at least once a year by APHIS and the NPPO to verify compliance with **all** these requirements as part of the certification process;
 - ❖ Production site **must** conduct ongoing testing for *Ralstonia solanacearum* race 3 biovar 2;
 - ❖ **Only** *Solanum* spp. plants (**except** seeds) from a group of plants that has been tested according to an APHIS-approved testing protocol with negative results for the presence of *Ralstonia solanacearum* race 3 biovar 2 may be used in production and export

Specific Restrictions

Solanum spp.

- ⇒ Records of the testing **must** be kept for two growing seasons and made available to representatives of APHIS and of the NPPO
- ⇒ All testing procedures **must** be approved by APHIS
- ❖ Each greenhouse on the production site **must** be constructed in a manner that ensures that runoff water from areas surrounding the greenhouses **cannot** enter the greenhouses;
- ❖ Greenhouses **must** be surrounded by a 1-meter buffer that is sloped so that water drains away from the greenhouses;
- ❖ Dicotyledonous weeds **must** be controlled **both** within each greenhouse on the production site and around the production site;
- ❖ Greenhouses on the production site **and** the 1-meter buffer surrounding the greenhouses **must** be free of dicotyledonous weeds;
- ❖ All equipment that comes in contact with *Solanum* spp. plants within the production site **must** be adequately sanitized so that *Ralstonia solanacearum* race 3 biovar 2 **cannot** be transmitted between plants or enter from outside the production site via the equipment;
- ❖ Production site personnel **must** adequately sanitize their clothing and shoes and wash their hands before entering the production site to prevent the entry of *Ralstonia solanacearum* race 3 biovar 2 into the production site;
- ❖ Growing media for *Solanum* spp. plants (**except** seeds) **must** be free of *Ralstonia solanacearum* race 3 biovar 2;
- ❖ Growing media and containers for *Solanum* spp. plants **must not** come in contact with growing media that could transmit *Ralstonia solanacearum* race 3 biovar 2 and **must** be grown in APHIS-approved growing media (see [Approved Growing Media](#));
- ❖ Growing media at the production site **must not** come in direct contact with any water source, such as an emitter or a hose end;
- ❖ Production site personnel **must** be educated regarding the various pathways through which *Ralstonia solanacearum* race 3 biovar 2 can be introduced into a production site and **must** be trained to recognize symptoms of *Ralstonia solanacearum* race 3 biovar 2 infection in plants of *Solanum* spp. in the production site;
- ❖ Production site **must** either derive the water from an APHIS-approved source or treat the water with an APHIS-approved treatment before use;
- ❖ Water used in the maintenance of plants at the production site **must** be free of *Ralstonia solanacearum* race 3 biovar 2;

- ⇒ If a drip irrigation system is used, then backflow devices **must** be installed to prevent any *Ralstonia solanacearum* race 3 biovar 2 that may be present from spreading to the rest of the production site through the irrigation system;
- ⇒ Ebb and flow irrigation **must not** be used;
- ❖ Plants of *Solanum* spp. produced for export within an approved production site **must** be handled and packed in a manner adequate to prevent the introduction of *Ralstonia solanacearum* race 3 biovar 2;
- ❖ Plants **must** be labeled with information indicating the production site from which the plants originated;
- ❖ If *Ralstonia solanacearum* race 3 biovar 2 is found in the production site or in consignments from the production site, then the production site will be ineligible to export plants of *Solanum* spp. to the United States;
- ◆ Reinstatement
 - ❖ Production site may be reinstated if a re-inspection reveals that the production site is free of *Ralstonia solanacearum* race 3 biovar 2 and all problems in the production site have been addressed and corrected to the satisfaction of APHIS;
- ◆ Trust Fund Agreement
 - ❖ Government of the country in which the plants are produced **must** enter into a trust fund agreement with APHIS before each growing season;
 - ❖ Government of the country in which the plants are produced or its designated representative is required to pay in advance all estimated costs that APHIS expects to incur through its involvement in overseeing the execution;
 - ⇒ These costs will include administrative expenses incurred in conducting the services enumerated in this program and all salaries (including overtime and the Federal share of employee benefits), travel expenses (including per diem expenses), and other incidental expenses incurred by the inspectors in performing these services;
 - ❖ Government of the country in which the plants are produced or its designated representative is required to deposit a certified or cashier's check with APHIS for the amount of the costs estimated by APHIS;
 - ❖ If the deposit is **not** sufficient to meet all costs incurred by APHIS, then the agreement further requires the government of the country in which the plants are produced or its designated representative to deposit with APHIS a certified or cashier's check for the amount of the

Specific Restrictions

Solanum spp.

remaining costs, as determined by APHIS, before the services will be completed;

- ❖ After a final audit at the conclusion of each shipping season, any overpayment of funds would be returned to the government of the country in which the plants are produced or its designated representative or held on account until needed.

Solanum lycopersicum from Canada

When from Canada, *Solanum lycopersicum* (tomato) plants for planting **must** be accompanied by a phytosanitary certificate or a re-export phytosanitary certificate with an additional declaration (AD) or a combination of the declarations certifying the following requirements prior to importation into the United States and territories (**one** of the following):

The *Solanum lycopersicum* plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Solanum lycopersicum* plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

OR

The *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

Per [Federal Order Effective November 22, 2019](#).

***Solanum lycopersicum* from Mexico Program**

Solanum lycopersicum (tomato) plants (**except** seeds) from Mexico are **not** authorized/prohibited unless imported from an approved facility under the *Solanum lycopersicum* from Mexico Program, which includes the requirements for [Solanum spp. from a Country or Area Where Ralstonia solanacearum R3B2 Is Known to Occur](#). All other species of *Solanum* plants (**except** seeds) from Mexico are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#).

See [Solanum lycopersicum \(tomato\) in Growing Media Program](#) and the list of [Approved Solanum lycopersicum in Growing Media Facilities](#).

Continue to [Solanum lycopersicum Seeds](#).

***Solanum lycopersicum* Seeds**

Solanum lycopersicum (tomato) seeds are regulated to prevent introduction of the following into the United States:

1. Tomato brown rugose fruit virus (ToBRFV) [Federal Order Effective November 22, 2019](#).
2. Six pospiviroids: Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid [Federal Order Effective September 8, 2019](#).

All shipments of *Solanum lycopersicum* seeds from all countries **must** be accompanied by a phytosanitary certificate or a re-export phytosanitary certificate with the following:

1. An additional declaration or a combination of the declarations addressing Tomato brown rugose fruit virus (ToBRFV):

The *Solanum lycopersicum* plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Solanum lycopersicum* plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

OR

The *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

Per [Federal Order Effective November 22, 2019](#).

AND

2. An additional declaration or a combination of the declarations addressing each of the six pospiviroids:

The *Solanum lycopersicum* (tomato) seeds in the shipment have been tested and found free of the following pospiviroids: Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid.

OR

The *Solanum lycopersicum* (tomato) seeds in the shipment were produced in [country] where Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid are **not** known to occur.

OR

The *Capsicum* spp. (pepper) seeds and *Solanum lycopersicum* (tomato) seeds in the shipment have been tested and found free of the following pospiviroids: Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid.

OR

The *Capsicum* (pepper) seeds and *Solanum lycopersicum* (tomato) seeds in the shipment were produced in [country] where Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid are **not** known to occur.

The requirement for a phytosanitary certificate with the above additional declarations applies to all *Solanum lycopersicum* seeds from all countries entering the United States.

[Federal Order Effective November 22, 2019](#) and [Federal Order Effective September 8, 2019](#).

NOTICE

A **Small Lots of Seed Permit** **cannot** be issued for *Capsicum* spp. seeds or *Solanum lycopersicum* seeds or due to specific requirements for entry.

If from Canada, continue to [Solanum lycopersicum Seeds from Canada](#).

***Solanum lycopersicum* Seeds from Canada**

All shipments of *Solanum lycopersicum* seeds from Canada **must** be accompanied by a phytosanitary certificate or a re-export phytosanitary certificate with the following additional declarations:

1. An additional declaration or a combination of the declarations addressing Tomato brown rugose fruit virus (ToBRFV) (**one** of the following):

The *Solanum lycopersicum* plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Solanum lycopersicum* plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

OR

The *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seeds originated from a country certified free from Tomato brown rugose fruit virus, as established by the national plant protection organization (NPPO) of that country.

OR

A representative sample of *Capsicum* spp. and *Solanum lycopersicum* plants for planting or seed lot has been officially tested and found free of Tomato brown rugose fruit virus.

Per [Federal Order Effective November 22, 2019](#).

AND

2. An additional declaration or a combination of the declarations addressing each of the six pospiviroids (**one** of the following):

The *Solanum lycopersicum* (tomato) seeds in the shipment have been tested and found free of the following pospiviroids: Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid.

OR

The *Solanum lycopersicum* seeds in the shipment were produced in [country] where Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid are **not** known to occur.

OR

The *Capsicum* spp. (pepper) seeds and *Solanum lycopersicum* (tomato) seeds in the shipment have been tested and found free of the following pospiviroids: Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid.

OR

The *Capsicum* (pepper) seeds and *Solanum lycopersicum* (tomato) seeds in the shipment were produced in [country] where Columnea latent viroid, Pepper chat fruit viroid, Potato spindle tuber viroid, Tomato apical stunt viroid, Tomato chlorotic dwarf viroid, and Tomato planta macho viroid are **not** known to occur.

The requirement for a phytosanitary certificate with the above additional declarations applies to all *Solanum lycopersicum* seeds from all countries entering the United States, including [Small Lots of Seeds](#) and [Obscured Seeds](#). [Federal Order Effective November 22, 2019](#) and [Federal Order Effective September 8, 2019](#)

NOTICE

A [Small Lots of Seed Permit](#) cannot be issued for small lots of *Capsicum* spp. seeds or small lots of *Solanum lycopersicum* seeds due to specific requirements for entry.

Solanum spp. Seeds (True Seed) of Tuber Bearing Species

True seeds of *Solanum* spp. tuber bearing species **only**—section *Tuberarium* are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from **all** countries **except** Canada, New Zealand, and the Tenth (X) region of Chile (that area of Chile between 39° and 44° South latitude).

Solanum spp. true seed is seed produced by flowers of *Solanum* that are capable of germinating and producing new *Solanum* plants, as distinguished from *Solanum* tubers, whole or cut, that are referred to as *Solanum* seeds or seed potatoes.

Solanum seed potatoes (seed potato tubers, cut or whole) are regulated as *Solanum* plants. See [Solanum spp.](#) for seed potato information.

Solanum tuberosum True Seed from Chile

True seeds of *Solanum tuberosum* from Chile **must** be accompanied by a phytosanitary certificate issued in Chile by Servicio Agrícola y Ganadero (SAG) with **all** following additional declarations:

- ◆ *Solanum tuberosum* true seed was produced by *Solanum tuberosum* plants that were propagated from plantlets from the United States;
- ◆ *Solanum tuberosum* plants that produced the *Solanum tuberosum* true seed were grown in the Tenth (X) Region of Chile (that area of Chile between 39° and 44° South latitude); and
- ◆ *Solanum tuberosum* plants, true seed, and tubers from each field in which the *Solanum* plants that produced *Solanum tuberosum* true seed were grown have been sampled by SAG once per growing season at a rate to detect 1 percent contamination with a 99 percent confidence level (500 tubers/500 plants/500 true seeds per 1 hectare (approximately 2.5 acres), and that the samples have been analyzed by SAG using an enzyme-linked immunosorbent assay (ELISA) test or nucleic acid spot hybridization (NASH) non-reagent test, with negative results for Andean Potato Calico Strain of Tobacco ringspot virus, Andean Potato latent virus, Arracacha virus B, Potato virus T, and Potato yellowing virus.

Syringa spp.

Syringa spp. (lilac) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from all countries **except** Canada.

***Syringa vulgaris* from Canada**

Syringa vulgaris plants (**except** seeds) from Canada **must** meet the requirements for hosts of **Phytophthora ramorum** (sudden oak death). See **Table 3-11, Host Plants (except seeds) of Phytophthora ramorum Exported from Canada** to determine if meets the conditions for entry.

Triticum spp.

Imported *Triticum* spp. (wheat) plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPPRA\)](#) from all countries **except** Canada.

Triticum spp. Seeds

Triticum spp. seeds are [Not Authorized Pending Pest Risk Analysis \(NAPPPRA\)](#) from all countries **except** Argentina, Belgium, Canada, France, Germany, Mexico, New Zealand, and United Kingdom (England, Northern Ireland, Scotland, Wales). When from Mexico, see [Triticum spp. Seeds from Mexico](#) to determine if *Triticum aestivum*, *Triticum aestivum* × *Secale cereale*, *Triticum turgidum* ssp. *durum* seeds meet the conditions for entry.

Triticum aestivum, *Triticum aestivum* ssp. *compactum*, *Triticum turgidum*, *Triticum turgidum* ssp. *durum*, *Triticum turgidum* ssp. *polonicum*, *Triticum* × *Agrotriticum* seeds are Federal Seed Act - Agriculture. See [Federal Seed Act Seeds](#) to determine if meets Federal Seed Act conditions for entry.

Triticum spp. Seeds from Mexico

Triticum aestivum, *Triticum aestivum* × *Secale cereale*, and *Triticum turgidum* ssp. *durum* seeds from Mexico may be imported into the U.S. when meeting all of the following conditions:

- ◆ **Must** be from areas in Mexico where Karnal bunt is **not** known to occur, States of:
 - ❖ Baja California (Mexicali Valley)
 - ❖ Chihuahua
 - ❖ Guanajuato
 - ❖ Jalisco
 - ❖ Michoacan
 - ❖ Queretaro
 - ❖ Sonora (Mexicali Valley)
- ◆ **Must** be accompanied by a phytosanitary certificate with the following:
 - ❖ Lists Mexican State of origin
 - ❖ Additional declaration that states, “The grain originated in an area where Karnal bunt is **not** known to occur as attested to by either survey results or by testing for bunted kernels or spores.”

When **not** meeting the above conditions, then prohibit entry.

Vaccinium spp.

Imported *Vaccinium* spp. plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from all countries **except** Australia and Canada. *Vaccinium* spp. plants (**except** seeds) are regulated to prevent the entry of blueberry scorch virus and for *Phytophthora kernoviae*.

Continue to specific restrictions for [Vaccinium spp. from Canada](#), [Vaccinium myrtillus](#), [Vaccinium ovatum](#), [Vaccinium vitis-idaea](#), and [Postentry Quarantine of Vaccinium spp.](#)

Vaccinium spp. from Australia

Vaccinium spp. plants (**except** seeds) from Australia **must** enter postentry quarantine. See [Postentry Quarantine of Vaccinium spp.](#) and [Postentry Quarantine Program](#).

Vaccinium spp. from Canada

Vaccinium spp. plants (**except** seeds) from Canada **must** be accompanied by a phytosanitary certificate with an additional declaration that the plants were produced in an approved certification program and found by the national plant protection organization of Canada to be free of blueberry scorch virus strains BC-1 and BC-2.

Vaccinium myrtillus

Vaccinium myrtillus plants for planting (**except** seeds) are regulated for the following:

- ◆ Blueberry scorch virus
- ◆ *Phytophthora ramorum* (see [Phytophthora ramorum \(sudden oak death\)](#))
- ◆ *Phytophthora kernoviae* (see [Phytophthora kernoviae](#))

Vaccinium ovatum

Vaccinium ovatum plants for planting (**except** seeds) are regulated for the following:

- ◆ Blueberry scorch virus
- ◆ *Phytophthora ramorum* (see [Phytophthora ramorum \(sudden oak death\)](#))

Specific Restrictions

Vaccinium spp.

Vaccinium vitis-idaea

Vaccinium vitis-idaea plants for planting (**except** seeds) are regulated for the following:

- ◆ Blueberry scorch virus
- ◆ *Phytophthora ramorum* (see [Phytophthora ramorum \(sudden oak death\)](#))

Postentry Quarantine of *Vaccinium* spp.

When meeting all conditions for entry, then *Vaccinium* spp. (**except** seeds) **must** enter [Postentry Quarantine Program](#) from Australia. See [Postentry Quarantine Program](#) on page 5-1 for more information.

Vitis spp.

Imported *Vitis* spp. (grape) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from all countries **except** Canada.

Vitis spp. from Canada

When from Canada, *Vitis* spp. (grape) plants for planting (**except** seeds) **must** at the time of arriving at the first port of entry, be accompanied by a phytosanitary certificate as follows:

- ◆ Additional declaration stating the plants were grown in a nursery in Canada, and the plants were found by the national plant protection organization of Canada to be free of the following injurious plant pathogens listed below:
 - ❖ *Arabis mosaic nepovirus* and its strains
 - ❖ Artichoke Italian latent virus⁹
 - ❖ Black wood phytoplasma (bois-noir)
 - ❖ Flavescence-doree phytoplasma
 - ❖ Grapevine asteroid mosaic agent
 - ❖ Grapevine Bratislava mosaic virus
 - ❖ Grapevine Bulgarian latent virus
 - ❖ Grapevine chasselas latent agent
 - ❖ Grapevine fanleaf virus and its strains
 - ❖ Grapevine infectious necrosis bacterium
 - ❖ Grapevine little leaf agent
 - ❖ Grapevine vein mosaic agent
 - ❖ Grapevine vein necrosis agent
 - ❖ Hungarian chrome mosaic virus
 - ❖ *Peyronellaea glomerata*
 - ❖ *Pseudopeziza tracheiphila*
 - ❖ Raspberry ringspot nepovirus and its strains
 - ❖ *Rhacodiella vitis*
 - ❖ *Rosellinia necatrix*
 - ❖ *Septoria melanosa*

⁹ A nematode transmitted virus.

Specific Restrictions

Vitis spp.

- ❖ Strawberry latent ringspot sadwavirus and its strains (peach willow leaf rosette)
- ❖ Tomato blackring nepovirus and its strains
- ❖ *Xanthomonas ampelina*

Determination by the national plant protection organization that the plants are free of these pathogens will be based on visual examination and [indexing](#) of the parent stock of the plants and inspection of the nursery where the restricted plants are grown to determine that the nursery is free of the specified pathogens;

or

- ◆ If any of the pathogens (injurious plant pests) listed above **do not** occur in Canada, then an additional declaration that the pathogen(s) [*List pathogen(s)*] **does not** or **do not** occur in Canada may be used in lieu of visual examination and [indexing](#) of the parent stock.

See [Plants for Planting from Canada That Require a Permit](#) on page 4-7 for more information.

***Vitis* spp. With a Plant Part from a Different Taxon**

If *Vitis* spp. plants for planting (**except** seeds) contain more than one plant part (e.g., grafted or budded) and the interstem, rootstock, scion or any other part of the finished plant belongs to a different regulated taxon, then the additional declaration (A.D.) **must** include the following:

- ◆ All plant parts of regulated taxa that have been incorporated into the finished plant;
- ◆ Scientific names of the regulated plant taxa that have been incorporated into the finished plant; and
- ◆ Quarantine pests and related restrictions associated with each taxon.

EXAMPLE An imported plant uses *Vitis rotundifolia* as its rootstock and *Vitis vinifera* as the scion. The phytosanitary certificate **must** list both *Vitis rotundifolia* and *Vitis vinifera* and **must** include the required additional declarations for *Vitis rotundifolia* and *Vitis vinifera*.

Watsonia spp.

Imported *Watsonia* spp. (bugle lily) plants for planting (**except** seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from Africa (Algeria, Angola, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic People's Republic of the), Congo (Republic of), Cote d'Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Eswatini (Swaziland), Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Liberia, Lesotho, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sudan, Tanzania, Togo, Tunisia, Uganda, Zambia, Zimbabwe); Argentina; and Uruguay.

Watsonia spp. plants for planting (**except** bulbs in commercial shipments and seeds) are **Not Authorized Pending Pest Risk Analysis (NAPPPRA)** from Brazil, France, Italy, Malta, Mauritius, and Portugal.

Continue to specific requirements for [Watsonia spp. from Luxembourg](#) and [Watsonia spp. from Spain](#) and [Postentry Quarantine](#).

Watsonia spp. from Luxembourg

Watsonia spp. plants for planting (**except** bulbs and seeds) are admissible from Luxembourg when accompanied by a phytosanitary certificate with the following additional declaration stating that:

The plants were grown in a disease free environment in a greenhouse. The plants were subjected to 12 hours of continuous misting per day with water at 15-20 degrees Celsius on 2 consecutive days. The plants were inspected by a plant quarantine official of the country where grown 20 days after the completion of the misting and were found free of gladiolus rust.

If *Watsonia* spp. (**except** bulbs and seeds) from Luxembourg **lack** the additional declarations above, then they **must** enter [Postentry Quarantine](#).

Watsonia spp. from Spain

Watsonia spp. plants for planting (**except** bulbs and seeds) are admissible from Spain when accompanied by a phytosanitary certificate with the following additional declaration stating that:

The plants were grown in a disease free environment in a greenhouse. The plants were subjected to 12 hours of continuous misting per day with water at 15-20 degrees Celsius on 2 consecutive days. The plants were inspected

Specific Restrictions

Watsonia spp.

by a plant quarantine official of the country where grown 20 days after the completion of the misting and were found free of *gladiolus* rust.

If *Watsonia* spp. (**except** bulbs and seeds) from Spain **lack** the additional declarations above, then they **must** enter [Postentry Quarantine](#).

Postentry Quarantine

Watsonia spp. (**except** bulbs and seeds) **must** enter postentry quarantine from all **other** countries **except** Brazil, France, Italy, Malta, Mauritius, and Portugal and those prohibited from: Africa (Algeria, Angola, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic People's Republic of the), Congo (Republic of), Cote d'Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Eswatini (Swaziland), Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sudan, Tanzania, Togo, Tunisia, Uganda, Togo, Zambia, Zimbabwe); Argentina, and Uruguay.

Watsonia spp. from Luxembourg and Spain are **exempt** from postentry quarantine if they meet the additional declaration requirements under [Watsonia spp. from Luxembourg](#) and [Watsonia spp. from Spain](#).

See [Postentry Quarantine Program](#) on page 5-1 for more information.

Zea spp. and Relatives

Zea spp. (corn) and its relatives *Coix* spp. (Job's tears), *Euchlaena* spp. (teosinte), *Pennisetum glaucum*, *Saccharum officinarum*, *Sorghum* spp. (broomcorn) plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries. [Final Rule Effective April 18, 2018](#)

Chionachne spp., *Echinochloa* spp., *Eleusine* spp., *Miscanthus* spp., *Panicum* spp., *Pennisetum* spp. (**except** *Pennisetum glaucum*), *Polytoca* spp., *Sclerachne* spp., *Tripsacum* spp., *Trilobachne* spp. plants for planting (**except** seeds) are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries **except** Canada.

See also *Zea* spp. relative [Setaria](#) spp. and [Setaria](#) spp. [Seeds](#).

Continue to [Zea](#) spp. [Seeds](#).

Zea spp. Seeds

Zea spp. (corn) seeds are [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) from all countries **except** Argentina, Austria, Brazil, Canada, Chile, Croatia, France, Germany, Guatemala, Guyana, Hungary, Italy, Mexico, Netherlands, New Zealand, Peru, Romania, Serbia, Spain, Turkey, and United Kingdom (England, Northern Ireland, Scotland, Wales). [Federal Notice Effective July 2, 2021](#)

Introduction

The *Plants for Planting from Canada* chapter provides information about specific conditions, exemptions, and requirements for importing plants for planting from Canada to the United States.

Plants for Planting from Canada

Plants for planting are considered to be from any country or locality in which the plants were grown.

Plants for planting from Canada may be either of the following:

- ◆ Plants grown **only** in Canada and **never** grown outside of Canada
- ◆ Plants considered as being from Canada

Plants for Planting Considered As Being from Canada

Plants for planting imported into Canada from another country or locality shall be considered as being **solely** from Canada if they meet **all** of the following conditions:

- ◆ They are imported into the United States directly from Canada after having been grown for at least 1 year in Canada;
- ◆ They have **never** been grown in a country from which their importation would be [Not Authorized Pending Pest Risk Analysis \(NAPPRA\)](#) under 7 CFR 319.37-4;
- ◆ They have **never** been grown in a country **other than** Canada from which it would be subject to certain restrictions on the importation of specific types of plants for planting which are listed in the *Plants for Planting Manual*;
- ◆ Plants for planting that would be subject to postentry quarantine if imported into the United States may be imported from Canada after growth in another country if they were grown in Canada in postentry quarantine conditions equivalent to those specified in the *Plants for Planting Manual*; and
- ◆ They were **not** imported into Canada in growing media.

Plants for planting (**except** seeds) entering under the [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP Revised 2016\)](#) or [U.S./Canada Greenhouse-Grown Plant Certification Program \(Legacy GCP\)](#) or [United States-Canada Nursery Certification Program \(NCP\)](#) are subject to inspection at the Canadian border by CBP, but generally **do not** require movement to a plant inspection station for clearance.

Plants Exported from Canada Originating in a Third Country

Plants for planting that are exported from Canada to the U.S. and originate in another country of origin and **do not** meet the definition of from Canada **must** be as follows:

- ◆ Be accompanied by a Canadian re-export phytosanitary certificate;
- ◆ Meet U.S. import requirements for the country of origin; and
- ◆ Be sent to a USDA plant inspection station for clearance.

Canadian Origin Plants in Growing Media

Plants for planting **from** Canada ¹ may be imported in any growing media, including soil, into the U.S., **except** as listed below:

- ◆ Plants from Canada established in soil are **prohibited** entry to Hawaii and Puerto Rico when shipped directly from Canada;
- ◆ Plants may be established in any growing media, unless from **an area of Canada regulated by the national plant protection organization (NPPO) of Canada for potato cyst nematodes**;
 - ❖ If from an area regulated by the NPPO for potato cyst nematodes, then may **only** be imported in an approved growing medium ² when accompanied by a phytosanitary certificate with an additional declaration that the plants were grown in a manner to prevent infestation by potato cyst nematodes (*Globodera rostochiensis* and *Globodera pallida*) and
- ◆ Plants **not** meeting other conditions for entry.

1 Plants for planting are considered to be “from” any country or locality in which they were grown. Provided, that plants imported into Canada from another country or locality shall be considered as being **solely** from Canada if they meet the following conditions:

- (1) They are imported into the United States directly from Canada after having been grown for at least 1 year in Canada;
- (2) They have **never** been grown in a country from which their importation would **not** be authorized pending pest risk analysis under § 319.37-4;
- (3) They have **never** been grown in a country, **other than** Canada, from which it would be subject to certain restrictions on the importation of specific types of plants for planting under of § 319.37-20, which is listed in the *Plants for Planting Manual*; provided that the plants for planting would be subject to postentry quarantine if imported into the United States may be imported from Canada after growth in another country if they were grown in Canada in postentry quarantine under conditions equivalent to those specified in the *Plants for Planting Manual*; and
- (4) They were **not** imported into Canada in growing media.

2 Approved growing media for Canada: baked expanded clay pellets, coal cinder, coir, cork, glass wool, organic and inorganic fibers, peat, perlite, phenol formaldehyde, plastic particles, polyethylene, polymer stabilized starch, polystyrene, polyurethane, rock wool, stockosorb super absorbent polymer, vermiculite, volcanic rock, zeolite, or any combination of these media.

U.S. Origin Plants Returning from Canada

Plants for planting of U.S. origin and returning from Canada that **do not** meet the definition of being solely from Canada **must** be accompanied by the following documents:

- ◆ Both a U.S. phytosanitary certificate and a Canadian phytosanitary certificate for re-export
OR
- ◆ Canadian phytosanitary certificate that notes the origin of the plants as the United States
OR
- ◆ Greenhouse Certification Program label issued by the Canadian Food Inspection Agency (CFIA).

Import Permits for Plants for Planting from Canada

Most plants for planting from Canada **do not** require an import permit however, there are exceptions and some plants do require a permit. Continue to [Plants for Planting from Canada That Require a Permit](#) below for import into the U.S.

Plants for Planting from Canada That Require a Permit

All plants for planting of the following taxa from Canada require an import permit:

- ◆ *Abelmoschus* spp. (including seeds)
- ◆ *Chaenomeles* spp. (**except** seeds)
- ◆ *Cydonia* spp. (**except** seeds)
- ◆ *Fraxinus* spp. (**except** seeds) from counties or municipal regional counties in Canada that are **not** regulated for emerald ash borer (EAB) but that are within an EAB regulated Province or Territory
- ◆ *Malus* spp. (**except** seeds)
- ◆ *Pinus* spp. (**except** seeds)
- ◆ *Prunus* spp. (**except** seeds)
- ◆ *Pyrus* spp. (**except** seeds)
- ◆ *Rubus* spp. (**except** seeds)
- ◆ *Vitis* spp. (**except** seeds)

Phytosanitary Certificates for Plants for Planting from Canada

Plants for planting from Canada **must** be accompanied by a phytosanitary certificate issued by the Canadian Food Inspection Agency (CFIA) (see [Phytosanitary Certificate](#)), **except** for plants or seeds meeting the requirements for phytosanitary certificate exemption.

Phytosanitary Certificate Exemption

The following plants for planting from Canada are **exempt** from the phytosanitary certificate when meeting the following:

- ◆ Plants imported from Canada through the [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP Revised 2016\)](#) or [U.S./Canada Greenhouse-Grown Plant Certification Program \(Legacy GCP\)](#)); or
- ◆ [Seeds Imported from Canada](#) **must** be accompanied by the following:
 - ❖ *Seed Analysis Certificate*, CFIA Form 5289 or PPQ Form 925
 - ❖ *Seed Export Label*, CFIA/ACIA Form 5309; or
 - ❖ Canadian seeds that **lack** an official certificate and destined to General Feed & Grain, Inc., Bonners Ferry, Idaho (ID) and under a compliance agreement:
 - ⇒ May enter through Porthill, ID or Eastport, ID;
 - ⇒ Seed will be cleaned; and
 - ⇒ Seed sample will be sent to an approved Canadian facility for a *Seed Analysis Certificate* (CFIA Form 5289); or
- ◆ Seeds imported from Canada through the USDA [Small Lots of Seeds](#) program and are accompanied by a *Small Lots of Seed Permit*

Ports of Entry for Plants from Canada

Plants for planting of Canadian origin entering from Canada or plants for planting entering under the [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP Revised 2016\)](#) or [U.S./Canada Greenhouse-Grown Plant Certification Program \(Legacy GCP\)](#) are subject to inspection by CBP at Customs designated [Approved Ports of Entry](#) at the Canadian Border, but generally **do not** require movement to a USDA plant inspection station. See exception below.

Plants Exported from Canada That Must Be Sent to a Plant Inspection Station

The following plants exported from Canada to the U.S. **must** enter at port with a USDA plant inspection station:

- ◆ *Abelmoschus* spp. (okra) seeds for planting (require treatment as a condition of entry; see *Abelmoschus* spp. in [Lists of Plants for Planting](#))
- ◆ *Hibiscus* spp. (kenaf) seeds for planting (require treatment as a condition of entry; see *Hibiscus* spp. in [Lists of Plants for Planting](#))
- ◆ Plants originating in a third country that are **not** considered to be from Canada (see [Plants for Planting Considered As Being from Canada](#))

United States–Canada Greenhouse-Grown Plant Certification Program (GCP Revised 2016)

The [United States–Canada Greenhouse-Grown Plant Certification Program \(GCP\)](#) is a bilateral export certification program for greenhouse-grown plants shipped between Canada and the continental United States. Agreed to in 2016, the revised GCP is the successor to the original greenhouse certification program between APHIS and the Canadian Food Inspection Agency (CFIA) established in 1996. Under the original U.S./Canada program (hereafter referred to as the “legacy” GCP), each country operated a parallel program to constitute the GCP: the United States Greenhouse-Grown Plant Certification Program (USGCP); and the Canada Greenhouse-Grown Plant Certification Program (CGCP). The revised GCP is a program that is applied equivalently in Canada and the United States.

