Introducing our most **ambitious Polo yet**

**It will make you think
you can do the impossible.**

Polo is here and it comes with a host of incredible new features that will make you feel more confident than ever before. With this newfound confidence, you'll think you can do anything.

But a word of caution: Beware the confidence.

Confidence sports a new look

The moment you set eyes on Polo, you'll see that every inch has been carefully considered to bring you a vehicle with charisma at every curve.

From front to back, Polo features a masculine arrow-shaped tornado line. This distinct new design line cuts a dash along the side of the car, from the indicators all the way to the rear lights. This structures the car's side profile, forming a strong shoulder section that gives Polo a bolder presence than before.

The chrome trim and dark red tail lights in the bumper underline its sporty and elegant appearance, accentuating Polo's key characteristics.

With its contemporary design, Polo will inspire you to go from the dull, grey office rug to Hollywood's red carpet.

Confidence at the core

True confidence comes from within.

That's why Polo features Volkswagen's new generation TSI engine with Start-Stop technology. With improved power and torque output, Polo can achieve maximum torque even at low speeds, allowing the driver to go from 0 to Confident in no time.

Eco Function* with Drive Profile Selection enables the driver to choose an engine setting that suits their needs.

In the Highline and GTI models, Eco Function comes standard, allowing the engine and gearbox to be optimised for a more economical drive.

The sky is no longer your limit

True confidence comes from within.

To create a car that inspires drivers to go beyond their limits; the Volkswagen design team pushed beyond their own limits. From the steering wheel to the completely redesigned dashboard that ensures optimal line of sight for critical information; every inch of Polo's interior has been designed to create a space that inspires and ignites the driver.

The interior can also confidently expand with Polo's split folding rear seats, larger 350l boot and variable load floors that make the rear space flexible and practical. The optional wider opening panoramic sliding sunroof, and tinted glass with a high-quality roller blind prove the possibilities are endless with Polo.

Connect to the future

Polo boasts an incredible array of safety features, raising the segment to a whole new level.

The optional rear-view camera allows any obstacles behind Polo - even moving ones - to be more visible, making reversing safer and easier thanks to unmatched technology built into the boot.

Polo's Park Distance Control with Manoeuvre Braking constantly monitors the distance around Polo and automatically activates the brakes if it's approaching a stationary vehicle while manoeuvring. Optional Blind Spot Detection sees what you don't; helping you avoid objects outside of your line of sight.

LED daytime running lights come standard in Polo, with optional LED headlights that feature larger light volume, longer durability and daylight-like light spectrum with a lower energy requirement, giving New Polo the ability to see and be seen more by other vehicles.

Polo sports a new Mobile phone interface with inductive charging function, ensuring every trip offers maximum connectivity and convenience.

A new standard of safety

Polo boasts an incredible array of safety features, raising the segment to a whole new level.

The optional rear-view camera allows any obstacles behind Polo - even moving ones - to be more visible, making reversing safer and easier thanks to unmatched technology built into the boot.

Polo's Park Distance Control with Manoeuvre Braking constantly monitors the distance around Polo and automatically activates the brakes if it's approaching a stationary vehicle while manoeuvring.

Optional Blind Spot Detection sees what you don't; helping you avoid objects outside of your line of sight. LED daytime running lights come standard in Polo, with optional LED headlights that feature larger light volume, longer durability and daylight-like light spectrum with a lower energy requirement, giving Polo the ability to see and be seen more by other vehicles.

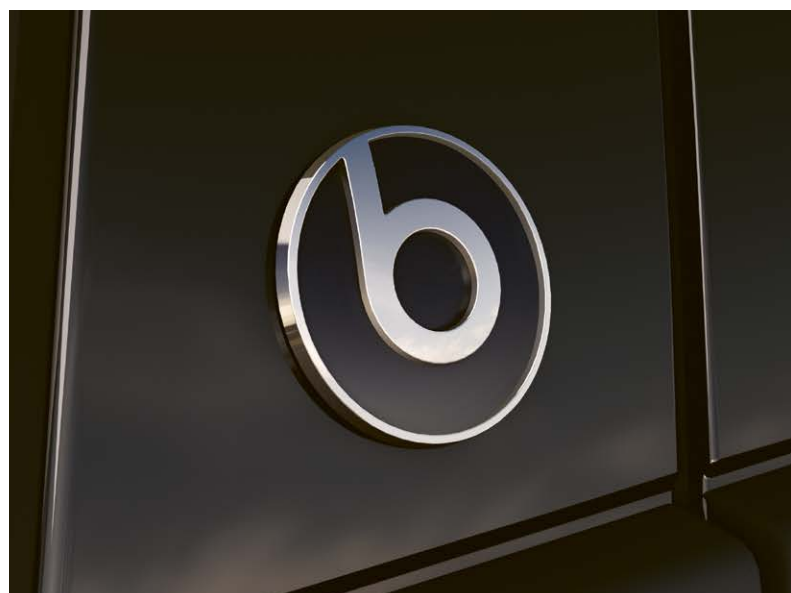

Drive to the beat **of your own drum**

Polo comes with an optional beats package on the Comfortline model and connects to the beat of the street like no other.

From the advanced sound and beats-themed strip running along the bonnet and the roof, to the special beats branded sports seats, Polo beats is here to make some noise.

The dynamic exterior design features tinted windows, gloss black radiator grille and 16" Torsby alloy wheels with a silver trim that add rhythm to this beat. Powered by the sound and style of beats Audio, Polo beats will make you think you run this town.

R-Line

A new line of confidence.

Polo features an optional sporty R-Line body kit, C signature front air curtains in high-gloss black and rear diffuser with roof edge spoiler, available on both the Comfortline and Highline models. The 17" Bonneville Alloy Wheels and the signature R-Line badge ensure that Polo drivers will look as confident as they feel.

Polo GTI

Polo GTI comes with great power.

Polo GTI has hit the streets with a confidence-boosting 2.0 TSI 147kW engine, standard LED taillights, "Art Velour" leather sport seats, twin tail pipes, front and rear spoilers along with the classic GTI insignia. The performance-driven design allows drivers to shift into a new mode of boldness with the leather-wrapped multi-function sports steering wheel and gearshift paddles. It is also equipped with a connected and largely digitalised cockpit which makes the Polo GTI, the ideal compact sports car of a new generation.

Colours

The illustrations on this page can only be regarded as a general guide as the printing process cannot render the true depth and brilliance of the paint finishes with absolute accuracy. Please note that certain paint and trim combinations may not be available.
