PORTFOLIO

INFINITI.

EMPOWER THE DRIVE™

EMPOWER THE DRIVE

We are like you. We push ourselves beyond our comfort zone. While others might be content with making machines, we are driven to go beyond – to design cars that push human potential. We build technology to enhance your senses, striking design that demands a response and performance that makes you feel more alive.

Discover the world's first production-ready VC-Turbo™ engine¹ that literally transforms to give you 4-cylinder efficiency and V6 power. Revel in advanced drive assist technology that can even help steer for you around gentle curves¹. Prepare to experience the road as it was intended.

DRIVEN BY FIRSTS

More than a mantra, an entrepreneurial mindset points in one direction – forward. Around the globe, this commitment results in INFINITI world's first technologies that have unleashed human potential by enhancing human abilities. Proof that putting you first, puts us first.

INFINITI VC-TURBO™ ENGINE¹

A breakthrough in internal combustion engine technology, the INFINITI VC-Turbo™ is the first production-ready engine that continuously transforms to optimize power and efficiency.

The multilink system flexes to lower the compression ratio when more horsepower is needed and relaxes to raise the compression ratio when greater fuel efficiency is desired.

2005

LANE DEPARTURE WARNING^{1,9}

Using a camera to monitor road markings, Lane Departure Warning can alert you with an audible signal if the vehicle senses you are unintentionally drifting from the travelling lane.

2008

AROUND VIEW® MONITOR^{1,4}

Four cameras and one virtual 360° view from above elevate your parking expertise, and empower you to see more clearly in tight situations.

2011

BLIND SPOT INTERVENTION®^{1,2}

Sense beyond what you can see with Blind Spot Intervention.® It warns you if a vehicle is detected in the blind spot area, and is engineered to intervene and help avoid a collision.

2013

BACKUP COLLISION INTERVENTION^{1,6}

This visionary technology warns you if it detects rear cross-traffic and large stationary objects when backing up. To help you avoid a collision, the system can even brake for you.

2014

DIRECT ADAPTIVE STEERING®¹

By transmitting input to the wheels electronically, Direct Adaptive Steering® constantly fine-tunes your steering performance and helps filter out unwanted vibrations.

2019

PREDICTIVE FORWARD COLLISION WARNING^{1,7}

Your INFINITI can not only monitor the vehicle directly ahead of you but the vehicle in front of that one as well. If the system detects a potential frontal collision, it provides an audible and visual alert.

DARE TO EVOLVE

Born on the track, made for the road. INFINITI represents what's possible when race technology is harnessed for its full potential. With this daring Project Black S concept, INFINITI and the Renault F1® Team are pushing the bounds of road-ready technologies – setting a new standard for future INFINITI coupes.

FASTER FAVOURS THE BOLD

Embrace your daring side with I-LINE, a stunning new class of vehicles from INFINITI.

Each one makes its mark with exclusive design details you can only find in Canada.

Starting with the 2019 Q50 sedan and Q60 coupe, we're introducing I-LINE editions of our most iconic vehicles. Discover what's in store – this is driving at its boldest.

Q50

UNTOUCHABLE POWER

Choose the Q50's standard 300-hp V6. Or come alive in the fast lane with a 400-horsepower twin-turbo V6. This award-winning engine distinguishes Q50 I-LINE from other sedans in its segment – making it the only one with this kind of power. And it looks the part, with custom imported glossy black wheels, a blacked out grille and a carbon fiber spoiler.

PERFORM LIKE NEVER BEFORE

Fine-tune your Q50's performance with the Drive Mode Selector. Choose from four distinct modes: Standard, Snow, Eco and Sport, or customize your own. The Q50's engine, transmission, suspension and steering settings will adjust automatically. Tailoring your drive at the flip of a switch.

FOUR-SEASON STATUS

Confidently move ahead with INFINITI's standard Intelligent All-Wheel Drive. It provides maximum traction by constantly adapting to changing road conditions.

PILOT WITH EASE

When technology advances to enhance the driver, you can cruise easier, follow smarter and steer quicker. INFINITI driver assist technologies in the ProACTIVE Package¹ employ the same technical innovations that will inspire and empower us in the future. When activated, driver assist technologies can automatically react to traffic to help you brake for cars ahead, accelerate to your preset pace and even help steer straight down your lane.

STEER WITH ENHANCED PRECISION

Direct Adaptive Steering¹ translates your impulses into electronic input - so you get the response you want. Smooth. Quick. Precise.

Q60

DRIVEN TO PERFORM

Choose from two available turbocharged engines: a 3.0t V6 with 300-hp or a segment-leading 400-hp 3.0 twin-turbo V6. With Q60 I-LINE, custom imported 20-inch glossy black wheels, blacked out grille and a carbon fiber spoiler push performance even further. All created to propel you forward with a newfound confidence.