The responsibilities of participating facilities and of APHIS and CFIA under the revised GCP are outlined in the [Technical Requirements United States–Canada Greenhouse-Grown Plant Certification Program \(GCP\)](#). The technical requirements and other information on the revised GCP can be found on the APHIS website for [U.S.–Canada Greenhouse-Grown Plant Certification Program \(GCP\)](#).

Transition Period

The revised U.S.-Canada GCP (2016) will replace the legacy U.S./Canada GCP (1996) over the transition period with an implementation target date of December 18, 2021. To facilitate an orderly transition to the revised program, facilities authorized under the legacy GCP may continue to use their existing USGCP or CGCP export certification labels to ship through the transition period (prior to December 18, 2021).

During the transition period, plants may be shipped under the revised GCP or the legacy GCP as facilities progress through the GCP authorization process. When the transition period ends, **only** facilities authorized under the revised GCP program can participate in the revised GCP. (See [Authorized Facilities \(GCP Revised 2016\)](#) for more information.)

Inspection at Customs (GCP Revised 2016)

Plants for planting entering under the revised United States–Canada Greenhouse-Grown Plant Certification Program are subject to inspection at the Canadian border by CBP, but generally **do not** require movement to a plant inspection station for clearance.

The exception is if an actionable pest is found during a CBP inspection at a port of entry, then the shipment will be placed on hold and sent to a plant inspection station or refused entry. The GCP Export Certification Label number should be recorded as the phytosanitary certificate number.

Commingled Shipments/Mixed Loads (GCP Revised 2016)

Plants for planting entering under the revised United States–Canada Greenhouse-Grown Plant Certification Program (GCP) may be in the same shipment, but **must not** be commingled with non-GCP commodities. GCP and non-GCP commodities **must** be segregated in a way that safeguards the GCP shipment and allows for traceability.

Eligible Plants (GCP Revised 2016)

Plants **must** originate in either Canada or the United States, or if imported from a third country, then **must** meet import requirements for that country into both the United States and Canada. Plants that meet these and the following requirements are eligible plants and may enter into the GCP:

- ◆ Plants **must** meet size/age requirements when entering from a third country of origin;
- ◆ Plants **must** meet any other regulatory requirements that may be applicable;
- ◆ Plants may be grown and shipped in any approved growing media that is acceptable for trade in plants between the United States and Canada after entering from a third country;
- ◆ Plants entering into the continental United States in growing media from the State of Hawaii or a U.S. territory **must** meet the requirements of the Canadian Growing Media Program and U.S. import requirements (see 7 CFR 318.13 and 318.60); and
- ◆ Specific plant taxa and production practices may be eligible for the GCP or may be excluded from the program based on agreement between APHIS and CFIA.

Associated Articles (GCP Revised 2016)

An associated article is anything accompanying a GCP Certified Plant that normally requires a phytosanitary certificate to enter either the United States or Canada (e.g., a bamboo stake included in a potted plant). Under the revised 2016 United States–Canada Greenhouse-Grown Plant Certification Program, associated articles **do not** require a phytosanitary certificate.

Commodities Excluded from the United States–Canada Greenhouse-Grown Certification Program (Revised 2016)

The following items are **excluded** (not eligible) and may **not** be certified through the United States–Canada GCP:

- ◆ Fresh fruits
- ◆ Fresh vegetables
- ◆ Grain
- ◆ Plants for Planting Not Authorized Pending Pest Risk Analysis (NAPPRA) for entry into either the United States or Canada directly from the country of origin
- ◆ Prohibited plants
- ◆ Regulated invasive plants
- ◆ Regulated noxious weeds
- ◆ Seed potatoes (*Solanum tuberosum*)
- ◆ Seeds

Authorized Facilities (GCP Revised 2016)

Approved facilities **must** enter into a compliance agreement with their NPPO. Facilities that are authorized to ship plants under the GCP are required to maintain a current list of plants in production at their facility indicating which plants are eligible and ineligible for the GCP. The list **must** be accepted by the exporting country’s NPPO. The NPPO verifies which plants are eligible for inclusion in the GCP, based on taxa and source. The NPPO may be consulted for guidance on how to assess which plants are eligible or ineligible. The NPPOs will maintain lists of facilities that are authorized to participate in the U.S.-Canada Greenhouse-Grown Plant Certification Program and supply that list to their counterpart as needed or upon request.

The NPPOs will make the authorized/approved facilities list publicly available with the following information:

- ◆ Facility name
- ◆ Address/location of authorized facility (city/town or province/state)
- ◆ Authorization number (approved facility number)

If an authorization is suspended, then the facility will be removed from the list.

See [GCP Authorized Facilities in Canada](#) and [GCP Authorized Facilities in the United States \(USDA Approved Facilities Authorized to Participate in GCP\)](#).

Export Certification Label (GCP Revised 2016)

The Export Certification Labels will include the following:

- ◆ “United States–Canada Greenhouse-Grown Plant Certification Program”;
- ◆ Identification of the authorizing NPPO;
- ◆ Authorized facility authorization number;
- ◆ Unique serial number; and
- ◆ Certification statement issued by the NPPO:

“The plants have been produced under the United States–Canada Greenhouse-Grown Plant Certification Program, are free from regulated pests, practically free from injurious plant pests, and meet the phytosanitary import requirements of both Canada and the United States.”

No pest-specific or plant-specific additional declarations will be required on the U.S.–Canada GCP export documents.

Handling Greenhouse Certification Program Shipments During Transition Period

See [Table 4-1](#) to determine how to handle Greenhouse Certification Program (GCP) shipments under the legacy GCP (1996) and the revised GCP (2016) during the transition period (prior to December 18, 2021).

Table 4-1 How to Handle U.S.-Canada Greenhouse Certification Program Shipments During Transition Period (prior to December 18, 2021)

If the shipment:	And is:	And:	Then:	
Is accompanied by an from Export Certification Label either U.S. Greenhouse-Grown Plant Certification Program (USGCP) or Canada Greenhouse-Grown Plant (CGCP) (Legacy GCP programs from 1996)	Prior to December 18, 2021: Plants are not listed on the Plants Excluded from the Canada/U.S. Greenhouse Certification Program for Export to the United States	Associated articles are accompanied by a phytosanitary certificate	INSPECT and RELEASE	
		Lacks the above	REFUSE ENTRY	
	<i>Ipomea batatas</i> and prior to December 18, 2021	Is accompanied by the statement, in bold, capital letters, and clearly visible to Customs and Border Protection inspectors, “ <i>Ipomoea batatas</i> in this shipment originated in the United States or were grown from seed” and declared on a self-printed label attached to the shipping invoice or on the shipping invoice following name of the listed plant <i>Ipomoea batatas</i>		INSPECT and RELEASE
		Lacks the above	REFUSE ENTRY	
Other than in cells above	—————→		REFUSE ENTRY	
Is accompanied by an Export Certification Label (GCP Revised 2016) ¹ (Revised GCP 2016)	Is on the list of U.S.-Canada Greenhouse Grown Plant Certification Program Facilities: (GCP Authorized Facilities in Canada or GCP Authorized Facilities in U.S.)	—————→	INSPECT and RELEASE	
		Other than in the cell above	—————→	REFUSE ENTRY
Lacks an Export Certification Label from the USGCP, GCCP (Legacy GCP) or GCP (Revised 2016)	—————→		Does not meet requirements of Greenhouse Certification Program; SEE General Restrictions and REGULATE as plants for planting	

1 GCP Revised 2016 **only**: There is **no** separate list of specific plants excluded from the GCP revised 2016; each facility gains approval for all plants grown in the facility during the registration process. [Associated Articles \(GCP Revised 2016\)](#) **do not** require a phytosanitary certificate with the shipment. There is a general list of [Commodities Excluded from the United States–Canada Greenhouse-Grown Certification Program \(Revised 2016\)](#).

For more information or if you have questions about the United States–Canada Greenhouse-Grown Plant Certification Program, please send inquiries to PPQexportservices@usda.gov.

U.S./Canada Greenhouse-Grown Plant Certification Program (Legacy GCP)

The [U.S./Canada Greenhouse-Grown Plant Certification Program \(GCP\)](#) authorizes facilities that meet specific compliance elements (requirements) to use an export certification label to import into the U.S. from Canada or to import into Canada from the U.S. The GCP is a voluntary program alternative for export certification.

Plants for planting entering under the Greenhouse-Grown Plant Certification Program are subject to inspection at the Canadian border by CBP, but generally **do not** require movement to a plant inspection station for clearance.

Plants for planting in the U.S./Canada Greenhouse-Grown Plant Certification Program for shipment to the U.S. **must** meet the following:

- ◆ Be accompanied by one of the following:
 - ❖ Shipping invoice with a CFIA label, CFIA Form 4702, that states, “Greenhouse Grown Plants from Canada”

OR

- ❖ Canadian phytosanitary certificate with an additional declaration that the plants in this shipment were grown in a manner to prevent infestation by potato cyst nematodes (*Globodera rostochiensis* and *Globodera pallida*)

Greenhouse-Grown Plant Certification Program Requirements (Legacy GCP)

Eligible greenhouse-grown plants may be imported from Canada if the Plant Health and Production Division of the Canadian Food Inspection Agency (CFIA) signs a written agreement with the Animal and Plant Health Inspection Service allowing such importation, and provided that the following conditions are met:

The Plant Health and Production Division of CFIA shall:

- ◆ Eliminate individual inspections and phytosanitary certification of each shipment of articles exported in accordance with this section;
- ◆ Enter into written agreements with, and assign a unique identification number to, each greenhouse grower participating in the greenhouse program;

- ◆ Inspect greenhouses and the plants being grown in them using inspection methods and schedules approved by Plant Protection and Quarantine to ensure that the criteria of this subsection are met;
- ◆ Issue labels to each grower participating in the program:
 - ❖ Labels issued to each grower shall bear a unique number identifying that grower, and shall bear the following statement: “This shipment of greenhouse-grown plants meets the import requirements of the United States, and is believed to be free from injurious plant pests. Issued by Plant Health and Production Division, Canadian Food Inspection Agency.”
 - ❖ Plant Health and Production Division, CFIA, shall also ensure that the label is placed on the airway bill, bill of lading, or delivery ticket accompanying each shipment of articles; and
 - ❖ Ensure that **only** plants that are **not excluded** shipment by the criteria of this subsection are shipped.
- ◆ Each greenhouse grower participating in the program shall enter into an agreement with the Plant Health and Production Division of CFIA in which the grower agrees to:
 - ❖ Maintain records of the kinds and quantities of plants grown in their greenhouses, including the date of receipt and place of origin of the plants;
 - ❖ Keep the records for at least 1 year after the plants are shipped to the United States;
 - ❖ Make the records available for review and copying upon request by either the Plant Health and Production Division of CFIA or an authorized representative of the Secretary of Agriculture;
 - ❖ Apply to an airway bill, bill of lading, or delivery ticket for plants to be shipped to the United States, a label issued by CFIA that includes the identification number assigned to the grower by the Plant Health and Production Division, CFIA, and the following certification statement, “This shipment of greenhouse grown plants meets the import requirements of the United States and is believed to be free from injurious plant pests. Issued by Plant Health and Production Division, Canadian Food inspection Agency.”; and
 - ❖ Use pest control practices approved by Plant Protection and Quarantine and the Plant Health and Production Division of CFIA to exclude pests from the greenhouses.

Plants Excluded from the Canada/U.S. Greenhouse Certification Program (Legacy GCP)

Plants for planting that are **excluded** from the [U.S./Canada Greenhouse-Grown Plant Certification Program \(Legacy GCP\)](#) for export from Canada to the U.S. **cannot** enter under the program.

The following plants are **excluded** from the program and **cannot** be exported from Canada to the U.S. under the Greenhouse-grown Plant Certification Program:

- ◆ All plants listed as **excluded** on the [Plants Excluded from the Canada/U.S. Greenhouse Certification Program for Export to the United States](#)
- ◆ Any plant imported into the continental United States or Canada in growing media from a third country
 - ❖ **Except** when the plant met the requirements of **both** 7 CFR 319.37-10 and the [Canadian Growing Media Program](#) at the time of entry into Canada
- ◆ Any plant imported into the continental United States or Canada from the State of Hawaii or a U.S. territory
 - ❖ **Except** if the plant met the requirements of **both** 7 CFR 318.13 and the [Canadian Growing Media Program](#) at the time of entry
- ◆ Any plant that is **not** authorized/prohibited entry from Canada (see [Lists of Plants for Planting](#))
- ◆ *Fraxinus* spp. (see [Fraxinus spp. from Canada](#))
- ◆ Seeds

***Ipomoea batatas* Requirements (Legacy GCP)**

Ipomoea batatas may be imported under the U.S./Canada Greenhouse Certification program and **must** be accompanied by the following:

- ◆ GCP Export certification label
- ◆ Statement clearly visible to Customs and Border Protection inspectors, in bold, capital letters, “*Ipomoea batatas* in this shipment originated in the United States or were grown from seed.”
 - ❖ Is declared on a self-printed label attached to the shipping invoice or
 - ❖ Is declared on the shipping invoice following the name of the listed plant *Ipomoea batatas*

EXAMPLE IPOMOEA BATATAS IN THIS SHIPMENT ORIGINATED IN THE UNITED STATES OR WERE GROWN FROM SEED.

If **lacks** the above requirements, then *Ipomoea batatas* **cannot** be imported under the U.S./Canada Greenhouse Certification Program.

United States-Canada Nursery Certification Program (NCP)

The United States-Canada Nursery Certification Program (NCP) is a bilateral export certification program for nursery-grown plants shipped between Canada and the continental United States. The NCP requirements are applied equivalently in the United States under the [United States Nursery Certification Program \(USNCP\) pilot](#) and in Canada under the [Canadian Nursery Certification Program \(CNCP\)](#).

The NCP offers an alternative to traditional phytosanitary certification (traditional phytosanitary certification is based on final product inspection immediately prior to shipping). The NCP uses a systems approach to mitigate pest risk. The NCP systems approach has several components, including documenting the production and pest management practices, auditing and reviewing the system, and determining pest prevalence during production. USDA and the Canadian Food Inspection Agency (CFIA) establish the requirements of the NCP and conduct audits to verify that plant material certified under the program meets the phytosanitary requirements of the importing country, and is free of quarantine and regulated non-quarantine pests.

If populations of non-regulated plant pests are **not** identified and controlled at a certified facility, then the facility may be suspended from the NCP due to non-conformance with the standard. Consequently, nurseries/facilities certified under the NCP will produce plant material that consistently meets the phytosanitary requirements of the importing country.

Regulated Commodities

All plants for planting from Canada and the United States are regulated.

Continue to [Canadian Nursery Certification Program \(CNCP\)](#).

Canadian Nursery Certification Program (CNCP)

Inspection at Customs (CNCP)

Plants for planting entering the United States under the [Canadian Nursery Certification Program \(CNCP\)](#) are subject to inspection at the Canadian border by U.S. Customs and Border Protection, but generally **do not** require movement to a plant inspection station for clearance.

The exception is if an actionable pest is found during a CBP inspection at a port of entry, then the shipment will be placed on hold and sent to a USDA plant inspection station or refused entry. The CNCP Phytosanitary Certification Label number should be recorded as the phytosanitary certificate number.

Entry Requirements (CNCP)

Plants certified for export to the U.S. under the Canadian Nursery Certification Program (CNCP) **must** be accompanied by a complete [Canadian Nursery Certification Program Phytosanitary Certificate \(CNCP\)](#).

Documentation accompanying CNCP shipments **must** list the scientific name of each plant species contained in the shipment, as follows:

- ◆ If there are specific species requirements, then the scientific name **must** include genus and species;
- ◆ If there are **no** specific species requirements, then scientific names to the genus level will suffice.

Canadian Nursery Certification Program Phytosanitary Certificate (CNCP)

The complete [Canadian Nursery Certification Program Phytosanitary Certificate](#) is composed of a [CFIA/ACIA 5425, Phytosanitary Certificate \(CNCP Phytosanitary Certificate Label\)](#) affixed to a [CFIA/ACIA 5378, Canadian Nursery Certification Program \(CNCP Export Label Document\)](#) document that includes the following:

- ◆ [CFIA/ACIA 5425, Phytosanitary Certificate \(CNCP Phytosanitary Certificate Label\)](#) is preprinted with the following information (same as found on a traditional Canadian phytosanitary certificate):
 - ❖ Certificate number, consisting of:
 - ⇒ Authorized facility's (CF) identification number (first 7 digits)
 - ⇒ Serial number (remaining digits) (to facilitate trace back)
 - ❖ Name and address of the Authorized Facility (exporter)

- ❖ Place of issue
- ❖ Seal (CFIA)
- ❖ Signature of the Director of Plant Health
- ❖ Statement certification:

“This is to certify that the plants, plant products or other regulated articles described herein have been inspected and/or tested according to appropriate official procedures and are considered to be free from the quarantine pests specified by the importing contracting party and to conform with the current phytosanitary requirements of the importing contracting party, including those for regulated non-quarantine pests. They are deemed to be practically free from other pests. Issued by the Canadian Food Inspection Agency.”

NOTICE

No pest-specific or plant-specific additional declarations will appear on the CNCN phytosanitary certificate.

- ◆ [CFIA/ACIA 5378, Canadian Nursery Certification Program \(CNCN Export Label Document\)](#) is an official CFIA form that is completed and printed by the Certified Facility (with a large space designated for affixing the [CFIA/ACIA 5425, Phytosanitary Certificate \(CNCN Phytosanitary Certificate Label\)](#) and contains the following:
 - ⇒ Designated space for affixing the Phytosanitary Certificate label
 - ⇒ Date
 - ⇒ Exporter’s name and address
 - ⇒ Description of consignment
 - ⇒ Means of conveyance (consignment)
 - ⇒ References to invoices or bills-of-lading
 - ⇒ Scientific names (list) and quantity of all plants contained in the shipment
 - ⇒ Treatment description (if any) applied to meet export requirements
 - ⇒ Additional declaration, “This shipment of plants was produced in accordance with the Canadian Nursery Certification Program and is considered to conform with the phytosanitary import requirements of the United States.”

The [Canadian Nursery Certification Program Phytosanitary Certificate](#) (completed [CFIA/ACIA 5425, Phytosanitary Certificate \(CNCN Phytosanitary Certificate Label\)](#) attached to [CFIA/ACIA 5378, Canadian Nursery Certification Program \(CNCN Export Label Document\)](#) will be retained by CBP at the port of entry and is equivalent to the traditional *Canadian Phytosanitary Certificate* that is normally required for the entry of plants to the United States.

NOTICE

A duplicate CFIA/ACIA 5425, *Phytosanitary Certificate* label may be affixed to a copy of the completed CFIA/ACIA 5378, *Canadian Nursery Certification Program* document and can be included with other documentation which accompanies the CNCN shipment. The duplicate Certification label may facilitate entry of CNCN shipments into the State of California.

Commodities Excluded from the CNCN

The following commodities are excluded (**not** eligible) and may **not** be certified through the CNCN:

- ◆ Field crops
- ◆ Fresh fruits
- ◆ Fresh vegetables
- ◆ Fruit trees
- ◆ Grain
- ◆ Grapevines
- ◆ Plants for planting [Not Authorized Pending Pest Risk Analysis \(NAPRA\)](#) for entry into either the United States or Canada
- ◆ Prohibited plants
- ◆ Regulated invasive plants
- ◆ Regulated noxious weeds (Federal Noxious Weeds)
- ◆ Seed potatoes (*Solanum tuberosum*)
- ◆ Seeds

Eligible Plants (CNCP)

Plants **must** originate in either Canada or the United States or if imported from a third country, then **must** meet import requirements for that country into both the United States and Canada. Plants that meet these and the following phytosanitary requirements are eligible plants and may enter into the Canadian Nursery Certification Program (CNCP):

- ◆ Compliance with any pest-specific or commodity-specific phytosanitary requirements of USDA and/or CFIA;
- ◆ Compliance with USDA requirements for the country of origin;
- ◆ Compliance with specific U.S. State or Canadian provincial requirements;
- ◆ Freedom from all regulated pests to the United States and Canada; and
- ◆ Practical freedom from non-regulated plant pests.

Eligible Plants of Canadian Origin (CNCP)

Eligible plants for planting of Canadian origin **must** be grown at the Certified Facility (CF) for a period of time that is **no** less than one growing cycle for the purpose of this directive and include at least one surveillance audit (internal or external):

- ◆ Growing cycle **must** be **no** shorter than 28 days for greenhouse-grown plants and includes at least one surveillance audit (internal or external);
- ◆ Growing cycle **must** be one growing season (period or periods of the year when plants actively grow in an area, place of production, or production site) **no** less than 120 days for field-grown and container-grown plants and includes at least one surveillance audit (internal or external).

Eligible Plants from Countries Other than the U.S. and Canadian Origin That Meet Import Requirements (CNCP)

Eligible plants for planting that originate from countries **other than** the Canada and the United States that meet import requirements and are grown at the Certified Facility (CF) for a period of time:

- ◆ Growing cycle is **no** less than one growing cycle for greenhouse-grown plants and includes at least one surveillance audit (internal or external);
- ◆ Growing cycle is **no** less than one growing cycle for field-grown and container-grown plants and includes at least one surveillance audit (internal or external).

Eligible Plants from Countries Other Than the U.S. and Canada That Do Not Meet U.S. Import Requirements (CNCP)

Eligible plants for planting that originate from a country **other than** the United States and Canada that **do not** meet U.S. import requirements, but are eligible for certification under the CNCP **must** be grown at the Canadian certified facility for a period of time that is sufficient to meet U.S. import requirements:

- ◆ Growing cycle is **no** less than one growing cycle for greenhouse-grown plants and includes at least one external surveillance audit; and
- ◆ Growing cycle is **no** less than one growing cycle for field-grown and container-grown plants and includes at least one external surveillance audit.

Eligible Plant Taxa (CNCP)

Plant taxa that are eligible for certification under the Canadian Nursery Certification Program (CNCP) include all plants commonly known and recognized as plants for planting, **except** those that have been excluded by the USDA.

Plants Excluded from the Canadian Nursery Certification Program (CNCP) for Export to the United States

The following plants for planting are excluded (**not** eligible) from the Canadian Nursery Certification Program (CNCP) for export to the United States:

- ◆ Plants for planting imported in growing media from a country **other than** the United States (U.S.) and is **not** eligible under the CNCP and is prohibited entry into the U.S. regardless of the length of time it is grown in Canada, per [7 CFR 319.37](#) and [CNCP D-04-01, Appendix I](#)
 - ❖ The exception is plant material sourced from facilities that are approved under both the CFIA [Canadian Growing Media Program](#) and the USDA [Plants in Growing Media Program](#) (see also [Canadian Origin Plants in Growing Media](#))
- ◆ Plants of the genera or species listed in [CNCP D-04-01, Appendix I, Part B](#) that are **never** eligible to be exported under the CNCP
 - ❖ The exception is certain plants listed in Part B that can be inspected by CFIA and exported to the United States under a CFIA Phytosanitary Certificate, depending on the country of origin, per [7 CFR 319.37](#)
- ◆ Plants whose country of origin is **other than** Canada or the U.S. listed in [CNCP D-04-01, Appendix I, Part C](#)
 - ❖ The exceptions are other plants that **must** be grown in Canada for a minimum of one (1) calendar year in order to be considered to

originate from Canada; certain plant taxa listed in [CNCP D-04-01 Appendix I, Part C](#) can be inspected by CFIA and exported to the U.S. under a traditional CFIA phytosanitary certificate depending on the county of origin per [7 CFR 319.37](#)

- ◆ Plants that are NAPPRA or prohibited entry per [7 CFR 319.37](#) and the *Plants for Planting Manual*.

Restricted Plant Material and Taxa Not Eligible for Certification (CNCP)

Plants that are considered restricted per [7 CFR 319.37](#) **must** be grown in Canada long enough to meet USDA import requirements, including those for postentry quarantine. Restricted plant material and plant taxa that **cannot** be certified under the Canadian Nursery Certification Program (CNCP) may still be inspected by the CFIA and exported to the United States under a traditional Canadian phytosanitary certificate. Plants that are prohibited or NAPPRA **cannot** be certified and **cannot** be exported under the CNCP export program.

Authorized Facilities (CNCP)

Canadian Facilities **must** enter into a compliance agreement with the CFIA for approval and authorization. CFIA maintains the [List of Facilities](#) that are authorized to participate in the Canadian Nursery Certification Program.

If an authorized facility is suspended, then that facility will be removed from the list.

Regulated Pests (CNCP)

The Canadian Nursery Certification Program (CNCP) regulates all quarantine and regulated non-quarantine pests of the United States and Canada. The USDA [U.S. Regulated Plant Pest List](#) is available at <https://www.aphis.usda.gov/aphis/ourfocus/planthealth/import-information/rppl>. The CFIA [List of Pests Regulated By Canada](#) is available at <https://www.inspection.gc.ca/plant-health/plant-pests-invasive-species/regulated-pests/eng/1363317115207/1363317187811>.

Specific U.S. State and/or Canadian Provincial Requirements

Individual U.S. States may have specific state plant quarantine requirements for imported plants in addition to federal plant quarantine requirements. It is the responsibility of the Canadian Exporter to ensure that shipments of plants for planting meet the specific requirements of the importing state.

CITES Plants (CNCP)

Import and export of certain plant species **must** comply with requirements under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). CITES sets controls on the international trade and movement of animal and plant species that have been or may be threatened due to excessive commercial exploitation. See CITES.org for more information.

Handling U.S.-Canada Nursery Program Shipments (CNCP)

See [Table 4-2](#) to determine how to handle [Canadian Nursery Certification Program \(CNCP\)](#) shipments arriving from Canada to the U.S. under the [United States-Canada Nursery Certification Program \(NCP\)](#). See also [Inspection at Customs \(CNCP\)](#).

Table 4-2 Handling U.S.-Canada Nursery Certification Program Shipments

If the shipment:	And:	And:	Then:
Is accompanied by a completed Canadian Nursery Certification Program Phytosanitary Certificate (consists of CFIA/ACIA 5378 , Canadian Nursery Certification Program (CNCP Export Label Document) affixed with a CFIA/ACIA 5425 , Phytosanitary Certificate (CNCP Phytosanitary Certificate Label) and includes the following additional declaration: "This shipment of plants was produced in accordance with the Canadian Nursery Certification Program and is considered to conform with the phytosanitary import requirements of the United States."	Is from an authorized CNCP certified facility on the list of Nurseries participating in the Canadian Nursery Certification Program (CNCP)	Does not contain Plants Excluded from the Canadian Nursery Certification Program (CNCP) for Export to the United States	1. INSPECT and RETAIN Canadian Nursery Certification Program Phytosanitary Certificate at the port of entry 2. RELEASE
		Is other than above	REFUSE ENTRY
	Is from other than above	—————→	REFUSE ENTRY
Lacks the above	Is accompanied by a traditional Canadian phytosanitary certificate	—————→	REGULATE as plants for planting; SEE General Restrictions in the <i>Plants for Planting Manual</i>
	Lacks a traditional Canadian phytosanitary certificate	—————→	REFUSE ENTRY

Seeds Imported from Canada

Seeds are considered to be of Canadian origin (from Canada) if they are produced from parent plants grown in Canada.

Seeds for planting imported from Canada or re-exported from Canada **must** be accompanied by a phytosanitary certificate issued by the Canadian Food Inspection Agency (CFIA), **except** when meeting the requirements under [Exceptions to Phytosanitary Certificate Requirement for Seeds from Canada](#).

NOTICE

Seeds originating from any other foreign country that are re-exported from Canada are **not** exempt from phytosanitary certificate requirements and **must** meet U.S. entry requirements for the country of origin.

Certain seeds for planting from Canada require both an import permit and a phytosanitary certificate. See [Seeds from Canada That Require an Import Permit](#).

Certain seeds for planting from Canada that are United States Federal Seed Act Seeds **must** also comply with the Federal Seed Act. See [Federal Seed Act Seeds from Canada](#).

Certain seeds may have additional requirements or restrictions **other than** listed in this chapter. See the specific seed taxon in Chapter 6, [Lists of Plants for Planting](#).

Seeds of U.S. origin may re-enter from Canada if they meet the requirements of [Seeds of U.S. Origin Returning from Canada](#).

Certain seeds of Canadian origin may be imported into the U.S. when from approved Canada exporters as part of a separate seed export program. See [Canada Seed Export Program](#).

Exceptions to Phytosanitary Certificate Requirement for Seeds from Canada

The exceptions to the phytosanitary certificate requirement is for certain seeds of Canadian origin when meeting **one** of the conditions below:

- ◆ Seeds of Canadian origin are accompanied by PPQ 925, *Seed Analysis Certificate* (Federal Seed Act (FSA) seed) or CFIA Form 5289, *Seed Analysis Certificate* (non-Federal Seed Act (FSA) seed) issued by a laboratory on the list of [Laboratories Authorized to Issue Seed Analysis Certificate](#);
- ◆ Seeds of Canadian origin are exported by an approved establishment (entity) that is on the list of [Approved Exporters to Use Seed Export Labels](#) and accompanied by **both**:
 - ❖ CFIA Form 5309, *Seed Export Label*, and
 - ❖ Export certification document indicating the following:
 - ⇒ Common name of the seed
 - ⇒ Country of origin of the seed
 - ⇒ Establishment identification number
 - ⇒ Lot number
 - ⇒ Scientific name of seed

NOTICE

Federal Seed Act-Agriculture (FSA-A) and Federal Seed Act-Vegetable (FSA-V) seeds **must** include all documentation required by the Federal Seed Act.

Non-Federal Seed Act (Non-FSA) seed **must** be accompanied by documentation certifying the seeds have been inspected.

- ◆ Small lots of seed meeting the requirements of [Small Lots of Seed from Canada](#) and accompanied by a *Small Lots of Seed Permit*; or
- ◆ Seeds of Canadian origin are consigned under bond to one of the facilities on the list of [Approved Facilities to Clean Canadian Seeds](#) with an appropriate compliance agreement.

Seeds from Canada That Require an Import Permit

The following seeds from Canada require an import permit and a phytosanitary certificate for entry (unless meeting [Exceptions to Phytosanitary Certificate Requirement for Seeds from Canada](#) conditions):

- ◆ *Abelmoschus* spp.
- ◆ *Castanea* spp.
- ◆ *Cenchrus* spp.
- ◆ *Chionachne* spp.
- ◆ *Coix* spp.
- ◆ *Echinochloa* spp.
- ◆ *Eleusine* spp.
- ◆ *Euchlaena* spp.
- ◆ *Gossypium* spp.
- ◆ *Guizotia abyssinica*
- ◆ *Hibiscus* spp.
- ◆ *Miscanthus* spp.
- ◆ *Panicum* spp.
- ◆ *Pennisetum* (syn. of *Cenchrus* spp.)
- ◆ *Polytoca* spp.
- ◆ *Sclerachne* spp.
- ◆ Seeds that require treatment as a condition of entry (see [Lists of Plants for Planting](#) and [Specific Restrictions](#) to determine if treatment is required based on country of origin)
- ◆ Seeds that are obscured (coated, pelleted, or embedded in a substrate that obscures visibility) (see [Obscured Seeds from Canada](#))
- ◆ *Setaria* spp.
- ◆ Small lots of seeds (see [Small Lots of Seed from Canada](#))
- ◆ *Solanum tuberosum*
- ◆ *Sorghum* spp.
- ◆ *Zea* spp.

