299. Heddon Vamp – GE., NOL, L-Rig Hardware – Varnish Chipping on Belly & Sides – Green Crackleback Finish

Ed Salensky & Bob Dorchester were able to purchase the William Miller’s Estate fishing items which were documented in the N.F.L.C.C. December 1992, Vol. 2, No. 2 magazine. The article was written by Jerry Barrows. After splitting the estate w/Bob Dorchester, Ed was later referred to as “The Miller’s Reversible Man”.

We are fortunate to be able to offer this incredible collection of William Miller’s Prototypes of Reversible Minnows & Tango Types & Submarines! The paint, the hardware & types of lures show the influences of the 1914-1916 lure designs of the Union Springs, NY area. Although no patents have been found for the Miller’s Reversible Minnow, this collection features 2 Type I Minnows with “Pat. Pend.” marked under the heads. The marks are impressed and painted over. Lot #326A features extra parts of the Type I Reversible Minnows. Two of the heads feature the same “Pat. Pend.” marks. It has been a documented practice to mark products w/Pat. Pend. To keep others from replicating their designs.

300. Miller’s Prototype Tango Type Lure – Measures 5¼” in Length – Has Miller Screw Eye & Washer Hardware – Tail Nail – Line Tie Has the Washer Under the Lip – Yellow w/ Gold Spot Finish – Shows Some Blemishes & Varnish Loss