ENHANCED EXHAUST

Raise your pulse with Q60 I-LINE's new axle-back performance exhaust tips. Made to enhance every ride, they expel exhaust efficiently while maximizing the coupe's already aggressive sound.

DESIGN THAT KNOWS NO BOUNDS

Daring curves, deep creases and flowing lines intensify Q60's low, wide, powerful stance. Signature elements like eye-inspired headlights and a black double-arch grille make it unmistakably INFINITI. Progressive and modern, yet dynamic and moving, this is a new kind of sports coupe.

HANDLE EFFORTLESSLY

Revolutionize how you drive with Direct Adaptive Steering^{®1}, the world's first digital steering system. Your impulses are translated into input to make steering smooth, precise and instant. You can even fine-tune it to your liking. Do the same with customizable Dynamic Digital Suspension², which continually adjusts to corners and conditions for a more personal and responsive ride.

TAILORED TO YOU

Step into an interior also performing on a higher level. An integrated headrest and deep bolsters deliver comfort and support. The Q60 I-LINE model lets you outfit them in Monaco Red semi-aniline leather, accented by the interior in lustrous Silver Optic Fiber trim to highlight your individuality.

Q70

INTENSIFY YOUR DRIVE

Unleash your potential no matter which engine you choose. Q70's athletic 3.7-litre V6 engine delivers a stirring 330-hp. Or opt for our most powerful production engine ever, a 5.6-litre V8 that produces a rush of 420-hp with polish and precision.

SENSORY DESIGN

The Q70 captivates you with a graceful form inspired by nature. Flowing like a rising wave, the hood and fenders hint at the raw power beneath. INFINITI designers carefully sculpted each surface to shimmer in light or to capture shadow, giving the Q70 a rare and magnetic presence.

Q70 L

DELIGHT IN ALL ITS DETAILS

Enter an atmosphere of quality: an exceptional space that immediately rewards your senses with uncompromising impressive attention to detail and the finest soft touch materials. Experience further elevation with inviting semi-aniline leather seating¹, distinctive White Ash silver-powdered wood trim¹ and premium soft-touch materials throughout the cabin.

RAISING THE LEVEL OF LUXURY

A long wheelbase enhances the Q70L's impressive side profile. It also works to increase your comfort when you step inside, adding 5.9 inches of legroom in the rear seat. All passengers can recline into luxury, without compromising the expressive exterior design.

ALL-NEW
QX50

TRANSFORMING POWER AND EFFICIENCY

Variable compression ratio technology represents a breakthrough in powertrain development. The QX50, powered by our VC-Turbo engine, is the first production vehicle ever to give drivers an engine that transforms on demand, setting a new benchmark for powertrain capability and refinement. This uncommonly smooth engine offers customers power and performance, as well class-leading fuel economy.

THE JOURNEY WITHIN

Elegant surfaces and driver-focused ergonomics come together to form the well-appointed QX50 interior. Technologies enhance the driving experience while allowing for a calm, connected and cooperative space. The asymmetric layout meets the different needs of both the driver and passengers.

POWER MEETS HUMAN ARTISTRY

The aerodynamically efficient exterior remains faithful to that of the QX50 Concept, bringing a fresh interpretation of INFINITI's distinctive 'Powerful Elegance' design language.

MAXIMIZE YOUR SPACE

Class-leading space, artistic application of quality materials and advanced technologies make the cabin as spacious and comfortable as it is flexible.

TAILORED FINISHES

Advanced human artistry creates a quality, hand-crafted feel in every aspect of QX50's tasteful cabin design – from its open-pore wood accents to the tailored leather stitching.

AWARENESS IS EFFORTLESS

QX50's Head-Up Display¹ projects a semi-transparent readout of key information onto the lower windshield. With important details like speed, navigation and warnings closer to your field of view, it's easier to stay aware without distraction.

QX60

LUXURIOUSLY ADAPTABLE

Crafted as a 7-passenger premium SUV, it elegantly accommodates all of today's possibilities. Tailor a space that adapts to everyone and everything. Command a suite of technologies that amplify your abilities as a driver, enabling you and your passengers to move forward with a new level of ease. Full arms are no barrier to entry with the Motion Activated Liftgate¹⁰ which automatically opens when prompted. No reaching for a button. No fumbling for a key. Just hands-free convenience.

BACK UP WITH CONFIDENCE

Extend your awareness with Backup Collision Intervention⁶, which alerts you to crossing traffic and large stationary objects detected when backing up. The system can even brake before you do to help avoid a collision. On the road, you have the ability to sense beyond what you can see with Blind Spot Warning Intervention², which uses radar sensors to help detect cars in your blind spot when changing lanes.