Federal Seed Act Seeds from Canada

Federal Seed Act (FSA) seeds imported into the U.S. from Canada or re-exported from Canada and originating from a third country **must** comply with the Federal Seed Act. The lists of FSA seeds considered Federal Seed Act-Agriculture (FSA-A) and Federal Seed Act-Vegetable (FSA-V) are included in [7 CFR 361](#). FSA seeds are identified by taxon in Chapter 6, [Lists of Plants for Planting](#).

FSA seeds of certain species may also be subject to specific restrictions found in Chapter 3, [Specific Restrictions](#) and Chapter 6, [Lists of Plants for Planting](#).

[Federal Seed Act Seeds](#) from Canada **must** meet the import provisions found in [7 CFR 361](#) and **must** include the following:

- ◆ All lots of FSA seed and screenings **must** be accompanied by a declaration from the importer of the seed or screenings that states the kind, variety, and origin of each lot of seed or screenings and intended use;
- ◆ Each container of FSA seed **must** be accurately labeled as to kind, origin, variety, and intended use;
- ◆ Each container of FSA seed **must** be labeled with the following:
 - ❖ Identification code or lot designation
 - ❖ Name of each kind or kind and variety of agricultural seed or name of each kind and variety of vegetable seed present in the lot in excess of 5 percent of the whole
 - ⇒ When the lot contains hybrid seed, the designation of “hybrid”
 - ⇒ Kind and variety names conform to the kind and variety names used in the [7 CFR 361.5](#) definitions of agricultural seed and vegetable seed;
- ◆ If FSA-A and FSA-V seeds from Canada are accompanied by PPQ Form 925, SAC or CFIA 5289, SAC, then the form **must** be issued by an approved laboratory on the list of approved [Laboratories Authorized to Issue Seed Analysis Certificates](#);
- ◆ If any seeds are treated, then each container **must** be further labeled in type **no** smaller than 8 point and as further described in [7 CFR 361.3](#);
- ◆ Seeds of Canadian origin **must** be accompanied by one of the following:
 - ❖ Phytosanitary certificate or
 - ❖ PPQ Form 925, *Seed Analysis Certificate* (SAC) issued by an approved laboratory on the list of [Approved Laboratories Authorized to Issue Seed Analysis Certificates](#). If a shipment **does not** arrive with

- a valid PPQ 925, SAC or CFIA 5289, SAC, then the shipment will be sampled at the port of entry;
- ◆ Seeds originating from any other foreign country and being re-exported from Canada **must** be accompanied by the following:
 - ❖ Phytosanitary certificate may be **either**:
 - ⇒ Canada re-export phytosanitary certificate accompanied by the phytosanitary certificate from the country of origin
OR
 - ⇒ Canada phytosanitary certificate listing the country of origin
AND
 - ❖ CFIA 5289, Seed Analysis Certificate (SAC) issued by an approved laboratory on the list of [Laboratories Authorized to Issue Seed Analysis Certificates](#)
 - ⇒ If a shipment **does not** arrive with a CFIA 5289, SAC, then the seed shipment will be sampled at the port of entry;

NOTICE

Seeds originating from any other foreign country that are re-exported from Canada are **not** exempt from phytosanitary certificate requirements and **must** meet U.S. entry requirements for the country of origin.

- ◆ Seeds **must** be sampled for Federal Noxious Weeds at the first port of arrival as described in [7 CFR 361](#), unless meeting the [Exceptions to Sampling Federal Seed Act Seeds at Port of Entry](#) or if accompanied by a valid PPQ 925, SAC or CFIA 5289, SAC; and
- ◆ If the Canadian exporter is on the list of [Approved Exporters to Use Seed Export Labels](#), then a CFIA 5309, *Seed Export Label* may be used in place of either PPQ 925, *Seed Analysis Certificate* or CFIA 5289, *Seed Analysis Certificate*.

Cleaning of Imported Federal Seed Act Seeds from Canada

Federal Seed Act-Agriculture (FSA-A) and Federal Seed Act-Vegetable (FSA-V) seeds of Canadian origin found to be above noxious weed seed tolerances set in [7 CFR 361.6\(b\)](#) may be forwarded under bond to an approved cleaning facility on the list of [Approved Facilities to Clean Canadian Seeds](#).

Federal Seed Act seed destined to an approved cleaning facility in the United States **must** have the USDA Federal Noxious Weed(s) found in the shipment listed on the PPQ Form 925, *Seed Analysis Certificate* or CFIA 5289, *Seed Analysis Certificate*. The seed **must** be cleaned in accordance with [7 CFR 361.8](#) at the expense of the owner or consignee of the seed.

Exceptions to Sampling Federal Seed Act Seeds at Port of Entry

The exceptions to sampling Federal Seed Act Seeds at the port of entry are as follows:

- ◆ Seeds for sowing imported for experimental or breeding purposes and is **not** for sale:
 - ❖ Lot size is limited; see [7 CFR 361.5](#), Sampling of seeds, Table 1, and:
 - a. Locate the name of FSA seed.
 - b. Find the maximum weight of seed lot permitted entry for experimental or breeding purposes **without** sampling (pounds) in column (3) per [7 CFR 361.4\(a\)\(4\)](#).
 - ❖ Require a phytosanitary certificate and a declaration stating the purpose for which the seed is being imported;
- ◆ Seeds being shipped in bond through the United States;
- ◆ Seeds **not** being imported for seeding (planting) purposes and accompanied by a declaration stating the other intended purpose; and
- ◆ Screenings of certain seeds being imported for processing or manufacturing purposes.

For more information see [7 CFR 361.4](#) and [7 CFR 361.7](#).

Obscured Seeds from Canada

Obscured seeds include seeds that are coated, pelleted, or embedded in tape, mats or in any other substrate that obscures visibility.

Obscured seeds of Canadian origin **must** meet the following conditions for import into the United States:

- ◆ **Must** be accompanied by a phytosanitary certificate
OR
- ◆ **Does not** require a phytosanitary certificate when accompanied by either:
 - ❖ PPQ Form 925, *Seed Analysis Certificate* or CFIA 5289, *Seed Analysis Certificate* issued by a laboratory on the list of [Approved Laboratories Authorized to Issue Seed Analysis Certificates](#) or
 - ❖ CFIA 5309, *Seed Export Label*, exporter on the list of [Approved Exporters to Use Seed Export Labels](#);
- ◆ **Must** be accompanied by an officially drawn and sealed sample of seed that was drawn before the seed was coated, embedded, or pelleted:
 - ❖ Sample **must** be identified as “Official Seed Sample” and

- ❖ Official Seed Sample **must** be presented to a CBP Officer for inspection at the port of entry;
- ◆ **Must** be accompanied by a USDA permit *PPQ 587, Permit to Import Plants or Plant Products* issued for Obscured Seed;
- ◆ **Must** be generally admissible into the U.S. under PPQ Form 587, *Permit to Import Plants or Plant Products*, **not** require treatment, and have **no** specific restriction; and
- ◆ Meet the [Obscured Seeds](#) requirements.

Obscured seeds from Canada that **do not** meet the conditions above are **not** admissible because the seed **cannot** be properly inspected.

See [Capsicum spp. Seeds from Canada](#) and [Solanum lycopersicum Seeds from Canada](#).

If from **other than** Canada, then see [Obscured Seeds](#) to determine admissibility.

If CBP inspectors find any quarantine pests for the United States, then the shipment will be refused entry into the U.S.

Seeds in Pulp of Canadian or U.S. Origin

Seeds in pulp for planting of Canadian origin or U.S. origin may **only** enter from Canada if accompanied by a phytosanitary certificate. An import permit is required for seeds from Canada that require a permit (see [Seeds from Canada That Require an Import Permit](#)). Seeds in pulp from any other country of origin are **prohibited**.

Small Lots of Seed from Canada

Seeds imported from Canada through the USDA [Small Lots of Seeds](#) program and accompanied by a [Small Lots of Seed Permit](#) **do not** require a phytosanitary certificate or a *Seed Analysis Certificate*.

See [Small Lots of Seed Permit](#) for additional information.

See [Capsicum spp. Seeds from Canada](#) and [Solanum lycopersicum Seeds from Canada](#).

NOTICE

A [Small Lots of Seed Permit](#) **cannot** be issued for *Capsicum* spp. seeds or *Solanum lycopersicum* seeds due to requirements for entry.

Ports of Entry for Seeds for Planting of Canadian Origin

Canadian origin seeds for planting entering from Canada are subject to inspection by Customs and Border Protection (CBP) at designated [Approved Ports of Entry](#) at the Canadian Border, but generally **do not** require movement to a USDA plant inspection station. Continue to [Seeds Required to Enter at a Port With a USDA Plant Inspection Station](#).

Seeds Required to Enter at a Port With a USDA Plant Inspection Station

The following seeds imported from Canada into the U.S. **must** enter at a port with a USDA plant inspection station:

- ◆ *Abelmoschus* spp. (okra) seeds
- ◆ *Castanea* spp. (chestnut) seeds
- ◆ *Guizotia abyssinica* (niger) seeds
- ◆ *Hibiscus* spp. (hibiscus, rose mallow) seeds
- ◆ Seeds requiring treatment as a condition of entry as indicated in Chapter 6, [Lists of Plants for Planting](#)
- ◆ Seeds entering under permit that require entry through a plant inspection station.

See [Table 2-4, Approved CBP Ports of Entry and Designated USDA Plant Inspection Stations](#).

Seeds of U.S. Origin Returning from Canada

Seeds for planting of U.S. origin that were exported to Canada may be re-imported into the U.S. from Canada when accompanied by all of the following documents (unless meeting [Exception for Seeds of U.S. Origin Returning from Canada](#)):

- ◆ Document issued by Canadian Food Inspection Agency (CFIA) indicating that the seed was not admitted into the commerce of Canada;
- ◆ Document issued by CFIA indicating the seeds were **not** commingled with other seed after being exported to Canada; and
- ◆ Export documents indicating:
 - ❖ Date of exportation from the United States
 - ❖ Distinguishing marks on the containers at the time of exportation
 - ❖ Name and address of the United States exporter
 - ❖ Quantity of seed and number of containers

Exception for Seeds of U.S. Origin Returning from Canada

If the seeds are in their original, sealed packaging, then they may be considered for re-entry into the U.S. from Canada **without** the CFIA documentation that the seed was **not** admitted into the commerce of Canada or a document stating that the seeds were **not** commingled with other seed after being exported to Canada.

Canada Seed Export Program

The [Canadian Phytosanitary Certification Program for Seeds \(CPCPS\)](#) is the seed export program established by the Canadian Food Inspection Agency which allows approved seed facilities to ship seeds using a CFIA 5309, *Seed Export Label*. See list of [Approved Exporters to Use Seed Export Labels](#).

If the following conditions are met, then certain seeds imported from Canada may be imported **without** a phytosanitary certificate under the [CPCPS](#).

The Canadian Food Inspection Agency (CFIA) shall:

- ◆ Establish and administer a seed export program under which Canadian exporters of seed may operate ([Canadian Phytosanitary Certification Program for Seeds](#));
- ◆ Assign a unique identification number to each exporting establishment enrolled in and approved by the seed inspection program;
- ◆ Provide APHIS with a current list of the establishments participating in its seed export program:
 - ❖ Include approved names, locations, telephone numbers, and establishment identification numbers at the start of the shipping season
 - ❖ Provide regular updates to that list throughout the shipping season;
- ◆ Enter into an agreement with APHIS that specifies the documents that **must** accompany shipments of seeds under the seed export program:
 - ❖ Federal Seed Act-Agriculture (FSA-A) and Federal Seed Act-Vegetable (FSA-V) seeds, as listed in the provisions of the Federal Seed Act regulations found in [7 CFR 361](#), **must** be accompanied by a document certifying that the relevant provisions of the Federal Seed Act have been followed, and
 - ❖ Seeds **other than** Federal Seed Act Seeds (non-FSA) **must** be accompanied by a document certifying that the seeds have been inspected;
- ◆ Each seed exporter participating in the seed export program [[Canadian Phytosanitary Certification Program for Seeds \(CPCPS\)](#)], shall enter into an agreement with the CFIA in which the exporter agrees to:
 - ❖ Practice any and all safeguards the CFIA may prescribe in order to ensure that:
 - ⇒ Seed exported to the United States is free of plant pests;
 - ⇒ Seed that **does not** meet the requirements for exportation to the United States is segregated from seed that does meet the requirements of the seed export program (seed **not** meeting the requirements **must not** enter the seed export program);

- ❖ Include an export certification document with each shipment indicating:
 - ⇒ Common name of the seed
 - ⇒ Scientific name of the seed
 - ⇒ Country of origin of the seed
 - ⇒ Establishment identification number assigned to the exporting establishment under the Canadian Food Inspection Agency's seed export program [[Canadian Phytosanitary Certification Program for Seeds \(CPCPS\)](#)]
 - ⇒ Lot number;
- ❖ FSA-A and FSA-V seeds, as listed in the provision of Federal Seed Act found in [7 CFR 361](#), **must** include all other documentation required by relevant provisions of the Federal Seed Act found in [7 C FR 361](#); and
- ❖ Seeds **other than** Federal Seed Act seeds (**non-FSA seeds**) **must** be accompanied by a document certifying that the seeds have been inspected, as agreed upon by the Canadian Food Inspection Agency and APHIS.

Gypsy Moth Host Material from Canada

Trees and shrubs from Canada are regulated to prevent the spread of gypsy moth (*Lymantria dispar*) from Canada into non-infested areas of the United States.

Greenhouse Grown Trees and Shrubs from Canada

Trees and shrubs from Canada that were greenhouse-grown throughout the year in Canada are **not** regulated for gypsy moth.

Trees and Shrubs Destined to Gypsy Moth Infested Areas

Trees and shrubs from Canada that are destined for a U.S. gypsy moth infested area and will **not** be moved through any U.S. noninfested area are **not** regulated for gypsy moth.

Trees and Shrubs Destined To or Through Gypsy Moth Noninfested Areas

If the trees or shrubs from Canada (**except** greenhouse grown) are destined for a U.S. noninfested gypsy moth area or will be moved through a U.S. noninfested area, they **must** meet the following conditions:

- ◆ If the trees or shrubs originated in a Canadian gypsy moth infested area, then they **must** be accompanied by:
 - ❖ Phytosanitary certificate issued by Canadian Food Inspection Agency (CFIA) with an additional declaration confirming either:
 - ⇒ Trees or shrubs have been inspected and found free of gypsy moth; or
 - ⇒ Trees or shrubs have been treated for gypsy moth in accordance with the PPQ Treatment Manual.
- ◆ If trees or shrubs originated in a Canadian gypsy moth noninfested area, then they **must** be accompanied by either of the following:
 - ❖ Phytosanitary certificate issued by the CFIA with an additional declaration specifying that the trees or shrubs were produced in an area of Canada where gypsy moth is **not** known to occur; or
 - ❖ Phytosanitary certificate issued by the CFIA **without** the additional declaration, but with a Certificate of Origin specifying that the trees or shrubs were produced in an area of Canada where gypsy moth is **not** known occur.

Gypsy Moth Infested Areas in Canada

Lists and maps of areas in Canada that are known to be infested with gypsy moth are available at Canadian Food Inspection Agency's [List of North American Gypsy Moth Infested or Suspected Infested Areas of Canada](#).

Gypsy Moth Infested Areas in the United States

A list of areas in the U.S. that are known to be infested with gypsy moth is available at the USDA's [Areas Quarantined in the United States for Gypsy Moth](#).

Potato Cyst Nematode (PCN) Host Material from Canada

Plants for planting (**except** seeds, unrooted cutting) are regulated for the potato cyst nematodes (PCN) *Globodera pallida* and *Globodera rostochiensis* when from an area in Canada regulated by the Canadian Food Inspection Agency for PCN.

If from an [area regulated by the Canadian Food Inspection Agency \(CFIA\) for PCN](#), then see [Potato Cyst Nematodes \(PCN\), Solanum tuberosum from Canada](#), and [Solanum tuberosum from Prince Edward Island, Canada](#).

Fraxinus spp. from Canada

The importation of *Fraxinus* spp. (ash) plants for planting (**except** seeds) from emerald ash borer (EAB) infested areas in Canada into the United States is prohibited.

Currently **only** certain areas (cities, counties, or territories) in Canada are infested with emerald ash borer. See the [CFIA Emerald Ash Borer Regulated Areas](#) website for the latest information on emerald ash borer regulated (EAB) areas in Canada.

Fraxinus spp. from EAB Free Areas within EAB Infested Provinces

Fraxinus spp. plants for planting (**except** seeds) from emerald-ash free areas (cities, counties, or territories) that are within the provinces of Canada that have EAB-infested areas **must** be accompanied by both an import permit **and** a Canadian phytosanitary certificate with an additional declaration (AD) that states:

The material in this consignment was produced/harvested in a city, county municipality or territory in Canada where emerald ash borer (*Agrilus planipennis*) **does not** occur based on official surveys.

If the shipment **lacks** a phytosanitary certificate with the additional declaration, then prohibit entry.

Fraxinus spp. from Provinces of Canada That Do Not Have EAB

Fraxinus spp. plants for planting (**except** seeds) from provinces of Canada that **do not** have emerald ash borer infested areas **do not** require an import permit and **do not** require the additional declaration above on the phytosanitary certificate.

See [Plants for Planting from Canada That Require a Permit](#) on page 4-7 for more information.

NOTICE

Check the [CFIA Emerald Ash Borer Regulated Areas](#) website to determine if a city, county, or area in Canada is regulated for EAB.

Hemp (*Cannabis sativa*) Imported from Canada

Plant and plant products of *Cannabis sativa* with a THC content of **less than or equal to 0.3%** are **not** regulated as controlled substances by the Drug Enforcement Agency (DEA).

The following are requirements for importation of hemp seeds and plants into the United States from Canada:

- ◆ Hemp seeds may be imported into the United States from Canada if accompanied by **either**: 1) a phytosanitary certificate from Canada's National Plant Protection Organization (NPPO) to verify the origin of the seed and to confirm **no** plant pests are detected; **or** 2) a Federal Seeds Analysis Certificate (SAC, PPQ Form 925) for hemp seeds grown in Canada
- ◆ Hemp plants may be imported into the United States from Canada if accompanied by a phytosanitary certificate from Canada's NPPO to verify the origin of the plant and to confirm **no** plant pests are detected
- ◆ Hemp plant and seed shipments will be inspected upon arrival at the first port of entry by Customs and Border Protection (CBP) and/or at a USDA Plant Inspection Station (PIS) to ensure USDA regulations are met, including certification and freedom from plant pests

Hydrangea spp. Re-exported from Canada to the U.S.

Hydrangea spp. plants (**except** seeds) that were re-exported from and grown in Canada under postentry quarantine, but originated from a country **other than** Japan **must** be accompanied by the following:

- ◆ Canadian re-export phytosanitary certificate **must** certify the plants have been inspected and the additional declaration **must** state:
“The *Hydrangea* spp. plants in this shipment have been grown in Canada under the postentry quarantine conditions equivalent to those of APHIS.”
- ◆ Copy of the phytosanitary certificate from the country of origin **must** accompany the re-export phytosanitary certificate

PIM Letter OC 20110418CACA Hydrangea, effective April 25, 2011

When **not** meeting the above requirements, then prohibit entry of *Hydrangea* spp. plants (**except** seeds) that have been re-exported from Canada.

Pinus spp. from Canada

Pinus spp. plants (**except** seeds) from Canada **must** be accompanied by an import permit issued by the APHIS-PPQ.

Pinus spp. (pine) plants for planting from Canada are regulated for the following:

- ◆ *Anoplophora chinensis* (CLB) and *Anoplophora glabripennis* (ALB) from Canada that originated in a third country (see [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#))
 - ❖ *Pinus* spp. plants that were exported from Canada and **never** grown in a third country are **not** regulated for [Anoplophora chinensis \(CLB\)](#) and [Anoplophora glabripennis \(ALB\)](#)
- ◆ *Globodera rostochiensis* and *Globodera pallida* (potato cyst nematodes) (see [Potato Cyst Nematode \(PCN\) Host Material from Canada](#))
- ◆ *Lymantria dispar* (gypsy moth) (see [Gypsy Moth Host Material from Canada](#))

Solanum tuberosum from Canada

Solanum tuberosum (potato) plants for planting (**except** true seed; see [Solanum spp. true seed](#)) for import into the U.S. from Canada **must** be accompanied by a phytosanitary certificate issued by the Canadian Food Inspection Agency (CFIA) with **one** of the following additional declarations stating that the shipment is free from potato cyst nematodes (PCN):

Fields used to produce the seed potatoes in this shipment were surveyed and tested according to the current PCN Guidelines and potato cyst nematodes (*Globodera rostochiensis* and *Globodera pallida*) were **not** detected.

OR

The plants in this shipment were grown in a PCN-free place of production or pest-free production site and in a manner to prevent infestation by potato cyst nematodes (*Globodera rostochiensis* and *Globodera pallida*).

For specific requirements related to the establishment of pest-free places of production or pest-free production sites within regulated areas, see [Canada and United States Guidelines on Surveillance and Phytosanitary Actions for the Potato Cyst Nematodes *Globodera rostochiensis* and *Globodera pallida*, 7 May 2014](#).

If from Prince Edward Island, then continue to [Solanum tuberosum from Prince Edward Island, Canada](#).

Solanum tuberosum from Prince Edward Island, Canada

Solanum tuberosum (seed potatoes) for planting (**except** true seed; see [Solanum spp. true seed](#)) from Prince Edward Island (PEI), Canada are prohibited entry into the United States, the District of Columbia, Guam, the Commonwealth of the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands to prevent the introduction of the fungal causal agent *Synchytrium endobioticum* (potato wart).

Solanum tuberosum in-vitro plantlets, micro-tubers, and mini-tubers for planting are allowed entry, but require a permit per [Federal Order Effective April 1, 2022](#).

Introduction

The [Postentry Quarantine](#) chapter provides information about the postentry requirements for certain plants for planting in the Postentry Quarantine Program.

Postentry Quarantine Program

Postentry quarantine is the inspection and quarantine growing period following admission of certain plants for planting at a port of entry to verify whether or **not** the plants are infected or infested with quarantine pests. The postentry quarantine restriction may be placed on the importation of certain taxa of plants for planting based upon an identified pest risk. Seeds are **exempt** from postentry quarantine.

Imported plants that require postentry quarantine are listed in [Table 5-2](#). [General Restrictions](#) apply and other [Specific Restrictions](#) may apply. See the individual plant taxon in the [Lists of Plants for Planting](#).

EXAMPLE *Blighia sapida* **must** enter postentry quarantine from all countries **except** Canada, Cote d'Ivoire, and Nigeria. *Blighia sapida* is admissible **without** postentry quarantine from Canada but is **Not Authorized Pending Pest Risk Analysis (NAPPRA)** from Cote d'Ivoire and Nigeria.

Plants for planting (**except** seeds) whose importation is subject to postentry quarantine **must** be as follows:

- ◆ Be accompanied by a valid Postentry Quarantine Permit (see [Applications for Permits](#));
- ◆ Be destined to a State that has completed a State postentry quarantine agreement with APHIS (see [State Postentry Quarantine Agreement](#)); and
- ◆ Be imported under an importer postentry quarantine growing agreement (see [Importer Postentry Quarantine Growing Agreement](#))
 - ❖ Postentry quarantine growing agreement **must** be signed by the same person (importer) importing the plants
 - ❖ Postentry quarantine growing agreement **must** be signed by the appropriate State Plant Regulatory Official (SPRO) or designee (in the State where the plants will be grown)
 - ❖ PPQ **must** have determined that the completed postentry quarantine growing agreement fulfills the applicable requirements of the [Postentry Quarantine Program](#)
 - ❖ Services by State inspectors are available to monitor and enforce the postentry quarantine (State nursery inspectors are responsible for performing and documenting the required inspections)
 - ❖ State Postentry Quarantine Agreement

Plants for planting that are required to undergo postentry quarantine may **only** be imported if destined for postentry quarantine growing in a State which has entered into a written agreement with APHIS, signed by the Administrator or his or her designee and by the State Plant Regulatory Official.

In accordance with the laws of individual States, inspection and other postentry quarantine services provided by a State may be subject to charges imposed by the State.

See the list of U.S. States and territories that have entered into a postentry quarantine agreement with APHIS (a signed memorandum of understanding (MOU) in [Table 5-1](#)).

The State, in the written postentry quarantine agreement (MOU), shall agree to:

- ◆ Establish State regulations and requirements prior to the effective date of the agreement and enforce such regulations and requirements necessary to inspect sites and plants growing in postentry quarantine and to monitor and enforce compliance with the [Postentry Quarantine Program](#);
- ◆ Review pending permit applications for plants to be grown under postentry quarantine conditions in the State, upon request of Plant Protection and Quarantine, and report to the National Postentry Quarantine Coordinator of Plant Protection and Quarantine whether the State would be able to provide inspection and monitoring services for the proposed postentry quarantine;
- ◆ Provide the services of State inspectors to:
 - ❖ Inspect sites to be used for postentry quarantine;
 - ❖ Report to the APHIS-PPQ whether the site is of adequate size to contain the number of plants proposed for importation, including potential increase if increase is allowed (part of permit approval process)
 - ⇒ Permit Unit sends request for the State to do growing site screening
 - ⇒ State returns PPQ 546, Agreement for Postentry Quarantine State Screening Notice to the Permit Unit
 - ⇒ Permit Unit reviews and if all conditions are met, issues permit
 - ❖ If the permittee wants to increase the number of plants already in Postentry Quarantine, then the State will have to perform a site visit to ensure there is space to do so, and recommend the increase or deny in writing to the Postentry Coordinator:

Anthony Man-Son-Hing
National Coordinator, Postentry Quarantine Program
National Operations Manager
USDA-APHIS-PPQ
920 Main Campus Drive, Suite 200
Raleigh, NC 27606
Email: anthony.man-son-hing@usda.gov
Fax: 919-855-7390
Phone: 919-855-7331
Cell: 919-337-6338

- ❖ Inspect plants for evidence of quarantine pests at least once during the first year and once during the second year for plants required to be grown in postentry quarantine for 2 years, and at least once for plants

required to be grown in quarantine for less than 2 years (details of when to inspect (spring, summer, or fall) are in the [Postentry Quarantine Manual](#))

- ❖ Monitor and enforce compliance with the requirements of the [Postentry Quarantine Program](#) during the use of the sites for postentry quarantine;
- ◆ Report to the National Postentry Quarantine Coordinator of Plant Protection and Quarantine any evidence of quarantine pests that are found at a postentry quarantine site by State inspectors;
- ◆ Recommend to Plant Protection and Quarantine safeguards or mitigation measures to control the pests; and supervise the application of safeguards or mitigation measures approved by Plant Protection and Quarantine; and
- ◆ Report to the National Postentry Quarantine Coordinator of Plant Protection and Quarantine any propagation or increase in the number of plants that occurs during postentry quarantine.

The Administrator, in the written postentry quarantine agreement, shall agree to:

- ◆ Seek State review of permit applications for postentry quarantine material in that State, and issue permits only after determining that State services are available to monitor the postentry quarantine;
- ◆ Upon request of the State, provide training, technical advice, and pest identification services to State officials involved in providing postentry quarantine services in accordance with the [Postentry Quarantine Program](#); and
- ◆ Notify State officials, in writing and within 10 days of the arrival, when plant material destined for postentry quarantine in their State arrives in the United States, and notify State officials in writing when materials in postentry quarantine may be released from quarantine in their State.

Termination of State Postentry Quarantine Agreement

A State postentry quarantine agreement may be terminated by either the Administrator or the State Plant Regulatory Official by giving written notice of termination to the other party. The effective date of the termination will be 60 days after the date of actual receipt of notice, with regard to future importation to that State of plants requiring postentry quarantine in accordance with the [Postentry Quarantine Program](#).

When a postentry quarantine agreement is terminated by either the State Plant Regulatory Official or the Administrator, APHIS and the affected State shall continue to provide postentry quarantine services in accordance with the postentry quarantine agreement, until the time the plant material is eligible to be released from quarantine, for all postentry quarantine material already in the

State, and for all postentry quarantine material that arrives in the State prior to the effective date of termination.

State inspectors should see the [Postentry Quarantine Manual](#) for more information.

States With Postentry Quarantine Agreements

Table 5-1 List of States With Postentry Quarantine Agreements

State	Cooperator	End Date
Alaska (AK)	Alaska DNR Division of Agriculture	06/10/2025
Alabama (AL)	Alabama Department of Agriculture	1/14/2020
Arkansas (AR)	Arkansas State Plant Board	10/21/2024
Arizona (AZ)	Arizona Department of Agriculture	09/16/2025
California (CA)	California Department of Food and Agriculture (CDFA)	12/08/2024

Wisconsin (WI)	Wisconsin Department of Agriculture	08/02/2025

Importer Postentry Quarantine Growing Agreement

Any plants for planting and any increase therefrom¹ (**except** seeds) that are required to be grown under postentry quarantine conditions, shall be grown in accordance with an importer postentry quarantine growing agreement (*PPQ Form 546, Agreement for Postentry Quarantine State Screening Notice*), signed by the person (applicant importing the plants), and submitted to APHIS-Plant Protection and Quarantine as part of the application process (see [Applications for Permits](#)).

On each importer postentry quarantine growing agreement, the person shall also obtain the signature of the State Plant Regulatory Official for the State in which plants for planting covered by the agreement will be grown. The importer *Postentry Quarantine Growing Agreement* shall specify the following:

- ◆ Kind, number, and origin of plants to be imported;
- ◆ Conditions under which the plants for planting will be grown, maintained, and labeled:
 - ❖ Grow or increase the plants for planting **only** on specified premises owned, rented, or otherwise in possession of the importer, within a space of dimensions designated by an inspector, and to move, propagate, or allow propagation of the plants or increase or parts thereof **only** with the written permission of the National Postentry Coordinator:

Anthony Man-Son-Hing
National Coordinator, Postentry Quarantine Program
National Operations Manager
USDA-APHIS-PPQ
920 Main Campus Drive, Suite 200
Raleigh, NC 27606
Email: anthony.man-son-hing@usda.gov
Fax: 919-855-7390
Phone: 919-855-7331
Cell: 919-337-6338
 - ❖ Permit an inspector to have access to the specified premises for inspection of such plants during regular business hours;
 - ❖ Keep the plants and any increase identified with a label showing the name of the plant, port accession number, and date of importation;
 - ❖ Keep the plants separated from any other plant or plant product by **no** less than 3 meters (approximately 10 feet) unless such other plant or

¹ Increase therefrom refers to the creation of new plants from mother plants by air layers, cutting, flowers, grafting, seeds, or suckers

- plant product is of the same genus as the plants, entered postentry quarantine with the plant(s), and arrived together with the plant(s) in a single shipment from a foreign region;
- ❖ Allow or apply remedial measures (including destruction) determined by an inspector to be necessary to prevent the spread of a quarantine pest;
 - ❖ Grow the plants or increase therefrom in postentry quarantine for a period of 2 years unless specified otherwise in the following:
 - ⇒ If a plant of *Rubus* spp. (cloudberry, blackberry, boysenberry, dewberry, loganberry, raspberry) from Europe, to grow the plant or increase therefrom **only** in a screenhouse with screening of a minimum of 16 mesh per inch;
 - ⇒ If a plant of *Chrysanthemum* spp. (syn. *Dendranthema* spp.), *Leucanthemella serotina*, and *Nipponanthemum nipponicum*, to grow the plant or increase therefrom **only** in a greenhouse or other enclosed building, and to comply with the above conditions for a period of 6 months after importation;
 - ⇒ If a plant of *Dianthus* spp. (carnation, sweet-William), to grow the plant or increase therefrom **only** in a greenhouse or other enclosed building, and to comply with the above conditions for a period of 1 year after importation;
 - ⇒ If a plant of *Hydrangea* spp., to grow the plant or increase therefrom **only** in a greenhouse or other enclosed building, and to comply with the above conditions for a for a period of 9 months after importation;
 - ◆ To keep the plants under postentry quarantine conditions until the National Postentry Quarantine Coordinator issues a written release for the plant
 - ◆ Reporting requirements in the case of abnormal or dead plants for planting
 - ❖ Notify an inspector, orally or in writing, within 30 days of the time the importer or the person in charge of the growing site finds any abnormality of the plant, or the plant dies or is killed by the importer, the person in charge of the growing site, or any other person;
 - ❖ Retain the abnormal or dead plant(s) for at least 60 days following that date of notification;
 - ❖ Give the abnormal or dead plant(s) to an inspector upon request;
 - ◆ Certify to APHIS and to the State in which the plants for planting are grown that the signer of the agreement will comply with the conditions of the agreement for the postentry quarantine growing period prescribed for the taxa of plants for planting in this [Postentry Quarantine](#) chapter.

Applications for Permits

A completed importer postentry quarantine agreement shall accompany the application for a written permit for plants for planting that are required to be grown under postentry quarantine conditions.

Importer Postentry Quarantine Agreement forms are available **without** charge from the Animal and Plant Health Inspection Program, 4700 River Road, Unit 136, Riverdale, MD 20737-1236 or from [ePermits \(PPQ 546, Application for Propagative Plants that Require Postentry Quarantine\)](#) on the Internet.

When completing the PPQ 546 Postentry Quarantine Import Application, please be sure to complete block 5, growing location of the actual PEQ plants.

After the PEQ growing agreement is validated (signed) by the State Plant Regulatory Official, the PEQ growing agreement becomes the application to import the postentry quarantine plants as listed in the agreement. Postentry quarantine agreements meeting requirements for entry may be issued by the Permit Unit.

Inspector-ordered Disposal, Movement, or Safeguarding of Plants for Planting, Costs and Charges, Civil and Criminal Liabilities

See the following for inspector-ordered disposal, movement, safeguarding of plants for planting, costs and charges, and civil and criminal liability requirements:

- ◆ [Growing at Authorized Sites](#)
- ◆ [Growing at Unauthorized Sites](#)
- ◆ [Costs and Charges](#)
- ◆ [Civil and Criminal Liabilities](#)

Growing at Authorized Sites

If an inspector determines that any plants for planting or any increase therefrom grown at a site specified in the authorized *Postentry Quarantine Growing Agreement* are being grown contrary to the provisions of this *Postentry Quarantine* chapter, including either of the following:

- ◆ In numbers (quantities) greater than the number approved by the Postentry Quarantine Growing Agreement, or
- ◆ In a manner that otherwise presents a risk of introducing quarantine pests into the United States,

then the inspector may issue a Letter of Information (LOI) or *PPQ 523, Emergency Action Notice*, to the person who signed the *Postentry Quarantine Growing Agreement*. That person (importer) shall be responsible for carrying out all actions specified in the *Emergency Action Notification*.

The *Emergency Action Notification* (EAN) may:

- ◆ Extend the time for which the plants for planting and the increase therefrom **must** be grown under the postentry quarantine conditions specified in the authorized Postentry Quarantine Growing Agreement
- ◆ Require that the person named in the EAN **must** do to the plants for planting, the increase therefrom, or any portion of the plants for planting or the increase therefrom within the time specified in the EAN, one of the following:
 - ❖ Apply treatments apply treatments or other safeguards,
 - ❖ Destroy, or
 - ❖ Ship to a point outside the United States (Re-export).

The inspector, in choosing which action to order and in setting the time limit for the action to list on the EAN, shall consider the following:

1. Degree of pest risk presented by the quarantine pests associated with the type of plants for planting including increase therefrom;
2. Types of other host materials for the pest in or near the growing site;
3. Climate and season at the site in relation to the pest's survival; and
4. Availability of treatment facilities.

Growing at Unauthorized Sites

If an inspector determines that any plants for planting subject to postentry quarantine growing requirements or any increase therefrom are being grown at an unauthorized site, then the inspector may issue a Letter of Information (LOI) or *PPQ 523, Emergency Action Notification* (EAN) with the owner of the plants for planting or the person who owns or is in possession of the site on which the plants for planting are being grown.

The person named in the Letter of Information or *PPQ 523, Emergency Action Notification* **must** within the time specified in the 523, do any of the following as prescribed by an inspector to prevent the introduction of quarantine pests into the United States:

- ◆ Apply treatments
- ◆ Apply other safeguards
- ◆ Destroy
- ◆ Move to an authorized postentry quarantine site
- ◆ Ship to a point outside the United States
- ◆ Sign a *PPQ 546, Postentry Growing Agreement*

In choosing which action to order and in setting the time limit for the action, the inspector shall consider the following:

- ◆ Degree of pest risk presented by the quarantine pests associated with the type of plants for planting including increase therefrom;
- ◆ Availability of treatment facilities;
- ◆ Climate and season at the site in relation to the pests survival; and
- ◆ Types of other host materials for the pest in or near the growing site.

Costs and Charges

Costs and charges of postentry quarantine plants for planting and increase therefrom are as follows:

- ◆ All costs pursuant to any action ordered by an inspector in accordance with this [Postentry Quarantine](#) chapter requirements shall be borne by the person who signed the *Postentry Quarantine Growing Agreement* covering the site where the plants for planting were grown;
or
- ◆ If **no** *Postentry Quarantine Growing Agreement* was signed, then costs shall be borne by the owner of the plants for planting at the postentry quarantine growing site.

Civil and Criminal Liabilities

The person(s) committing either of the following shall be subject to civil penalties and criminal liabilities as provided by 18 U.S.C. 1001, 7 U.S.C. 7734, or other applicable Federal statutes:

- ◆ Any person who moves plants for planting that are subject to postentry quarantine growing requirements from the site specified in an authorized *Postentry Quarantine Growing Agreement*
or
- ◆ Any person who otherwise handles plants for planting that are subject to postentry quarantine growing requirements from the site contrary to the requirements

Postentry Quarantine

Table 5-2 List of Restricted Postentry Quarantine Plants for Planting (except seeds)

Restricted plants for planting (except seeds)	And:	Postentry quarantine is required from:
NOTICE		
<p>In addition to the postentry quarantine restrictions below, General Restrictions apply and other Specific Restrictions may apply. See the individual taxon in the Lists of Plants for Planting.</p>		
<i>Abelmoschus</i> spp.	→	All countries and territories except those Not Authorized Pending Pest Risk Analysis (NAPPRA) and Canada (NAPPRA from Algeria, Angola, Bangladesh, Benin, Botswana, Brazil, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic People’s Republic of), Cote d’Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Eswatini (Swaziland), Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, India, Iraq, Kenya, Liberia, Lesotho, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Papua New Guinea, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sri Lanka, Sudan, Tanzania, Tobago, Togo, Trinidad, Tunisia, Uganda, Zambia, Zimbabwe)
<i>Acca sellowiana</i>	→	All countries except Canada New Zealand when not meeting Acca sellowiana conditions for entry
<i>Acer</i> spp.	→	New Zealand
<i>Acer japonicum</i>	→	Netherlands, New Zealand
<i>Acer palmatum</i>	→	Netherlands, New Zealand

Table 5-2 List of Restricted Postentry Quarantine Plants for Planting (except seeds) (continued)

Restricted plants for planting (except seeds)	And:	Postentry quarantine is required from:
<i>Althaea</i> spp.	→	All countries and territories except those prohibited from (Algeria, Angola, Bangladesh, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic People's Republic of), Congo (Republic of), Cote d'Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Eswatini (Swaziland), Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, India, Kenya, Liberia, Lesotho, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sri Lanka, Sudan, Tanzania, Togo, Tunisia, Uganda, Zambia, Zimbabwe) and Canada
<i>Anacardium</i> spp.	→	All countries except Canada
<i>Annona</i> spp.	→	Costa Rica
<i>Averrhoa</i> spp.	→	All countries except Canada
<i>Berberis</i> spp.	Black stem rust resistant species and horticultural varieties listed in Table 3-16 and destined to other than Black Stem Rust Eradication States	All countries
	Black stem rust resistant species and horticultural varieties listed in Table 3-16 and destined to Black Stem Rust Eradication States are Not Authorized Pending Pest Risk Analysis (NAPPRA) and prohibited	
	Species and varieties not designated as resistant to black stem rust are Not Authorized Pending Pest Risk Analysis (NAPPRA)	
<i>Blighia sapida</i>	→	All countries and territories except Canada, Cote d'Ivoire, Nigeria
Bromeliaceae family	Destined to Hawaii	All countries when imported into Hawaii
<i>Brugmansia</i> spp.	→	All countries except Canada, Colombia

Postentry Quarantine

Plants for Planting Subject to Postentry Quarantine

Table 5-2 List of Restricted Postentry Quarantine Plants for Planting (except seeds) (continued)

Restricted plants for planting (except seeds)	And:	Postentry quarantine is required from:
<i>Chrysanthemum</i> spp.	→	All other countries except Canada and those Not Authorized Pending Pest Risk Analysis (NAPPRA) from Afghanistan, Albania, Andorra, Argentina, Armenia, Australia, Austria, Azerbaijan, Azores , Bahrain, Bangladesh, Belarus, Belgium, Bhutan, Bolivia, Bosnia and Herzegovina, Brazil, British Isles , Brunei Darussalam, Bulgaria, Burma (Myanmar), Cambodia, Channel Islands , Chile, China, Colombia, Croatia, Czechia (Czech Republic), Denmark, Ecuador, England, Estonia, Falkland Islands, Finland, France, French Guiana, Georgia, Germany, Greece, Guyana, Hebrides, Hong Kong, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Isle of Man, Isle of Wight, Isles of Scilly, Israel, Italy, Japan, Jordan, Kazakhstan; Korea, Democratic People’s Republic of (North Korea); Korea Republic of (South Korea), Kosovo, Kuwait, Kyrgyzstan, Lao People’s Democratic Republic (Laos), Latvia, Lebanon, Liechtenstein, Lithuania, Lundy Island, Luxembourg, Macedonia, Malaysia, Maldives, Malta, Marshall Islands, Melanesia, Mexico, Micronesia (Federated States of), Moldova, Monaco, Mongolia, Montenegro, Nauru, Nepal, Netherlands, New Caledonia, New Guinea, New Zealand, Nicobar Islands, Northern Ireland, Northern Mariana Islands, Norway, Oceania , Oman, Orkney Islands, Pakistan, Palau, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Polynesia, Portugal, Qatar, Romania, Russia, San Marino, Saudi Arabia, Scotland, Serbia, Shetland Islands, Singapore, Slovakia, Slovenia, Solomon Islands, South Africa, Spain, Sri Lanka, Suriname, Sweden, Switzerland, Syria, Taiwan, Tajikistan, Thailand, Timor-Leste, Tunisia, Turkey, Turkmenistan, Tuvalu, Ukraine, United Arab Emirates, United Kingdom , Uruguay, Uzbekistan, Vanuatu, Vatican City, Venezuela, Vietnam, Wales, Yemen (Asia , Australia, Europe , Mexico, New Zealand, Oceania , Republic of South Africa, South America , Tunisia)
<i>Chrysobalanus</i> spp.	→	All countries except Canada
<i>Chrysophyllum</i> spp.	→	All countries except Canada
<i>Corylus</i> spp.	→	Netherlands

Table 5-2 List of Restricted Postentry Quarantine Plants for Planting (except seeds) (continued)

Restricted plants for planting (except seeds)	And:	Postentry quarantine is required from:
<i>Crocoshmia</i> spp. except bulbs	Not meeting the conditions for entry; see Crocoshmia spp.	All countries except Africa, Argentina, Brazil, Canada, France, Italy, Malta, Mauritius, Portugal, Uruguay
	Not meeting conditions for importation; see Crocoshmia spp. from Luxembourg	Luxembourg when not meeting conditions for entry
	Not meeting conditions for importation; see Crocoshmia spp. from Spain	Spain when not meeting conditions for entry
<i>Dianthus</i> spp.	—————→	All countries except Canada
	Not meeting conditions for entry; SEE Dianthus spp. from Great Britain	England, Scotland, Wales when not meeting conditions for entry
	Not meeting conditions for entry; SEE Dianthus spp. from the Netherlands	England, Scotland, Wales when not meeting conditions for entry
<i>Eucalyptus</i> spp.	—————→	All countries except those prohibited from (Albania, Andorra, Armenia, Austria, Azerbaijan, Belgium, Belarus, Bosnia and Herzegovina, Bulgaria, Croatia, Czechia (Czech Republic), Denmark, England, Estonia, Finland, France, Germany, Georgia, Greece, Hungary, Iceland, Ireland, Italy, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malta, Moldova, Monaco, Montenegro, Netherlands, Northern Ireland, Norway, Poland, Portugal, Romania, Russia (European part), San Marino, Scotland, Serbia, Slovakia, Slovenia, Spain, Sri Lanka, Sweden, Switzerland, Turkey (European part), Ukraine, Uruguay, Vatican City, Wales) and Canada
<i>Eugenia</i> spp.	—————→	All countries except Canada
<i>Ficus carica</i>	—————→	China, Costa Rica, Dominican Republic, Guatemala, Mexico, Netherlands, Taiwan, Thailand

<i>Malpighia</i> spp.	→	All countries except Canada

Postentry Quarantine

Plants for Planting Subject to Postentry Quarantine

Table 5-2 List of Restricted Postentry Quarantine Plants for Planting (except seeds) (continued)

Restricted plants for planting (except seeds)	And:	Postentry quarantine is required from:
<i>Malus</i> spp.	When meeting conditions for entry; see Malus spp.	Belgium, France, Germany, Netherlands
<i>Mammea</i> spp.	→	All countries except Canada
<i>Manilkara</i> spp.	→	All countries except Canada
<i>Melicoccus</i> spp.	→	All countries except Canada
<i>Mespilus germanica</i>	→	Belgium, England, France, Germany, Netherlands, Northern Ireland, Scotland, Wales
<i>Nephelium</i> spp.	→	All countries except Canada

Table 5-2 List of Restricted Postentry Quarantine Plants for Planting (except seeds) (continued)

Restricted plants for planting (except seeds)	And:	Postentry quarantine is required from:
<i>Nipponanthemum nipponicum</i>	→	All other countries except Canada and those Not Authorized Pending Pest Risk Analysis (NAPPRA) from Afghanistan, Albania, Andorra, Argentina, Armenia, Australia, Austria, Azerbaijan, Azores , Bahrain, Bangladesh, Belarus, Belgium, Bhutan, Bolivia, Bosnia and Herzegovina, Brazil, British Isles , Brunei Darussalam, Bulgaria, Burma (Myanmar), Cambodia, Channel Islands , Chile, China, Colombia, Croatia, Czechia (Czech Republic), Denmark, Ecuador, England, Estonia, Falkland Islands, Finland, France, French Guiana, Georgia, Germany, Greece, Guyana, Hebrides, Hong Kong, Hungary, Iceland, India, Indonesia, Iran, Iraq, Ireland, Isle of Man, Isle of Wight, Isles of Scilly, Israel, Italy, Japan, Jordan, Kazakhstan, Korea, Democratic People’s Republic of (North Korea), Korea, Republic of (South Korea), Kosovo, Kuwait, Kyrgyzstan, Lao People’s Democratic Republic (Laos), Latvia, Lebanon, Liechtenstein, Lithuania, Lundy Island, Luxembourg, Macedonia, Malaysia, Maldives, Malta, Marshall Islands, Melanesia, Mexico, Micronesia, Moldova, Monaco, Mongolia, Montenegro, Nauru, Nepal, Netherlands, New Caledonia, New Guinea, New Zealand, Nicobar Islands, Northern Ireland, Northern Mariana Islands, Norway, Oceania , Oman, Orkney Islands, Pakistan, Palau, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Polynesia, Portugal, Qatar, Romania, Russia, San Marino, Saudi Arabia, Scotland, Serbia, Shetland Islands, Singapore, Slovakia, Slovenia, Solomon Islands, South Africa, Spain, Sri Lanka, Suriname, Sweden, Switzerland, Syria, Taiwan, Tajikistan, Thailand, Timor-Leste, Tunisia, Turkey, Turkmenistan, Tuvalu, Ukraine, United Arab Emirates, United Kingdom , Uruguay, Uzbekistan, Vanuatu, Vatican City, Venezuela, Vietnam, Wales, Yemen (Asia , Australia, Europe , Mexico, New Zealand, Oceania , Republic of South Africa, South America , Tunisia)
<i>Passiflora</i> spp.	→	All countries except Canada
<i>Pinus</i> spp.	2- or 3-leaved only	Korea, Republic of (South Korea)
<i>Prunus</i> spp.	When meeting Prunus spp. conditions for entry	Netherlands
<i>Pseudotsuga</i> spp.	→	India

Postentry Quarantine

Plants for Planting Subject to Postentry Quarantine

Table 5-2 List of Restricted Postentry Quarantine Plants for Planting (except seeds) (continued)

Restricted plants for planting (except seeds)	And:	Postentry quarantine is required from:
<i>Rhodomyrtus</i> spp.	→	All countries except Canada
<i>Rosa</i> spp.	→	Denmark, England, France, Germany, Netherlands, Northern Ireland, Scotland, Wales
<i>Rubus</i> spp.	When not meeting <i>Rubus</i> spp. from Canada conditions for entry	Canada
	When meeting <i>Rubus</i> spp. Postentry Requirements	England, Northern Ireland, Scotland, Wales
<i>Spondias</i> spp.	→	All countries except Canada
<i>Vaccinium</i> spp.	→	Australia
<i>Watsonia</i> spp. (except bulbs)	→	All countries except those prohibited from (Africa, Argentina, Brazil, France, Italy, Malta, Mauritius, Portugal, Uruguay) and Canada
	When not meeting <i>Watsonia</i> spp. from Luxembourg	If <i>Watsonia</i> spp. from Luxembourg lacks the additional declaration, then must enter postentry quarantine
	When not meeting <i>Watsonia</i> spp. from Spain	If <i>Watsonia</i> spp. from Spain lacks the additional declaration, then must enter postentry quarantine

Postentry Quarantine Growing Conditions

Plants or increase therefrom **must** be grown under postentry quarantine for a period of 2 years **except** for *Chrysanthemum* spp., *Dianthus* spp., *Hydrangea* spp., *Leucanthemella serotina*, *Nipponanthemum nipponicum.*, and *Rubus* spp. See the exceptions and additional postentry quarantine growing conditions below.

Chrysanthemum spp. Postentry Requirements

Plants for planting or any increase therefrom (**except** seeds) of *Chrysanthemum* spp. **must** be grown under postentry quarantine as follows:

- ◆ Be grown **only** in a greenhouse or other enclosed building;
- ◆ Be grown in postentry quarantine for period of 6 months after importation; and
- ◆ Comply with [Importer Postentry Quarantine Growing Agreement](#)

See [Table 5-2, List of Restricted Postentry Quarantine Plants for Planting \(except seeds\)](#) and for import requirements including the additional declaration, see [Chrysanthemum](#) spp. and the taxa in the [Lists of Plants for Planting](#).

Dianthus spp. Postentry Requirements

Plants for planting or any increase therefrom (**except** seeds) of *Dianthus* spp. **must** be grown under postentry quarantine as follows:

- ◆ Be grown **only** in a greenhouse or other enclosed building;
- ◆ Be grown in postentry quarantine for period of 1 year after importation; and
- ◆ Comply with [Importer Postentry Quarantine Growing Agreement](#)

See [Table 5-2, List of Restricted Postentry Quarantine Plants for Planting \(except seeds\)](#) and for import requirements, see [Dianthus](#) spp. and the taxa in the [Lists of Plants for Planting](#).

Hydrangea spp. Postentry Quarantine Requirements

Plants for planting or any increase therefrom (**except** seeds) of *Hydrangea* spp. **must** be grown under postentry quarantine as follows:

- ◆ Be grown **only** in a greenhouse or other enclosed building;
- ◆ Be grown in postentry quarantine for period of 9 months after importation; and
- ◆ Comply with [Importer Postentry Quarantine Growing Agreement](#)

See [Table 5-2, List of Restricted Postentry Quarantine Plants for Planting \(except seeds\)](#) and for import requirements, see [Hydrangea spp.](#) and the taxa in the [Lists of Plants for Planting](#).

***Leucanthemella serotina* Postentry Quarantine Requirements**

Plants for planting or any increase therefrom (**except** seeds) of *Leucanthemella serotina* **must** be grown under postentry quarantine as follows:

- ◆ Be grown **only** in a greenhouse or other enclosed building;
- ◆ Be grown in postentry quarantine for period of 6 months after importation; and
- ◆ Comply with [Importer Postentry Quarantine Growing Agreement](#)

See [Table 5-2, List of Restricted Postentry Quarantine Plants for Planting \(except seeds\)](#) and for import requirements including the additional declaration, see [Leucanthemella serotina](#) and the taxon in the [Lists of Plants for Planting](#).

***Nipponanthemum nipponicum* Postentry Requirements**

Plants for planting or any increase therefrom (**except** seeds) of *Nipponanthemum nipponicum* **must** be grown under postentry quarantine as follows:

- ◆ Be grown **only** in a greenhouse or other enclosed building;
- ◆ Be grown in postentry quarantine for period of 6 months after importation; and
- ◆ Comply with [Importer Postentry Quarantine Growing Agreement](#)

See [Table 5-2, List of Restricted Postentry Quarantine Plants for Planting \(except seeds\)](#) and for import requirements including the additional declaration, see [Nipponanthemum nipponicum](#) and the taxon in the [Lists of Plants for Planting](#).

***Rubus* spp. Postentry Requirements**

Plants for planting or any increase therefrom (**except** seeds) of *Rubus* spp. **must** be grown under postentry quarantine as follows:

- ◆ Be grown **only** in a screenhouse with a minimum of 16 mesh per inch;
- ◆ Be grown in postentry quarantine for a period of 2 years after importation;
and
- ◆ Comply with [Importer Postentry Quarantine Growing Agreement](#)

For import requirements, see [Rubus spp.](#) and [Lists of Plants for Planting](#)

Introduction

The [Lists of Plants for Planting](#) chapter provides alphabetical lists of [plants for planting](#) that have specific restrictions or requirements for entry that are in addition to [General Restrictions](#).

NOTICE

In addition to the requirements included in the lists in this chapter, all plants for planting require an import permit and a phytosanitary certificate unless meeting exception conditions. See the [General Restrictions](#) chapter under [Permits](#) and [Phytosanitary Certificate](#) for details.

Using the Plants for Planting Lists

Each plants for planting list in this chapter is alphabetized by taxon and is separated into four columns:

- ◆ Plant Taxon
- ◆ Regulated Plant Part
- ◆ Not Authorized/ Is Prohibited from
- ◆ Specific Restrictions, Requirements, Postentry, etc.

1. The first column heading, **Plant Taxon**, lists the regulated plants by genus and species, family, common name(s) (if any). If an entire plant family is regulated, then the plant family name is listed.
2. The second column heading, **Regulated Plant Part**, includes the plant type regulated:
 - ❖ All propagules (includes all plant material used for the purpose of plant propagation (process of creating new plants) or capable of propagation, including seeds);
 - ❖ All propagules **except** seeds (includes all plant material used for the purpose of plant propagation or capable of propagation, **other than** seeds);
 - ❖ Seeds (includes **only** seeds used for the purpose of plant propagation or capable of propagation).
3. The third column heading is **Not Authorized/ Is Prohibited from**. If the name of a country is listed under this heading, then the plant material is **not** authorized entry (prohibited) from the country. EXIT this manual.

If the country of origin is **not** listed under the **Not Authorized/ Is Prohibited from** column, then the plant **must** meet the **General Restrictions** and any **Specific Restrictions** for entry unless meeting exception conditions.

4. If a plant taxon has specific import requirements or restrictions, then they are listed under the column **Specific Restrictions, Requirements, Postentry, etc.** Specific restrictions and requirements are in addition to **General Restrictions**.
5. When special restrictions apply to all species with a genus, that will be listed in the special restrictions chapter.

6. If there are additional restrictions to specific plant taxa within the species, then they will be listed separately and **must** meet both the genus spp. restrictions and the specific epithet restrictions.

EXAMPLE *Abies* spp.
Abies spp. indicates all clones, cultivars, species, strains, varieties, and hybrids of the genus *Abies*.

EXAMPLE *Abies grandis*
Pinaceae
giant fir
grand fir
lowland fir

Regulated species/plant taxon: *Abies grandis*
Family: Pinaceae
Common names: giant fir, grand fir, lowland fir

Scientific name: *Abies grandis*
Genus: *Abies*
Species: *Abies grandis*
Specific epithet: *grandis*

The species is the combination of the genus and the specific epithet.

Key to Abbreviations and Phrases

Use the key in [Table 6-1](#) to interpret the abbreviations and terms used in the lists of regulated propagative material

Table 6-1 Key to Lists of Regulated Plants for Planting With Specific Restrictions

Abbreviation/ Phrase	Meaning
ALB	Asian longhorned beetle
CITES I	CITES Appendix I; includes seeds unless listed otherwise
CITES II	CITES Appendix II; does not include seeds unless listed otherwise
CITES III	CITES Appendix III; does not include seeds unless listed otherwise
CG	citrus greening; also known as Huanglongbing disease
CLB	citrus longhorned beetle
CVC	citrus variegated chlorosis
Except	Does not include; other than
ESA-E	Endangered Species Act listed as endangered; includes seeds
ESA-T	Endangered Species Act listed as threatened; includes seeds except seeds from cultivated plants
EU	European Union. EU member countries include: Austria, Belgium, Bulgaria, Croatia, Cypress, Czechia, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom (England, Northern Ireland, Scotland, Wales)
FSA-A	Federal Seed Act agricultural seed; see Federal Seed Act Seeds
FSA-V	Federal Seed Act vegetable seed; see Federal Seed Act Seeds
HLB	Huanglongbing disease of citrus; also known as citrus greening
Herbaceous	Species is herbaceous. A plant that has leaves and stems that die down to the soil level and has no persistent woody stem above ground at the end of the growing season
Herbaceous only	Genus has both woody and herbaceous species, but restriction applies to herbaceous species only
Not Authorized (Prohibited)	Not admissible; not enterable. See Not Authorized Pending Pest Risk Analysis (NAPPRA)
Other than	Does not include; except
Postentry	Postentry Quarantine Program

NOTICE

General Restrictions must be met in addition to specific restrictions and requirements for plant taxa listed in this chapter.