BALANCED POWER

Control. Power. Tactile response. Whether engaging the power of the V6 or INFINITI's Intelligent All-Wheel Drive system, the QX60's refined driving characteristics are meticulously crafted to achieve maximum output while enhancing your feel for the road.

RESHAPE VERSATILITY

Three rows are impressive. But a second-row seat that lets you tilt and slide without removing a child's seat is liberating¹¹ and exclusive to the QX60. If you're inclined towards more room, the second row can easily move back to welcome taller passengers.

QX80

In the strength of its lines and fearless presence, the QX80 cannot be mistaken nor ignored. It is a grand statement of confidence for 7 or 8 passengers, with distinctive front and rear fascias and powerfully expressive LED headlights featuring an eye-inspired INFINITI signature. Augment the QX80's bold stance with the available 22-inch wheels.

PASS CONFIDENTLY

Performance in the QX80 puts you in command. An impressive 5.6-litre V8 balances 400-hp and 413 lb-ft of torque with modern-day efficiency and up to 8,500 lbs in towing capacity¹⁰. The INFINITI All-Mode 4WD[®] ensures you're ready when the pavement is wet, snowy or not paved at all. For command in curves and smoothness in bumps, the Hydraulic Body Motion Control¹¹ actively adjusts the suspension to counter body lean and bounce.

THE HEIGHT OF LUXURY

Experience a new level of refinement on every journey. The 2019 QX80 LIMITED is the premier expression of our iconic SUV. With exclusive design details and a host of standard driving innovations, this stunning new INFINITI lets you take command at every turn.

ENHANCE YOUR CAPABILITIES

Engineered for luxury without limits, it offers bold ideas for the driven. Indulge up to 8 passengers in expansive comfort and entertainment. Empower yourself with innovation that looks as far forward as you do with technology like Predictive Forward Collision Warning^{1,7} and Intelligent Cruise Control^{1,3}.

REFLECT ON YOUR VISION

The Smart Rear View Mirror¹² means your view need never be compromised by passengers, large cargo or even darkness. The toggle transforms it from a mirror into an LCD screen, displaying the enhanced view from a wide-angle high-resolution camera.

EXPAND YOUR AWARENESS

The QX80 augments your ease by helping watch for and avoid danger on all sides. Drive with innovations such as Blind Spot Intervention^{®1,2}, that can actively help avoid vehicles in your blind spot area, and Predictive Forward Collision Warning^{1,7} that watches two cars ahead to help warn you of danger, sometimes before you even see it.

A MORE POWERFUL DRIVE

The future isn't driverless. It's choosing when to drive. INFINITI empowers you with ProPILOT Assist. This suite of available innovations helps you master traffic, guiding your drive at the touch of a button. It maintains your space from the vehicle ahead, keeping you safely between the lines, without taking over control. Designed to complement your natural abilities, ProPILOT Assist enhances every movement.

HAVE IT ALL

Imagine having superior performance and eco-friendly efficiency on demand in the all-new QX50. The revolutionary new Variable Compression Turbo (VC-Turbo) engine makes it all possible. It automatically transforms to suit your drive, giving you more power when you need it, consuming less fuel when you don't. It's like having two advanced engines in one seamless package.

WORLD'S FIRST

The VC-Turbo is the world's first production-ready variable compression ratio engine.

VARIABLE COMPRESSION RATIO

Using an advanced multi-link system to raise or lower the height of the pistons' stroke, the VC-Turbo engine offers any compression ratio between 8:1 (for power) and 14:1 (for efficiency).

20 YEARS' DEVELOPMENT

INFINITI has worked on its VC-Turbo technology since 1996. The multi-link mechanism, which holds the key to the variable compression ratio, was invented in 1998.

TESTING

INFINITI has tested more than 100 engine prototypes to perfect the technology, with over three million kilometres of road testing and more than 30,000 hours on the test bed.

FUEL EFFICIENCY

INFINITI is targeting up to a 27% improvement in fuel efficiency over similarly-powered V6 gasoline engines.

INFINITI 2.0L VC-TURBO ENGINE

POWER

Development teams are aiming for a 200 kW (272 ps, 268 hp) maximum power output and 390 Nm torque – higher specific power output than many other four-cylinder turbo engines.

TURBO

The VC-Turbo engine uses a wide-range single-scroll turbocharger to provide seamless, instant access to power and torque.

REFINEMENT

The VC-Turbo's multi-link system reduces lateral movement of the connecting rods, creating just 10dB of vibration noise – 20 dB less than a conventional four-cylinder engine.

FORMULA 1 INPUT

The engine development involved the Renault F1® Team, calling on their deep material knowledge and expertise dealing with high RPM.

PACKAGING

The VC-Turbo engine is so smooth, it requires no balance shafts – conventional four-cylinder engines require two. Removing them offsets the space occupied by the multi-link system.