Table 6-2 “A” List of Regulated Plants for Planting With Specific Restrictions

Plant Taxon	Regulated Plant Part	Not Authorized/ Is Prohibited from	Specific Restrictions, Requirements, Postentry, etc.
<i>Aakia</i> spp. Poaceae family	All propagules except seeds	All countries except Canada	Not Authorized Pending Pest Risk Analysis (NAPPRA) from Prohibited Articles List Final Rule Effective April 18, 2018
<i>Abelmoschus</i> spp. Malvaceae family okra	All propagules except seeds	Algeria, Angola, Bangladesh, Benin, Botswana, Brazil, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic Republic of the), Cote d'Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Eswatini (Swaziland), Ethiopia, Gabon, Gambia, Ghana, Guinea, Guinea-Bissau, India, Iraq, Kenya, Liberia, Lesotho, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Papua New Guinea, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sri Lanka, Sudan, Tanzania, Tobago, Togo, Trinidad, Tunisia, Uganda, Zambia, Zimbabwe	Not Authorized Pending Pest Risk Analysis (NAPPRA) from Prohibited Articles List Final Rule Effective April 18, 2018
		—————▶	Must enter Postentry Quarantine Program from all other countries except Canada and those listed as not authorized/prohibited above
	Seeds	—————▶	REQUIRE 1 of 3 alternative treatment schedules: T203-g-1, T203-g-2, or T203-g-3

<i>Atriplex canescens</i> Chenopodiaceae family four-wing saltbush shadscale	All propagules except seeds	All countries except Canada	Including cut flowers and greenery Not Authorized Pending Pest Risk Analysis (NAPPRA) Federal Notice Effective May 20, 2013
	Seeds	—————→	FSA-A; SEE Federal Seed Act Seeds to determine if meets FSA conditions for entry
<i>Atriplex coronata</i> var. <i>notatoir</i> Chenopodiaceae family San Jacinto Valley crownscale	All propagules	—————→	ESA-E; SEE Endangered Species Act (ESA) Plants
	All propagules except seeds	All countries except Canada	Including cut flowers and greenery Not Authorized Pending Pest Risk Analysis (NAPPRA) Federal Notice Effective May 20, 2013
<i>Attalea</i> spp. Arecaceae family palm	All propagules except seeds	All countries	Not Authorized Pending Pest Risk Analysis (NAPPRA) Federal Notice Effective May 20, 2013
<i>Aucklandia costus</i> Asteraceae family	All propagules		CITES I, listed as synonym <i>Saussurea costus</i> ; SEE CITES Plants
<i>Auerodendron pauciflorum</i> Rhamnaceae family	All propagules	—————→	ESA-E; SEE Endangered Species Act (ESA) Plants
<i>Aulonemia</i> spp. Poaceae family Bambuseae tribe bamboo	All propagules	All countries	Not Authorized Pending Pest Risk Analysis (NAPPRA) from Prohibited Articles List Final Rule Effective April 18, 2018
<i>Aureolaria</i> spp. Orobanchaceae family foxglove	All propagules	All countries	Parasitic Plants 7 CFR 330
<i>Australopyrum</i> spp. Poaceae family	All propagules except seeds	All countries except Canada	Not Authorized Pending Pest Risk Analysis (NAPPRA) from Prohibited Articles List Final Rule Effective April 18, 2018

Plant Taxon	Regulated Plant Part	Not Authorized/ Is Prohibited from	Specific Restrictions, Restrictions, Postentry, etc.
<i>Billbergia nutans</i> Bromeliaceae family	All propagules except seeds	→	If destined to Hawaii, then must enter Postentry Quarantine Program
		→	If from Netherlands, then may be imported with residual paper adhering to the roots when at least 90 percent of the roots are visible
<i>Billbergia porteana</i> Bromeliaceae family	All propagules except seeds	→	If destined to Hawaii, then must enter Postentry Quarantine Program
		→	If from Netherlands, then may be imported with residual paper adhering to the roots when at least 90 percent of the roots are visible
<i>Billbergia pyramidalis</i> Bromeliaceae family	All propagules except seeds	→	If destined to Hawaii, then must enter Postentry Quarantine Program
		→	If from Netherlands, then may be imported with residual paper adhering to the roots when at least 90 percent of the roots are visible
<i>Biserrula</i> spp. Fabaceae family	All propagules except seeds	All countries except Canada	Herbaceous Fabaceae Family Not Authorized Pending Pest Risk Analysis (NAPPR) from Prohibited Articles List Herbaceous species only Final Rule Effective April 18, 2018
<i>Bituminaria</i> spp. Fabaceae family	All propagules except seeds	All countries except Canada	Herbaceous Fabaceae Family Not Authorized Pending Pest Risk Analysis (NAPPR) from Prohibited Articles List Herbaceous species only Final Rule Effective April 18, 2018

Table 6-3 “B” List of Regulated Plants for Planting With Specific Restrictions

Plant Taxon	Regulated Plant Part	Not Authorized/ Is Prohibited from	Specific Restrictions, Restrictions, Postentry, etc.
<i>Bromus pectinatus</i> Poaceae family	All propagules	All countries	Not Authorized Pending Pest Risk Analysis (NAPPRA) Federal Order Effective May 20, 2013
<i>Broussonetia</i> spp. Moraceae family	All propagules except seeds	All countries except Canada	Not Authorized Pending Pest Risk Analysis (NAPPRA) Federal Notice Effective May 20, 2013
		Canada when not meeting the Federal Order conditions for entry	SEE Table 3-4, Host Plants (except seeds) of <i>Anoplophora chinensis</i> (CLB) or <i>Anoplophora glabripennis</i> (ALB) from Canada to determine if meets Federal Order conditions for entry Federal Order Effective May 20, 2013
<i>Brugmansia</i> spp. Solanaceae family angel's-trumpet maikoa	All propagules except seeds	Colombia	Not Authorized Pending Pest Risk Analysis (NAPPRA) from Prohibited Articles List Final Rule Effective April 18, 2018
		→	Must enter Postentry Quarantine Program from all other countries except Canada and Colombia
<i>Bruguiera gymnorhiza</i> Rhizophoraceae family black mangrove orange mangrove red mangrove	All propagules	All countries	Not Authorized Pending Pest Risk Analysis (NAPPRA) Federal Notice Effective July 2, 2021
<i>Bryaspis</i> spp. Fabaceae family	All propagules except seeds	All countries except Canada	Herbaceous Fabaceae Family Not Authorized Pending Pest Risk Analysis (NAPPRA) from Prohibited Articles List Herbaceous species only ; SEE Fabaceae Family Final Rule Effective April 18, 2018
<i>Brylkinia</i> spp. Poaceae family	All propagules except seeds	All countries except Canada	Not Authorized Pending Pest Risk Analysis (NAPPRA) from Prohibited Articles List Final Rule Effective April 18, 2018

Plant Taxon	Regulated Plant Part	Not Authorized/ Is Prohibited from	Specific Restrictions, Requirements, Postentry, etc.
<i>Cynosurus cristatus</i> Poaceae family crested dogtail crested dog's tail	All propagules except seeds	All countries except Canada	Not Authorized Pending Pest Risk Analysis (NAPPRA) from Prohibited Articles List Final Rule Effective April 18, 2018
	Seeds	—————▶	FSA-A; SEE Federal Seed Act Seeds to determine if meets FSA conditions for entry
<i>Cyperochloa</i> spp. Poaceae family	All propagules except seeds	All countries except Canada	Not Authorized Pending Pest Risk Analysis (NAPPRA) from Prohibited Articles List Final Rule Effective April 18, 2018
<i>Cyperus aromaticus</i> Cyperaceae family Navua sedge	All propagules	All countries	Not Authorized Pending Pest Risk Analysis (NAPPRA) listed as synonym <i>Kyllinga polyphylla</i> Federal Notice Effective June 19, 2017
<i>Cyperus bracheilema</i> Cyperaceae family	All propagules	All countries	Not Authorized Pending Pest Risk Analysis (NAPPRA) listed as synonym <i>Kyllinga pulchella</i> Federal Notice Effective June 19, 2017
<i>Cyperus exaltatus</i> Cyperaceae family	All propagules	All countries	Not Authorized Pending Pest Risk Analysis (NAPPRA) Federal Notice Effective June 19, 2017
<i>Cyperus fauriei</i> Cyperaceae family	All propagules	—————▶	ESA-E; SEE Endangered Species Act (ESA) Plants
<i>Cyperus flavidus</i> Cyperaceae family	All propagules	All countries	Not Authorized Pending Pest Risk Analysis (NAPPRA) listed as synonym <i>Pycreus flavidus</i> Federal Notice Effective June 19, 2017
<i>Cyperus neokunthianus</i> Cyperaceae family	All propagules	—————▶	ESA-E; SEE Endangered Species Act (ESA) Plants
<i>Cyperus pennatiformis</i> Cyperaceae family	All propagules	—————▶	ESA-E; SEE Endangered Species Act (ESA) Plants
<i>Cyperus trachysanthos</i> Cyperaceae family pu`uka`a	All propagules	—————▶	ESA-E; SEE Endangered Species Act (ESA) Plants

Table 6-17 “P” List of Regulated Plants for Planting With Specific Restrictions

Plant Taxon	Regulated Plant Part	Not Authorized/ Is Prohibited from	Specific Restrictions, Requirements, Postentry, etc.
<i>Psidium</i> spp. Myrtaceae family guava	All propagules except seeds	All countries when destined to Hawaii	Not Authorized Pending Pest Risk Analysis (NAPPRA) Federal Notice Effective July 2, 2021
		All countries except Canada	Not Authorized Pending Pest Risk Analysis (NAPPRA) Federal Notice Effective May 20, 2013
		Canada when not meeting the ALB/CLB Federal Order conditions for entry	SEE Table 3-4, Host Plants (except seeds) of <i>Anoplophora chinensis</i> (CLB) or <i>Anoplophora glabripennis</i> (ALB) from Canada to determine if meets Federal Order conditions for entry Federal Notice Effective May 20, 2013
<i>Psilolemma</i> spp. Poaceae family	All propagules except seeds	All countries except Canada	Not Authorized Pending Pest Risk Analysis (NAPPRA) from Prohibited Articles List Final Rule Effective April 18, 2018
<i>Psilopeganum</i> spp. Rutaceae family	All propagules except seeds	All countries	Not Authorized Pending Pest Risk Analysis (NAPPRA) from Consolidation of Plants for Planting Regulations Final Rule Effective April 18, 2018
	Seeds	→	If from Afghanistan, Andaman Islands, Cambodia, Caroline Islands, Congo (Democratic Republic of the), Côte d'Ivoire, Fiji Islands, Home Island in Cocos (Keeling) Islands, Hong Kong, Korea, Mozambique, Oman, Rodrigues Island, Seychelles, Thursday Island, United Arab Emirates, then REQUIRES treatment T203-p Rutaceae Seeds Requiring Treatment
<i>Psilurus</i> spp. Poaceae family	All propagules except seeds	All countries except Canada	Not Authorized Pending Pest Risk Analysis (NAPPRA) from Prohibited Articles List Final Rule Effective April 18, 2018

Introduction

The *Plants in Growing Media Programs* chapter provides information about programs for plants for planting that are approved to be imported in approved growing media.

APHIS-Approved Plants In Growing Media Programs

Plants may **only** be imported in growing media when meeting all of the following conditions:

- ◆ Be APHIS-approved taxa listed in [Table 7-2](#);
- ◆ Be in APHIS-approved growing media listed in [Table 7-1](#); and
- ◆ Be from APHIS-approved facilities authorized to export plants in growing media to the United States.

If the plants in growing media are from Canada, then see [Canadian Origin Plants in Growing Media](#) to determine if plants in growing media meet the conditions for entry. See [Exceptions to Growing Media General Restriction](#) for other exceptions to plants in growing media restriction.

Approved Growing Media

The approved growing media listed in [Table 7-1](#) is **only** for use with approved plants for planting that meet the requirements of the [Plants in Growing Media Program](#) that may be imported into the U.S.

Table 7-1 Approved Growing Media List for Plants in Approved Growing Media Program (except *Hyacinthus* spp.)

Approved Growing Media for Use with Approved Taxa from USDA Approved Facilities		
Baked expanded clay pellets	Phenol formaldehyde	Stockosorb super absorbent polymer
Coal cinder	Plastic particles	Ureaformaldehyde
Coir	Polyethylene	Vermiculite
Cork	Polymer stabilized starch	Volcanic rock
Glass wool	Polystyrene	Zeolite
Organic and inorganic fibers	Polyurethane	Any combination of growing media listed in this table
Peat	Rock wool	
Perlite	Sphagnum moss	

Approved Taxa for Plants in Growing Media Program

All plants in growing media program taxa are listed in [Table 7-2](#). **Only** the following groups of plants may be imported established in approved growing media when imported from a USDA approved facility and that meets the requirements of the [Plants in Growing Media Programs With Approved Facilities](#). Each program and facility **must** be individually approved by USDA-APHIS before import into the United States.

An exception to the plants in growing media program requirements is for plants in growing media from Canada. See [Canadian Origin Plants in Growing Media](#) to determine if plants in growing media from Canada meet conditions for entry.

Table 7-2 Status of Approved Plant Taxa for a Plants in Growing Media Program

Plant taxa in growing media	From	Status
<i>Aechmea</i> spp.	Belgium, Denmark	Approved program; no approved facilities
	Canada	SEE Canadian Origin Plants in Growing Media
	Netherlands	Approved program; SEE Aechmea spp. in Growing Media Program and list of Approved Aechmea spp. in Growing Media Facilities
	Other than Belgium, Denmark, Netherlands	No approved program
<i>Alstroemeria</i> spp.	—————→	No approved facilities

Plants in Growing Media Program

Most plants for planting established in growing media are prohibited entry under [General Restrictions](#) (see [Growing Media](#)). One **exception** is for certain taxa from an approved facility that is part of an approved growing media program.

Plants in Growing Media Program Basic Requirements

Approved taxa imported in approved growing media from approved facilities (**except** *Hyacinthus* which has separate program requirements) **must** meet the following requirements:

- ◆ Be accompanied by a phytosanitary certificate issued by the national plant protection organization (NPPO) of the country in which the plants were grown, with an additional declaration that:
 - ❖ The plants meet the conditions of the APHIS Plant Protection and Quarantine (PPQ) plants in approved growing media program;
- ◆ Be **only** in approved growing media (baked expanded clay pellets, coal cinder, coir, cork, glass wool, organic and inorganic fibers, peat, perlite, phenol formaldehyde, plastic particles, polyethylene, polymer stabilized starch, polystyrene, polyurethane, rock wool, sphagnum moss, ureaformaldehyde, Stockosorb® superabsorbent polymer, vermiculite, volcanic rock, or zeolite, or any combination of these media);
 - ❖ Approved growing media **must not** have been previously used;
- ◆ Be grown in compliance with a written agreement (bilateral work plan) for enforcement of this program signed by the national plant protection organization (NPPO) of the country where grown and APHIS-PPQ;
- ◆ Be developed from mother stock that was inspected and found free from evidence of quarantine pests by an APHIS inspector or foreign plant protection service inspector **no** more than 60 days prior to the time the plant is established in the greenhouse (**except** for plants developed from seeds germinated in the greenhouse);
- ◆ Grower agrees to comply with the provisions of the program and to allow inspectors, and representatives of the NPPO of the country where the article is grown, access to the growing facility as necessary to monitor compliance with the provisions of this program;
- ◆ Be grown solely in a greenhouse in which sanitary procedures adequate to exclude quarantine pests are always employed, including cleaning and disinfection of floors, benches and tools, and the application of measures to protect against any quarantine pests;

- ❖ Greenhouse **must** be free from sand and soil and **must** have screening with openings of **not** more than 0.6 mm (0.2 mm for greenhouses growing *Rhododendron* spp.) on **all** vents and openings **except** entryways;
- ❖ Greenhouse entryways **must** all be equipped with automatic closing doors;
- ◆ Be rooted and grown in an active state of foliar growth for at least four consecutive months immediately prior to importation into the United States, in a greenhouse unit that is used **solely** for articles grown in compliance with this program;
- ◆ Be grown from seeds germinated in the greenhouse unit; or descended from a mother plant that was grown for at least 9 months in the exporting country prior to importation into the United States of the descendant plants; if the mother plant was imported into the exporting country from another country, then the mother plant **must** be:
 - ⇒ Grown for at least 12 months in the exporting country prior to importation of the descendant plants into the United States or
 - ⇒ Treated at the time of importation into the exporting country with a treatment prescribed for quarantine pests of that plant by the NPPO of the exporting country, and then grown for at least 9 months in the exporting country prior to importation of the descendant plants into the United States;
- ◆ Be watered **only** with rainwater that has been boiled or pasteurized, with clean well water, or with potable water;
- ◆ Be rooted and grown in approved growing media (see [Table 7-1](#)) on benches supported by legs and raised at least 46 cm above the floor;
- ◆ Be stored and packaged **only** in areas free of sand, soil, earth, and quarantine pests; and
- ◆ Be inspected in the greenhouse and found free from evidence of quarantine pests by an APHIS inspector or an inspector of the national plant protection organization (NPPO) of the exporting country, **no** more than 30 days prior to the date of export to the United States.

Continue to [Plants in Growing Media Programs With Approved Facilities](#) to check for any additional requirements that apply to specific taxa.

Approved Taxa with Additional Requirements

The following approved taxa in growing media programs have other requirements in addition to those listed under [Plants in Growing Media Program Basic Requirements](#):

- ◆ [Buxus sinica](#) in Growing Media Program
- ◆ [Ehretia microphylla](#) in Growing Media Program
- ◆ [Phalaenopsis spp.](#) in Approved Growing Media Program
- ◆ [Podocarpus macrophyllus](#) in Growing Media Program
- ◆ [Rhododendron spp.](#) in Growing Media Program
- ◆ [Sageretia thea](#) in Growing Media Program
- ◆ [Serissa foetida](#) in Approved Growing Media
- ◆ [Solanum lycopersicum](#) (tomato) in Growing Media Program

The **exception** is [Hyacinthus](#) in Approved Growing Media Program (with its own requirements) and **does not** require the [Plants in Growing Media Program Basic Requirements](#).

Plants in Growing Media Programs With Approved Facilities

Plants in growing media may **only** be imported from an APHIS approved facility when meeting the requirements of an APHIS approved [Plants in Growing Media Program](#).

The following plants in growing media programs have approved facilities:

- ◆ [Aechmea spp. in Growing Media Program](#)
(Approved Aechmea in Growing Media Facilities)
- ◆ [Ananas spp. in Growing Media Program](#)
(Approved Ananas in Growing Media Facilities)
- ◆ [Anthurium spp. in Growing Media Program](#)
(Approved Anthurium in Growing Media Facilities)
- ◆ [Campanula spp. in Approved Growing Media Program](#)
(Approved Campanula in Growing Media Facilities)
- ◆ [Cryptanthus spp. in Growing Media Program](#)
(Approved Cryptanthus in Growing Media Facilities)
- ◆ [Cymbidium spp. in Approved Growing Media Program](#)
(Approved Cymbidium in Growing Media Facilities)
- ◆ [Dendrobium spp. in Growing Media Program](#)
(Approved Dendrobium in Growing Media Facilities)
- ◆ [Filicales \(True Ferns\) in Growing Media Program](#)
(Approved Filicales (True Ferns) in Growing Media Facilities)
- ◆ [Guzmania spp. in Growing Media Program](#)
(Approved Guzmania in Growing Media Facilities)
- ◆ [Hohenbergia spp. in Growing Media Program](#)
(Approved Hohenbergia spp. in Growing Media Facilities)
- ◆ [Neoregelia spp. in Growing Media Program](#)
(Approved Neoregelia in Growing Media Facilities)
- ◆ [Nidularium spp. in Growing Media Program](#)
(Approved Nidularium in Growing Media Facilities)
- ◆ [Oncidium spp. in Growing Media Program](#)
(Approved Oncidium in Growing Media Facilities)
- ◆ [Phalaenopsis spp. in Approved Growing Media Program](#)
(Approved Phalaenopsis in Growing Media Facilities)
- ◆ [Rhipsalidopsis spp. in Growing Media Program](#)
(Approved Rhipsalidopsis in Growing Media Facilities)
- ◆ [Schlumbergera spp. in Growing Media Program](#)
(Approved Schlumbergera in Growing Media Facilities)

Plants in Growing Media Programs

Plants in Growing Media Program

- ◆ [Solanum lycopersicum \(tomato\) in Growing Media Program](#)
(Approved Solanum lycopersicum in Growing Media Facilities)
- ◆ [Tillandsia spp. in Growing Media Program](#)
(Approved Tillandsia in Growing Media Facilities)
- ◆ [Vriesea spp. in Growing Media Program](#)
(Approved Vriesea in Growing Media Facilities)

Aechmea spp. in Growing Media Program

Aechmea spp. plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities in the list of [Approved Aechmea spp. in Growing Media Facilities](#).

Currently **only** the Netherlands has an approved *Aechmea* spp. in growing media program and an approved facility. Belgium and Denmark have approved *Aechmea* spp. in growing media programs, but **no** approved facilities.

Aechmea in Growing Media from the Netherlands Program

Plants of *Aechmea* spp. in approved growing media from the Netherlands **must** be as follows:

- ◆ Meet all the [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility on the [Approved Aechmea spp. in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Aechmea spp. in growing media that **do not** meet all the above conditions for entry are prohibited.

Ananas spp. in Growing Media Program

Ananas spp. plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities included on the list of [Approved Ananas spp. in Growing Media Facilities](#).

Currently **only** the Netherlands has an approved *Ananas* spp. in growing media program and an approved facility.

Ananas spp. in Growing Media from the Netherlands Program

Plants of *Ananas* spp. in approved growing media from the Netherlands **must** be as follows:

- ◆ Meet all the [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility on the [Approved Ananas in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Ananas spp. in growing media that **do not** meet all the above conditions for entry are prohibited.

Anthurium spp. in Growing Media Program

Anthurium spp. plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities listed in the [Approved Anthurium spp. in Growing Media Facilities](#).

Currently **only** the Netherlands has an approved *Anthurium* spp. in growing media program and approved facilities.

Anthurium spp. in Growing Media from the Netherlands Program

Plants of *Anthurium* spp. in approved growing media from the Netherlands **must** be as follows:

- ◆ Meet all the [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility included on the [Approved Anthurium in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Anthurium spp. in growing media that **do not** meet all the above conditions for entry are prohibited.

Buxus sinica in Growing Media Program

There is a program for importing *Buxus sinica* in growing media to the United States, however, there are currently **no** APHIS approved facilities.

Buxus sinica in growing media from China **cannot** be imported into the U.S. until APHIS approves facilities to export *Buxus sinica* in growing media to the U.S.

Buxus sinica in Growing Media from China Program

Plants of the species *Buxus sinica* in approved growing media from the People's Republic of China **must** meet all the [Plants in Growing Media Program Basic Requirements](#) and the following requirements:

- ◆ Propagative cuttings
 - ❖ Propagative materials used to produce the artificially dwarfed (penjing) plants may enter an approved greenhouse **only** as seeds, tissue cultures, unrooted cuttings, or rooted cuttings with **no** growing media
 - ❖ Rooted cuttings may **not** be established or grown in soil at any time
 - ❖ Rooted cuttings may be established in a greenhouse or outside the greenhouse on raised benches (46 cm in height) in pots containing **only** APHIS approved growing media.
- ◆ Inspection and treatment
 - ❖ When any cuttings are introduced into the greenhouse, the cuttings **must** be as follows:
 - ⇒ Free of growing media,
 - ⇒ Inspected and found free of quarantine pests, and
 - ⇒ Then treated with a pesticide dip approved by the national plant protection organization (NPPO) of the People's Republic of China that will control mites, scale insects, whiteflies, thrips, and fungi
- ◆ Growing
 - ❖ Artificially dwarfed (penjing) plants **must** be grown in an approved greenhouse for at least 6 months immediately prior to export
 - ❖ Additional treatments
 - ⇒ While in the greenhouse, plants **must** be treated with appropriate pesticides at least once every 10 days or as needed for 3 months before shipping to maintain a pest-free condition

- ◆ Artificially dwarfed (penjing) plants **must** be propagated from mother plants that have been visually inspected by an APHIS inspector or an inspector of the NPPO of the People's Republic of China and found free of the following pests: *Guignardia miribellii*, *Macrophoma ehretia*, *Meliola buxicola*, *Puccinia buxi*

Campanula spp. in Approved Growing Media Program

There is an approved program for exporting *Campanula* spp. (bellflower) plants for planting in approved growing media and may be **only** be imported into the United States if sent from one of the authorized growers on the list of [Approved Campanula in Growing Media Facilities](#).

Currently, **only** Denmark has an approved program and approved facilities.

Campanula spp. in Approved Growing Media from Denmark Program

Campanula spp. plants for planting in approved growing media from Denmark **must** be as follows:

- ◆ Meet [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be exported from an APHIS approved facility authorized to export *Campanula* spp. in approved growing media from Denmark to the United States on the list of [Approved Campanula in Growing Media Facilities](#); and
- ◆ Meet all other requirements for entry.

Campanula spp. in growing media that **do not** meet all the above conditions for entry are prohibited.

Cryptanthus spp. in Growing Media Program

Cryptanthus spp. plants in approved growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities included on the list of [Approved Cryptanthus spp. Plants in Growing Media Facilities](#).

Currently **only** the Netherlands has both an approved *Cryptanthus* spp. in growing media program and an approved facility.

Cryptanthus spp. in Growing Media from the Netherlands Program

Plants of *Cryptanthus* spp. in approved growing media from the Netherlands **must** be as follows:

- ◆ Meet all the [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility included on the [Approved Cryptanthus in Growing Media Facilities](#); and
- ◆ Meet all other requirements for entry.

Cryptanthus spp. in growing media that **do not** meet all the above conditions for entry are prohibited.

Cymbidium spp. in Approved Growing Media Program

Cymbidium plants in approved growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the continental United States (may **not** be moved into Hawaii or the territories of the United States) **only** if sent from one of the approved facilities included on the list of [Approved Cymbidium in Growing Media Facilities](#).

Currently **only** South Korea (Republic of Korea) has both an approved *Cymbidium* spp. in growing media program and an approved facility.

Cymbidium spp. in Growing Media from South Korea

Cymbidium spp. in approved growing media from South Korea (Republic of Korea) may be imported into the continental United States (may **not** be moved into Hawaii or the territories of the United States) **only** if sent from a facility approved to export *Cymbidium* in growing media to the continental U.S. on the list of [Approved Cymbidium in Growing Media Facilities](#).

Cymbidium spp. in Approved Growing Media from Korea **must** be as follows to be imported into the continental United States (**not** Hawaii or the territories of the U.S.):

- ◆ Meet all the requirements listed for [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be exported from an APHIS approved facility authorized to export *Cymbidium* spp. in growing media from South Korea to the continental United States; and
- ◆ Meet all other requirements for entry.

Dendrobium spp. in Growing Media Program

Dendrobium spp. (orchid) plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities listed in the [Approved Dendrobium in Growing Media Facilities](#).

Currently **only** Taiwan has an approved *Dendrobium* spp. in growing media program and approved facilities.

Dendrobium spp. in Growing Media from Taiwan Program

Dendrobium spp. plants in approved growing media imported from Taiwan into the United States **must** meet the following conditions:

- ◆ Meet [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility on the [Approved Dendrobium in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Dendrobium spp. in growing media that **do not** meet the above conditions for entry are prohibited.

Ehretia microphylla in Growing Media Program

There is a program for importing *Ehretia microphylla* in growing media to the United States, however, there are currently **no** APHIS approved facilities.

Ehretia microphylla in growing media from China **cannot** be imported into the U.S. until APHIS approves facilities to export *Ehretia microphylla* in growing media to the U.S.

Ehretia microphylla in Growing Media from China Program

Plants of the species *Ehretia microphylla* from the People's Republic of China **must** meet the [Plants in Growing Media Program Basic Requirements](#) and the following conditions:

- ◆ Propagative cuttings
 - ❖ Propagative materials used to produce the artificially dwarfed (penjing) plants may enter an approved greenhouse **only** as seeds, tissue cultures, unrooted cuttings, or rooted cuttings with **no** growing media
 - ❖ Rooted cuttings may **not** be established or grown in soil at any time
 - ❖ Rooted cuttings may be established in a greenhouse or outside the greenhouse on raised benches (46 cm in height) in pots containing **only** APHIS approved growing media.
- ◆ Inspection and treatment
 - ❖ When any cuttings are introduced into the greenhouse, the cuttings **must** be as follows:
 - ⇒ Free of growing media
 - ⇒ Inspected, and found free of quarantine pests, and
 - ⇒ Then treated with a pesticide dip approved by the national plant protection organization (NPPO) of the People's Republic of China that will control mites, scale insects, whiteflies, thrips, and fungi.
- ◆ Growing
 - ❖ Artificially dwarfed (penjing) plants **must** be grown in an approved greenhouse for at least 6 months immediately prior to export
 - ❖ Additional treatments
 - ⇒ While in the greenhouse, plants **must** be treated with appropriate pesticides at least once every 10 days or as needed for 3 months before shipping to maintain a pest-free condition

- ◆ Artificially dwarfed (penjing) plants **must** be propagated from mother plants that have been visually inspected by an APHIS inspector or an inspector of the Animal and Plant Quarantine Service of the People's Republic of China and found free of the following pests: *Macrophoma ehretia*, *Phakopsora ehretiae*, *Pseudocercospora ehretiae*, *Pseudocercospora ehretiae-thyrsiflora*, *Uncinula ehretiae*, *Uredo ehretiae*, *Uredo garanbiensis*

Currently there are **no** APHIS approved facilities authorized to export *Ehretia microphylla* in growing media from China to the United States.

Filicales (True Ferns) in Growing Media Program

Filicales plants in growing media of the families listed below **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities listed in the [Approved Filicales \(True Ferns\) in Growing Media Facilities](#).

Plants of Filicales, true (leptosporangiate) ferns, include the following families:

- ◆ Anemiaceae
- ◆ Aspleniaceae
- ◆ Athyriaceae
- ◆ Blechnaceae
- ◆ Cyatheaceae
- ◆ Davalliaceae
- ◆ Dennstaedtiaceae
- ◆ Dicksoniaceae
- ◆ Didymochlaenaceae
- ◆ Dryopteridaceae
- ◆ Gleicheniaceae
- ◆ Hymenophyllaceae
- ◆ Hypodematiaceae
- ◆ Oleandraceae
- ◆ Osmundaceae
- ◆ Polypodiaceae
- ◆ Pteridaceae
- ◆ Schizaeaceae
- ◆ Thelypteridaceae

Currently **only** the Netherlands has an approved Filicales (true ferns) in growing media program and approved facilities. If imported from Canada, then see [Canadian Origin Plants in Growing Media](#).

Filicales in Growing Media from the Netherlands Program

Plants of Filicales (true ferns) in approved growing media from the Netherlands **must** be as follows:

- ◆ Meet all the [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility included on the [Approved Filicales \(True Ferns\) in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Filicales in growing media that **do not** meet all the above conditions for entry are prohibited.

Guzmania spp. in Growing Media Program

Guzmania spp. plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities in the list of [Approved Guzmania spp. in Growing Media Facilities](#).

Currently **only** the Netherlands has both an approved *Guzmania* spp. in growing media program and an approved facility.

Guzmania in Growing Media from the Netherlands Program

Plants of *Guzmania* spp. in approved growing media from the Netherlands **must** meet be as follows:

- ◆ Meet all the [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility included on the [Approved Guzmania spp. in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry

Guzmania spp. in growing media that **do not** meet all the above conditions for entry are prohibited.

Hohenbergia spp. in Growing Media Program

Hohenbergia spp. plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities in the list of [Approved Hohenbergia spp. in Growing Media Facilities](#).

Currently **only** the Netherlands has both an approved *Hohenbergia* in growing media program and approved facilities.

Hohenbergia in Growing Media from Netherlands Program

Plants of *Hohenbergia* spp. in approved growing media from the Netherlands **must** be as follows:

- ◆ Meet [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility on the [Approved Hohenbergia spp. in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Hohenbergia spp. in growing media that **do not** meet all the above conditions for entry are prohibited.

Hyacinthus in Approved Growing Media Program

There is a program for importing *Hyacinthus* spp. in growing media to the United States, however, there are currently **no** APHIS approved facilities.

Hyacinthus in growing media **cannot** be imported into the U.S. until APHIS approves facilities to export *Hyacinthus* in growing media to the U.S.

NOTICE

Hyacinthus spp. in Approved Growing Media is a separate program and has different requirements than other taxa approved for importation in growing media from an approved facility. There are **no** approved facilities at this time.

Hyacinthus spp. (hyacinth) may be imported established in unused peat, sphagnum moss, or vermiculite growing media, or in synthetic growing media or synthetic horticultural foams, i.e., plastic particles, glass wool, organic and inorganic fibers, polyurethane, polystyrene, polyethylene, phenol formaldehyde, or ureaformaldehyde and from an approved facility **must** meet the following requirements:

- ◆ Has a written agreement between Plant Protection and Quarantine and the national plant protection organization (NPPO) of the country where the article is grown in which the NPPO agrees to implement a program in compliance with the provisions of this section;
- ◆ Has a written agreement between the grower of the article and the national plant protection organization (NPPO) of the country in which the article is grown wherein the grower agrees to:
 - ❖ Comply with the provisions of this section;
 - ❖ Allow an inspector access to the growing facility as necessary to monitor compliance with the provisions of this section; and
 - ❖ Allow representatives of the national plant protection organization (NPPO) of the country in which the article is grown access to the growing facility as necessary to make determinations concerning compliance with the provisions of this section;
 - ❖ Is inspected immediately prior to the growing period by the national plant protection organization (NPPO) of the country in which the article is to be grown and found to be free of quarantine pests
 - ⇒ Grown throughout its growing period **only** in a cold room (with temperatures **not** exceeding 9 °C (48 °F).) within an enclosed building;
 - ⇒ Grown **only** in a cold room unit **solely** used for plants grown under **all** the criteria specified in this paragraph;

- ⇒ Grown **only** in unused peat, sphagnum moss, or vermiculite growing media; or grown **only** in synthetic growing media or synthetic horticultural foams (i.e., plastic particles, glass wool, organic and inorganic fibers, polyurethane, polystyrene, polyethylene, phenol formaldehyde, ureaformaldehyde);
- ⇒ Watered **only** with clean rainwater that has been pasteurized, with clean well water, or with potable water;
- ⇒ Grown in a coldroom free of sand, soil, or earth;
- ⇒ Grown **only** in a coldroom where strict sanitary procedures are always practiced, i.e., cleaning and disinfection of floors and tools and the application of measures to protect against any quarantine pests; and
- ⇒ Stored **only** in areas found free of sand, soil, earth, quarantine pests.
- ❖ Appropriate measures have been taken to assure that the article is to be stored, packaged, and shipped free of quarantine pests;
- ❖ Be accompanied by a phytosanitary certificate with an accurate additional declaration from the national plant protection organization of the country in which grown that the article meets conditions of growing, storing, and shipping in compliance with the [Hyacinthus in Approved Growing Media Program](#); and
 - ⇒ Accompanying phytosanitary certificate is endorsed by a Plant Protection and Quarantine (PPQ) inspector in the country of origin or
 - ⇒ At the time of offer for importation, representing a finding based on monitoring inspections that the conditions listed above are being met.

Neoregelia spp. in Growing Media Program

Neoregelia spp. plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities in the list of [Approved Neoregelia spp. in Growing Media Facilities](#).

Currently **only** the Netherlands has both an approved *Neoregelia* in growing media program and approved facilities.

Neoregelia spp. in Growing Media from Netherlands Program

Neoregelia spp. plants in growing media from the Netherlands **must** be as follows:

- ◆ Meet [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility on the [Approved Neoregelia spp. in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Neoregelia spp. in growing media that **do not** meet all the above conditions for entry are prohibited.

Nidularium spp. in Growing Media Program

Nidularium spp. plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities on the list of [Approved Nidularium spp. in Growing Media Facilities](#).

Currently **only** the Netherlands has both an approved *Nidularium* in growing media program and approved facilities.

Nidularium spp. in Growing Media from Netherlands Program

Nidularium spp. plants in growing media from the Netherlands **must** be as follows:

- ◆ Meet [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility on the [Approved Nidularium spp. in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Nidularium spp. in growing media that **do not** meet all the above conditions for entry are prohibited.

Oncidium spp. in Growing Media Program

Oncidium spp. plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities listed in the [Approved Oncidium in Growing Media Facilities](#).

Currently **only** Taiwan has an approved *Oncidium* in growing media program and approved facilities.

Oncidium in Growing Media from Taiwan Requirements

Oncidium spp. plants for planting in approved growing media from Taiwan **must** be as follows to be imported into the United States:

- ◆ Meet [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility on the [Approved Oncidium spp. in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Oncidium spp. in growing media that **do not** meet the above conditions for entry are prohibited.

Phalaenopsis spp. in Approved Growing Media Program

Phalaenopsis spp. plants in approved growing media (listed in [Table 7-1](#)) exported to the United States **must** be from an APHIS approved facility.

Plants in growing media from facilities that are **not** included in the list of [Approved Phalaenopsis in Growing Media Facilities](#) are prohibited entry.

Phalaenopsis in Approved Growing Media from China Program

Phalaenopsis spp. plants for planting in growing media from China may **only** be imported into the continental United States (may **not** be moved into Hawaii or the territories of the United States) and **must** meet the following conditions:

- ◆ Meet all the [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be exported from an APHIS approved facility authorized to export *Phalaenopsis* in growing media from the People's Republic of China to the continental United States (see list of [Approved Phalaenopsis in Growing Media Facilities](#)); and
- ◆ Meet all other requirements for entry.

Phalaenopsis in Approved Growing Media from South Korea Program

Phalaenopsis spp. plants in approved growing media from South Korea (Republic of Korea) may **only** be imported into the continental United States (may **not** be moved into Hawaii or the territories of the United States) and **must** meet the following conditions:

- ◆ Meet all the requirements listed for [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be exported from an APHIS approved facility authorized to export *Phalaenopsis* spp. in growing media from South Korea (Republic of Korea) to the continental United States (see list of [Approved Phalaenopsis in Growing Media Facilities](#)); and
- ◆ Meet all other requirements for entry.

***Phalaenopsis* in Approved Growing Media from Taiwan Program**

Phalaenopsis spp. plants for planting in approved growing media from Taiwan **must** be as follows to be imported into the United States:

- ◆ Meet all the requirements listed for [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be exported from an APHIS approved facility authorized to export *Phalaenopsis* spp. in growing media from Taiwan to the United States (see list of [Approved Phalaenopsis in Growing Media Facilities](#)); and
- ◆ Meet all other requirements for entry.

Podocarpus macrophyllus in Growing Media Program

There are currently **no** APHIS approved facilities authorized to export *Podocarpus macrophyllus* in growing media to the U.S.

Podocarpus macrophyllus in Growing Media from China Program

Plants of *Podocarpus macrophyllus* from the People's Republic of China **must** meet the [Plants in Growing Media Program Basic Requirements](#) requirements above and the following conditions:

- ◆ Propagative cuttings
 - ❖ Propagative materials used to produce the artificially dwarfed (penjing) plants may enter an approved greenhouse **only** as seeds, tissue cultures, unrooted cuttings, or rooted cuttings with **no** growing media
 - ❖ Rooted cuttings may **not** be established or grown in soil at any time
 - ❖ Rooted cuttings may be established in a greenhouse or outside the greenhouse on raised benches (46 cm in height) in pots containing **only** APHIS approved growing media.
- ◆ Inspection and treatment
 - ❖ When any cuttings are introduced into the greenhouse, they **must** be free of growing media, inspected, and found free of quarantine pests and then treated with a pesticide dip approved by the national plant protection organization (NPPO) of the People's Republic of China that will control mites, scale insects, whiteflies, thrips, and fungi.
 - ❖ Artificially dwarfed (penjing) plants **must** be propagated from mother plants that have been visually inspected by an APHIS inspector or an NPPO of the People's Republic of China and found free of the following pests:
 - ⇒ *Pestalosphaeria jinggangensis*
 - ⇒ *Pestalotia diospyri*
 - ⇒ *Phellinus noxius*
 - ⇒ *Sphaerella podocarpi*
- ◆ Growing
 - ❖ Artificially dwarfed (penjing) plants **must** be grown in an approved greenhouse for at least 6 months immediately prior to export.
 - ❖ Additional treatments

Plants in Growing Media Programs

Podocarpus macrophyllus in Growing Media Program

- ⇒ While in the greenhouse, plants **must** be treated with appropriate pesticides at least once every 10 days or as needed for three months before shipping to maintain a pest-free condition

There are currently **no** APHIS approved facilities authorized to export *Podocarpus macrophyllus* in growing media from China to the U.S.

Rhipsalidopsis spp. in Growing Media Program

Rhipsalidopsis plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities listed in the [Approved Rhipsalidopsis in Growing Media Facilities](#).

Currently **only** Denmark and Netherlands have approved *Rhipsalidopsis* in growing media programs and approved facilities.

Rhipsalidopsis in Growing Media from Denmark Program

Plants of *Rhipsalidopsis* in growing media from Denmark must be as follows:

- ◆ Meet the [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be sent from an approved facility on the [Approved Rhipsalidopsis in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Rhipsalidopsis in growing media that **do not** meet the above requirements are prohibited.

Rhipsalidopsis in Growing Media from Netherlands Program

Plants of *Rhipsalidopsis* in growing media from the Netherlands **must** be as follows:

- ◆ Meet the [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be sent from an approved facility on the [Approved Rhipsalidopsis in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Rhipsalidopsis in growing media that **do not** meet the above requirements are prohibited.

Rhododendron spp. in Growing Media Program

There are currently **no** APHIS approved facilities authorized to export *Rhododendron* spp. in growing media to the U.S.

Rhododendron in Growing Media from Europe Program

Plants of *Rhododendron* spp. in growing media from Europe **must** meet the [Plants in Growing Media Program Basic Requirements](#) and **must** meet additional the requirements below:

- ◆ Be propagated from mother plants that have been visually inspected by an APHIS inspector or an inspector of the national plant protection organization (NPPO) of the exporting country and found free of evidence of diseases caused by the following pathogens:
 - ❖ *Chrysomyxa ledi* var. *rhododendri*
 - ❖ *Erysiphe cruciferarum*
 - ❖ *Erysiphe rhododendri*
 - ❖ *Exobasidium vaccinii*
 - ❖ *Exobasidium vaccinii* var. *japonicum*
 - ❖ *Phomopsis theae*
- ◆ Be grown **solely** in a greenhouse equipped with automatic closing double doors of an airlock type, so that whenever one of the doors in an entryway is open the other is closed
- ◆ Be introduced into the greenhouse as tissue cultures or as rootless stem cuttings from mother plants that:
 - ❖ Have received a pesticide dip prescribed by the national plant protection organization (NPPO) of the exporting country for mites, scale insects, and whitefly; and
 - ❖ Have been grown for at least the previous 6 months **solely** in a greenhouse in which sanitary procedures adequate to exclude quarantine pests are always employed, and included the following:
 - ⇒ Cleaned and disinfected of floors, benches and tools
 - ⇒ Applied measures to protect against any quarantine pests
 - ⇒ Free from sand and soil
 - ⇒ Have screening with openings of **not** more than 0.2 mm on all vents and openings **except** entryway
 - ⇒ Have all entryways equipped with automatic closing doors.

Sageretia thea in Growing Media Program

There are currently **no** APHIS approved facilities authorized to export *Sageretia thea* in growing media to the U.S.

Sageretia thea in Growing Media from China Program

Plants of *Sageretia thea* from the People's Republic of China **must** meet the requirements of [Plants in Growing Media Program Basic Requirements](#) and the following conditions:

Propagative Cuttings

The propagative materials used to produce the artificially dwarfed (penjing) plants may enter an approved greenhouse **only** as seeds, tissue cultures, unrooted cuttings, or rooted cuttings with **no** growing media. Rooted cuttings may **not** be established or grown in soil at any time. Rooted cuttings may be established in a greenhouse or outside the greenhouse on raised benches (46 cm in height) in pots containing **only** APHIS approved growing media.

Inspection and Treatment

When any cuttings are introduced into the greenhouse, they **must** be free of growing media, inspected, and found free of quarantine pests and then treated with a pesticide dip approved by the Animal and Plant Quarantine Service of the People's Republic of China that will control mites, scale insects, whiteflies, thrips, and fungi. The artificially dwarfed (penjing) plants **must** be propagated from mother plants that have been visually inspected by an APHIS inspector or an inspector of the Animal and Plant Quarantine Service of the People's Republic of China and found free of the following pest: *Aecidium sageretiae*.

Growing

The artificially dwarfed (penjing) plants **must** be grown in an approved greenhouse for at least 6 months immediately prior to export.

Additional Treatments

While in the greenhouse, plants **must** be treated with appropriate pesticides at least once every 10 days or as needed for three months before shipping to maintain a pest-free condition.

Schlumbergera spp. in Growing Media Program

Schlumbergera spp. plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities listed in the [Approved Schlumbergera in Growing Media Facilities](#).

Currently **only** Denmark and the Netherlands have approved *Schlumbergera* spp. in growing media programs and approved facilities.

Schlumbergera in Growing Media from Denmark Program

Schlumbergera plants in growing media from Denmark **must** meet the [Plants in Growing Media Program Basic Requirements](#) and be sent from an approved facility on the [Approved Schlumbergera in Growing Media Facilities](#) list.

Schlumbergera in Growing Media from Netherlands Program

Schlumbergera from the Netherlands **must** meet the [Plants in Growing Media Program Basic Requirements](#) and be sent from an approved facility on the [Approved Schlumbergera in Growing Media Facilities](#) list.

Serissa foetida in Approved Growing Media

There are currently **no** APHIS approved facilities authorized to export *Serissa foetida* in growing media to the U.S.

Serissa foetida in Growing Media from China Program

Serissa foetida plants in growing media from the People's Republic of China **must** meet [Plants in Growing Media Program Basic Requirements](#) requirements and the following conditions:

Propagative Cuttings

The propagative materials used to produce the artificially dwarfed (penjing) plants may enter an approved greenhouse **only** as seeds, tissue cultures, unrooted cuttings, or rooted cuttings with **no** growing media. Rooted cuttings may **not** be established or grown in soil at any time. Rooted cuttings may be established in a greenhouse or outside the greenhouse on raised benches (46 cm in height) in pots containing **only** APHIS approved growing media.

Inspection and Treatment

When any cuttings are introduced into the greenhouse, they **must** be free of growing media, inspected, and found free of quarantine pests and then treated with a pesticide dip approved by the Animal and Plant Quarantine Service of the People's Republic of China that will control mites, scale insects, whiteflies, thrips, and fungi. The artificially dwarfed (penjing) plants **must** be propagated from mother plants that have been visually inspected by an APHIS inspector or an inspector of the Animal and Plant Quarantine Service of the People's Republic of China and found free of the following pest: *Melampsora serissicola*.

Growing

The artificially dwarfed (penjing) plants **must** be grown in an approved greenhouse for at least 6 months immediately prior to export.

Additional Treatments

While in the greenhouse, plants **must** be treated with appropriate pesticides at least once every 10 days or as needed for three months before shipping to maintain a pest-free condition.

Solanum lycopersicum (tomato) in Growing Media Program

Solanum lycopersicum plants in growing media **must** be imported from an approved facility under the *Solanum lycopersicum* from Mexico Program.

Solanum lycopersicum from Mexico Program

Solanum lycopersicum plantlets in approved growing media from Mexico **must** be from [approved Solanum lycopersicum in Growing Media Facilities](#), **must** meet all of the conditions for entry and be produced as follows:

- ◆ Plantlets **must** meet the requirements of [Solanum spp. Ralstonia solanacearum Race 3 Biovar 2 Program](#);
- ◆ Plantlets can **only** be imported into the continental United States;
- ◆ Plantlets **cannot** be imported into Hawaii or the territories of the United States;
- ◆ Plantlets **must** be imported from Mexico directly into a greenhouse in the continental United States, the owner or owners of which have entered into a compliance agreement with APHIS; and
- ◆ Compliance agreement will:
 - ❖ Specify the conditions under which the plants **must** enter;
 - ❖ Be maintained within the greenhouse; and
 - ❖ Prohibit the plantlets from being moved from the greenhouse following importation **other than** for the appropriate disposal of dead plantlets.

If all of the above requirements are correctly complied with, then the tomato fruit produced from the imported greenhouse plantlets may be shipped from the greenhouses for commercial sale within the United States.

Solanum lycopersicum that **do not** meet the above conditions are prohibited.

See the list of [Approved Solanum lycopersicum in Growing Media Facilities](#).

Tillandsia spp. in Growing Media Program

Tillandsia spp. plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities in the list of [Approved Tillandsia in Growing Media Facilities](#).

Currently **only** the Netherlands has an approved *Tillandsia* in growing media program and an approved facility.

Tillandsia spp. in Growing Media from Netherlands Program

Plants of *Tillandsia* spp. in growing media from the Netherlands **must** be as follows:

- ◆ Meet [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility on the on the [Approved Tillandsia in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Tillandsia in growing media that **do not** meet the above requirements are prohibited.

Vriesea spp. in Growing Media Program

Vriesea spp. plants in growing media **must** meet the [Plants in Growing Media Program Basic Requirements](#) and may enter the United States **only** if sent from one of the authorized growers and facilities in the list of [Approved Vriesea in Growing Media Facilities](#).

Currently **only** the Netherlands has an approved *Vriesea* in growing media program and an approved facility.

Vriesea spp. in Growing Media from Netherlands Program

Plants of *Vriesea* spp. in growing media from the Netherlands **must** be as follows:

- ◆ Meet [Plants in Growing Media Program Basic Requirements](#);
- ◆ Be from a facility on the [Approved Vriesea in Growing Media Facilities](#) list; and
- ◆ Meet all other requirements for entry.

Vriesea plants in growing media that **do not** meet the above requirements for entry are prohibited.

Pest Risk Evaluation Standards for Plants Established in Growing Media

Any interested party may initiate a commodity import request to allow the importation of additional taxa of plants in growing media from a country seeking new market access. [Commodity Import Approval Process \(How to Request a PRA\)](#). APHIS **must** conduct a pest risk assessment before the development of a new plants in growing media program.

APHIS will conduct a pest risk assessment based on pest-risk analysis guidelines established by the International Plant Protection Convention (IPPC) of the United Nations Food and Agriculture Organization in response to each request to allow the importation of additional taxa of plants in growing media. These guidelines are available upon request by writing to the following:

USDA-APHIS-PPQ
Center for Plant Health Science and Technology
Plant Epidemiology and Risk Assessment Laboratory (PERAL)

Introduction

The [Preclearance Programs](#) chapter provides information about regulating bulbs and underground portions of dormant perennials and includes a list of species and genera of plants with structures that may be considered for Preclearance.

Preclearance Programs

Preclearance is the phytosanitary inspection and/or clearance in the country in which the plants for planting were grown, and is performed by or under the regular supervision of USDA-APHIS.

Bulbs and Underground Portions of Dormant Perennial Preclearance Program

The Preclearance Program for Bulbs and Underground Portions of Dormant Perennials is the **only** APHIS-approved plants for planting preclearance program. A country must apply and be approved by APHIS to participate in a preclearance program.

Bulbs and underground portions of dormant perennials entering through the preclearance program have already been inspected. When meeting the

preclearance program entry requirements, these precleared shipments generally **do not** require additional agricultural inspection in the U.S.

The preclearance program for specific taxa of bulbs and underground portions of dormant perennials are in effect in Belgium, Chile, Ireland, Israel, the Netherlands, South Africa, Turkey (via the Netherlands **only**), and United Kingdom. All requirements for the preclearance program **must** be met to qualify for the preclearance program.

NOTICE

If other categories of plants for planting (i.e., cuttings, plants, shrubs, trees, vines, sprouting bulbs or perennials, or bulbs **not** listed, etc.) are found in with a shipment of precleared bulbs and dormant perennials, then send the entire shipment to the Plant Inspection Station.

When **not** meeting the preclearance program requirements, the plants are subject to general restrictions for admissibility and any additional restrictions for the commodity, including inspection.

NOTICE

The CBP Agriculture Specialist (CBP AS) may make integrity and compliance checks on any or all precleared shipments of bulbs.

Precleared Bulbs from the Netherlands via Canada

Precleared bulbs from the Netherlands via Canada are authorized entry from Canada.

Precleared Bulbs from Turkey

Precleared bulbs and underground portions of dormant perennials grown in Turkey and shipped from the Netherlands are authorized entry as part of the Netherlands preclearance program and may **only** enter from the Netherlands.

Bulbs and Dormant Perennials Not in Preclearance Program

Bulbs and dormant perennials that are **not** listed in [Table 8-2](#) and are **not** from a preclearance program with Belgium, Chile, Ireland, Israel, the Netherlands, South Africa, Turkey (via the Netherlands **only**), and United Kingdom are **not** part of the preclearance program.

Bulbs and dormant perennials from **other than** Belgium, Chile, Ireland, Israel, the Netherlands, South Africa, Turkey, and United Kingdom are subject to the general restrictions for admissibility. See the specific plant taxa in the [Lists of Plants for Planting](#) for restrictions.

See the specific plant taxa in the [Lists of Plants for Planting](#) to regulate bulbs and underground portions of dormant perennials that are **not** part of a preclearance program.

Bulbs and dormant perennials listed as “**except**” are **not** part of the preclearance program. See the specific plant taxa in the [Lists of Plants for Planting](#) to regulate.

If the bulb or underground portion being imported is **not** from an APHIS-approved precleared preclearance program, then see the [Lists of Plants for Planting](#) to regulate as any other plants for planting.

Bulbs

Genus and species of plants with dormant, underground portions are those that conform to the definition of bulb as the portion of a plant commonly known as a bulb, bulbil, bulblet, corm, cormel, pip, rhizome, or tuber, a unit of which produces an individual plant.

Underground Portions of Dormant Perennials

Genus and species of plants with dormant, underground portions of perennials are fleshy roots or other underground fleshy growths, a unit of which produces an individual plant.

Signs of New Growth (Not Dormant)

If the underground portions of bulbs or plants show signs of new growth, then they are **not** dormant. They are **not** regulated as precleared bulbs or dormant perennials. They are regulated as plants (regardless of having been precleared or **not**). Send all bulbs and plants showing signs of new growth to a plant inspection station for inspection and regulating as plants for planting.

Phytosanitary Certificate Requirement

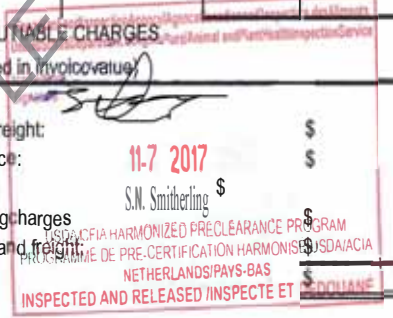

Precleared dormant bulbs and dormant perennials **must** be accompanied by a phytosanitary certificate issued by the national plant protection organization of the country of origin, and include an additional declaration for freedom of potato cyst nematodes from specified countries. The exceptions to the phytosanitary certificate requirement for countries with an approved Preclearance program is listed below.

Exceptions to Phytosanitary Certificate Requirement for Precleared Shipments

Any **one** of the following documents is acceptable in lieu of a phytosanitary certificate for Precleared shipments of bulbs and dormant perennials **only**:

- ◆ Invoice or other document from the Netherlands stating the shipment has been “Precleared” (see [Figure 8-1](#));
- ◆ Label “Copy-certificate of examination for USA” or similar label used for precleared bulbs from Belgium, Ireland, Israel, Netherlands, Turkey, and United Kingdom (see [Figure 8-2](#));
- ◆ Label on mail order shipment with the words “Pre-cleared Flower Bulbs as per Phytosanitary Certificate” with the phytosanitary certificate number inserted at the top right (used by one company in the Netherlands **only**) (see [Figure 8-3](#));
- ◆ Label on mail order shipment (mailing label) titled, “Flower Bulbs From Holland” bearing a “Copy-certificate of examination for USA” at the bottom (used by Netherlands **only**) (see [Figure 8-4](#)); or
- ◆ PPQ Form 203, *Foreign Site Certificate of Inspection and/or Treatment*, accompanying bulbs or a telex (Chile) that verifies the shipment has been Precleared (see [Figure C-4](#) on [page C-8](#)) (used by South Africa).

CITES Documentation

If any of the precleared dormant bulbs or dormant perennials are CITES, then a valid PPQ-issued *Protected Plant Permit* **must** accompany the shipment. CITES documents for Preclearance shipments from the above countries are kept at the USDA-APHIS Preclearance Office in Hillegom, Netherlands. The CITES documents **do not** accompany Preclearance shipments to the U.S.

Common Diseases and Injuries

Commercial entries of bulbs with appreciable freezing, heating, or physical injury or with more than eight percent of any one variety in a shipment infected with common diseases, such as follows:

- ◆ *Cylindrocarpon radicicola*
- ◆ *Pseudomonas marginata*
- ◆ *Septoria gladioli*
- ◆ *Stromatinia gladioli*
- ◆ *Thielaviopsis basicola*

and species of the pests:

- ◆ *Aspergillus*
- ◆ *Botrytis*
- ◆ *Fusarium*
- ◆ *Papulospora*
- ◆ *Penicillium*
- ◆ *Rhizopus*

should be reported to the importer or the broker handling the shipment. This affords the importer with an opportunity to refuse or recondition the shipment, and save on entry charges and further transportation. If the shipment is consigned to a State that is known to make a practice of condemning such shipments at destination, then the importer should be informed.

In case of shipments cleared abroad, physical injuries and common diseases **must** be within the above tolerances at the time of inspection.

New Taxa

Importers may request a new taxa be included in the [List of Bulbs and Underground Portions of Dormant Perennials](#) by contacting the Animal and Plant Health Inspection Service, Plant Protection and Quarantine (USDA-APHIS-PPQ), in Riverdale, Maryland at 1-877-770-5990.

See [Preclearance Activities](#) for more information.

List of Bulbs and Underground Portions of Dormant Perennials

Table 8-2 provides the list of scientific names of bulbs and underground portions of dormant perennials that are **eligible** for preclearance in an APHIS approved preclearance program. The listed species and genera have either underground parts that conform to the definition of “Bulb (B)” **bulb** or are regulated as “Dormant Perennial (DP).” Both plant structures (bulbs and underground portions of dormant perennials) listed in Table 8-2 may be considered for the Preclearance Program. Family names are provided to help identify regulated families. Taxa listed as “**except**” **cannot** be considered for the Preclearance Program.

When meeting all requirements for the Preclearance Program, bulbs and underground portions of dormant perennials listed in Table 8-2 are admissible from Belgium, Chile, Israel, the Netherlands, South Africa, and the United Kingdom, unless listed as **except**.

EXAMPLE *Adonis* spp. **except** *Adonis amurensis*, *A. baetica*, *A. dentata*, *A. flammea*, *A. microcarpa* are listed in Table 8-2.

Adonis spp. may be considered for the Preclearance Program from Belgium, Chile, Israel, the Netherlands, South Africa, Turkey (via the Netherlands **only**), United Kingdom.

Adonis amurensis, *A. baetica*, *A. dentata*, *A. flammea*, *A. microcarpa* **cannot** be considered for the Preclearance Program and **must** be regulated as plants for planting (see the individual taxa in the [Lists of Plants for Planting](#)).

NOTICE

Bulbs and underground portions of perennials showing signs of new growth are **not** dormant. Forward the shipment to a plant inspection station for regulating as plants, even if the shipment is Precleared.

Introduction

The *Protected Plants* chapter includes the text of the CITES Appendices I, II, and III Interpretation and annotations to the CITES Appendices for plants; and a list of designated U.S. CITES ports where CITES and ESA plants may be imported into, and exported or re-exported from the U.S.

USDA-APHIS-PPQ staff at plant inspection stations carry out regulations controlling the import and export of protected plant species. Responsibility to enforce the Endangered Species Act of 1973 (ESA) and the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) treaty has been delegated to the USDA.

Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and Endangered Species Act (ESA)

The USDA is responsible for enforcing the regulations specific to the import and export of plants regulations specific to the import and export of plants regulation by CITES and the Endangered Species Act.

Continue to [CITES Plants](#) and [Endangered Species Act \(ESA\) Plants](#).

CITES Plants

The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), is an international treaty, signed by the United States and 180 other countries. CITES regulates the trade in listed species and hybrids of plants and animals at risk of extinction because of overexploitation. The goal of CITES is to ensure that international trade in listed plant and animal specimens is legal and sustainable and that the extinction of those species is prevented.

About 28,000 species of plants are protected by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) against over-exploitation through international trade. These endangered plant species are included in the [Lists of Plants for Planting](#). Use the information in this chapter along with identified CITES plants included the [Lists of Plants for Planting](#).

CITES regulated plants are identified by individual plant taxa in Chapter 6, [Lists of Plants for Planting](#). The current official list is at [CITES regulated plants](#) at [CITES.org](#).

Permits

If you are in the business of importing, exporting, or re-exporting CITES regulated plants and plant products, USDA regulation 7 CFR 355 requires that you possess a valid USDA *Protected Plant Permit*. Importations of live plants and seeds **must** also obtain permits under the USDA's 7 CFR 319 Subpart H—Plants for Planting. If you are engaging in the business of importing CITES regulated plants, then see [Plant Health Permits](#) and complete *PPQ 621, Application for a Protected Plant Permit to Engage in the Business of Importing, Exporting, or Re-exporting Terrestrial Plants* and *PPQ 587, Application to Import Plants or Plant Products*.

Procedures

Summary of procedures for handling the importation of CITES protected plants for planting:

1. Confirm that the commodity is a CITES Appendix I, Appendix II, or Appendix III protected plant species.
2. Determine if the form of the commodity is protected by CITES.
3. Determine if you have the authority to validate the shipment.
4. Determine which CITES documents must accompany the shipment.
5. Collect all relevant documents associated with the importation.

6. Verify that the CITES document accompanying the importation is authentic and acceptable.
7. Verify the USDA-APHIS ePermits issued Protected Plant Permit has not expired.
8. Inspect the shipment to make sure the quantities are authorized.
9. If the shipment is in order, then validate the CITES documents by stamp and endorsement.
10. Distribute and file the endorsed documents.

CITES Appendices I, II, and III Interpretation

CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES
OF WILD FAUNA AND FLORA

Appendices I, II and III

valid from 26 November 2019

Interpretation

1. Species included in these Appendices are referred to:
 - a) by the name of the species; or
 - b) as being all of the species included in a higher taxon or designated part thereof.
2. The abbreviation "spp." is used to denote all species of a higher taxon.
3. Other references to taxa higher than species are for the purposes of information or classification only. The common names included after the scientific names of families are for reference only. They are intended to indicate the species within the family concerned that are included in the Appendices. In most cases this is not all of the species within the family.
4. The following abbreviations are used for plant taxa below the level of species:
 - a) "ssp." is used to denote subspecies; and
 - b) "var(s)." is used to denote variety (varieties).
5. As none of the species or higher taxa of FLORA included in Appendix I is annotated to the effect that its hybrids shall be treated in accordance with the provisions of Article III of the Convention, this means that artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.
6. The names of the countries in parentheses placed against the names of species in Appendix III are those of the Parties submitting these species for inclusion in this Appendix.
7. When a species is included in one of the Appendices, the whole, live or dead, animal or plant is included. In addition, for animal species listed in Appendix III and plant species listed in Appendix II or III, all parts and derivatives of the species are also included in the same Appendix unless the species is annotated to indicate that only specific parts and derivatives are included. The symbol # followed by a number placed against the name of a species or higher taxon included in Appendix II or III refers to a footnote that indicates the parts or derivatives of animals or plants that are designated as 'specimens' subject to the provisions of the Convention in accordance with Article I, paragraph (b), subparagraph (ii) or (iii).
8. The terms and expressions below, used in annotations in these Appendices, are defined as follows:

Extract

Any substance obtained directly from plant material by physical or chemical means regardless of the manufacturing process. An extract may be solid (e.g. crystals, resin, fine or coarse particles), semi-solid (e.g. gums, waxes) or liquid (e.g. solutions, tinctures, oil and essential oils).

Finished musical instruments

A musical instrument (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) that is ready to play or needs only the installation of parts to make it playable. This term includes antique instruments (as defined by the Harmonized System codes 97.05 and 97.06; Works of art, collectors' pieces and antiques).

Figure 9-1 CITES Appendices I, II and III Interpretation Valid from November 26, 2019 (page 1)

Finished musical instrument accessories

A musical instrument accessory (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) that is separate from the musical instrument, and is specifically designed or shaped to be used explicitly in association with an instrument, and that requires no further modification to be used.

Finished musical instrument parts

A part (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) of a musical instrument that is ready to install and is specifically designed and shaped to be used explicitly in association with the instrument to make it playable.

Finished products packaged and ready for retail trade

Products, shipped singly or in bulk, requiring no further processing, packaged, labelled for final use or the retail trade in a state fit for being sold to or used by the general public.

Powder

A dry, solid substance in the form of fine or coarse particles.

Shipment

Cargo transported under the terms of a single bill of lading or air waybill, irrespective of the quantity or number of containers or packages; or pieces worn, carried or included in personal baggage.

Ten (10) kg per shipment

For the term "10 kg per shipment", the 10 kg limit should be interpreted as referring to the weight of the individual portions of each item in the shipment made of wood of the species concerned. In other words, the 10 kg limit is to be assessed against the weight of the individual portions of wood of Dalbergia/Guibourtia species contained in each item of the shipment, rather than against the total weight of the shipment.

Transformed wood

Defined by Harmonized System code 44.09: Wood (including strips, friezes for parquet flooring, not assembled), continuously shaped (tongued, grooved, v-jointed, beaded or the like) along any edges, ends or faces, whether or not planed, sanded or end-jointed.

Woodchips

Wood that has been reduced to small pieces.

Figure 9-2 CITES Appendices I, II and III Interpretation Valid from November 26, 2019 (page 2)

Protected Plants

CITES Annotations to the Appendices (Plants Only)

CITES Annotations to the Appendices (Plants Only)

The CITES annotations to the Appendices are valid from November 26, 2019. Annotations 9-12 apply to CITES protected plants (flora)¹ and are listed in [Table 9-1](#) below. Footnotes to the CITES annotations are listed in [Table 9-2](#).