BEYOND HYBRID OR DIESEL

Developing the VC-Turbo™ – the first production-ready engine to vary its compression ratio and seamlessly transform between power and efficiency – was revolutionary. Developing a new generation of electric vehicles (EV) is next. Instantly exhilarating with immediate torque from a standstill, our future models will include EV and newly emerging INFINITI e-Power technology, catapulting performance to a new league. The switch to electric is on by 2021.

Prototype
10

INFINITI LAB

With a commitment to turn ideas into action, the INFINITI LAB is fostering innovation and entrepreneurship around the world. Start-ups are mentored on key components of business success and meet with global thought leaders throughout the program.

Upon completion, each team has the opportunity to pitch their business to potential investors and advance to the global INFINITI LAB Accelerator program. At INFINITI, we empower startups to fuel the future.

BEYOND THE TRACK

Nico Hülkenberg + Daniel Ricciardo

RACECAR DRIVERS, RENAULT F1® TEAM

At 200 mph, Nico and Daniel embrace the future faster than most. Part of the exhilaration is no doubt from the Energy Recovery System (ERS), an innovative hybrid technology that can deliver an extra boost of 160 brake horsepower on demand. INFINITI's extensive history with the Direct Response Hybrid® contributed to the ERS development and powers them to push their potential on the track.

As a Technical Partner of Renault F1® Team, INFINITI brings cutting-edge Performance Hybrid expertise to every race. We also bring something else – a group of young, fresh-thinking and diverse engineers from around the world, who have a passion to upend settled beliefs. This entrepreneurial culture flows through everything we do. Ask drivers Nico Hülkenberg and Daniel Ricciardo or INFINITI Engineering Academy Canada winner Chase Pelletier. Each will put everything on the line to win. And in the process, drive each other to victory.

• **Chase Pelletier**

2018 ENGINEERING ACADEMY WINNER, CANADA

To ignite the world's best, the INFINITI Engineering Academy searches for ambitious young engineers ready to accelerate their careers. The competition is fierce: Thousands of applicants. Seven countries. One winner each. Chase will spend six months at the INFINITI Technical Centre Europe and then six more with the Renault F1® team. Breakthrough thinking has no borders.

This brochure is intended for general descriptive and informational purposes only. It is subject to change and does not constitute an offer, representation or warranty (express or implied) by INFINITI a Division of Nissan Canada, Inc. Interested parties should confirm the accuracy of any information in this brochure as it relates to a vehicle directly with INFINITI a Division of Nissan Canada, Inc., before relying on it to make a purchase decision. INFINITI a Division of Nissan Canada, Inc., reserves the right to make changes, at any time, without prior notice, in prices, colours, materials, equipment, specifications, and models and to discontinue models or equipment. Due to continuous product development and other pre- and post-production factors, actual vehicle, materials and specifications may vary from this brochure. Some vehicles shown with optional equipment. See the actual vehicle for complete accuracy. Availability and delivery times for particular models or equipment may vary. For additional information on availability, options or accessories, see your INFINITI Retailer or contact INFINITI a Division of Nissan Canada, Inc.

1. Available on select models. 2. Blind Spot Warning and Blind Spot Intervention Systems are not a substitute for proper lane change procedures. The systems will not prevent contact with other vehicles or accidents. They may not detect every vehicle or object around you. 3. Intelligent Cruise Control is not a collision avoidance or warning device. Designed to use limited braking. Failure to apply the brakes could result in an accident. 4. Around View Monitor with Moving Object Detection cannot completely eliminate blind spots and may not detect every object. Moving Object Detection operates at vehicle speeds below 8 km/h. Always check surroundings and turn to look behind you before moving vehicle. 5. The Sonar System is a convenience, not a substitute for proper parking and/or backing procedures. Always check that it is safe to do so before moving vehicle. May not detect every object. 6. Backup Collision Intervention will not detect every object, and speed limitations apply. Always check surroundings and turn to look behind you before moving vehicle. See Owner's Manual for details. 7. Predictive Forward Collision Warning is intended to warn you before a collision occurs; it cannot prevent a collision. Speed and other limitations apply. See Owner's Manual for details. 8. Active Lane Control cannot prevent accidents or loss of control. It is the driver's responsibility to be in control of the vehicle at all times. Active Lane Control may not detect the lane markers in certain road, weather or driving conditions. 9. Lane Departure Warning and Lane Departure Prevention Systems operate only when the lane markings are clearly visible. Speed and other limitations apply. See Owner's Manual for details. 10. Cargo and load capacity limited by weight and distribution. Always secure all cargo. Heavy loading of the vehicle with cargo, especially on the roof, will affect the handling and stability of the vehicle. 11. Slide-forward function should not be performed with the CRS occupied. 12. Smart Rear View Mirror may not detect every object and does not eliminate blind spots or warn of moving objects. See Owner's Manual for safety information.