Table 9-1 CITES Annotations to the Appendices as of November 26, 2019

Annotation	
9	<p>Artificially propagated specimens of the following hybrids and/or cultivars are not subject to the provisions of the Convention:</p> <ul style="list-style-type: none">- <i>Hatiora x graeseri</i>- <i>Schlumbergera x buckleyi</i>- <i>Schlumbergera russelliana x Schlumbergera truncata</i>- <i>Schlumbergera orssichiana x Schlumbergera truncata</i>- <i>Schlumbergera opuntioides x Schlumbergera truncata</i>- <i>Schlumbergera truncata</i> (cultivars)- Cactaceae spp. colour mutants grafted on the following grafting stocks: <i>Harrisia 'Jusbertii'</i>, <i>Hylocereus trigonus</i> or <i>Hylocereus undatus</i>- <i>Opuntia microdasys</i> (cultivars).
10	<p>Artificially propagated hybrids of the following genera are not subject to the provisions of the Convention, if conditions, as indicated under a) and b), are met: <i>Cymbidium</i>, <i>Dendrobium</i>, <i>Phalaenopsis</i> and <i>Vanda</i>:</p> <p>a) Specimens are readily recognizable as artificially propagated and do not show any signs of having been collected in the wild such as mechanical damage or strong dehydration resulting from collection, irregular growth and heterogeneous size and shape within a taxon and shipment, algae or other epiphyllous organisms adhering to leaves, or damage by insects or other pests; and</p> <p>b) i) when shipped in non-flowering state, the specimens must be traded in shipments consisting of individual containers (such as cartons, boxes, crates or individual shelves of CC-containers) each containing 20 or more plants of the same hybrid; the plants within each container must exhibit a high degree of uniformity and healthiness; and the shipment must be accompanied by documentation, such as an invoice, which clearly states the number of plants of each hybrid; or</p> <p>ii) when shipped in flowering state, with at least one fully open flower per specimen, no minimum number of specimens per shipment is required but specimens must be professionally processed for commercial retail sale, e.g. labeled with printed labels or packaged with printed packages indicating the name of the hybrid and the country of final processing. This should be clearly visible and allow easy verification.</p> <p>Plants not clearly qualifying for the exemption must be accompanied by appropriate CITES documents</p>
11	<p>Artificially propagated specimens of cultivars of <i>Cyclamen persicum</i> are not subject to the provisions of the Convention. However, the exemption does not apply to such specimens traded as dormant tubers,</p>
12	<p>Artificially propagated hybrids and cultivars of <i>Taxus cuspidata</i>, live, in pots or other small containers, each consignment being accompanied by a label or document stating the name of the taxon or taxa and the text 'artificially propagated', are not subject to the provisions of the Convention.</p>

¹ (Annotations 1-8 are **not** included in this manual since they apply to CITES protected animals (fauna).)

Table 9-2 Footnotes to CITES Annotations (Plants Only) as of November 26, 2019

Footnotes to Annotations	
#1	All parts and derivatives, except: a) seeds, spores and pollen (including pollinia); b) seedling or tissue cultures obtained <i>in vitro</i> , in solid or liquid media, transported in sterile containers c) cut flowers of artificially propagated plants; and d) fruits, and parts and derivatives thereof, of artificially propagated plants of the genus <i>Vanilla</i> .
#2	All parts and derivatives except : a) seeds and pollen; and b) finished products packaged and ready for retail trade.
#3	Whole and sliced roots and parts of roots, excluding manufactured parts or derivatives, such as powders, pills, extracts, tonics, teas and confectionery
#4	All parts and derivatives, except : a) seeds (including seedpods of Orchidaceae), spores and pollen (including pollinia). The exemption does not apply to seeds from Cactaceae spp. exported from Mexico, and to seeds from <i>Beccariophoenix madagascariensis</i> and <i>Dypsis decaryi</i> exported from Madagascar; b) seedling or tissue cultures obtained <i>in vitro</i> , in solid or liquid media, transported in sterile containers; c) cut flowers of artificially propagated plants; d) fruits, and parts and derivatives thereof, of naturalized or artificially propagated plants of the genus <i>Vanilla</i> (Orchidaceae) and of the family Cactaceae; e) stems, flowers, and parts and derivatives thereof, of naturalized or artificially propagated plants of the genera <i>Opuntia</i> subgenus <i>Opuntia</i> and <i>Selenicereus</i> (Cactaceae); and f) finished products of <i>Aloe ferox</i> and <i>Euphorbia antisyphilitica</i> packaged and ready for retail trade.
#5	Logs, sawn wood and veneer sheets.
#6	Logs, sawn wood, veneer sheets and plywood.
#7	Logs, woodchips, powder and extracts.
#8	Underground parts (i.e. roots, rhizomes): whole, parts and powdered.
#9	All parts and derivatives except those bearing a label: "Produced from <i>Hoodia</i> spp. material obtained through controlled harvesting and production under the terms of an agreement with the relevant CITES Management Authority of [Botswana under agreement No. BW/xxxxxx] [Namibia under agreement No. NA/xxxxxx] [South Africa under agreement No. ZA/xxxxxx]".
#10	Logs, sawn wood, veneer sheets, including unfinished wood articles used for the fabrication of bows for stringed musical instruments.
#11	Logs, sawn wood, veneer sheets, plywood, powder and extracts. Finished products containing such extracts as ingredients, including fragrances, are not considered to be covered by this annotation.
#12	Logs, sawn wood, veneer sheets, plywood and extracts. Finished products containing such extracts as ingredients, including fragrances, are not considered to be covered by this annotation.
#13	The kernel (also known as 'endosperm', 'pulp' or 'copra') and any derivative thereof.

Protected Plants

CITES Annotations to the Appendices (Plants Only)

Table 9-2 Footnotes to CITES Annotations (Plants Only) as of November 26, 2019 (continued)

Footnotes to Annotations	
#14	All parts and derivatives except :
	a) seeds and pollen;
	b) seedling or tissue cultures obtained <i>in vitro</i> , in solid or liquid media, transported in sterile containers;
	c) fruits;
	d) leaves;
	e) exhausted agarwood powder, including compressed powder in all shapes; and
	f) finished products packaged and ready for retail trade, this exemption does not apply to wood chips, beads, prayer beads and carvings.
#15	All parts and derivatives are included, except :
	a) Leaves, flowers, pollen, fruits, and seeds;
	b) Finished products to a maximum weight of wood of the listed species of up to 10 kg per shipment;
	c) Finished musical instruments, finished musical instrument parts and finished musical instrument accessories;
	d) Parts and derivatives of <i>Dalbergia cochinchinensis</i> , which are covered by Annotation # 4;
	e) Parts and derivatives of <i>Dalbergia</i> spp. originating and exported from Mexico, which are covered by Annotation # 6.
#16	Seeds, fruits, oils.
#17	Logs, sawn wood, veneer sheets, plywood and transformed wood.

Endangered Species Act (ESA) Plants

The Endangered Species Act (ESA) is to protect and recover imperiled species and the ecosystems upon which they depend.

Under the ESA, species may be listed as either endangered or threatened.

ESA-E

Under the ESA, endangered means a species is in danger of extinction throughout all or a significant portion of its range. In this manual, ESA-E refers to endangered plants or plant parts.

ESA-T

Under the ESA, threatened means a species is likely to become endangered within the foreseeable future throughout all or a significant portion of its range. In this manual, ESA-T refers to endangered plants or plant parts.

Permits

If you are in the business of importing, exporting, or re-exporting CITES or ESA regulated plants and plant products, USDA regulation 7 CFR 355 requires that you possess a valid USDA Protect Plant Permit. Importations of live plants and seeds **must** also obtain permits under the USDA's 7 CFR 319 Subpart H—Plants for Planting.

Permits

If you are in the business of importing, exporting, or re-exporting ESA regulated plants and plant products, USDA regulation 7 CFR 355 requires that you possess a valid USDA Protected Plant Permit. Importations of live plants and seeds **must** also obtain permits under the USDA's 7 CFR 319 Subpart H—Plants for Planting. If you are engaging in the business of importing ESA regulated plants, then see [Plant Health Permits](#) and complete *PPQ 621, Application for a Protected Plant Permit to Engage in the Business of Importing, Exporting, or Re-exporting Terrestrial Plants* and *PPQ 587, Application to Import Plants or Plant Products*.

Protected Plants

Designated U.S. Ports for CITES and ESA Plant Species

Designated U.S. Ports for CITES and ESA Plant Species

CITES listed plants and plant products **must** enter the United States through a designated port. See [CITES Designated Ports](#) to locate a designated port through which CITES regulated commodities **must** enter.

Offshore Greenhouse Certification Program

Contents

Introduction **10-1**

Offshore Greenhouse Certification Program for Unrooted Vegetative Cuttings
10-1

Introduction

The *Offshore Greenhouse Certification Program* chapter provides information about unrooted vegetative cuttings for planting or propagation that may be imported to the United States through the Offshore Greenhouse Certification Program for Unrooted Vegetative Cuttings and facilities authorized to participate.

Offshore Greenhouse Certification Program for Unrooted Vegetative Cuttings

The Offshore Greenhouse Certification Program (OGCP) is a certification program for offshore facilities that produce APHIS-approved, generally admissible unrooted plant cuttings under a systems approach to reduce pest and disease risk.

Facilities that participate in the program may benefit from a reduced inspection frequency at the U.S. plant inspection stations for shipments that meet **all** of the following criteria:

- ◆ Consist of **only** unrooted cuttings from the [-APHIS approved plant taxa list](#);
- ◆ Consist of cuttings produced in a [facility certified by APHIS](#) to participate in the OGCP;
- ◆ Meet the general admissibility requirements for importing plants for planting into the United States under [General Restrictions](#); and
- ◆ Use [APHIS CORE Message Set](#) single window system to submit required import data.

Participation in the program is voluntary and is **not** a condition of entry for generally admissible plants. OGCP certifications require a mandatory annual facility audit by APHIS that demonstrates the entity meets or exceeds the program's [minimum standards](#) for facility construction, security, production and sanitation, pest management, training, and record-keeping.

Certified OGCP facilities will have their program benefits suspended if a quarantine pest is intercepted in any unrooted cuttings consignment from that facility. This means subsequent shipments from the facility will **not** benefit from potentially reduced inspection rates at the port of entry. To maintain OGCP certification and have their benefits restored, the facility **must** resolve to APHIS' satisfaction any corrective action requests and demonstrate a series of clean shipments where **no** additional quarantine pests are intercepted. If the facility is unable to resolve the issue, then their OGCP certification may be revoked.

Participating offshore facilities **must** cover the full cost of the certification audit, including travel, salary, benefits, and overtime (if applicable) of the associated auditors. The facilities provide these funds through a trust fund established through a signed cooperative services agreement.

See the list of [Approved Offshore Greenhouse Certification Program for Unrooted Vegetative Cuttings Facilities](#). For more information about the program, see the [Offshore Greenhouse Certification Program website](#).

Plant Inspection Stations

Ports of Entry

Contents

Introduction	A-1
Ports of Entry	A-1
USDA Plant Inspection Stations	A-2

Introduction

The Plant Inspection Stations and Ports of Entry provides a list of the ports of entry and the USDA plant inspection stations where plants for planting for import that require a written permit under 7 CFR 319 Subpart H—Plants for Planting.

Ports of Entry

Any plants for planting required to be imported under a written permit pursuant to 7 CFR 319.37-5, unless precleared, may be imported or offered for importation **only** at a USDA plant inspection station listed in [Table A-1](#). Ports of entry associated with each USDA plant inspection station are listed in the table.

CITES plants for planting **must** enter at designated ports of entry. See [Designated U.S. Ports for CITES and ESA Plant Species](#).

USDA Plant Inspection Stations

Table A-1 List of Ports of Entry and USDA Plant Inspection Stations

State	Port of Entry	USDA Plant Inspection Station	Phone and Fax
Arizona (AZ)	Nogales	USDA-APHIS-PPQ Plant Inspection Station 220 North Mariposa Road, B500 Nogales, AZ 85621	Ph: 520-285-5400 Fax: 520-287-2117

Federal Import Orders

Federal Order Effective April 1, 2022

[Federal Order DA-2022-14](#), dated April 1, 2022 and effective on April 1, 2022, amending the importation requirements for potatoes from Prince Edward Island in Canada, to prevent the introduction of potato wart (fungal causal agent *Synchytrium endobioticum*) into the United States. This Federal Order replaces DA-2015-01 issued on January 26, 2015, and updates import requirements for potatoes for consumption and planting into the United States, including all 50 states, the District of Columbia, Guam, the Commonwealth of the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands.

Federal Order Effective September 14, 2021

[Federal Order DA-2021-25](#), dated September 7, 2021 and effective September 14, 2021, amending the entry requirements for the importation of *Fragaria* spp., *Rosa* spp., and *Rubus* spp. plants produced in Canada to prevent the introduction of the *Anthonomus rubi* (strawberry blossom weevil) into the United States.

Federal Order Effective May 26, 2021

[Federal Order DA-2021-11](#), dated May 26, 2021 and effective May 26, 2021, amending the import requirements of *Buxus* spp. (boxwood), *Euonymus* spp. (*Euonymus*), and *Ilex* spp. (holly) plants for planting from Canada to prevent the entry of box tree moth (*Cydalima perspectalis*). This Federal Order replaces DA-2020-07 and prohibits the importation of *Buxus* spp., *Euonymus* spp., and *Ilex* spp. from Canada into the United States and territories.

Federal Order Effective May 21, 2021

[Federal Order DA-2021-10](#), amending the Federal Order and Letter issued on May 20, 2021 (DA-2020-22 and DA-2021-06) to remove Costa Rica from the list of countries where *Fusarium oxysporum* f. sp. *ubense* Tropical race 4 (*Foc* TR4) is known to exist, and remove any new corresponding restrictions on the importation of *Foc* TR4 hosts from Costa Rica. The revised Federal Order replaces the May 20, 2021 order.

Federal Order Effective May 20, 2021

[Federal Order DA-2021-06](#), dated May 20, 2021 and effective May 20, 2021, to prohibit the importation of certain plant parts of all *Musa* spp. (banana and plantain species) and *Ensete ventricosum* (Abyssinian banana), to prevent the introduction and establishment of *Fusarium oxysporum* f.sp. *ubense* Tropical race 4 (*Foc* TR4) into the United States and its territories.

Federal Order Effective March 3, 2020

[Federal Order DA-2020-07](#), dated March 3, 2020 and effective March 3, 2020, to amend entry requirements for importation of *Buxus* spp., *Euonymus* spp., and *Ilex* spp. plants for planting (**except** seeds) imported from Canada into the United States and territories to prevent the introduction of *Cydalima perspectalis* (box tree moth).

Federal Order Effective November 22, 2019

[Federal Order DA-2019-28](#), dated November 15, 2019 and effective November 22, 2019, to restrict the importation of *Solanum lycopersicum* (tomato) and *Capsicum* spp. (pepper) hosts of Tomato brown rugose fruit virus (ToBRFV) to prevent the introduction of ToBRFV into the United States.

Federal Order Effective September 8, 2019

[Federal Order DA-2019-21](#), dated August 9, 2019 and effective September 8, 2019, to amend the entry requirements for *Solanum lycopersicum* (tomato) seeds and *Capsicum* spp. (pepper) seeds imported from all countries into the United States, to prevent the introduction of any quarantine-significant potyviroids in tomato and pepper seeds introduced into the United States.

Federal Order Effective August 16, 2019

[Federal Order DA-2019-18](#), dated August 1, 2019 and effective August 16, 2019, replaces Federal Order DA-2014-33, and is to add *Salpichroa* spp. to the host species and to update the list of countries APHIS considers to be infested by *Tuta absoluta* (tomato leaf miner), and prohibits imports of the propagative materials except seeds of *Datura* spp. and *Salpichroa* spp. and synonyms.

Federal Order Effective May 19, 2016

[Federal Order DA-2016-31](#), dated May 19, 2016 and effective May 19, 2016, is to remove the following species of seed from the list of prohibited articles for citrus greening (CG) caused by *Candidatus Liberibacter*: *Citrus* spp. and *Poncirus* spp. *Citrus* spp. seed is also removed from the list of prohibited articles for citrus variegated chlorosis (CVC) caused by *Xylella fastidiosa*. *Poncirus* spp. remains on the list of prohibited articles for CVC. The importation of *Citrus* spp. seed from Costa Rica and Paraguay is **no** longer prohibited. APHIS will continue to regulate seed of the following genera for CG and CVC: *Aeglopsis*, *Atalantia*, *Balsamocitrus*, *Bergera*, *Calodendrum*, *Citrofortunella*, *×Citroncirus*, *Clausena*, *Fortunella*, *Limonia*, *Microcitrus*, *Murraya*, *Poncirus* (regulated for CVC **only**), *Severinia*, *Swinglea*, *Toddalia*, *Triphasia*, and *Vepris*.

Federal Order Effective December 23, 2015

[Federal Order DA-2015-57](#) dated November 23, 2015 and effective December 23, 2015, to expand the import prohibition on *Mangifera indica* (mango) seeds and fruits to include countries where the mango seed weevil (*Sternochetus mangiferae*) is present. To prevent the introduction and establishment of the mango seed weevil in the United States, the importation of mango seeds and fruits from Antigua and Barbuda, Saint Kitts and Nevis, and Saint Martin-Sint Maarten are added to the list of countries whose mango seeds are prohibited entry to the U.S.

Federal Order Effective January 26, 2015

[Federal Order DA-2015-01](#), effective January 26, 2015, requires new conditions associated with the importation of potatoes (*Solanum tuberosum*) from Prince Edward Island in Canada. This Federal Order is to prevent the entry or the introduction into the United States of the causative agent (*Synchytrium endobioticum*) of potato wart, a serious disease of cultivated potato (*Solanum tuberosum*) that is **not** known to be present in the U.S.

Federal Order Effective August 6, 2014

[Federal Order DA-2014-33](#), dated July 23, 2014 and effective August 6, 2014, replaces the previous Federal Order 2012-21, and updates the list of countries infested by tomato leaf miner, continues to require that tomatoes **do not** contain vines, stems, or calyces when imported under a systems approach from a country infested with *Tuta absoluta*. Prohibits *Datura* spp. **except** seeds, pending completion of a pest risk analysis (PRA) and implementation of appropriate mitigation measures to prevent the introduction and establishment of *T. absoluta*.

Federal Order Effective May 20, 2013

[Federal Order DA-2013-18](#) dated May 9, 2013 and effective May 20, 2013, for the importation of host material of *Anoplophora chinensis*, citrus longhorned beetle, and *Anoplophora glabripennis*, Asian longhorned beetle. This Federal Order revises and replaces FO DA-2011-18 for two harmful plant pests, citrus longhorned beetle (CLB), *Anoplophora glabripennis*, and Asian longhorned beetle (ALB), previously issued on April 1, 2011. This revision of the Federal Order removes host plants (from certain countries) that were placed on NAPPRA on May 20, 2013 in accordance with 7 CFR 319.37-2a.

Federal Order Effective May 21, 2012

[Federal Order DA-2012-14](#), effective May 21, 2012 and dated April 18, 2012 is to restrict importation of plants for planting known to be hosts of *Phytophthora ramorum*. This Federal Order is to prevent the spread of the fungal plant pathogen *Phytophthora ramorum* into the United States from countries where it is known to be present and from uninfested countries that trade plants for planting with infested countries.

Federal Order Effective January 17, 2012

Federal Order DA-2011-71, effective January 17, 2012 and dated December 14, 2011 for Commercial Shipments of Soybeans (*Glycine max*), Safflower Seeds (*Carthamus tinctorius*), and Chickpeas (*Cicer spp.*) from Countries with Khapra Beetle (*Trogoderma granarium*), to prevent the entry of Khapra beetle into the United States.

Federal Order Effective February 10, 2010

Federal Order DA-2010, effective February 10, 2012 and dated January 25, 2010 for Palm Pests *Rhynchophorus ferrugineus* (Red Palm Weevil), *Rhynchophorus palmarum* (Giant Palm Weevil), and *Bursaphelenchus cocophilus* (Red Ring Nematode) from all foreign countries into the United States, with the exception of seed, until a pest risk analysis has been completed and determined whether effective pest mitigation measures exist. The affected plants for planting (**except** seed), are *Acrocomia*, *Astrocaryum*, *Attalea*, *Bactris*, *Brahea*, *Butia*, *Calamus*, *Chamerops*, *Desmoncus*, *Euterpe*, *Manicaria*, *Mauritia*, *Metroxylon*, *Oncosperma*, *Roystonea*, *Sabal*, *Washingtonia*.

[Federal Orders](#) are available on the [Plant Import Information](#) website.

Federal Register Notices

Federal Notice Effective July 2, 2021

Federal Notice of Decision to Add Taxa of Plants for Planting That Are Quarantine Pests or Hosts of Quarantine Pests to the Lists of Plants for Planting Whose Importation Is Not Authorized Pending Pest Risk Analysis published June 2, 2021 and effective July 2, 2021. APHIS 2018-066

Federal Notice Effective April 5, 2021

Federal Notice of Importation of *Dianthus* spp. from Kenya published April 5, 2021 and effective April 5, 2021. This Federal Notice is to allow the importation of *Dianthus* spp. cuttings from Kenya without postentry quarantine, subject to certain conditions. APHIS-2018-0068

Federal Notice Effective June 19, 2017

Federal Notice of Addition of Taxa of Plants for Planting To List of Taxa Whose Importation Is Not Authorized Pending Pest Risk Analysis published June 19, 2017 and effective June 19, 2017. This Federal Notice is to add 22 taxa of plants for planting that are quarantine pests and 34 taxa of plants for planting that are hosts of 8 quarantine pests to our lists of taxa of plants for planting whose importation is **not** authorized pending pest risk analysis. APHIS-2012-076-0003

Federal Notice Effective May 20, 2013

Federal Notice of Addition of Taxa of Plants for Planting To List of Taxa Whose Importation is **Not** Authorized Pending Pest Risk Analysis effective May 20, 2013 and dated April 18, 2013. This Federal Notice is to add 31 taxa of plants for planting that are quarantine pests and 107 taxa of plants for planting that are hosts of 13 quarantine pests to our lists of taxa of plants for planting whose importation is **not** authorized pending pest risk analysis. APHIS-2011-0072-0043

Final Rules

Final Rule Effective November 2, 2020

Final rule effective November 2, 2020 and published October 1, 2020, to amend regulations to remove the domestic pine shoot beetle (PSB) quarantine and to eliminate the restrictions that apply to the importation of PSB host material from Canada. APHIS-2016-0065

Final Rule Effective April 18, 2018

Final rule effective April 18, 2018 and published March 19, 2018, restructuring of regulations on the importation of plants for planting. We are restructuring the regulations governing the importation of specific types of plants for planting. In the new structure, restrictions on the importation of specific types of plants for planting will **no** longer be found in the regulations, but instead will be found in the [Plants for Planting Manual](#). We will make changes to the restrictions in the manual after taking public comment through notices published in the [Federal Register](#). As part of this restructuring, we are grouping together restrictions in the plants for planting regulations that apply to the importation of most or all plants for planting, and we are adding general requirements for the development of integrated pest risk management measures that we may use to mitigate the risk associated with the importation of a specific type of plants for planting. We are also amending our foreign quarantine regulations to remove various provisions regarding the importation of specific types of plants for planting that are not currently subject to the general plants for planting regulations; these provisions will also be found in the [Plants for Planting Manual](#). This action does not make any major changes to the restrictions that currently apply to the importation of plants for planting. These changes will make restrictions on the importation of specific types of plants for planting easier for readers to find and less cumbersome for us to change. APHIS-2008-0011-0024

Final Rule Effective June 27, 2011

Final rule effective June 27, 2011 and published May 27, 2011, amending the regulations to establish a new category of regulated articles in the regulations governing the importation of nursery stock, also known as plants for planting. This category lists taxa of plants for planting whose importation us **not** authorized pending pest risk analysis. If scientific evidence indicates that a taxon of plants for planting is a quarantine pest or a host of a quarantine pest, we will publish a notice that will announce our determination, cite the scientific evidence we considered in making this determination and give the public an opportunity to comment on our determination. APHIS-2006-0011-02

Historical Emergency Measures

Emergency Measures Effective April 1, 2008

Letter to Michael Flueh dated February 6, 2008: Emergency measures for *Phytophthora kernoviae*, adds *Vaccinium myrtillus* to host list effective April 1, 2008.

Emergency Measures Effective February 27, 2006

Letter to Michael Flueh dated February 27, 2006: Follow up to November 1, 2002. APHIS first implemented emergency measures for *Phytophthora ramorum*.

Emergency Measures Effective May 2005

Letter to Michael Flueh.

Emergency Measures Effective April 1, 2005

Letter to Michael Flueh dated February 28, 2005: Emergency measures for *Phytophthora kernoviae*. Lists 8 genera (*Fagus* spp., *Gevuina* spp., *Liriodendron* spp., *Michelia* spp., *Magnolia* spp., *Pieris* spp., *Quercus* spp., *Rhododendron* spp., *Vaccinium* spp.), effective April 1, 2005 from all regions of the European Union.

Purpose

The [CFIA/ACIA 5378, Canadian Nursery Certification Program \(CNCP Export Label Document\)](#) is an official Canadian Food Inspection Agency (CFIA) form that is completed and printed by the CFIA certified facility. The form has a large blank space designed for affixing the [CFIA/ACIA 5425, Phytosanitary Certificate \(CNCP Phytosanitary Certificate Label\)](#) label.

Instructions

The [CFIA/ACIA 5378, Canadian Nursery Certification Program \(CNCP Export Label Document\)](#) contains the date, exporter's name and address, description of the consignment, consignment's means of conveyance, references to invoices or bills-of-lading, additional declaration, lists scientific names of plants in the shipment, and if any, a description of treatment applied to meet import requirements.

See the example of [CFIA/ACIA 5378, Canadian Nursery Certification Program \(CNCP Export Label Document\)](#) in Figure C-2.

<p>This is to certify that the plants, plant products or other regulated articles described herein have been inspected and/or tested according to appropriate official procedures and are considered to be free from the quarantine pests specified by the importing contracting party and to conform with the current phytosanitary requirements of the importing contracting party, including those for regulated non-quarantine pests. They are deemed to be practically free from other pests. Issued by the Canadian Food Inspection Agency.</p>		<p>Il est certifié que les végétaux, produits végétaux ou autres articles réglementés décrits ci-dessous ont été inspectés et/ou testés suivant des procédures officielles appropriées et estimés exempts d'organismes de quarantaine tel que spécifié par la partie contractante importatrice, et qu'ils sont jugés conformes aux exigences phytosanitaires en vigueur de la partie contractante importatrice, y compris celles concernant les organismes réglementés non de quarantaine. Ils sont jugés pratiquement exempts d'autres organismes nuisibles. Émis par l'Agence canadienne d'inspection des aliments.</p>	
<p>No liability attached to the Canadian Food Inspection Agency or any of its officers in respect of this certificate.</p>		<p>Aucune responsabilité n'est imposée à l'Agence canadienne d'inspection des aliments ni à aucun de ses agents à l'égard du présent certificat.</p>	
CFIA / ACIA 5425 (2013/07)		Original	

Figure C-3 Example of CFIA/ACIA 5425, Phytosanitary Certificate (CNCP Phytosanitary Certificate Label) (Redacted)

Purpose

The [CFIA/ACIA 5425, Phytosanitary Certificate \(CNCP Phytosanitary Certificate Label\)](#) is issued by the Canadian Food Inspection Agency (CFIA) to certify that CNCP plants meet the import requirements of the United States and are believed to be free from injurious plant pests. Each CNCP phytosanitary certificate label has a unique serial number to facilitate traceback.

Instructions

Use [CFIA/ACIA 5425, Phytosanitary Certificate \(CNCP Phytosanitary Certificate Label\)](#) to confirm that plants were grown at an approved facility in the CNCP. Verify the label is an original, green color, contains a unique serial number, CFIA seal, exporter's name and address (of authorized facility), place of issue, name of authorized officer, liability statement, and certification:

“This is to certify that the plants, plant products or other regulated articles described herein have been inspected and/or tested according to appropriate official procedures and are considered to be free from the quarantine pests specified by the importing contracting party and to conform with the current phytosanitary requirements of the importing contracting party, including those for regulated non-quarantine pests. They are deemed to be practically free from other pests. Issued by the Canadian Food Inspection Agency.”

NOTICE

No pest-specific or plant-specific additional declarations will appear on the CNCP Phytosanitary Certificate.

See the example [page C-6](#).

Glossary

Definitions

Administrator. The Administrator of the Animal and Plant Health Inspection Service, United States Department of Agriculture, or any other employee of the United States Department of Agriculture authorized to act in his or her stead.

Africa. Consists of the countries Algeria, Angola, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Congo (Democratic People's Republic of the), Congo (Republic of), Cote d'Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Ethiopia, Gabon, Gambia (The), Ghana, Guinea, Guinea-Bissau, Kenya, Liberia, Lesotho, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sudan, Swaziland, Tanzania, Togo, Tunisia, Uganda, Zambia, Zimbabwe.

agar. A jelly-like substance obtained from algae. In this manual, refers to a type of growing medium.

Animal and Plant Health Inspection Service (APHIS). The Animal and Plant Health Inspection Service, United States Department of Agriculture.

approved. Approved by the [Administrator](#) of the Animal and Plant Health Inspection Service.

artificially dwarfed plant. An ornamental shrub or tree grown in a pot and artificially prevented from reaching its normal size.

Asia. Consists of the countries Afghanistan, Armenia, Azerbaijan, Bahrain, Bangladesh, Bhutan, Brunei Darussalam, Burma (Myanmar), Cambodia, China, Georgia, Hong Kong, India, Indonesia, Iran, Iraq, Israel, Japan, Jordan, Kazakhstan, Korea, Kuwait, Kyrgyzstan, Lao People's Democratic Republic (Laos), Lebanon, Malaysia, Maldives, Mongolia, Nepal, Oman, Pakistan, Philippines, Qatar, Russia, Saudi Arabia, Singapore, Sri Lanka, Syria, Taiwan, Tajikistan, Thailand, Timor-Leste, Turkey, Turkmenistan, United Arab Emirates, Uzbekistan, Vietnam, Yemen.

Azores. One of two autonomous regions of Portugal, composed of nine islands in the North Atlantic Ocean.

bilateral work plan. A plan that details the activities that the national plant protection organization (NPPO) will carry out to meet the requirements of a program, subject to APHIS approval, and signed by both parties (NPPO and APHIS).

British Isles. Consists of the Channel Islands, [Great Britain](#), Ireland (Republic of), Hebrides, Isle of Man, Isle of Wight, Isles of Scilly, Lundy Island, Northern Ireland, Orkney Islands, and Shetland Islands.

budwood. Short lengths of young branches with buds prepared for grafting onto the rootstock of another plant.

bulb. The portion of a plant commonly known as a bulb, bulbil, bulblet, corm, cormel, rhizome, tuber, or pip, and including fleshy roots or other underground fleshy growths, a unit of which produces an individual plant.

Caribbean Islands. Consists of Anguilla, Antigua and Barbuda, Aruba, Barbados, Bonaire, British Virgin Islands, Cayman Islands, Cuba, Curacao, Dominica, Dominican Republic, Grenada, Guadeloupe, Haiti, Jamaica, Martinique, Montserrat, Puerto Rico, Saba, St. Barthelemy, Saint Kitts and Nevis, St. Lucia, Saint Martin, Saint Vincent and the Grenadines, Sint Eustatius, Sint Maarten, Trinidad and Tobago, United States Virgin Islands.

Central America. Consists of the countries of Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama.

Channel Islands. A group of small islands in the English Channel, off the coast of Normandy, France. The principal islands include Alderney, Jersey, Guernsey, and Stark.

citrus greening (CG). Common name for *Candidatus Liberibacter asiaticus*.

citrus variegated chlorosis (CVC). Disease caused by the bacterium *Xylella fastidiosa*.

clean well water. Well water that **does not** contain any quarantine pests.

coated seed. Any seed unit covered with any substance that changes the size, shape, or weight of the original seed. Seeds coated with ingredients such as, but **not** limited to dyes, pesticides, and rhizobia are excluded.

commercial shipment. Goods that are imported for resale purposes or for profit (example cuttings to be grown in a nursery for resale as a whole plant); **not** for personal use.

commingled. Mixed with.

commingled with. Cross contamination between inspectional units is likely to occur.

commingled packing. Packed in the same container.

condition of entry. Requirement for importation.

consignment. A quantity of plants for planting being moved from one country to another and covered, when required, by a single phytosanitary certificate (a consignment may be composed of one or more lots or taxa).

continental United States. The territory of the United States that is within North America between Canada and Mexico.

controlled import permit. A written or electronically transmitted authorization issued by APHIS for the importation into the United States of otherwise prohibited or restricted plant material for experimental, therapeutic, or development purposes, under conditions as prescribed by the Administrator in accordance with 7 CFR 319.6.

corn. A solid, swollen part of a stem, usually subterranean or a short, vertical underground stem surrounded by thin, papery leaves.

cotton. Parts and products of plants of the genus *Gossypium*, including seed cotton; [cotton seed](#), [cottonseed](#); cotton lint, linters, and other forms of cotton fiber, **not** including yarn, thread and cloth cottonseed hulls, cake, meal, and other cottonseed products, **except** oil, waste, and all other unmanufactured parts of cotton plants.

cotton seed. Seed of the cotton plant.

cottonseed. Cottonseed from which the lint has been removed and is intended for processing or consumption.

country of origin. The country where the plants, or plants from the plant products were derived, or grown, or where the non-plant articles were produced.

cultivar (cultivated variety). Variety which has been produced through cultivation by selective breeding.

disease. The term in addition to its common meaning, includes a disease agent which incites a disease.

earth. The softer matter composing part of the surface of the globe, in distinction from the firm rock, and including the soil and subsoil, as well as finely divided rock and other soil formation materials down to the rock layer.

except. Not including, other than.

Europe. The continent of Europe, consists of the British Isles, Iceland, the [Azores](#), and the islands in the Mediterranean Sea. Geographical countries in Europe include: Albania, Andorra, Armenia, Austria, Azerbaijan, Belgium, Belarus, Bosnia and Herzegovina, Bulgaria, Croatia, Czechia (Czech Republic), Denmark, England, Estonia, Finland, France, Germany, Georgia, Greece, Hungary, Iceland, Ireland, Italy, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malta, Moldova, Monaco, Montenegro, Netherlands, Northern Ireland, Norway, Poland, Portugal, Romania, Russia (European part), San Marino, Scotland, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey (European part), Ukraine, Vatican City, Wales.

European Union (EU). Member countries are Austria, Belgium, Bulgaria, Croatia, Cyprus, Czechia (Czech Republic), Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom (England, Northern Ireland, Scotland, Wales).

Filicales. An order of herbaceous, arborescent, or occasional climbing plants (Class Filicinae) that comprise the true ferns that are characterized by extipulate fronds, leptosporangiate sporangial development, and thin-walled leptosporangiate which are usually borne in sori on the undersides of the fronds, and that have a characteristic ring of thick-walled cells which assists in dehiscence of the spores.

from. Plants for planting are considered to be “from” any country or locality in which they are grown. Provided, that plants for planting imported into Canada from another country or locality shall be considered as being **solely** from Canada if they meet the following conditions: (1) They are imported into the United States directly from Canada after having been grown for at least 1 year in Canada; (2) They have been grown in a country from which their importation would be **not** be authorized pending pest risk analysis under 7 CFR 319.37-4; (3) They have **never** been grown in a country, **other than**

Canada, from which it would be subject to restrictions on the importation of specific types of plants for planting under §319.37-20, which are listed in the *Plants for Planting Manual*; provided that plants for planting that would be subject to postentry quarantine if imported into the United States may be imported from Canada were grown in Canada in postentry quarantine under conditions equivalent to those specified in the *Plants for Planting Manual*; and (4) They were **not** imported into Canada in growing media.

generally admissible. Plant taxa imported for planting that meet general restrictions and **do not** have any specific restrictions as listed in the *Plants for Planting Manual*.

geophyte. A perennial plant that propagates from structures such as bulbs, rhizomes, or tubers that are below ground.

Great Britain. England, Scotland, and Wales.

GRIN. [Genetic Information Resources Network](#). U.S. National Plant Germplasm System database operated by USDA ARS National Germplasm Resources Laboratory.

growing media. A substance through which the roots grow and extract water and nutrients.

hemp. The plant *Cannabis sativa* and any part of that plant, including the seeds thereof and all derivatives, extracts, cannabinoids, isomers, acids, salts, and salts of isomers, whether growing or **not**, with a delta-9 tetrahydrocannabinol (THC) concentration of **not more than** 0.3% on a dry weight basis.

herbaceous. A plant that has leaves and stems that die down to the soil level and has **no** persistent woody stem above ground at the end of the growing season.

huanglongbing. Yellow dragon disease; a common name of *Candidatus, Liberibacter asiaticus*. See [citrus greening \(CG\)](#).

increase therefrom. For plants for planting, the creation of new plants from mother plants by air layers, cutting, flowers, grafting, seeds, or suckers.

indexing. A procedure for using plant material or its extracts to determine the presence or absence of one or more pests in or on the tested plant material.

Infraspecific species. Occurring within a species, such as occurring between two varieties. At a taxonomic level below that of species, such as cultivar, subspecies, or variety.

inspector. Any individual authorized by the [Administrator](#) or the Commissioner of Customs and Border Protection, Department of Homeland Security, to enforce the regulations in this part.

intergeneric hybrid. Plants resulting from breeding between plants of two different genera in the same family.

interspecific hybrid. Plants resulting from breeding between plants of different varieties or species.

interpolated. To insert or introduce between other elements or parts of plants, such as grafting.

layers. Shoots fastened down to take root while attached to the parent plant.

layering. A means of plant propagation in which a portion of an aerial stem grows roots while still attached to the parent plant and then detaches as an independent plant.

Letter of Information (LOI). The intent of the Letter of Information (LOI) is to educate alleged noncompliant entities about APHIS regulations and their obligation to comply with them.

lot. A number of units of a single commodity, identifiable by its homogeneity of composition and origin, forming all or part of a consignment.

mitigate. To lessen, reduce, or alleviate.

Monilinia fructigena. *Monilinia fructigena* is a plant pathogen that causes a fruit rot that affects apples, cherries, peaches, and plums.

mother stock. A group of plants from which plant parts are taken to produce new plants.

national plant protection organization (NPPO). The official service established by a government to discharge the functions specified by the International Plant Protection Convention.

naturally dwarfed or miniature cultivar. A cultivated natural, permanent genetic miniature of an existing plant species.

nomenclature. In plants, the scientific names of plants.

North America. Consists of the countries Canada, the United States, and Mexico.

not authorized pending pest risk analysis (NAPPRA). A category in the regulations governing the importation of plants for planting, commonly known as the Q37 regulations.

noxious weed. Any plant or plant product that can directly or indirectly injure or cause damage to crops (including plants for planting or plant products), livestock, poultry, or other interests of agriculture, irrigation, navigation, the natural resources of the United States, the public health, or the environment.

Oceania. The islands of Micronesia, Melanesia, and Polynesia (**except** Hawaii, Guam, and the Northern Mariana Islands) in the central and southern Pacific Ocean.

official control. The active enforcement of mandatory phytosanitary regulations and the application of mandatory phytosanitary procedures with the objective of eradication or containment of quarantine pests.

other than. Does not include.

packing material. Approved material that the plant is packed, but **not** rooted in and the plant's roots are easily removed from for inspection. 7 CFR 319.37

parasitic plant. A plant that derives all or some of its nutritional requirements from another living plant.

pathovar (pv). Bacterial strain or set of strains with the same or similar characteristics that is differentiated at an infrasubspecific level from other strains of the same species or subspecies on the basis of distinctive pathogenicity to one or more plant hosts. For example *Xanthomonas axonopodis* pv. *citri*.

pelleted seed. Any seed unit covered with a substance that changes the size, shape, or weight of the original seed in order to improve the plantability or singulation of the seed.

permit. A written authorization, including by electronic methods, by the Administrator to move plants, plant products, biological control organisms, plant pests, noxious weeds, or articles under conditions prescribed by the [Administrator](#).

perennial. A plant that lives three years or more, tending to flower and fruit repeatedly.

person. Any individual, partnership, corporation, association, joint venture, or other legal entity.

phytosanitary certificate. A document, including electronic versions, that is related to a restricted article and is issued not more than 15 days prior to shipment of the restricted article from the country in which grown, and that: (1) Is patterned after the model certificate of the International Plant Protection Convention, a multilateral convention on plant protection under the authority of the Food and Agriculture Organization of the United Nations (FAO); (2) Is issued by an official of a foreign national plant protection organization in one of the five official languages of the FAO; (3) Is addressed to the national plant protection organization of the United States (Animal and Plant Health Inspection Service); (4) Describes the shipment; (5) Certifies the place of origin for all contents of the shipment; (6) Certifies the shipment has been inspected and/or tested according to appropriate official procedures and is considered free from quarantine pests of the United States; (7) Contains any additional declarations required in the *Plants for Planting Manual*; and (8) Certifies that the shipment conforms with the phytosanitary requirements of the United States and is considered eligible for information pursuant to the laws and regulations of the United States.

place of production. Any premises or collection of fields operated as a single production or farming unit. This may include production sites that are separately managed for phytosanitary purposes.

plant. Any plant (including any plant part) for or capable of propagation, including a tree, a tissue culture, a plantlet culture, pollen, a shrub, a vine, a cutting, a graft, a scion, a bud, a bulb, a root, and a seed.

plant broker. An entity that purchases or takes possession of plants for planting from an approved place of production for the purpose of exporting those plants **without** further growing beyond maintaining the plants until export.

plant germplasm. Living genetic plant resources such as seeds or tissue that is maintained for the purpose of plant breeding, preservation, and other research uses.

plant pest. Any living stage of any of the following that can directly or indirectly injure, cause damage to, or cause disease in any plant or plant product: A protozoan, a nonhuman animal, a parasitic plant, a bacterium, a

fungus, a virus or viroid, an infectious agent or other pathogen, or any article similar to or allied with any of these articles.

Plant Protection and Quarantine Programs. The organizational unit within APHIS that is delegated responsibility for enforcing provisions of the Plant Quarantine Act (7 U.S.C. 7701 *et seq.*) and related legislation, quarantines, and regulations.

plant type. [type of plants for planting.](#)

planting. Any operation for the placing of plants in a growing medium, or by grafting or similar operations, to ensure their subsequent growth, reproduction, or propagation.

plants for planting. Plants intended to remain planted, to be planted, or replanted.

Plants for Planting Manual. The document that contains restrictions on the importation of specific types of plants for planting, as provided in § 319.37-20 and other information about the importation of plants for planting as provided in this subpart. The *Plants for Planting Manual* is available on the Internet at http://www.aphis.usda.gov/import_export/plants/manuals/ports/downloads/plants_for_planting.pdf or by contacting the Animal and Plant health Inspection Service, Plant Protection and Quarantine, 4700 River Road Unit 133, Riverdale, MD 20737-1236.

port of first arrival. The land area (such as a seaport, airport, or land border station) where a person, or a land, water, or air vehicle, first arrives after entering the territory of the United States, and where inspection of plants for planting is carried out by inspectors.

postentry quarantine. Inspection and quarantine detention period following admission of some plant material at a port of entry.

Portugal. Part of Europe. Territory includes the [Azores](#) and Madeira.

potable water. Water which is approved for drinking purposes by the national or local health authority having jurisdiction.

preclearance. Phytosanitary inspection and/or clearance in the country in which the plants for planting were grown, performed by or under the regular supervision of APHIS.

production site. A defined portion of a place of production utilized for the production of a commodity that is managed separately for phytosanitary

purposes. This may include the entire place of production or portions of it. Examples of portions of places of production are a defined orchard, grove, field, greenhouse, screen house, or premises.

prohibit. Do not allow.

prohibited. Not authorized pending pest risk analysis. Not allowed.

propagation. The process of creating new plants.

propagule. Any plant material used for the purpose of plant propagation.

pulp. The soft, fleshy part of a fruit or a vegetable.

quarantine pest. A plant pest or noxious weed that is of potential economic importance to the United States and **not** yet present in the United States, or present but **not** widely distributed and being officially controlled.

refuse entry. Do not allow.

regulated plant. A vascular or nonvascular plant. Vascular plants include gymnosperms, angiosperms, ferns, and fern allies. Gymnosperms include cycads, conifers, and ginkgo. Angiosperms include any flowering plant. Fern allies include club mosses, horsetails, whisk ferns, spike mosses, and quillworts. Nonvascular plants include mosses, liverworts, hornworts, and green algae.

restricted articles. See [plants for planting](#).

rhizome. A horizontal stem, usually underground.

risk factors. Anything that might contribute to pest risk. i.e., greenhouse grown vs. wild collected.

rock wool (mineral wool). Horticulture growing media or packing material made from the natural ingredients basalt, rock, and chalk or limestone which is melted into a lava that is used to form fiber (similar to cotton candy).

sealed seed sample. Bare seed that is packaged and identified with the marks of the lot sampled and then closed in such a way that the package **cannot** be opened to gain access to the seed and closed again **without** either destroying the seal or leaving evidence of tampering. The package is clearly marked "Official Seed Sample".

Secretary. The Secretary of Agriculture, or any other officer or employee of the Department of Agriculture to whom authority to act in his/her stead has been or may hereafter be delegated.

section. In botany, a taxonomic rank below genus but above species.

seed cotton. Cotton as it comes from the field.

shipment. A quantity of plants, plant products, or other articles being moved from one country to another and covered, when required, by a single phytosanitary certificate. (A shipment may be composed of one or more commodities or lots.)

soil. The loose surface material of the earth in which plants, trees, and shrubs grow, in most cases consisting of disintegrated rock with an admixture of organic material and soluble salts.

soil ped. A single unit of soil structure. Ped shapes include granular, platy, blocky and prismatic. Ped sizes can range from 1 mm granules to 10 cm prisms.

***Solanum* spp. true seed.** Seed produced by flowers of *Solanum* capable of germinating and producing new *Solanum* plants.

***Solanum* tuber.** Whole or cut, that are referred to as *Solanum* seeds or seed potatoes.

South America. Consists of the countries Argentina, Bolivia, Brazil, Chile, Colombia, French Guiana, Ecuador, Falkland Islands, French Guiana, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela.

species (spp). All species, clones, cultivars, strains, varieties, and hybrids of a genus.

subspecies (ssp). The primary taxonomic subdivision of the species.

State. Any of the several States of the United States, the Commonwealth of the Northern Mariana Islands, the Commonwealth of Puerto Rico, the District of Columbia, Guam, the Virgin Islands of the United States, or any other territory or possession of the United States.

State Plant Regulatory Official. The official authorized by the State to sign agreements with Federal agencies involving operations of the State plant protection agency.

suffrutescent plants. A plant that is slightly woody at the base.

(syn.) synonym. In this manual, any of two or more scientific names for a plant taxon, including names **not** currently in use and names at different ranks and positions; **only** one name of a taxon is the USDA accepted scientific name as listed in [GRIN](#). When restrictions apply to the importation of a taxon of plants for planting for which there are taxonomic synonyms, all restrictions apply to the importation of all the synonyms of that taxon.

taxa. Plural of taxon.

taxon (taxa). Any grouping within botanical nomenclature, such as family, genus, species, or cultivar.

Tenth (X) Region of Chile. That area of Chile between 39° and 44° South latitude.

true seed. See [Solanum spp. true seed](#).

tuber. A thick, fleshy, underground part of a stem that serves as a storage organ.

type of plants for planting. A grouping of plants for planting based on shared characteristics, such as biological traits, morphology, botanical nomenclature, or risk factors.

variety. A group of plants of less than species rank.

United Kingdom. England, Northern Ireland, Scotland, Wales.

United States. All of the States.

U.S. territories. American Samoa, Federated States of Micronesia, Guam, Northern Mariana Islands, Puerto Rico, Republic of Marshall Islands, U.S. Virgin Islands,

woody. A plant that produces wood as its structural tissue, e.g. shrubs, trees, and some vines.

synonym of *Euphorbia deppeana* 6-495, 6-499
- Chamaesyce garberi*.
Synonym of *Euphorbia garberi* 6-495
- Chigua* spp.
synonym of *Zamia restrepoi* 6-999
- Chionachne* spp. 3-197
- Chloothamnus* spp.
synonym of *Nastus* spp. 6-693
- Chnoophora*
syn. of *Cyathea* spp. 6-421
- Chrysalidocarpus decipiens*.
See *Dypsis decipiens* 6-463
- Cladomyza* spp.
synonym of *Dendromyza* spp. 6-440
- Cnemidaria*
syn. of *Cyathea* spp. 6-421
- Coatesia* spp.
syn. of *Geijera* spp. 6-521
- Coix* spp. (Job's tears) 3-197
- Colina*
syn. of *Anemia* spp. 6-56
- Coliquea*
syn. of *Chusquea* spp. 6-373
- Coptophyllum*
syn. of *Anemia* spp. 6-56
- Cormophyllum*
syn. of *Cathea* spp. 6-421
- corn relatives
Chionachne spp. 3-197
- Coronopus*.
See *Lepidium* spp. 6-596
- Coryphantha densispina*.
See *Coryphantha werdermannii* 6-404
- Coryphantha minima*
syn. of *Escobaria minima* 6-487
- Coryphantha robbinsiorum*
syn. of *Escobaria robbinsiorum* 6-487
- Cowania subintegra*
synonym of *Purshia subintegra* 6-822
- Cryptophyllum*
syn. of *Anemia* spp. 6-56
- Cycladenia humilis*.
See *Cycladenia jonesii* 6-423
- D**
- Davalliaceae 7-28
- Decarya* spp.
syn. of *Decaryia* spp. 6-435
- Dendranthema* spp.
syn. of *Chrysanthemum* spp. 6-372, 6-373
- Dendranthema* spp.
syn. of *Chrysanthemum* spp. 3-91
- Dendranthema* spp. *Chrysanthemum* spp. synonym 5-16
- Dendrocalamopsis*.
See *Bambusa* spp. 6-439
- Dendrocalamus* spp. See *Klemachloa* spp. 6-582

- Dennstaediaceae 7-28
 Dichorexia
 syn. of *Cyathea* spp. 6-421
 Dicksoniaceae 7-28
 Diclytra. synonym of *Dicentra* spp. 8-16
 Dicranophlebia
 syn. of *Cathea* spp. 6-421
 Dictyodroma
 syn. of *Deparia* 6-441
 Digrammaria
 syn. of *Diplazium* 6-452
 Disphenia
 syn. of *Cathea* spp. 6-421
 Dryopteridaceae 7-28
- E**
 Eatoniopteris
 syn. of *Cathea* spp. 6-421
Echinocactus asterias. See *Astrophytum asterias* 6-84
Echinocereus lindsayi. See *Echinocereus ferreirianus* ssp. *lindsayi* 6-465
 Echinochloa spp. 3-197
Echinus spp.
 syn. of *Mallotus* spp. 6-644
 Eleusine spp. 3-197
 Erianthus spp.
 syn. of *Saccharum* 6-866
Escobaria robbinsorum. See *Coryphantha robbinsorum* 6-403
Escobaria sneedii ssp. *leei*. See *Escobaria leei* 6-486
 Euchlaena spp. 3-197
 Euchlaena spp. (teosinte) 3-197
Euphorbia capsaintemariensis var. *tulearensis*. See *Euphorbia tulearensis* 6-496
Evodia spp. See *Euodia* spp. 6-493
- F**
 Fagara spp.
 syn. of *Zanthoxylum* spp. 6-999
- Feronia spp.
 syn. of *Limonia* spp. 6-609
 Filicales 7-28
- G**
 Gerdina spp.
 syn. of *Agalinis* spp. 6-35
 Gleicheniaceae 7-28
Guilielma spp. See *Bactris* spp. 6-91
 Gymnopremnon
 syn. of *Cyathea* spp. 6-421
- H**
Halogetum spp. See *Halogeton* spp. 6-535
 Haplophlebia
 syn. of *Cyathea* spp. 6-421
 Hedyotis mannii
 syn. of *Kadua laxiflora* 6-580
Hedyotis schlehtendahliana var. *reymi*. See *Kadua cordata* ssp. *reymi* 6-580
Hedyotis schlehtendahliana ssp. *reymi*. syn. See *Kadua cordata* ssp. *reymi* 6-580
Hedyotis schlehtendahliana var. *reymi*
 syn. of *Kadua cordata* ssp. *reymi* 6-580
 Helianthemum greenei
 syn. of *Crocanthemum greenei* 6-406
 Hemianemia
 syn. of *Anemia* spp. 6-56
Hemizonia conjugens>. See *Deinandra conjugens* 6-437
 herbarium specimens. See the Miscellaneous and Processed Products Manual 1-5
Heterotheca floridana. See *Chrysopsis floridana* 6-373
Hudsonia ericoides ssp. *montana*
 synonym of *Hudsonia montana* 6-560

- Huperzia mannii
syn. of Phlegmariurus manni 6-763
- Huperzia nutans
syn. of Phlegmariurus nutans 6-763
- Hygrorhiza*. See *Hygroryza* spp. 6-562
- Hymenophyllaceae 7-28
- Hymenoxys herbacea
syn. of Tetraneuris herbacea 6-932
- I**
- ilamapond apple. See *Annona* spp. 6-58
- Inducalamus* spp. See *Gelidocalamus* spp. 6-522
- Inodes spp.
synonym of *Sabal* spp. 6-866
- Itoh peony. See *Paeonia* 8-21
- K**
- Kentia belmoreana*
syn. of *Howea* spp. 6-559
- Keppleria* spp.
syn. of *Oncosperma* spp. 6-715
- Kopsiopsis* spp. 6-584
- Korthalsella* spp. 6-584
- L**
- Leguminaceae
Fabaceae 3-62
- Leguminosae
alternate family name for
FABACEAE family 6-499
- Lembertia congdonii*. See *Monolpoia congdonii* 6-683
- Lesquereuxia* spp.
syn. of *Siphonostegia* spp. 6-892
- Leucanthemum nipponicum*
See *Nipponanthemum nipponicum* 6-706, 6-707
synonym of *Nipponanthemum nipponicum* 6-706, 6-707
- Leucanthemum sibiricum*
See *Chrysanthemum* spp. 6-372, 6-373
synonym of *Chrysanthemum zawadskii* ssp. *Actilobum* 6-372, 6-373
- Leucanthemum weyrichii*
See *Chrysanthemum* spp. 6-372
synonym of *Chrysanthemum werichii* 6-372, 6-373
- Leucanthemum yezoense*
See *Chrysanthemum* spp. 6-372, 6-373
synonym of *Chrysanthemum yezoense* ssp. *Yezoense* 6-372, 6-373
synonym of *Chrysanthemum zawadski* ssp. *Yezoense* 6-372, 6-373
- Lithocarpus densiflorus*
syn. of *Notholithocarpus densiflorus* 3-52, 6-709
- Lobelia gaudichaudii* ssp. *koolauensis*
syn. of *Lobelia koolauensis* 6-613
- Lophidium*
syn. of *Schizaea* 6-877
- Lotus scoparius* ssp. *traskiae* syn. See *Lotus dendroideus* ssp. *traskiae* 6-617
- Lupinus oreganus* var. *kincaidii* syn. See ssp. *kincaidii* 6-622
- Lycopersicon esculentum*
synonym of *Solanum lycopersicum*. 6-623
- Lycopodium nutans*. See *Huperzia nutans* 6-560
- Lysimachia ternifolia*. See *Lysimachia maxima* 6-624

M

- Magnolia candollii* var. *obovata*. See *Magnolia liliifera* var. *obovata* 6-632

- Magnolia tripetala* x *virginiana*. See *Magnolia* x *thompsoniana* 6-634
- Mahoberberis spp.
syn. of *Berberis* spp. 3-74
- Mahonia aquifolium
syn. of *Berberis aquifolium* 6-102, 6-103, 6-104, 6-105, 6-106, 6-107, 6-108, 6-109, 6-110
- Mahonia diversifolia
syn. of *Berberis aquifolium* 6-102, 6-103, 6-104, 6-105, 6-106, 6-107, 6-108, 6-109, 6-110
- Michelia doltsopa*. See *Magnolia doltsopa* 6-630
- Michelia figo*. See *Magnolia figo* 6-631
- Michelia maudiae*. See *Magnolia maudiae* 6-633
- Michelia wilsonii*. See *Magnolia ernestii* 6-630
- Microcitrus* x *Poncirus*. See x*Microcirus* spp. 6-672
- Mimosa invisa
synonym *Mimosa diplotricha* 6-678
- Mimulus michiganensis
syn. of *Erythranthe michiganensis* 6-486
- Miscanthus spp. 3-197
- Mohria
syn. of *Anemia* spp. 6-56
- Monadenium spp.
syn. of *Euphorbia* spp. 6-494

N

- Nasturtium officinale* synonym. See *Rorippa gambellii* 6-693
- nyger. See *Guizotia abyssinica* 3-116

O

- Oleandraceae 7-28
- Oreiostachys spp.
synonym of *Nastus* spp. 6-693
- Oreodoxa spp.
synonym of *Roystonea* spp. 6-859
- Ornithopteris
syn. of *Anemia* spp. 6-56
- Orthostemon sellowianus*. See *Feijoa sellowiana* 6-502
- Osmundaceae 7-28
- Oxypolis canbyi
syn. of *Tiedemannia canbyi* 6-940

P

- Panicum* spp. 3-197
- parasitic plants
Kopsiopsis spp. 6-584
Korthalsella spp. 6-584
- Parasitipomoea spp.
syn. of *Ipomoea* spp. 6-745
- Parkeriaceae
synonym of *Pteridaceae* 7-28
- Pelea mucronulata*. See *Melicope mucronulata* 6-660
- Pennisetum glaucum* 3-197
- Pennisetum* spp.
syn. of *Cenchrus* spp. 3-197
- Perella* spp.
synonym of *Peraxilla* spp. 6-755
- Petalostemum foliosa*. See *Dalea foliosa* 6-432
- Phrygilanthus* spp.
syn. of *Phrygilanthus* spp. 6-765
- Polypodiaceae family 7-28
- Polypodiophyta. See *Filicales* 7-28
- Polytoca* spp. 3-197
- Potamochoa*. See *Hygroryza* spp. 6-562

- Potamogeton clystocarpus 6-416
 synonym of Potamogeton
 berchtoldii ssp.
 clystocarpus 6-798
- Pseudocoix spp.
 synonym of Hickelia spp. 6-554
- Pseudosimachion spicatum
 synonym of Veronica spicata 6-981
- Pteridaceae family 7-28
- Pteridophyta. See Filicales 7-28
- Pteriglyphis
 syn. of Diplazium 6-452
- pulp
 seeds from Canada 4-34
 seeds in 2-33, 6-883
- Pyrethrum lavandulifolium
 syn. of Chrysanthemum
 lavandulifolium 6-372, 6-373
- Q**
- Qiongzhuea spp.
 synonym of Chimonobambusa
 spp. 6-825
- R**
- Ranunculus aestivalis
 syn. of Ranunculus acroformis 6-838
 synonym of Ranunculus
 acroformis 6-838
- Rheum ×hybridum
 syn. of Rheum rhabarbarum 6-844
- Rheum rhabarbarum
 syn. of Rheum ×rhabarbarum 6-844
- Rheum undulatum. See Rheum
 ×rhabarbarum 6-844
- Rhododendron chapmanii
 syn. of Rhododendron minus var.
 chapmanii 6-847
- Rollandia crispa. See Cyanea crispa
- S**
- Saccharum officinarum 3-197
- Sarracenia alabamensis ssp.
 alabamensis
 syn. of Sarracenia alabamensis
 ssp. alabamensis 6-872
- Sasaella
 syn. of Sasa 6-873
- Sasamorpha
 syn. of Sasa 6-873
- Schizostachyum spp. See
 Dendrochloa spp. 6-440
- Schizostachyum. See Leptocanna spp.
 6-598
- Sclerachne spp. 3-197
- seeds
 from Canada 4-34
 in pulp 2-33, 6-883
- Senebiera. See Lepidium spp. 6-596
- Setaria pallid-fusca
 synonym of Setaria pumila
 ssp. pallide fusca 6-887
- Setaria spp. 3-197
- Sinarundinaria spp.
 synonym of Fargesia spp 6-501
 synonym of Yushania spp. 6-998
- Sinarundinaria spp.
 See Drepanostachyum spp. 6-456
- Sinocalamus spp.
 synonym of Dendrocalamus spp.
 6-440
- Smilacina racemosa. See
 Maianthemum racemosum 6-643
- Sorghum ×drummondii
 synonym of Sorghum bicolor ssp.
 drummondii 6-905
- Sorghum spp 3-197
- Sorghum spp. (broomcorn) 3-197
 spp. See Ferrocalamus spp. 6-502
- Stranvaesia spp.
 syn. of Photinia spp. 6-765
- Stylurus spp. See Grevillea spp. 6-530

- sugarapple
See *Annona* spp. 6-58
- suncoya. See *Annona* spp. synonym 6-58
- sweetsop
Annona spp. synonym 6-58
- swiss chard 6-310
- T**
- Talauma hodgsonii*. See *Magnolia liliifera* var. *obovata* 6-632
- Taravalia spp.
syn. of *Ptelea* spp. 6-819
- Tecleopsis spp.
syn. of *Vepris* spp. 6-980
- Terminthodia spp.
syn. of *Tetractomia* spp. 6-931
- Thamnocalamus* spp. See *Himalayacalamus* 6-554
- Thamnocalamus* spp. See *Fargesia* spp. 6-501
- Thelocactus beguinii*
syn. of *Turbinicarpus beguinii* 6-970
- Thelocactus gielsdorfianus*
syn. of *Turbinicarpus gielsdorfianus* 6-970
- Thelocactus horripilus*
syn. of *Turbinicarpus horripilus* 6-970
- Thelocactus knuthianus*
syn. of *Turbinicarpus knuthianus* 6-970
- Thelocactus lophophoroides*
syn. of *Turbinicarpus lophophoroides* 6-970
- Thelocactus mandragora*
syn. of *Turbinicarpus mandragora* 6-970
- Thelocactus pseudopectinatus*
syn. of *Turbinicarpus pseudopectinatus* 6-970
- Thelocactus saueri*
syn. of *Turbinicarpus saueri* 6-970
- Thelocactus setispinus*
syn. of *Hamatocactus bicolor* 6-537
- Thelocactus subterraneus*
syn. of *Turbinicarpus subterraneus* 6-970
- Thelocactus viereckii*
syn. of *Turbinicarpus viereckii* 6-970
- Thelocactus ysabelae*
syn. of *Turbinicarpus ysabelae* 6-970
- Triblemma
syn. of *Diplazium* 6-452
- Trilobachne spp. 3-197
- Tripsacum spp. 3-197
- Triticale
syn. of *Triticosecale* 6-964
- Triticum durum*
syn. of *Triticum turgidum* ssp. *durum* 3-190
- Trochopteris
syn. f. *Anemia* spp. 6-56
- V**
- Vittariaceae
synonym of *Pteridaceae* 7-28
- W**
- Welwitschia bainesii*
syn. of *Welwitschia mirabilis* 6-994
- Wilcoxia nerispina*. See *Echinocereus schmolii* 6-465
- Wilcoxia schmollii*. See *Echinocereus schmollii* 6-465
- Z**
- Zea* hybrid. See *Euchlaena* spp. 6-491
- Zygosicyos pubescens*
synonym of *Xerosicyos pubescens* 6-997

Zygosicyos tripartitus
synonym of *Xerosicyos tripartitus*
[6-997](#)
